FHEFSSA requires the GSEs to submit an Annual Housing Activities Report (AHAR) to Congress and the Secretary. Under FHEFSSA, the AHAR must, among other things, describe actions that the GSE has undertaken during the preceding year or is planning to undertake to: promote and expand its attainment of its statutory purposes; standardize credit terms and underwriting guidelines for multifamily housing and securitize multifamily housing mortgages; and promote and expand opportunities for first-time home buyers. FHEFSSA also requires that, for the AHAR, the GSEs assess underwriting standards and other business practices and procedures that affect the purchase of mortgages for low- and moderate-income families or that may yield disparate results. The AHAR also must include annual compilations of year-to-date mortgage data (but not loan-level data) and any other information that the Secretary considers necessary for the report and requests in writing.

Fannie Mae objected to the requirement that the AHAR provide information on the extent to which the mortgages purchased "have been used in conjunction with public subsidy programs." Fannie Mae argued that it was only required to report on subsidy programs "under Federal law" and that the proposed "public subsidy" requirement was too broad, administratively burdensome, time-consuming, and unreliable, because lenders frequently do not report the presence of State/local subsidy programs.

While the Charter Act amendments do specifically require the GSEs to provide information on the extent to which mortgage purchases have been used in conjunction with public subsidy programs under Federal law, the Secretary may require information concerning the presence of non-Federal subsidies under FHEFSSA's authorization to the Secretary to "request other information [for the AHAR] that the Secretary considers appropriate." Nevertheless, HUD has decided to remove this requirement because information on public subsidies is frequently unavailable and often inaccurate, and generally cannot be obtained in sufficient detail to be useful.

The proposed rule would have required each GSE to provide an AHAR within 60 days after the end of each calendar year. Fannie Mae asked that this period be extended to 90 days. Since FHEFSSA requires that the Secretary report to Congress by June 30 of each year on the activities of each GSE, the GSEs' AHARs are needed substantially prior to that date in order to allow sufficient time for HUD to develop the Secretary's report. In an attempt to address the needs of the GSEs and HUD, the final rule provides that AHARs will be due 75 days after the end of the calendar year. The first AHAR required under this rule will be the report covering calendar year 1996 (due in 1997).

Periodic Reports, Section 81.64

Fannie Mae objected to the requirement in § 81.64 of the proposed rule that all releases of information disclosed to entities outside the GSE be submitted to HUD. Fannie Mae argued that the requirement: was excessive, expensive, and of no practical use to HUD; violated the principles of Executive Order 12866; and could compromise the GSE's competitive position and the need for confidentiality. Fannie Mae suggested that the requirement be removed from the regulation or modified to specify that the GSEs need provide to HUD only "significant announcements" and could provide those simultaneously with public announcement.

While the burden of compliance with § 81.64 has been exaggerated, no necessity exists for transmittal of

[64] Sections 307(e)(1)(E) of the Freddie Mac Act and 309(m)(1) of the Fannie Mae Charter Act.

[65] The House Bill, H.R. 2900, 102d Cong., 1st Sess., did require "annual" reporting in the HMDA manner. However, sections 121(l) and 122(k) of that bill were changed substantially before the law was enacted.

[66] The Senate Report expressed Congressional intent that the Secretary should be more aggressive in monitoring the GSEs' activities. *See* S. Rep. at 33.

[67] S. Rep. at 38–39.

insignificant data. For this reason, HUD has revised § 81.64 to create a self-policing mechanism. The specific categories of information listed in the section—*i.e.*, Housing Advisory Council material, press releases, investor reports, proxy statements, and seller-servicer guides—must all be provided to the Secretary. For all other information released to entities outside the GSE, if the GSE determines that such information is relevant to the Secretary's regulatory responsibilities under FHEFSSA or its Charter Act, the GSE must provide the information to the Secretary. At the same time, the Secretary continues to have the authority to request information on an as-needed basis.

Other Information and Analyses, Section 81.65

Freddie Mac opposed § 81.65 of the proposed rule, which stated that "GSEs shall furnish to the Secretary the data underlying the reports required under this subpart." Freddie Mac called such "open-ended" requirements burdensome, costly, and not reasonably related to the Secretary's mission. Freddie Mac said that any additional reports the Secretary may wish to require must be related to Charter Act activities of the GSEs. Fannie Mae also objected to this requirement and suggested that "underlying data" should instead be requested by HUD on a case-by-case and "as-needed" basis.

The Secretary's broad authority to require reports under section 1327 of FHEFSSA encompasses the authority to require additional analyses and reports that the Secretary considers "appropriate." However, requirements in the proposed rule for the GSEs to submit "underlying data" were not intended to require that the GSEs submit a massive quantity of data as a matter of course in support of each report. In fact, underlying data will only be sought by the Secretary on a case-by-case basis. Therefore, any required submission of underlying data will be the subject of a specific request from the Secretary to one or both GSEs and will be based on an actual need for supporting data in order to fulfill the Secretary's responsibilities. The final rule has been clarified to this effect.

Other Reporting Issues

Published simultaneously with this final rule is an Appendix E which is a list entitled "Required Loan-level Data Elements" which details the reporting formats and the loan-level data elements required to be collected and compiled by each GSE on each single-family and multifamily mortgage purchased. The Secretary may revise the list of loan-level data by notice to the GSEs. Fannie Mae, referencing the proposed rule's loan-level data listings, objected to submitting the following data elements, identified by their numerical listing in the Appendix to the proposed rule:

- For single-family mortgage purchases—Number 24, Refinancing Loan from Own Portfolio; Number 31, Lender Institution; Number 38, Public Subsidy Program; Numbers 45 and 46, Family size of borrower (and co-borrower); and Numbers 54 and 55, Low- and Moderate-Income Goal flag and Special Affordable Housing Goal flag; and
- For multifamily mortgage purchases—Number 26, Lender institution; Number 36, Low and Moderate-Income Goal flag; and Number 37, Special Affordable Housing Goal flag.

Fannie Mae's objections to these data elements were based, variously, on relevancy, unavailability of the data in existing information databases, unreliability of data furnished by lenders, and availability of the data to HUD by other means. In addition, Fannie Mae commented that the furnishing of "lender institution" data would violate confidentiality between Fannie Mae and its lenders.

Data Element Number 24, Refinancing Loan from Own Portfolio, is not required in the final rule, because these data were required under the interim notices for technical monitoring purposes that no longer apply.

Data Elements Number 31 (Single-family) and Number 26 (Multifamily), designating Lender Institution (Element Number 27 in Appendix E of this final rule), are important elements for the monitoring of GSE reporting. The name of the lender institution will facilitate the Secretary's verification of loans reported as being sold to the GSEs. Since these data are already reported by lenders under HMDA, disclosing the lender institution would not violate confidentiality between the GSEs and their lenders.

Data Element Number 38, Public Subsidy Program data (for single-family properties), have not been reported by Fannie Mae because it asserts that the data are of such poor quality that the data are not meaningful. Freddie Mac has reported public subsidy data to HUD, but Freddie Mac's data indicates that public subsidies are involved in less than one-quarter of one percent of its single-family mortgage purchases. Given the available data, this data element has been deleted from the list of required data elements.

Data Elements Numbers 45 and 46, Family size of borrower (and co-borrower), are not currently collected by the GSEs, and the final rule does not require the GSEs to collect these data at this time. However, because family size is an important element for determining the affordability of units, the Secretary reserves the right to collect these data at a later date.

Data Elements Numbers 54 and 55 (Single-family) and Numbers 36 and 37 (Multifamily), Low- and Moderate-Income Goal flag and Special Affordable Housing Goal flag, are not required fields under the final rule. The Secretary has determined that this information can be derived from other data elements.

Although HAC commented that the Secretary should use census tracts/BNAs instead of counties, in the definition of rural areas, HAC also commented that, if a county-based definition is used, the Secretary should insist that the GSEs at least report their progress under the Geographically Targeted Goal by census tract/BNA, "so that HUD can determine the extent to which the GSEs are meeting the goal in purchasing mortgages in 'served' portions of counties." Accordingly, although the Secretary has changed the definition of rural areas from a census tract to a county basis (as discussed above), the final rule (at Data Element Number 7) requires the BNA locations for mortgage purchases, to facilitate research and analyses of GSE purchases in non-metropolitan areas. Since 1993, the GSEs have been reporting to HUD BNA locations of mortgages located in non-metropolitan areas.

Subpart F—Access to Information

FHEFSSA requires the Secretary to establish a public-use database and release to the public certain categories of information submitted by the GSEs concerning their mortgage purchases. The statute also requires protection of proprietary information the GSEs submit to the Secretary.

FHEFSSA requires a public-use database so that the public will have access to data and information on the GSEs' performance toward meeting the Charter Act purposes of providing mortgage credit to the broadest range of families throughout the nation. Congress indicated its intent that the GSE public-use database supplement HMDA data.[68] In complying with the public-use database requirements, HUD will make publicly available maximum nonproprietary mortgage purchase data and information to the widest range of

[68] *See, e.g.*, S. Rep. at 39.

housing groups, State and local governmental entities, academicians, and other persons and entities, so that, for example, these entities may monitor the efforts of the GSEs toward meeting their Charter Act purposes.

"Balancing" Test

The preamble to the proposed rule stated that, in making as much data as possible available, the Secretary would engage in "balancing the proprietary concerns of the GSEs." Freddie Mac commented, however, that Congress did not intend the Secretary to balance the public interest to determine whether information was proprietary; rather Congress encouraged the Secretary to "be creative in finding ways to release certain types of information—without revealing proprietary information."

Neither the preamble nor the final rule incorporates a balancing test for determining whether information is proprietary. While the legislative history of FHEFSSA does discuss "balanc[ing] the sometimes competing interests of the enterprises against the public's interest in access to information," it also provides that HUD should "whenever possible develop disclosure and access methods that take into account any proprietary concerns, while continuing public access to information."[69] Therefore, the Secretary has determined that the public interest in knowing about the GSEs' activities must be addressed through the careful and considered design of a public-use database that makes maximum appropriate data and information available to the public in creative ways—including aggregating—while protecting proprietary information.

Definition of "Proprietary Information"

Section 1326 of FHEFSSA authorizes the Secretary to provide, by regulation or order, that certain information shall be treated as "proprietary information" and not subject to disclosure to the public either (1) in the public-use database established pursuant to section 1323 (which consists of mortgage data submitted by the GSEs under section 309(m) of the Fannie Mae Charter Act and section 307(e) of the Freddie Mac Act); or (2) through public dissemination of the AHARs of the GSEs (which the GSEs submit to the Secretary and Congress pursuant to sections 309(n)(3) of the Fannie Mae Charter Act and 307(f)(3) of the Freddie Mac Act). Section 81.2 of the proposed rule defined the term "proprietary information" as "all categories of information and data submitted to the Secretary by a GSE that contain trade secrets or privileged or confidential, commercial or financial information that, if released, would cause the GSE substantial competitive harm."

Consistent with the statutory language of section 1326 of FHEFSSA and in light of the comments by the GSEs, the final rule clarifies that the designation "proprietary information" for purposes of this rule applies only to mortgage data (that the GSEs submit to the Secretary under sections 309(m) of the Fannie Mae Charter Act and 307(e) of the Freddie Mac Act), and AHAR information (that the GSEs submit to the Secretary under sections 309(n) of the Fannie Mae Charter Act and 307(f) of the Freddie Mac Act), since other types of information are not candidates for inclusion in the public-use data base. However, as discussed more fully below, where a GSE seeks to protect from disclosure confidential business information that is not mortgage data that the GSE submits to the Secretary under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act, and is not information that the GSE submits to the Secretary in the AHARs under section 309(n) of the Fannie Mae Charter Act or section 307(f) of the Freddie Mac Act, the GSE may seek protection of such confidential business information under HUD regulations at 24 CFR Part 15. This final rule clarifies and supplements Part 15 with respect to GSE information. FHEFSSA's specific designation of data and information as "proprietary information" is designed to distinguish that mortgage data and AHAR information that is to be included in the public-use database and disseminated to the public and data that may be withheld. It is not to be confused with the function that the designation of information as "confidential business information" serves under Part 15. (That term distinguishes business information, as defined in 24 CFR 15.54, which a submitter may seek to have withheld from public disclosure under the Freedom of Information Act (FOIA)[70], from other information.)

The issue of the scope of mortgage data that should be treated as "proprietary" and withheld from public disclosure drew only limited comment. Only ten of the 163 public comments treated the issue in any level of detail.

Both GSEs commented extensively on this subpart of the rule, recommending protections against the release of certain identified data elements the GSEs considered proprietary. Six of the other ten commenters (including MBA and NAHB) supported the GSEs' position favoring strong controls on release of proprietary information. In contrast, the American Civil Liberties Union Foundation (ACLU), in comments filed on behalf of ACLU, the NAACP Legal Defense and Educational Fund, Inc., the Puerto Rican Legal Defense and Education Fund, and the National Council of La Raza, favored strict limitations on treating information provided by the GSEs under FHEFSSA as proprietary.

The Prospect of Competitive Harm

While Freddie Mac indicated that the definition of proprietary information in the proposed rule was "generally consistent" with definitions of the term in similar contexts, Freddie Mac proposed several additions to the scope of the definition. Freddie Mac, citing FHEFSSA's legislative history, contended that it was the intention of Congress that the Secretary withhold data if it "would be likely to cause the GSE substantial competitive or financial harm, or substantial harm to the GSE's ability to fulfill its statutory purposes." In suggesting that the term "financial harm" be added, Freddie Mac criticized the use of the term "competitive harm" by itself as too narrow. In suggesting that the ability to fulfill statutory purposes be added, Freddie Mac argued that because the GSEs have "express public purposes," it is not merely competitive harm that must be averted, but also the possibility that disclosure of data could "frustrate the GSEs' ability to fulfill their statutory purposes, by decreasing the liquidity of the secondary mortgage market and [thus] decreasing market stability."

Fannie Mae pointed out that it had asked for proprietary protection for only 23 of 80 database elements. Fannie Mae, in supplementary comments dated July 24, 1995, urged the adoption of the revisions to the definition of "proprietary information" indicated in Freddie Mac's comments.

The final rule adopts the GSEs' comment that the definition include a "likely to cause competitive harm" standard. HUD finds this formulation to be consistent with the body of case law interpreting Exemption 4 of FOIA,[71] which focuses on likely competitive harm,[72] as well as related regulations of other Federal financial regulators governing the confidentiality of business information.[73]

[69] S. Rep. at 44.

[70] 5 U.S.C. 552.

[71] 5 U.S.C. 552(b)(4); 24 CFR 15.21(a)(4).

[72] *See Critical Mass Energy Project v. NRC*, 975 F.2d 871 (D.C. Cir. 1992), *cert. denied*, 113 S. Ct. 1579 (1993).

[73] *See, e.g.*, 40 CFR 2.208(e)(1); 19 CFR 201.6(a).

Exemption 4 of FOIA authorizes the withholding of "trade secrets and commercial or financial information obtained from a person and privileged or confidential." Accordingly, the exemption covers material that is substantively very similar to the information protected as proprietary under FHEFSSA. Because the case law interpreting the FOIA exemption is well-developed and FHEFSSA does not define the term "proprietary," HUD has chosen to formulate a definition that largely tracks interpretations of the FOIA exemption, so that interpretation of the term as it applies to mortgage data and AHAR information under FHEFSSA may draw upon the body of FOIA law.

It is not necessary to add a specific reference to "financial" harm to the definition of "proprietary information." The exclusion of this term from the definition keeps the definition more consistent with FOIA provisions respecting confidential business information and related law. Section 81.74(b)(1) of the rule provides that the Secretary will consider information on adverse financial consequences that would result from disclosure, in determining what information is proprietary. In general, "financial" harm will also involve "competitive" harm. Even where the disclosure of information would not harm one GSE relative to the other, the disclosure may nonetheless cause competitive harm, because the GSEs also compete with other private-sector firms, as well as individuals seeking an advantage with respect to the GSEs. The definition, as modified, will protect against financial harm by protecting the GSEs against substantial competitive harm.

It is not necessary to expand the definition to refer specifically to the GSE's ability to fulfill statutory purposes. Again, exclusion of this terminology avoids inconsistency with FOIA and similar definitions. The final rule allows the GSEs to advance arguments, for the Secretary's consideration, regarding any effect that disclosure would have on the GSEs' ability to fulfill statutory purposes.

Plain Meaning

In its original comments—prior to its July 24, 1995, letter endorsing much of Freddie Mac's approach to the definition of "proprietary"—Fannie Mae's comments on the definition of "proprietary information" focused on an assertion that the term "proprietary" has a settled "plain" meaning which should be incorporated into the rule, i.e., the entire range of business information that a GSE holds closely as an owner of private property. Fannie Mae supported its claim based on the definition in *Webster's* dictionary.

Supreme Court precedent, however, reveals that the established approach under case law is more complicated. The mere fact that a statutory term is defined in a dictionary does not establish the term's plain meaning or deny the agency charged with administration of the statute the authority to provide a reasonable interpretation.[74]

The term "proprietary" has several alternative dictionary definitions, depending on the dictionary consulted. Aside from the fact that the designation as "proprietary information" for purposes of FHEFSSA only applies to mortgage data and AHAR information, HUD's definition, as revised in this final rule, is similar to the definition Congress has ascribed to the term in other legislation, including statutes enacted just days before FHEFSSA's October 28, 1992, enactment date.[75] In addition, HUD's definition is generally consistent with the definitions of other Federal administrative agencies.[76]

The definition that Fannie Mae advanced is not legally supported and is too broad. If any information obtained and held by a person by virtue of being an owner of property qualifies as proprietary, all such information submitted to HUD would have to be withheld from disclosure. Such a definition would effectively undermine the Secretary's ability to release nonproprietary information; it would allow the GSEs to force proprietary treatment of any information by merely labeling it as such. Such a definition would also improperly apply the specific designation "proprietary information" under FHEFSSA to materials other than mortgage data and AHAR information.

Other Comments on Definition

Freddie Mac also asked that § 81.73 be augmented to provide that HUD take into account the extent to which particular information, when taken together with other information, could reveal proprietary information. This final rule has been modified to specify that this is one of the additional facts that the Secretary will consider.[77]

Public-use Database

Consistent with section 1323(a) of FHEFSSA, this final rule establishes a public-use database of mortgage data concerning the characteristics of individual mortgage purchases of the GSEs, including census tract, location, race, and gender of mortgagors.

In accordance with FHEFSSA, this final rule provides that the Secretary may not, by regulation or order, make available to the public information that the Secretary determines is proprietary information. The Secretary, however, may not restrict access to the income, census tract location, race, and gender data of single-family properties. When the Secretary grants a GSE's request for proprietary treatment of mortgage data, the Secretary will issue an order or promulgate a regulation providing that the mortgage data is proprietary and shall not be included in the public-use database.

In addition to mortgage data, the Secretary will make publicly available in the public-use database information in the GSEs' AHARs, which are submitted to the Secretary and Congress, and comprise a detailed picture of the GSEs' activities. Proprietary information in the AHARs may be withheld from the public if the GSE requests, and the Secretary agrees with, designation of the information as proprietary information, pursuant to a regulation or order.

On June 7, 1994, the Secretary published a Temporary Order[78] protecting GSE data and information deemed to be proprietary, pending public comment and further review. Published simultaneously with this final rule and adopted by the Secretary through this rule, is an Appendix 7 containing an Order entitled "GSE Mortgage Data and AHAR Information: Proprietary Information/Public-use Data" which Appendix F of this final rule contains the most current listing of data and information deemed proprietary by the Secretary and supersedes the Temporary Order. The Secretary may revise this list by regulation or order.

The public-use database also will not include information the release of which would invade personal privacy,[79]

[78] 59 FR 29514.

[79] A bank commented that it was concerned about "right to privacy issues" regarding communication between HUD and the GSEs: "We hope that rights of individual borrowers are not compromised due to creative interpretations of the laws and regulations for the sake of political expediency."

The Privacy Act of 1974, 5 U.S.C. 552a, and FOIA exemption 6, 5 U.S.C. 552(b)(6), pertain to the disclosure of information on individuals. HUD may

Continued

or information required to be withheld under the Trade Secrets Act.[80]

Availability of "Public Data"

Section 81.2 of the rule revises the proposed rule's definition of "public data" to clarify that it only includes mortgage data submitted to the Secretary by the GSEs (under section 309(m) of the Fannie Mae Charter Act or 307(e) of the Freddie Mac Act) relating to the GSEs' mortgage purchases, and AHAR information (submitted to the Secretary by the GSEs under sections 309(n) of the Fannie Mae Charter Act or 307(f) of the Freddie Mac Act), to the extent that the Secretary determines such mortgage data or AHAR information is not proprietary and should be made publicly available. Freddie Mac was concerned that the definition in the proposed rule could be misconstrued to require HUD to disclose all nonproprietary mortgage data submitted to HUD, including data submitted for reasons unrelated to the rule's reporting requirement in § 81.62. Similarly, Fannie Mae had recommended that the definition be revised to limit its scope.

Under section 1323 of FHEFSSA, HUD has authority to include in the public-use database mortgage data required under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act. In addition, HUD will make publicly available the information in the GSEs' AHARs, except for information the Secretary determines to be proprietary.[81]

HUD's public-use database will only include mortgage data submitted by the GSEs under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act and information in the GSEs' AHARs, except for information the Secretary determines to be proprietary, and only where the Secretary determines that it "should be made publicly available." Since other information or data that the GSEs may submit pursuant to subpart E would not fit the definitions of "mortgage data" or "public data" used in the rule, that information or data will not be included in the public-use database.

Timing of Disclosure

In its comments on the proposed rule, Fannie Mae addressed public comments on the June 7, 1994, Temporary Order. Fannie Mae regarded as unpersuasive arguments that competitive harm to the GSEs would not occur because data would be outdated when finally released publicly. Fannie Mae commented that, for single-family products, a time lag of less than 12 months would be insufficient to allow adequate recovery of investment. In the case of multifamily products, Fannie Mae claimed that even the passage of 2 years would be insufficient protection, because competitive harm is caused by affording competitors crucial information allowing them to "pick the loans off at liquidation, thereby eroding our market share and investment return on the market research and development that preceded our booking the loan initially."

NAHB strongly supported the creation of a public-use database, but suggested compromise on the question of release of proprietary information. To address the GSEs' concerns regarding confidentiality of data, NAHB suggested that the Secretary grant requests for proprietary treatment for a specified time period, such as two years.

In analyzing whether information is proprietary, the Secretary will, when appropriate, consider the effect of the passage of time in determining if the release of information would likely cause substantial competitive harm.

Requests for Proprietary Treatment

The regulation establishes procedures for the GSEs to request proprietary treatment of mortgage data and AHAR information submitted to the Secretary and clarifies and supplements HUD regulations at 24 CFR Part 15 as they apply to GSE requests for confidential treatment of other business information. When a GSE submits information to the Secretary, the GSE shall designate what part of the information the GSE deems to be mortgage data or AHAR information that is "proprietary information" under FHEFSSA or other types of confidential business information for purposes of FOIA. Depending on the type of information submitted, HUD either will process the request in accordance with the procedures in §§ 81.73–81.75, or upon a FOIA request, in accordance with the procedures in 24 CFR Part 15 as clarified and supplemented in this subpart.

Section 81.73(d) of this final rule makes clear that while any request for proprietary treatment is pending, none of the information that is the subject of the request will be disclosed. Part 15 contains a similar protection, which applies to GSE submissions designated as confidential. HUD will not release material marked confidential except in accordance with Part 15 and this final rule.

Fannie Mae objected to the requirement in § 81.73 of the proposed rule that the GSE submit a certification and justification for the Secretary to designate mortgage data or information as "proprietary information" under FHEFSSA.

In response to Fannie Mae's comment, HUD has greatly streamlined the regulation. First, under § 81.73, it is now optional for the GSE to submit a statement explaining the bases for the GSE's assertion that mortgage data or AHAR information is proprietary. In instances in which HUD has not previously issued an order or regulation determining the data or information to be proprietary, HUD urges the GSEs to provide such a supporting statement and address in the statement the factors that the Secretary will consider in making determinations of whether data or information is proprietary. Conclusory statements that particular data or information would aid competitors or would impair business dealings, or similar statements, will not provide the kind of views that will be useful to the Secretary.

Second, the final rule eases the requirements by providing that where there is an existing regulation or order designating mortgage data or AHAR information as proprietary, it is sufficient for the GSE to stamp the information as proprietary and reference the order or regulation. When a GSE supports a request for proprietary treatment by citing an existing order or regulation, HUD will determine whether the data or information comes within the order or regulation. If the data or information is proprietary under such order or regulation, it will not be disclosed except in accordance with other provisions in this subpart, *e.g.*, Congressional requests.

The factors the Secretary will apply in making a determination in response to a request for proprietary treatment are identified in § 81.74. The factors in § 81.74(b) will be applied where the request for proprietary treatment pertains to data submitted by the GSEs in the reports required under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act, or AHAR information for which there is no order or regulation covering the materials for which proprietary treatment is requested.

When the Secretary accords proprietary treatment to mortgage data or AHAR information, the rule establishes procedures for the Secretary to issue a temporary order, an order, or a regulation to withhold proprietary information and to inform the public of the withholding. If the Secretary does not determine such mortgage data or AHAR information to be proprietary information, the Secretary will provide the GSE with an opportunity for a meeting on the matter, during which the GSE may provide comments and additional views. After the meeting, the Secretary will determine, in writing, which data or information is proprietary and will notify the GSE 10 working days before the data or information is made available to the public. The rule is now more consistent with HUD FOIA regulations regarding protections for confidential business information in general.[82]

FOIA Requests

Information on the GSEs may be requested by the public pursuant to FOIA. Subpart F of this rule clarifies and supplements HUD's FOIA regulations[83] with respect to information submitted by the GSEs.

FOIA provides that several classes of records are exempt from mandatory disclosure. A memorandum dated October 4, 1993, from the President to Heads of Departments and Agencies, emphasizes the importance of public disclosures under FOIA. The implementing memorandum from the Attorney General, attached to the President's memorandum, instructed agencies to disclose information unless disclosure would harm an interest protected by a FOIA exemption.

Additional Safeguards for Proprietary and Confidential Information

FOIA Exemption 8 protects from mandatory disclosure information "contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of the Department in connection with its responsibility for the regulation or supervision of financial institutions."[84] Section 1319F of FHEFSSA specifically provides that HUD is an agency responsible for the regulation and supervision of financial institutions for purposes of this exemption. Accordingly, where appropriate, the Secretary may invoke this exemption to withhold GSE information.

To address comments of Fannie Mae requesting additional safeguards for the protection of information, the rule also has been revised to clarify that while HUD may make information available for the confidential use of other government agencies in their official duties or functions, all such information remains the property of HUD, and unauthorized use or disclosure of information may be subject to the penalties provided in 18 U.S.C. 641.

FOIA Exemption 4 covers "trade secrets and commercial or financial information obtained from a person and privileged or confidential."[85] When appropriate, the Secretary may invoke this exemption to withhold GSE information in response to a FOIA request. In addition, the Trade Secrets Act forbids Government officers and employees from releasing trade secrets and other confidential business information. HUD will not disclose information in violation of the Trade Secrets Act, notwithstanding the indication in 24 CFR 15.21 that a requested record will not be withheld under FOIA unless it both comes within one of the FOIA exemptions and there is need in the public interest to withhold the record.

Fannie Mae commented that the Secretary should review the rules of the financial institution regulators governing the confidentiality of materials, and should incorporate the same protections for proprietary information. Fannie Mae commented that OFHEO was adopting its own confidentiality rules to parallel financial institution regulators' protections, and HUD and OFHEO should assure that all submitted materials receive "consistent protection."

On March 3, 1995, HUD promulgated new amendments to its FOIA regulations that incorporate explicit protections for business information in accordance with Executive Order 12600.[86] Part 15 regulations are fully applicable to GSE data and information provided to HUD. Indeed, Part 15 applies to a broader range of information that the GSEs submit to HUD, since they are not limited in applicability to mortgage data that the GSEs submit under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act and AHAR information the GSEs submit under section 309(n) of the Fannie Mae Charter Act or section 307(f) of the Freddie Mac Act. HUD has carefully reviewed the safeguards afforded by these new FOIA regulation amendments and this subpart and has concluded that many of the concerns raised by Fannie Mae regarding the protection of proprietary information were previously addressed through those amendments.

As indicated in the preamble to the revised FOIA rules, "[t]he amendment consolidates the FOIA process under the supervision of a designated officer, which assures more consistent and prompt response to FOIA requests." Centralized control also serves to protect against erroneous disclosure. The FOIA amendments state that, except as otherwise provided, HUD officers and employees are prohibited from disclosing business information, except to other HUD officers or employees who are properly entitled to such information for the performance of their official duties.[87] This provision is similar to that of other financial regulators.[88]

In response to another Fannie Mae comment about disclosures by HUD's agents, HUD notes that its amended FOIA rules prohibit HUD officers and employees from directly or indirectly using or allowing the use of business information obtained through or in connection with Government employment that has not been made available to the general public.[89] Also, § 81.76(e) of this final rule includes safeguards against disclosure of GSE data and information by contractors. The FOIA regulations also provide other safeguards consistent with Executive Order 12600, which Fannie Mae commented should be included in HUD's regulations.[90]

When a GSE desires that HUD accord confidential treatment to information other than the mortgage data submitted by the GSEs in the reports required under section 309(m) of the Fannie Mae Charter Act or section 307(e) of the Freddie Mac Act, and other than AHAR information, the GSE should follow the procedures for protection from disclosure of such information in 24 CFR Part 15, as clarified and supplemented by this subpart.

Release of Information to Congress, Comptroller General, or Pursuant to Legal Process

Paragraph 81.76(d) of the proposed rule stipulated that the Secretary would provide information requested by Congress, the Comptroller General, or pursuant to subpoena or other legal process "without regard to the provisions of this section." Both GSEs

---

withhold information from the public pursuant to the Privacy Act or FOIA Exemption 6.

[80] 18 U.S.C. 1905.

[81] The GSEs are required by sections 309(n)(3)(B) and 307(f)(3)(B) their Charter Acts to make available publicly reports they provide to HUD pursuant to sections 309(n) and 307(f) of the Charter Acts, unless HUD has determined such information to be proprietary under section 1326 of FHEFSSA. HUD will facilitate this requirement by providing public access to this information.

objected to this provision, and were supported by the MBA. Freddie Mac commented that the Secretary has a fiduciary duty to maintain the confidentiality of GSE proprietary information and that duty would be breached by proposed § 81.76(d) to the extent the provision allowed disclosure without any exercise of judgment on the part of the Secretary. Furthermore, Freddie Mac argued that materials disclosed based on a subpoena should be safeguarded to the extent possible against further disclosure to third parties. Freddie Mac asked for provisions, similar to those found in existing HUD regulations,[91] to the effect that the Secretary and his or her counsel would determine whether to honor particular subpoenas or requests. Fannie Mae asserted that HUD's "unconditional commitment" to provide congressional access to all committees and subcommittees "totally conflicts with practices observed by other financial institution regulators."

The intention of the proposed rule was not that HUD would provide GSE data or information to Congress without any appropriate safeguards; rather, that nothing in this subpart of the rule should be construed to grant authority to the Secretary to withhold information from or to prohibit the disclosure of information to Congress, the Comptroller General, a court of competent jurisdiction pursuant to a subpoena, or where otherwise required by law. HUD safeguards for handling such requests would still apply. Accordingly, § 81.77 of the final rule provides that "nothing in this subpart F may be construed to grant authority to the Secretary under FHEFSSA to withhold any information from or to prohibit the disclosure of any information" to Congress, the Comptroller General, or pursuant to a subpoena or legal process. This formulation is in keeping with the practice of other agencies.[92] HUD notes that Congress, the Comptroller General, and the courts all have procedures to safeguard proprietary and confidential information.[93]

This final rule specifies that HUD—in providing data or information in response to requests from Congress, the Comptroller General, and the courts—will, where applicable, include a statement to the effect that the GSE regards the data or information as proprietary or confidential, public disclosure of the information may cause competitive harm to the GSE, and the Secretary has determined that the information is proprietary or confidential. In addition, the rule provides that, to the extent practicable, HUD will provide notice to the GSEs after such a request for proprietary or confidential information is received and before HUD provides information in response to the request.

The revised rule makes clear that HUD's discretion to take additional steps to protect GSE data or information in appropriate circumstances is not precluded. These steps could include, for example, seeking on a GSE's behalf, or supporting a GSE motion for, a protective order when a court subpoenas HUD to produce GSE data or information.

Section 81.77 also clarifies the scope of requests that are to be considered official requests from Congress. This change responds to a specific GSE comment that the request must be from a committee with appropriate jurisdiction, to conform more closely to FOIA procedures and similar authorities. The rule has also been modified to conform language concerning HUD disclosures to the Comptroller General to the language in other HUD regulations.[94]

Furthermore, in response to a comment by Fannie Mae, § 81.77(c) of the final rule now makes clear that safeguards under HUD regulations at 24 CFR 15.71–15.74 apply. These provisions govern the production of documents or testimony when a subpoena, order, or other demand of a court or other authority is issued. The rule extends these protections to situations in which demands are made on non-HUD employees (including contractor employees) who have custody of exempt records, and is modeled after regulations of other financial regulators.[95] The Secretary notes that a recent decision [96], may limit the ability to withhold information pursuant to such a regulation and that case law on this issue is evolving. In response to Fannie Mae's comment that OFHEO and HUD should adopt consistent procedures on this point, the Secretary notes that OFHEO is in the process of promulgating rules applicable to OFHEO employees.[97]

Pro-Disclosure Comments

Comments received from the ACLU, which dealt exclusively with proprietary information issues, advocated more expansive disclosure of GSE data. The ACLU argued that only information elements that both GSEs considered proprietary should even be considered for designation as proprietary. The ACLU commented that, even then, proprietary treatment frequently should be declined in an exercise of the Secretary's discretion. The ACLU asserted the public-interest purposes of the Fair Housing Act, ECOA, and FHEFSSA, and stated:

> Given these factors, we believe that Fannie Mae and Freddie Mac cannot be considered similar to purely private, profit-making enterprises. The true measure of the effectiveness of the GSEs is not their maximization of profit, but their compliance with mandates established by the Congress and the Secretary. "Proprietary" for the GSEs should not mean "will harm competition" but rather "will harm the ability to carry out governmental mandates. * * *"

The ACLU favored a presumption that information is not proprietary and suggested a standard for determining whether information is proprietary. Under the ACLU formulation, the burden would be on the GSEs to establish the need for nondisclosure. To meet this burden, the GSEs would have to establish that disclosure would frustrate the goals set by the statute or the Secretary, not "merely" that disclosure would hurt the GSEs' competitive positions.

HUD, however, must recognize congressional intent, as expressed through the Charter Acts and legislative history, that the GSEs be self-supporting, profit-making entities. Although the GSEs receive substantial Federal benefits, they are not Government agencies. The GSEs do face competition from each other and from other private sector firms and, accordingly, have legitimate proprietary interests that the Congress explicitly intended to be respected. The ACLU's definition would unjustifiably dismiss any competition-based arguments for withholding sensitive information.

The ACLU also objected to the possibility that the Secretary would make determinations that particular material was proprietary solely on the basis of submissions by the GSEs. Such determinations, the ACLU insisted, should be subjected to public participation and comment before any information is deemed "proprietary."

Under FHEFSSA, there is no requirement that any party other than the GSEs be afforded a right to comment before determining that GSE information is proprietary. To the extent that the Secretary employs the rulemaking process in making determinations of the proprietary nature of mortgage data submitted by the GSEs, the Secretary will follow applicable Administrative Procedure Act procedures.

Issues Regarding Specific Data Elements

Freddie Mac commented that information on pricing, fees and other key aspects of business strategy were to be considered proprietary and protected from disclosure to the public. Information on pricing, fees, and other key aspects of business strategy will be withheld to the extent they are proprietary under this rule or otherwise protected from public disclosure under other authorities and HUD regulations.

NAHB suggested that some of the "data fields" sought to be protected by the GSEs as proprietary have been provided in HMDA data "with apparently little harm to either the borrowers or the lending institutions." These fields, NAHB added, would be very helpful, in utilizing HUD and HMDA databases together. These fields include: Purpose of Loan; Occupancy Code; Loan Balance at Acquisition.

Additionally, NAHB asserted, certain fields claimed as possibly proprietary were needed for use in research by academicians and governmental entities. NAHB requested, "at a minimum," that the following data fields be included:

For single-family housing:

- Loan to Value Ratio at Origination
- Purpose of Loan, Product Type, and Loan Term
- Occupancy Code, Number of Units.

And for multifamily housing:

- Purpose of Loan, Loan Type, and Loan Term
- Mortgagor Type
- Average Reported Rent OR Rent Plus Utilities OR Rent Affordability Level
- Public Subsidy Program.

With respect to single-family loan-level data, HUD must consider the GSEs' proprietary concerns in determining whether a data element can be released at the census tract level or whether some form of aggregation would be sufficient to protect the proprietary nature of the data in a public release. HUD developed a national-level database file structure that has no geographic identifiers. Certain data elements are recoded into categories to prevent exact identification of specific elements. The national data files are used to supplement census-tract-based public use data files.

For single-family purchases by the GSEs, the national data files contain purpose of the loan, occupancy code, number of units, and the loan-to-value ratio at origination which are recoded into five categories (0–60, 60–80, 80–90, 90–95, and over 95). The census tract and national files do not contain Product Type or Loan Term data since, taken together, these two elements have been deemed proprietary by the Secretary.

For multifamily purchases by the GSEs, a number of elements were deemed proprietary because of the nature of the multifamily market—the size of the market and the way multifamily properties are financed. The fact that these data elements were proprietary led the Secretary to deem Loan Type, Loan Term, Mortgagor Type, and Public Subsidy Program fields as proprietary to protect these data elements. HUD does release the Purpose of the Loan and the affordability of the units, by category, on the national multifamily public use data file.

CANICCOR, an Interfaith Council on Corporate Accountability, urged that, at a minimum, the public be provided all the information that is provided for each loan by primary market lenders under HMDA. This data, CANICCOR said, includes:

- Geocoding to the census tract level;
- Income of borrower;
- Borrower's/Co-borrower's race or national origin;
- Borrower's/Co-borrower's gender or sex;
- Whether owner or non-owner occupancy;
- Purchaser (i.e., which GSE);
- Type of loan (e.g., conventional);
- Purpose (i.e., home purchase, refinance, home improvement);
- Dollar amount of loan; and
- Seller identification.

HUD, in its development of the public-use database, considered the availability of the data to the public through sources outside of the GSE data, including HMDA. The public-use database, either through the census tract file or the national data file, contains all of the above elements.

Subpart G—Procedures for Actions and Review of Action

This subpart establishes procedures for hearings, disclosures of orders and agreements between the Secretary and the GSEs in enforcement actions, and judicial review. Generally, these procedures concern actions by the Secretary to enforce housing goal-related matters under subpart B of the rule and reporting requirements under subpart E. In addition, this portion of the preamble addresses certain procedural issues involving the approval of new programs.

As stated in the proposed rule's preamble, the housing goal requirements of this rule are enforced through the imposition of cease-and-desist orders and civil money penalties. FHEFSSA is prescriptive because of the seriousness of these actions; therefore this final rule often references or restates the statutory requirements. However, in a few instances, which are discussed in more detail throughout this portion of the preamble, the final rule augments the statutory procedures to promote the purposes of the legislation and to better recognize the legitimate interests of the GSEs in these proceedings.

Both GSEs submitted detailed comments on the provisions of subpart G. The arguments and suggestions for change submitted by the two GSEs were markedly similar. On this subject matter, Freddie Mac presented the more detailed objections, so the Freddie Mac comments will be the principal focus of the discussion of the subpart.

Closely Following the Statutory Text

Freddie Mac asserted that this subpart of the regulation should mirror the procedural requirements set forth in FHEFSSA. However, Freddie Mac commented that the proposed rule's provisions "variously depart from [FHEFSSA], or from the Administrative Procedure Act." Additionally, to avoid the "inefficiencies of litigation," Freddie Mac recommended an explicit provision in HUD's enforcement procedures for a HUD/GSE exchange of views before any enforcement action is initiated.

Freddie Mac objected to provisions in §§ 81.82 and 81.83 on the grounds that cease-and-desist orders and imposition of civil penalties were limited to violations of the statute, whereas provisions of the rule could be read as authorizing sanctions for violations of the procedural rule itself. Freddie Mac commented that FHEFSSA permits the Secretary to seek an order only for violations of the statute—not its implementing regulations. Similarly, Freddie Mac urged, the Administrative Procedure Act (APA) requires that no sanction or order may be imposed

"except within jurisdiction delegated to the agency and as authorized by law."[98]

While HUD agrees that it is the statute, and not the regulations, that serves as the foundation for any order sought by the Secretary, Freddie Mac's argument suggests that regulatory elaboration may never properly be employed to augment the recitation of statutory authority in connection with an enforcement provision. This is incorrect; it is clear that regulatory references legitimately may be included. Only reference to a regulatory section that exceeds the Secretary's authority would raise a valid legal issue; the references Freddie Mac refers to are reasonably related to the purposes of the enabling legislation. Rather than causing "confusion," these regulatory references help to clarify, and even to limit, the statutory language. The change sought might itself create confusion. Accordingly, the rule retains the regulatory cross-references, and cites both them and the statutory references.

Freddie Mac suggested that the final rule include various procedures to avoid enforcement actions. Freddie Mac cited Executive Order 12778 on Civil Justice Reform in support of its argument that the rule should mandate a preenforcement process, which could include informal discussions, negotiations, and compromise.

HUD expects that, in connection with a pending enforcement action against a GSE, it will frequently be appropriate to solicit the GSE's views in order to explore mutually agreeable resolutions of perceived problems. This option is always available to the Secretary; every reason exists to expect it will be used. However, Freddie Mac's suggestion that the rule should provide expressly for preenforcement procedures in every case—that is, to turn an existing option of the Secretary into a right of the GSEs—is unwarranted. Fact situations may differ too markedly to expect that obligatory preenforcement procedures would always be the proper course. Under § 81.21, the GSE already is afforded an opportunity to respond to the Secretary's preliminary determination that it has failed to meet its housing goals—a response that will precede any HUD requirement for submission of a housing plan. Settlement following the issuance of charges also is permitted under hearing procedures at 24 CFR 30.420. (Part 30 procedures are incorporated by reference into this final rule.)

Given the already-available procedures that will foster the amicable resolution of most disputes, the change Freddie Mac has proposed is unnecessary and is contrary to the spirit of the Administration's efforts to simplify regulations. Potentially, the change could result in institutionalized delay in the hearing process.

Executive Order 12278 is, in relevant part, directed at encouraging techniques to avoid full litigation after charges have been filed. By its own terms, the Executive Order creates no obligation on an agency's part to alter its standards for the acceptance of settlements, or to change existing delegations of settlement or litigation authority. While the Secretary shares the GSEs' interest in minimizing needless litigation, the existing authority to attempt a voluntary pre-charge resolution on a case-by-case basis will accomplish this goal as well as Freddie Mac's suggested procedure.

Freddie Mac also asked for modification of the rule to allow a GSE to recommend and request the appointment (at the GSE's expense and with the Secretary's approval) of "special expert" hearing officers to hear all or part of any enforcement action. These special officers would then sit in lieu of, or under the supervision of, a HUD Administrative Law Judge (ALJ).

Freddie Mac commented that these enforcement actions are likely to involve "highly technical statistical and financial proof on arcane issues * * *." While the Secretary hopes and believes that the ALJs will not be called upon to hear these matters often, the ALJs do have experience with handling technical, statistical, and financial matters; there is every reason to believe they will make well-reasoned decisions in any enforcement actions brought under this rule.

Furthermore, the option suggested by Freddie Mac is not available: the person who must preside over the taking of evidence in these proceedings is prescribed by the APA. While procedures authorized under the Alternative Dispute Resolution Act[99] could be used in particular instances—when the parties agreed to their use—a regulatory procedure calling for unilateral Secretarial designation of a special expert at the behest of a GSE would conflict with the APA, as applicable under FHEFSSA. No necessity exists to cite in the rule the existence of alternatives that are available via agreement of the parties.

The Public Interest

Freddie Mac commented that § 81.83(c) (calling for the Secretary's consideration of "other factors that the Secretary determines in the public interest warrant consideration" in the course of imposing civil money penalties) cannot be adopted in the manner set out in the proposed rule. Rather, Freddie Mac claimed, FHEFSSA required the Secretary to establish, by rule, following notice and comment, those "other factors" to be considered in measuring the conduct of violators.

The reference in the proposed rule to "other factors * * *" is too broad, and that formulation has been deleted. However, inasmuch as the Secretary is authorized to consider the nature of the injury to the public in establishing the amount of the penalty and other factors that the Secretary may determine by regulation to be appropriate, the final rule eliminates the "other factors" phrase in favor of a "public interest" formulation like that contained in FHEFSSA.

Freddie Mac also commented that the statutory language permits the Secretary to consider only "actual" injury to the public, and that the use of the term "nature of the injury to the public" in the proposed rule is unacceptably subjective. Clearly, under the Secretary's authority to adopt other factors through rulemaking, the rule could include "nature of the injury to the public" as a separate factor, if necessary. The final rule, however, returns to the concise statutory formulation, "injury to the public," without regulatory elaboration. HUD does not intend to place narrow limits on the interpretation of the statutory phrase, and will consider, in evaluating a particular fact situation, reasonable application of this factor, including the nature of the injury involved.

Consultation

Freddie Mac also requested that the Secretary limit consultation with the Director of OFHEO concerning any enforcement proceeding against a GSE to consultation before the enforcement proceeding is actually undertaken. Freddie Mac suggested that the proposed rule's formulation allowing the Director's participation in an ongoing enforcement proceeding would be "inconsistent with the Director's independence from the Secretary, and would be in the nature of a prohibited *ex parte* contact." However, Freddie Mac said, *ex parte* problems could be avoided if the consultation (which Freddie Mac favored) took place only before institution of an enforcement proceeding.

Freddie Mac asserted that once an adversary proceeding has commenced, due process requires that any review by the Director be conducted openly, in writing, and included in the administrative record. Further, the affected GSE should be provided an opportunity to supplement the record and to respond.

Limiting the Secretary's consultations with the Director of OFHEO to communications that occur before the institution of an action would needlessly limit the Secretary's authority in a manner not contemplated by FHEFSSA. Section 81.83(d)(5) of the rule, cited by Freddie Mac as the source of its comments on the subject matter, is, with one minor exception, a recitation of the statutory language.[100]

Freddie Mac's suggestion that these communications between the Secretary and the Director would be "in the nature of" *ex parte* communications prohibited by the APA simply is off the mark. Section 1345(c)(1)(C) of FHEFSSA provides that, in establishing standards and procedures governing the imposition of civil money penalties, the Secretary may provide for such review by the Director. Under this provision, Congress intended that open communication between the Secretary and the Director of OFHEO be permitted without implicating the *ex parte* prohibitions in 5 U.S.C. 557(d)(1).

With reference to Freddie Mac's due process concerns, the Secretary is mindful of the need for fairness and openness throughout the process leading to a possible imposition of penalties. An affected GSE would have full access to discovery procedures that will permit review of any decisionmaking process that involves the Director of OFHEO. Accordingly, the final rule does not place limits on Secretary/Director communications.

Standard of Proof

Both GSEs commented on the standard of proof in cease-and-desist and civil money penalty proceedings. Freddie Mac cited *Steadman* v. *SEC*, 450 U.S. 91 (1981) as authority for application of the "preponderance of the evidence" standard of proof to both types of proceedings. Fannie Mae stated that the APA's standard of proof is "substantial evidence," and that this standard should be made consistent in provisions governing both cease-and-desist and civil money penalty proceedings.[101]

Under FHEFSSA, the standard of proof to be applied is governed by the APA.[102] As Freddie Mac noted in its comments, the Supreme Court in *Steadman* has found the statutory "substantial evidence" phrase to mean a "preponderance of the evidence" burden of proof for the proponent of an order, and the final rule reflects this change.

General Procedural Questions

Freddie Mac asked for a variety of other revisions affecting § 81.84 on Hearings:

Freddie Mac requested a "clarification" to the effect that the ALJ must modify a hearing schedule at the GSE's request, unless HUD can show good reason why the GSE's request should be denied. Freddie Mac urged that the GSE, rather than the hearing officer, is in the best position to judge the feasibility of a particular hearing schedule. Furthermore, Freddie Mac argued, FHEFSSA "suggests a congressional determination that such requests should ordinarily be allowed."

The proposed rule at § 81.84(c) provided that the ALJ would set a hearing schedule "[u]nless an earlier or later date is requested by a GSE and is granted by the Administrative Law Judge * * *." The regulatory formulation is similar to the statute, which provides, at section 1342(a)(2), "* * * unless an earlier or later date is set by the hearing officer at the request of the enterprise * * *." Therefore, on its face, the statute provides for the setting of the date by the ALJ, with an opportunity for the GSE to "request" a change. The Secretary sees no basis for limiting the ALJ's discretion, and the rule is unchanged.

Freddie Mac also asked that the rule be modified to provide a procedure for a GSE to request the Secretary to seek enforcement of a subpoena issued and served in connection with a hearing or in discovery proceedings under the rule. The Secretary is sympathetic to the thrust of this comment by Freddie Mac, i.e., that the GSE should have the same right to enforcement of a subpoena as does the Secretary. However, FHEFSSA does not grant a right to subpoenaing parties to apply directly for a judicial order requiring compliance with a subpoena. The Secretary, under FHEFSSA, can only request that the Attorney General bring judicial actions to enforce subpoenas. Because direct judicial enforcement by either party is not specifically provided as a matter of law, HUD has developed an administrative mechanism in the final rule providing for recognition of the GSEs' interest in requesting enforcement action through the Secretary. Consistent with the availability of remedies under the statute, this will improve equity between HUD and the GSEs in discovery.

Freddie Mac asked that the final rule be amended to specify that waiver, by a GSE, of an ALJ hearing on the disapproval of a new program on public interest grounds would not constitute a "failure to appear" within the meaning of § 81.84(g). (As proposed, the rule stated that a failure to appear by a GSE shall be taken as consent to the disapproval of a new program.) Freddie Mac said that, in cases involving program disapprovals, a GSE may sometimes wish to expedite judicial review, and urged that the GSE's waiver of an administrative hearing on program disapproval not be treated as a consent to the HUD action.

The final rule does not adopt the change. The statute requires, in section 1322, that HUD provide the GSEs with "notice of, and opportunity for, a hearing on the record" after the Secretary submits a report to the Congress to the effect that a new program has been disapproved. The Secretary concludes that this language indicates a preference for providing the GSEs with administrative remedies. Therefore, if the Secretary has refused to approve a new program because the Secretary believes it is not in the public interest, HUD should provide the forum in which appeal of the Secretary's initial disapproval is heard and in which the GSE can offer further evidence on the matter.

Both GSEs requested language indicating more expressly that conduct is only "alleged" in notices of charges for cease-and-desist proceedings. (The proposed rule at § 81.82(b)(1)(i), in describing the content of a "charge" notification, made reference to a "* * * concise statement of the facts constituting the conduct upon which the Secretary has relied * * *.") The final rule includes the word "alleged" before "conduct" where the reference is to conduct that remains to be proven. However, it is not necessary to reiterate in the rule that the conduct remains to be proven in a hearing.

Fannie Mae recommended revising § 81.84(e) of the rule to increase its specificity regarding how the Secretary will serve notices and filings required under this subpart G. Fannie Mae suggested that HUD follow the Federal Reserve Board rules of service—rules that provide, among other things, details on what types of U.S. mail may be used, and when electronic transmission is acceptable.

[98] 5 U.S.C. 558(b).

[99] 5 U.S.C. 571–583.

[100] Only a reference to the Notice of Intent—a reference to which Freddie Mac made no objection—contains material not found in the text of FHEFSSA.

[101] The proposed rule set out the preponderance of the evidence standard to govern civil money penalty cases, and the substantial evidence standard for other administrative proceedings under FHEFSSA.

[102] 5 U.S.C. 556(d).

The proposed rule adopted by incorporation the requirements of 24 CFR 30.425(c)(3) governing how service is to be made. The final rule has been revised to accept the GSEs' suggestion and to model the rule governing service after the provisions in the Uniform Rules of Practice and Procedure that have been adopted by the Federal financial regulators.

Closed Proceedings

Freddie Mac requested that the final rule provide explicitly for motions by the GSE to close a hearing, with any ALJ determination on that question to be made reviewable by the Secretary on an interlocutory basis. Freddie Mac argued that the affected GSE is more likely than the ALJ to appreciate how an open hearing would affect its employees, shareholders, customers and borrowers, and its ability to perform its public mission. Freddie Mac proposed that the motion first be made before the ALJ, with discretionary review by the Secretary during an established, brief time period before the hearing is permitted to continue.

FHEFSSA permits the Secretary to determine that a hearing should be closed to the public, or that a document or part of a document should be sealed. The proposed rule implemented this authority in §§ 81.84(h) and 81.85(c), but did not provide additional procedures, beyond those available under the statute or part 30, subpart E, as incorporated.

Under 24 CFR part 30, subpart E, a GSE may move for an order from the ALJ providing for a closed hearing or sealed document. In response to Freddie Mac's comment, the final rule also provides an additional mechanism for interlocutory review by the Secretary of an ALJ's decision in both of these situations. Section 81.84(h) allows a GSE to request the Secretary to review an ALJ's denial of a timely motion for a closed hearing. The hearing is stayed while the Secretary makes a determination on the need to close the hearing. Section 81.85(c) provides that a party may request immediate review by the Secretary of an ALJ's denial of a protective order relating to documents for which disclosure would be contrary to the public interest. However, unless request for protection of the documentary evidence meets specific timing requirements or the Secretary directs otherwise, the obligation to produce the documents at a hearing will not be affected by the request for review by the Secretary of the ALJ's decision on disclosure.

Appeal-Related Issues

Freddie Mac urged that provisions in the final rule "conform to statutory requirements" limiting the Secretary to 90 days to decide an appeal of an ALJ ruling. Proposed § 81.84(k) allowed the Secretary an additional 30 days, at his or her discretion, in addition to the statutory 90-day period set out in section 1342(b)(1). Additionally, Freddie Mac objected to the provision in § 81.84(l), permitting remand of a case to an ALJ for additional proceedings, to the extent that remand might have the effect of extending the 90-day time provision established for a final decision. Freddie Mac asked that the Secretary's authority to remand to an ALJ be limited, unless the parties consent to any remand that extends the time for an ultimate decision. The final rule eliminates any reference to a discretionary extension of time triggered by written notice to the parties. However, under the final rule the Secretary's remand of a case to an ALJ for additional proceedings is a "decision" within the meaning of FHEFSSA. This approach is consistent with recent case law.[103]

Freddie Mac also commented on the proposed rule's procedural provisions on time-to-file and page limitations on appeals. Freddie Mac stated that procedures set out in § 30.910 for the Secretary's review of ALJ decisions were inadequate in cases involving the GSEs, because of the complex, fact-intensive nature of anticipated cases and the broad public policy implications likely to be involved. Freddie Mac requested that the rule make clear that provisions of § 30.910, including 15-day time and 10-page statement limits for appeals, may be waived by the Secretary upon the motion of a party. Although Freddie Mac agreed that expeditiousness and simplicity are "generally desirable," it asserted that such limits may not be appropriate in cases involving national housing policies.

As a general matter the Secretary has authority to waive HUD regulations, including those provisions to which Freddie Mac has raised objection, as well as other procedural rules from 24 CFR part 30 that are incorporated by reference. Nevertheless, the page-limit, and, in some cases, the time-limit, provisions set out in § 30.910 might be inadequate in cases arising under this rule. For that reason, the final rule makes waiver of those specific provisions easier, by providing that any such waiver of the part 30 page- and time-limits for notices of appeal or any other waivers under this subpart will not trigger publication requirements for general waivers. Waiver requests, when reasonable in light of the subject matter of a particular proceeding and other factors, can be expected to be dealt with suitably by an ALJ or the Secretary.

Freddie Mac asked that, because of the importance of these decisions, the Secretary provide for oral argument on appeal at the request of a GSE. Predicting that cases arising under FHEFSSA will be rare, Freddie Mac argued that providing for oral argument by right would not impose a significant burden on the Secretary.

Nothing in the proposed rule would prevent the Secretary from granting a right to oral argument in connection with a particular appeal of an ALJ decision. A GSE may petition for such an opportunity and the Secretary may, in an appropriate case, agree to it. However, it is unnecessary to provide in the regulation for additional mandatory procedural rights that may be provided in the Secretary's discretion, when necessary.

Freddie Mac commented that the rule need not repeat FHEFSSA's provisions governing judicial review of HUD enforcement actions. For example, Freddie Mac criticized the provisions of proposed § 81.83(e), which detailed the procedures through which the Secretary could seek the aid of the U.S. District Court to collect a civil money penalty. Provisions that only detail functions of the reviewing court have been stricken in the final rule. The final rule now cross-references statutory provisions governing judicial procedures.

Fannie Mae asked for clarification on an "apparent inconsistency" between FHEFSSA and the proposed rule concerning who is responsible for filing the record of an administrative proceeding with the appellate court. The statute says the Secretary shall file, while the proposed rule stated the Office of Administrative Law Judges shall file. The provision Fannie Mae questioned is an intentional delegation to the Office of Administrative Law Judges, in the interest of efficiency, and is unchanged in the final rule.

Commenting on § 81.86 of the proposed rule, Freddie Mac said that the rule ignored the fact that FHEFSSA treats enforcement of cease-and-desist orders and civil money penalties orders differently. Freddie Mac argued that the two enforcement actions had been dealt with differently in FHEFSSA to reflect a congressional judgment that fact situations involving cease-and-desist orders may require immediate action, while the collection of a civil money penalty might more readily be deferred. The rule has been revised to reflect the statutory language.

Freddie Mac also questioned the inclusion of a provision in § 81.86(c) providing that the Secretary "may obtain such other relief as may be available, including attorney fees and other expenses * * *." FHEFSSA, Freddie Mac asserted, made explicit reference to attorney fees only in instances where a GSE has refused, after adjudication, to pay a civil money penalty. The final rule eliminates, from § 81.86, the reference to attorney fees. The provision more specifically addressing failures to comply with an order imposing a civil money penalty (§ 81.83(e)) cross-references the statutory provision.

New Program Procedures

The proposed rule provided, under the procedures for review of the Secretary's disapproval of a program request on grounds that the program is not authorized, that the GSE may request an opportunity to review and supplement the record, or may request a meeting with the Secretary. The final rule allows the GSE to supplement the record timely in writing and/or through a meeting. Freddie Mac expressed concern in its comments about the procedures outlined in § 81.54. The proposed rule provided that such a meeting "shall not be on the record * * *." Freddie Mac's concern was that materials furnished in response to the invitation to supplement the record—or statements made at the meeting with the Secretary or his designee—might belong on the record, because they might help a court to decided that the Secretary's decision was not arbitrary and capricious, or would otherwise assist in pinpointing the issues in dispute. Additionally, Freddie Mac said, a record would help to avoid arguments about what happened at such a meeting.

Because there is no statutory requirement that any opportunity be provided for a meeting with an affected GSE to review a program disapproval on these grounds, the question of how such a meeting should be conducted is one solely within the Secretary's discretion.[104] The intention of the proposed "off the record" provision was to afford GSE representatives some assurance that statements made by them at such a meeting would not be used in a manner adverse to the interests of the GSE.

While the Secretary does not want to reverse the position taken in the proposed rule and provide that all such post-decision meetings will be held on the record, the final rule removes the above-quoted negative declaration from § 81.54(a). Instead, the Secretary will establish procedures for any such meeting on a case-by-case basis.[105]

Subpart H—Book Entry Procedures

Both the GSEs and the Book-Entry Treasury Regulations Task Force of the Investment Securities Subcommittee of the UCC Committee of the Business Law Section of the American Bar Association ("ABA Task Force") stated that revising book-entry procedures would be premature in light of continuing work on a comprehensive revision of the Treasury Department book-entry regulations.[106] The Federal Reserve Bank of New York—which operates the book-entry system—also urged HUD to delay implementation of new book-entry provisions.

Fannie Mae discussed the book-entry provisions briefly, indicating that the proposed rule's revisions to the book-entry provisions were so minor that any revision was unnecessary. Pending the overhaul of the book-entry system by Treasury, Fannie Mae recommended preserving the current book-entry regulations to "avoid confusion and certain regulatory inefficiency." However, Fannie Mae recommended deleting § 81.45(b) of the current book-entry regulations, consistent with the proposed rule, because without this deletion, Fannie Mae must request a waiver whenever it issues securities in definitive form.

Freddie Mac commented that it "strongly opposes" adoption of proposed Subpart H, calling it "at best premature and at worst potentially destructive." Freddie Mac requested that, if HUD determines it is necessary to promulgate subpart H at this time, §§ 81.94(d) and 81.95 be "recast" to allow Freddie Mac to maintain its ability to decide whether to allow conversion of its securities to definitive form. Current Freddie Mac regulations allow a depositor to withdraw securities from the book-entry system and convert to definitive form *only* if the securities provide for such conversion pursuant to the offering materials. Since 1985, Freddie Mac's offering materials have not provided such a right of conversion—a practice it comments is in keeping with current market practice. Freddie Mac said that while the proposed HUD rules appear to mirror part O of Treasury's regulations, the Treasury Department has informed Freddie Mac "that in practice it has not issued its own offerings in definitive form since 1986, notwithstanding the language of Part O, unless the offering circular specifically allows." Freddie Mac therefore concluded that the HUD proposal could put the GSEs at a competitive disadvantage respecting other competing issuers, including Treasury.

The GSEs' current book-entry regulations date back to the late 1970s and are codified in separate parts of the CFR.[107] These regulations are essential to permit the GSEs to avail themselves of Federal Reserve book-entry systems. Under HUD's general regulatory power respecting the GSEs, the proposed rule sought to establish a uniform, modern set of book-entry regulations applicable to both Fannie Mae and Freddie Mac modelled on the current book-entry procedures established by the Treasury.[108] Recently, by regulation and at the request of Fannie Mae, the Secretary specifically extended the Fannie Mae book-entry regulations to allow Fannie Mae to continue to use the book-entry system pending the issuance of this comprehensive rule.[109]

Based on the comments, the Secretary has decided to postpone adopting uniform book-entry regulations for the GSEs pending completion of the revised Treasury Department book-entry regulations. For HUD to act now to finalize a complete set of regulations for both GSEs, and then shortly to revise them, would only lead to confusion. HUD will work with the Treasury Department to adopt revised regulations simultaneously. These regulations will be substantively identical for both GSEs and will provide a level playing field. In the interim, Fannie Mae and Freddie Mac book-entry regulations shall remain effective, essentially in their current form. The final rule makes only three changes.

The Fannie Mae book-entry regulations are modified to delete § 81.45(b), as requested by Fannie Mae.

[103] *Mountain Side Mobile Estates Partnership v. Secretary of HUD*, 56 F.3d 1243, 1248 (10th Cir. 1993). Furthermore, under the rule, if a decision is remanded for further proceedings, the ALJ is required to issue an initial decision on remand within 60 days of the date of issuance of the final decision, unless it is impractical to do so.

[104] However, written materials submitted at such a meeting, or in lieu of requesting a meeting, are considered as having been submitted with the intention of supplamenting the record, as permitted under § 81.54(a)(1).

[105] As a note of further clarification, the final rule continues to permit a GSE freely to supplement the record in writing, either at the meeting with the Secretary or designee, or in a separate submission.

[106] The Treasury Department is revising its book entry regulations to reflect a major revision to Article 8 of the Uniform Commercial Code (UCC). Treasury withdrew proposed changes to its own regulations pending the completion of additional UCC work. *See* 57 FR 12244 (Apr. 9, 1992), and 58 FR 59972 (Nov. 12, 1993).

[107] 24 CFR part 81, subpart E (Fannie Mae) and 1 CFR part 462 (Freddie Mac).

[108] *See* 31 CFR 306.115 *et seq.*

[109] 59 FR 54366 (Oct. 28, 1994).

This provision requires use of book-entry procedures and has necessitated that Fannie Mae formally request a waiver each time definitive certificates are to be issued. Fannie Mae's requests for waivers under this section have always been granted. Nonetheless, work on these requests has frequently tied up both HUD and Fannie Mae staff. In removing this section, HUD recognizes that under Freddie Mac's regulations, securities may be issued in definitive form only where the offering circular so provides. While HUD considered adding this provision to current Fannie Mae regulations, it determined instead to await Treasury Department revisions before addressing the matter.

In addition, the current Fannie Mae book-entry regulations are moved to subpart H and renumbered, using the numbering scheme in the proposed regulation, §§ 81.91–99. HUD explored the possibility of maintaining the book-entry procedures as subpart E, and redesignating and renumbering subparts E through I of the proposed rule, as had been suggested by Fannie Mae. HUD determined, however, that the organization of the regulation was more sensible if the book-entry provisions were placed near the end of the part, because other subparts were of more universal interest. Moreover, moving and redesignating five sections of the proposed rule would be more confusing to the public than moving the book-entry procedures. Finally, in the interest of consistency, the term "Fannie Mae" is substituted for the term "Federal National Mortgage Association" in this subpart.

Subpart I—Other Provisions

Both GSEs commented on a provision of HUD's proposed rule that provided that the Secretary could conduct regulatory examinations of the GSEs at any time, to determine whether the GSEs were complying with statutory requirements. The primary argument made by both GSEs was that the Secretary does not possess examination authority, because Congress specifically took this authority away from the Secretary under FHEFSSA and gave it to the Director of OFHEO. Freddie Mac also argued that the Secretary does not possess this authority pursuant to FHEFSSA's grant to the Secretary of "general regulatory authority," because examination authority may only be implied if that authority is necessary, indispensable, and essential. Freddie Mac argued that the authority is not necessary, indispensable, or essential, because the Secretary may monitor the GSEs' compliance by using the reports and data that the GSEs provide to HUD.

The section on regulatory examinations has been removed. However another provision, making clear the Secretary's authority to verify information, has been added to the rule at § 81.102. Sections 1381(k) and 1382(e) of FHEFSSA removed the Secretary's explicit statutory authority to "examine and audit the books and financial transactions" of the GSEs. However, that elimination of the Secretary's explicit statutory grant of authority to conduct examinations does not mean that the Secretary has no alternative but to accept, as accurate and complete, whatever data, information, or reports the GSEs may provide. Rather, the Secretary may independently verify the accuracy and completeness of the data, information, and reports, including conducting on-site verification, when verification is reasonably related to determining whether the GSEs are complying with the law. The Secretary does not anticipate exercising this authority often, but only where such verification is necessary.

The authority to verify information when necessary is derived from section 1321 of FHEFSSA, which accords the Secretary "general regulatory power over each enterprise," as well as the enumerated powers conferred on the Secretary by FHEFSSA. The Supreme Court has repeatedly held that a grant to an agency of "general regulatory authority," extends to the agency those unenumerated powers that are "reasonably related to the purposes of the enabling legislation."[110] This standard has been accepted by every Federal Court of Appeals.[111] Independent verification of the information provided by the GSEs is reasonably related to the Secretary's performing out his or her statutory duties.

Freddie Mac acknowledged in its comments that "HUD could have implicit examination authority only if that authority were necessary, indispensable and essential to monitor GSE compliance with" provisions of the Charter Acts. In support of its "necessary, indispensable, and essential" standard, Freddie Mac cited one Circuit Court decision,[112] which involved the authority of bankruptcy judges to conduct jury trials. That case is distinguishable on several grounds and does not represent the correct standard to apply here, in light of Supreme Court holdings adopting a "reasonably related" standard, which every Federal Circuit Court has followed.

In a landmark decision, the Supreme Court specifically addressed the scope of an agency's authority to investigate a regulated entity absent an explicit grant of statutory authority to conduct such investigations.[113] In that case, the Court held that the Federal Trade Commission (FTC) possessed authority to require additional reports from a corporation it regulated, even though the FTC did not have specific authority to require such reports under applicable law or the consent decree that it sought to enforce.

In reaching its decision, the Court rejected Morton Salt's argument that enforcing compliance with the decree had to "rest upon respondents' honor unless evidence of a violation fortuitously comes to the Commission." Rather, "the Commission, in view of its residual duty of enforcement," could "affirmatively satisfy itself that the decree is being observed."[114] The Court indicated that the FTC's authority to investigate compliance with consent decrees in this manner derived from its authority to initiate contempt proceedings for the violation of such decrees, concluding that the authority to initiate contempt proceedings "must have contemplated that the Commission could obtain accurate information from time to time on which to base a responsible conclusion that there was or was not cause for such a proceeding."[115]

The Secretary, like the FTC, is charged with the authority to initiate enforcement actions upon determining that the law has been violated. This enforcement responsibility contemplates that the Secretary will obtain accurate information on which to base a responsible conclusion that there is or is not cause for such a proceeding. The Secretary, like the FTC, is accorded a number of investigative functions. For the Secretary, these investigatory functions include the authority to require reports (*e.g.*, FHEFSSA, section 1327), gather data from the GSEs on their mortgage purchases (FHEFSSA, sections 1381(o) and 1382(r)),[116] monitor compliance with the housing goals (FHEFSSA, section 1336), and issue subpoenas (FHEFSSA, section 1348).[117] The Secretary's functions, like the FTC's functions, include making factual determinations. For the Secretary these determinations include: (1) Whether a GSE is complying with the housing goals; (2) whether a GSE has made a good-faith effort to comply with a housing plan; and (3) whether a GSE has submitted the mortgage information and reports required under sections 1381(o), 1382(r), or 1337 of FHEFSSA. Under *Morton Salt*, these functions, along with the Secretary's general regulatory powers, support the Secretary's authority to verify independently the completeness and accuracy of data, information, and reports submitted by the GSEs, including conducting on-site verification when doing so is reasonably related to determining whether the GSEs are complying with the law.

Freddie Mac maintains that the Secretary can sufficiently monitor compliance through the extensive data and reports that the GSEs are required to provide. Freddie Mac points out that the Secretary can use the mortgage purchase data required to be submitted to verify the accuracy of the housing goal performance reported in the annual reports. Freddie Mac asserts, "If a GSE fails to submit required reports or data required under the Act or its charter, HUD can initiate enforcement proceedings and, incidental to those proceedings, can issue subpoenas for the production of documents and witnesses."

However, without the authority to verify the completeness and accuracy of the data, information, or reports submitted by each GSE, the Secretary would be hampered in making the determinations that are required. Such a situation could result in the Secretary erroneously concluding that the GSEs are complying with FHEFSSA's requirements when they are not, or that they are not complying with FHEFSSA's requirements when they are. Thus, where the Secretary determines that it is necessary to verify independently the data, information, or reports provided by the GSEs, including conducting on-site verification, such verification is "reasonably related to the purposes of the enabling legislation."

Information Collection and Cost/Benefit Analysis

Freddie Mac argued that HUD's estimates of the cost of GSE compliance with the reporting requirements were grossly understated in the analysis provided with the proposed rule. Freddie Mac noted that HUD's estimate of its own costs to review the data was much higher than the costs estimated for the GSEs.

HUD did not act arbitrarily in estimating its own costs to review data as substantially higher than the costs to the GSEs of providing the data. HUD's estimates of costs did not include the GSEs' costs of amassing the data, including systems costs, because the cost estimates were intended to measure the incremental costs associated with compiling the data from the GSEs data systems, i.e., producing the tables, reports, and loan-level data tapes. The estimates also are not intended to reflect costs associated with data elements that the GSEs would collect in the absence of the final rule. Moreover, the costs should not reflect any analytical research conducted by the GSEs with respect to the data or the housing goals.

However, the Secretary does appreciate the GSEs' commitment to diligence in checking the accuracy of the data, and those costs have been accounted for in reviewing the information collection provisions in the final rule. In addition, after reviewing the comments on all areas of the rule in which information collection considerations were a factor, HUD revised its cost estimates to reflect more accurately the costs of producing each of the reports required by the rule. These revised cost estimates have been provided to OMB, and the Economic Analysis that analyzes the costs and benefits associated with the provisions of this final rule is available to the public, as noted under "Significant Regulatory Action" in the "Other Matters" section of this preamble.

Other Matters

Environmental Impact

In accordance with 40 CFR 1508.4 of the regulations of the Council on Environmental Quality and 24 CFR 50.20 of the HUD regulations, the policies and procedures contained in this rule do not affect a physical structure or property and relate only to statutorily required accounting and reporting procedures, and, therefore, are categorically excluded from the requirements of the National Environmental Policy Act.

Executive Order 12866

This rule constitutes a "significant regulatory action" as that term is defined in subsection 3(f) of Executive Order 12866 on Regulatory Planning and Review issued by the President on September 30, 1993. A preliminary review of the rule indicated that it might, as defined in that Order, have an annual effect on the economy of $100 million or more. Accordingly, an economic Analysis was prepared and is available for review and inspection in Room 10276, Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–0500.

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule would not have a significant economic impact on a substantial number of small entities. The requirements of the proposed rule are directed toward the accounting procedures used in the mortgage servicing industry and the disclosure to consumers of related information.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under subsection 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule would not have substantial direct effects on States or their political subdivisions, or the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order. The requirements of the rule are directed toward the accounting procedures used in the mortgage servicing industry and the disclosure to consumers of related information.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule does not have the potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this rule, as those

[116] Sections 1381(o) and 1382(r) of FHEFSSA require that the GSEs "collect, maintain, and provide to the Secretary, in a form determined by the Secretary," mortgage data pertaining to single-family and multifamily mortgages. These provisions provide the Secretary with broad discretion to determine the "form" in which the data is to be provided, as well as what information, other than the mortgage characteristics indicated in the statute, the Secretary may also require.

[117] "Administrative authority to inspect and copy business records was implied as a reasonable projection of a principle reflected in a statutory grant of subpoena power." 2B Norman J. Singer, *Sutherland on Statutory Construction* § 55.04 (5th ed. 1992) (citing *Porter* v. *Gantner & Mattern Co.*, 156 F.2d 886 (9th Cir. 1946)).

policies and programs relate to family concerns.

List of Subjects in 24 CFR Part 81

Accounting, Federal Reserve System, Mortgages, Reporting and recordkeeping requirements, Securities.

1. For the reasons set out in the preamble, part 81 of Title 24 of the Code of Federal Regulations is revised to read as follows:

PART 81—THE SECRETARY OF HUD'S REGULATION OF THE FEDERAL NATIONAL MORTGAGE ASSOCIATION (FANNIE MAE) AND THE FEDERAL HOME LOAN MORTGAGE CORPORATION (FREDDIE MAC)

Subpart A—General

Sec.
81.1 Scope of part.
81.2 Definitions.

Subpart B—Housing Goals

Sec.
81.11 General.
81.12 Low- and Moderate-Income Housing Goal.
81.13 Central Cities, Rural Areas, and Other Underserved Areas Housing Goal.
81.14 Special Affordable Housing Goal.
81.15 General requirements.
81.16 Special counting requirements.
81.17 Affordability—Income level definitions—family size and income known (owner-occupied units, actual tenants, and prospective tenants).
81.18 Affordability—Income level definitions—family size not known (actual or prospective tenants).
81.19 Affordability—Rent level definitions—tenant income is not known.
81.20 Actions to be taken to meet the goals.
81.21 Notice and determination of failure to meet goals.
81.22 Housing plans.

Subpart C—Fair Housing

Sec.
81.41 General.
81.42 Prohibitions against discrimination.
81.43 Reports; underwriting and appraisal guideline review.
81.44 Submission of information to the Secretary.
81.45 Obtaining and disseminating information.
81.46 Remedial actions.
81.47 Violations of provisions by the GSEs.

Subpart D—New Program Approval

Sec.
81.51 General.
81.52 Requirement for program requests.
81.53 Processing of program requests.
81.54 Review of disapproval.

Subpart E—Reporting Requirements

Sec.
81.61 General.
81.62 Mortgage reports.
81.63 Annual Housing Activities Report.
81.64 Periodic reports.
81.65 Other information and analyses.
81.66 Submission of reports.

Subpart F—Access to Information

Sec.
81.71 General.
81.72 Public-use database and public information.
81.73 GSE request for proprietary treatment.
81.74 Secretarial determination on GSE request.
81.75 Proprietary information withheld by order or regulation.
81.76 FOIA requests and protection of GSE information.
81.77 Requests for GSE information on behalf of Congress, the Comptroller General, a subpoena, or other legal process.

Subpart G—Procedures for Actions and Review of Actions

Sec.
81.81 General.
81.82 Cease-and-desist proceedings.
81.83 Civil money penalties.
81.84 Hearings.
81.85 Public disclosure of final orders and agreements.
81.86 Enforcement and jurisdiction.
81.87 Judicial review.

Subpart H—Book-Entry Procedures

Sec.
81.91 Definitions.
81.92 Authority of Reserve Bank.
81.93 Scope and effect of book-entry procedure.
81.94 Transfer or pledge.
81.95 Withdrawal of Fannie Mae securities.
81.96 Delivery of Fannie Mae securities.
81.97 Registered bonds and notes.
81.98 Servicing book-entry Fannie Mae securities; payment of interest; payment at maturity or upon call.
81.99 Treasury Department regulations; applicability to Fannie Mae.

Subpart I—Other Provisions

Sec.
81.101 Equal employment opportunity.
81.102 Independent verification authority.

Authority: 12 U.S.C. 1451 *et seq.*, 1716–1723h, and 4501–4641; 42 U.S.C. 3535(d) and 3601–3619.

Subpart A—General

§ 81.1 Scope of part.

(a) *Authority.* The Secretary has general regulatory power respecting the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") (referred to collectively as Government-sponsored enterprises ("GSEs")) and is required to make such rules and regulations as are necessary and proper to ensure that the provisions of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 ("FHEFSSA"), codified generally at 12 U.S.C. 4501–4641; the Fannie Mae Charter Act, 12 U.S.C. 1716–1723h; and the Freddie Mac Act, 12 U.S.C. 1451–59, are accomplished.

(b) *Relation between this part and the authorities of OFHEO.* The Director of the Office of Federal Housing Enterprise Oversight ("OFHEO") will issue separate regulations implementing the Director's authority respecting the GSEs. In this part, OFHEO and the Director are only referenced when the Director's responsibilities are connected with the Secretary's responsibilities.

§ 81.2 Definitions.

(a) *Statutory terms.* All terms defined in FHEFSSA (12 U.S.C. 4502) are used in accordance with their statutory meaning unless otherwise defined in paragraph (b) of this section.

(b) *Other terms.* As used in this part, the term—

AHAR means the Annual Housing Activities Report that a GSE submits to the Secretary under sections 309(n) of the Fannie Mae Charter Act or 307(f) of the Freddie Mac Act.

AHAR information means data or information contained in the AHAR.

AHS means the American Housing Survey published by HUD and the Department of Commerce.

Balloon mortgage means a mortgage providing for payments at regular intervals, with a final payment ("balloon payment") that is at least 5 percent more than the periodic payments. The periodic payments may cover some or all of the periodic principal or interest. Typically, the periodic payments are level monthly payments that would fully amortize the mortgage over a stated term and the balloon payment is a single payment due after a specified period (but before the mortgage would fully amortize) and pays off or satisfies the outstanding balance of the mortgage.

Central city means the underserved areas located in any political subdivision designated as a central city by the Office of Management and Budget of the Executive Office of the President.

Charter Act means the Federal National Mortgage Association Charter Act (12 U.S.C. 1716 *et seq.*) or the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1451 *et seq.*).

Contract rent means the total rent that is, or is anticipated to be, specified in the rental contract as payable by the tenant to the owner for rental of a dwelling unit, including fees or charges for management and maintenance services and those utility charges that are included in the rental contract. In determining contract rent, rent concessions shall not be considered, *i.e.*, contract rent is not decreased by any rent concessions. Contract rent is rent net of rental subsidies.

Conventional mortgage means a mortgage other than a mortgage as to which a GSE has the benefit of any guaranty, insurance or other obligation by the United States or any of its agencies or instrumentalities.

Day means a calendar day.

Director means the Director of OFHEO.

Dwelling unit means a room or unified combination of rooms intended for use, in whole or in part, as a dwelling by one or more persons, and includes a dwelling unit in a single-family property, multifamily property, or other residential or mixed-use property.

ECOA means the Equal Credit Opportunity Act (15 U.S.C. 1691 *et seq.*).

Familial status has the same definition as is set forth at 24 CFR 100.20.

Family means one or more individuals who occupy the same dwelling unit.

Fannie Mae means the Federal National Mortgage Association and any affiliate thereof.

FHEFSSA means the Federal Housing Enterprises Financial Safety and Soundness Act of 1992, codified generally at 12 U.S.C. 4501–4651.

FOIA means the Freedom of Information Act (5 U.S.C. 552).

Freddie Mac means the Federal Home Loan Mortgage Corporation and any affiliate thereof.

Freddie Mac Act means the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1451 *et seq.*).

Government-sponsored enterprise or *GSE* means Fannie Mae or Freddie Mac.

Handicap has the same definition as is set forth at 24 CFR 100.201.

HUD means the United States Department of Housing and Urban Development.

Lender means any entity that makes, originates, sells, or services mortgages, and includes the secured creditors named in the debt obligation and document creating the mortgage.

Low-income area means a census tract or block numbering area in which the median income does not exceed 80 percent of the area median income.

Median income means, with respect to an area, the unadjusted median family income for the area, as most recently determined and published by the Secretary.

Metropolitan area means a metropolitan statistical area ("MSA"), primary metropolitan statistical area ("PMSA"), or consolidated metropolitan statistical area ("CMSA"), designated by the Office of Management and Budget of the Executive Office of the President.

Minority means any individual who is included within any one of the following racial and ethnic categories:

(1) American Indian or Alaskan Native—a person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition;

(2) Asian or Pacific Islander—a person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands;

(3) African-American—a person having origins in any of the black racial groups of Africa; and

(4) Hispanic—a person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Mortgage means a member of such classes of liens, including subordinate liens, as are commonly given or are legally effective to secure advances on, or the unpaid purchase price of, real estate under the laws of the State in which the real estate is located, or a manufactured home that is personal property under the laws of the State in which the manufactured home is located, together with the credit instruments, if any, secured thereby, and includes interests in mortgages. "Mortgage" includes a mortgage, lien, including a subordinate lien, or other security interest on the stock or membership certificate issued to a tenant-stockholder or resident-member by a cooperative housing corporation, as defined in section 216 of the Internal Revenue Code of 1986, and on the proprietary lease, occupancy agreement, or right of tenancy in the dwelling unit of the tenant-stockholder or resident-member in such cooperative housing corporation.

Mortgage data means data obtained by the Secretary from the GSEs under subsection 309(m) of the Fannie Mae Charter Act and subsection 307(e) of the Freddie Mac Act.

Mortgage purchase means a transaction in which a GSE bought or otherwise acquired with cash or other thing of value, a mortgage for its portfolio or for securitization.

Multifamily housing means a residence consisting of more than 4 dwelling units. The term includes cooperative buildings and condominium projects.

New England means Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

OFHEO means the Office of Federal Housing Enterprise Oversight.

Ongoing program means a program that is expected to continue for the foreseeable future.

Other underserved area means any underserved area that is in a metropolitan area, but not in a central city.

Owner-occupied unit means a dwelling unit in single-family housing in which a mortgagor of the unit resides.

Participation means a fractional interest in the principal amount of a mortgage.

Portfolio of loans means 10 or more loans.

Proprietary information means all mortgage data and all AHAR information that the GSEs submit to the Secretary in the AHARs that contain trade secrets or privileged or confidential, commercial, or financial information that, if released, would be likely to cause substantial competitive harm.

Public data means all mortgage data and all AHAR information that the GSEs submit to the Secretary in the AHARs, that the Secretary determines are not proprietary and may appropriately be disclosed consistent with other applicable laws and regulations.

Real estate mortgage investment conduit (REMIC) means multi-class mortgage securities issued by a tax-exempt entity.

Refinancing means a transaction in which an existing mortgage is satisfied or replaced by a new mortgage undertaken by the same borrower. The term does not include:

(1) A renewal of a single payment obligation with no change in the original terms;

(2) A reduction in the annual percentage rate of the mortgage as computed under the Truth in Lending Act, with a corresponding change in the payment schedule;

(3) An agreement involving a court proceeding;

(4) A workout agreement, in which a change in the payment schedule or collateral requirements is agreed to as a result of the mortgagor's default or delinquency, unless the rate is increased or the new amount financed exceeds the unpaid balance plus earned finance charges and premiums for the continuation of insurance;

(5) The renewal of optional insurance purchased by the mortgagor and added to an existing mortgage; and

(6) A renegotiated balloon mortgage on a multifamily property where the balloon payment was due within 1 year after the date of the closing of the renegotiated mortgage.

Rent means, for a dwelling unit:

(1) When the contract rent includes all utilities, the contract rent; or

(2) When the contract rent does not include all utilities, the contract rent plus:

(i) The actual cost of utilities not included in the contract rent; or

(ii) A utility allowance.

Rental housing means dwelling units in multifamily housing and dwelling units that are not owner occupied in single-family housing.

Rental unit means a dwelling unit that is not owner-occupied and is rented or available to rent.

Residence means a property where one or more families reside.

Residential mortgage means a mortgage on single-family or multifamily housing.

Rural area means any underserved area located outside of any metropolitan area.

Seasoned mortgage means a mortgage on which the date of the mortgage note is more than 1 year before the GSE purchased the mortgage.

Second mortgage means any mortgage that has a lien position subordinate only to the lien of the first mortgage.

Secondary residence means a dwelling where the mortgagor maintains (or will maintain) a part-time place of abode and typically spends (or will spend) less than the majority of the calendar year. A person may have more than one secondary residence at a time.

Secretary means the Secretary of Housing and Urban Development and, where appropriate, any person designated by the Secretary to perform a particular function for the Secretary, including any HUD officer, employee, or agent.

Single-family housing means a residence consisting of one to four dwelling units. Single-family housing includes condominium dwelling units and dwelling units in cooperative housing projects.

Underserved area means:

(1) For purposes of the definitions of "central city" and "other underserved area," a census tract having:

(i) A median income at or below 120 percent of the median income of the metropolitan area and a minority population of 30 percent or greater; or

(ii) A median income at or below 90 percent of median income of the metropolitan area.

(2) For purposes of the definition of "rural area":

(i) In areas other than New England, a county having:

(A) A median income at or below 120 percent of the State nonmetropolitan median income and a minority population of 30 percent or greater; or

(B) A median income at or below 95 percent of the greater of the:

(1) State non-metropolitan median income; or

(2) Nationwide non-metropolitan median income; and

(ii) In New England, an entire county having the characteristics in paragraph (2)(i)(A) or (B) of this definition or the remainder of a county, where a portion of the county is in a metropolitan area and the remainder of the county has the characteristics in paragraph (2)(i)(A) or (B) of this definition.

Utilities means charges for electricity, piped or bottled gas, water, sewage disposal, fuel (oil, coal, kerosene, wood, solar energy, or other), and garbage and trash collection. Utilities do not include charges for telephone service.

Utility allowance means either:

(1) The amount to be added to contract rent when utilities are not included in contract rent (also referred to as the "AHS-derived utility allowance"), as issued annually by the Secretary; or

(2) The utility allowance established under the HUD Section 8 Program (42 U.S.C. 1437f) for the area where the property is located.

Very-low-income has the same definition as "very low-income" has in FHEFSSA.

Wholesale exchange means a transaction in which a GSE buys or otherwise acquires mortgages held in portfolio or securitized by the other GSE, or where both GSEs swap such mortgages.

Working day means a day when HUD is officially open for business.

Subpart B—Housing Goals

§ 81.11 General.

This subpart establishes: three housing goals, as required by FHEFSSA; requirements for measuring performance under the goals; and procedures for monitoring and enforcing the goals.

§ 81.12 Low- and Moderate-Income Housing Goal.

(a) *Purpose of goal.* This annual goal for the purchase by each GSE of mortgages on housing for low- and moderate-income families ("the Low- and Moderate-Income Housing Goal") is intended to achieve increased purchases by the GSEs of such mortgages.

(b) *Factors.* In establishing the Low- and Moderate-Income Housing Goals, the Secretary considered the factors in 12 U.S.C. 4562(b). A statement documenting the Secretary's considerations and findings with respect to these factors, entitled "Secretarial Considerations to Establish the Low- and Moderate-Income Housing Goal," was published in the **Federal Register** on December 1, 1995.

(c) *Goals.* The annual goals for each GSE's purchases of mortgages on housing for low- and moderate-income families are:

(1) For 1996, 40 percent of the total number of dwelling units financed by that GSE's mortgage purchases in 1996;

(2) For each of the years 1997–99, 42 percent of the total number of dwelling units financed by that GSE's mortgage purchases in each of those years; and

(3) For 2000 and thereafter the Secretary shall establish annual goals; pending establishment of goals for 2000 and thereafter, the annual goal for each of those years shall be 42 percent of the total number of dwelling units financed by that GSE's mortgage purchases in each of those years.

§ 81.13 Central Cities, Rural Areas, and Other Underserved Areas Housing Goal.

(a) *Purpose of the goal.* This annual goal for the purchase by each GSE of mortgages on housing located in central cities, rural areas, and other underserved areas is intended to achieve increased purchases by the GSEs of mortgages financing housing in areas that are underserved in terms of mortgage credit.

(b) *Factors.* In establishing the Central Cities, Rural Areas, and Other Underserved Areas Goals, the Secretary considered the factors in 12 U.S.C. 4564(b). A statement documenting the Secretary's considerations and findings with respect to these factors, entitled "Secretarial Considerations to Establish the Central Cities, Rural Areas, and Other Underserved Areas Housing Goal," was published in the **Federal Register** on December 1, 1995.

(c) *Goals.* The annual goals for each GSE's purchases of mortgages on housing located in central cities, rural areas, and other underserved areas are:

(1) For 1996, 21 percent of the total number of dwelling units financed by that GSE's mortgage purchases in 1996;

(2) For each of the years 1997–99, 24 percent of the total number of dwelling units financed by that GSE's mortgage purchases in each of those years; and

(3) For 2000 and thereafter the Secretary shall establish annual goals; pending establishment of goals for 2000 and thereafter, the annual goal for each of those years shall be 24 percent of the total number of dwelling units financed by that GSE's mortgage purchases in each of those years.

(d) *Measuring performance.* The GSEs shall determine on a mortgage-by-mortgage basis, through geocoding or any similarly accurate and reliable method, whether a mortgage finances one or more dwelling units located in a central city, rural area, or other underserved area.

§ 81.14 Special Affordable Housing Goal.

(a) *Purpose of the goal.* This goal is intended to achieve increased purchases by the GSEs of mortgages on rental and owner-occupied housing meeting the then-existing unaddressed needs of, and affordable to, low-income families in low-income areas and very-low-income families.

(b) *Factors.* In establishing the Special Affordable Housing Goals, the Secretary considered the factors in 12 U.S.C. 4563(a)(2). A statement documenting the Secretary's considerations and findings with respect to these factors, entitled "Secretarial Considerations to Establish the Special Affordable Housing Goal," was published in the **Federal Register** on December 1, 1995.

(c) *Goals.* The annual goals for each GSE's purchases of mortgages on rental and owner-occupied housing meeting the then-existing, unaddressed needs of and affordable to low-income families in low-income areas and very-low-income families are:

(1) For 1996, 12 percent of the total number of dwelling units financed by each GSE's mortgage purchases in 1996. The goal shall include mortgage purchases financing dwelling units in multifamily housing totalling not less than 0.8 percent of the dollar volume of mortgages purchased by the respective GSE in 1994;

(2) For each of the years 1997–99, 14 percent of the total number of dwelling units financed by each GSE's mortgage purchases in each of those years. The goal for each year shall include mortgage purchases financing dwelling units in multifamily housing totalling not less than 0.8 percent of the dollar volume of mortgages purchased by the respective GSE in 1994; and

(3) For 2000 and thereafter the Secretary shall establish annual goals. Pending establishment of goals for 2000 and thereafter, the annual goal for each of those years shall be 14 percent of the total number of dwelling units financed by each GSE's mortgages purchases in each of those years; the goal for each such year shall include mortgage purchases financing dwelling units in multifamily housing totalling not less than 0.8 percent of the dollar volume of mortgages purchased by the respective GSE in 1994.

(d) *Counting of multifamily units.* (1) Dwelling units affordable to low-income families and financed by a particular purchase of a mortgage on multifamily housing shall count toward achievement of the Special Affordable Housing Goal where at least:

(i) 20 percent of the dwelling units in the particular multifamily property are affordable to families whose incomes do not exceed 50 percent of the area median income; or

(ii) 40 percent of the dwelling units in the particular multifamily property are affordable to very-low-income families.

(2) Where only some of the units financed by a purchase of a mortgage on multifamily housing count under the multifamily component of the goal, only a portion of the unpaid principal balance of the mortgage attributable to such units shall count toward the multifamily component. The portion of the mortgage counted under the multifamily requirement shall be equal to the ratio of the total units that count to the total number of units in the mortgaged property.

(e) *Full Credit Activities.* (1) For purposes of 12 U.S.C. 4563(b)(1) and this paragraph (e), full credit means that each unit financed by a mortgage purchased by a GSE and meeting the requirements of this section shall count toward achievement of the Special Affordable Housing Goal for that GSE.

(2) Consistent with § 81.16(b)(3)(ii), the Secretary will give full credit toward achievement of the Special Affordable Housing Goals for the activities in 12 U.S.C. 4563(b)(1).

(3) Mortgages under HUD's Home Equity Conversion Mortgage ("HECM") Insurance Demonstration Program, 12 U.S.C. 1715z-20, and the Farmers Home Administration's Guaranteed Rural Housing Loan Program, 7 U.S.C. 1933, meet the requirements of 12 U.S.C. 4563(b)(1)(A)(i) and (ii).

(4) (i) For purposes of determining whether a seller meets the requirement in 12 U.S.C. 4563(b)(1)(B), a seller must currently operate on its own or actively participate in an ongoing program that will result in originating additional loans that meet the goal. Actively participating in such a program includes actively participating with a qualified housing group that operates a program resulting in the origination of loans that meet the requirements of the goal.

(ii) To determine whether a seller meets the requirement in paragraph (e)(4)(i) of this section, the GSE shall verify and monitor that the seller meets the requirement and develop any necessary mechanisms to ensure compliance with this requirement.

(iii) Where a seller's primary business is originating mortgages on housing that qualifies under this Special Affordable Housing Goal, such seller is presumed to meet the requirements in paragraph (e)(4)(i) of this section.

(f) *No credit activities.* Neither the purchase nor the securitization of mortgages associated with the refinancing of a GSE's existing mortgage or mortgage-backed securities portfolios shall receive credit toward the achievement of the Special Affordable Housing Goal. Refinancings that result from the wholesale exchange of mortgages between the two GSEs shall not count toward the achievement of this goal. Refinancings of individual mortgages shall count toward achievement of this goal when the refinancing is an arms-length transaction that is borrower-driven and the mortgage otherwise counts toward achievement of this goal. For purposes of this paragraph (f), "mortgage or mortgage-backed securities portfolios" includes mortgages retained by Fannie Mae or Freddie Mac and mortgages utilized to back mortgage-backed securities.

§ 81.15 General requirements.

(a) *Calculating the numerator and denominator.* Performance under each of the housing goals shall be measured using a fraction that is converted into a percentage. The numerator of each fraction is the number of dwelling units financed by a GSE's mortgage purchases in a particular year that count toward achievement of the housing goal. The denominator of each fraction is, for all mortgages purchased, the number of dwelling units that could count toward achievement of the goal under appropriate circumstances. The denominators shall not include GSE transactions or activities that are not mortgages or mortgage purchases. When a GSE lacks sufficient information to determine whether the purchase of a mortgage originated after 1992 counts toward achievement of a particular housing goal, that mortgage purchase shall be included in the denominator for that housing goal.

(b) *Properties with multiple dwelling units.* For the purposes of counting toward the achievement of the goals, whenever the property securing a mortgage contains more than one dwelling unit, each such dwelling unit shall be counted as a separate dwelling unit financed by a mortgage purchase.

(c) *Credit toward multiple goals.* A mortgage purchase (or dwelling unit financed by such purchase) by a GSE in a particular year shall count toward the achievement of each housing goal for which such purchase (or dwelling unit) qualifies in that year.

(d) *Counting owner-occupied units.* For purposes of counting owner-occupied units toward achievement of the Low- and Moderate-Income Housing

Goal or the Special Affordable Housing Goal, mortgage purchases financing such units shall be evaluated based on the income of the mortgagors and the area median income at the time of origination of the mortgage. To determine whether mortgagors may be counted under a particular family income level, *i.e.*, very-low-, low-, or moderate-income, the income of the mortgagors is compared to the median income for the area at the time of mortgage origination, using the appropriate percentage factor provided under § 81.17.

(e) *Counting rental units.* (1) *Use of income, rent.* (i) *Generally.* For purposes of counting rental units toward achievement of the Low- and Moderate-Income Housing Goal or the Special Affordable Housing Goal, mortgage purchases financing such units shall be evaluated based on the income of actual or prospective tenants where such data is available, *i.e.*, known to a lender.

(ii) *Availability of income information.* (A) Each GSE shall require lenders to provide to the GSE tenant income information under paragraphs (e)(3) and (4) of this section, but only when such information is known to the lender.

(B) When such tenant income information is available for all occupied units, the GSE's performance shall be based on the income of the tenants in the occupied units. For unoccupied units that are vacant and available for rent and for unoccupied units that are under repair or renovation and not available for rent, the GSE shall use the income of prospective tenants, if paragraph (e)(4) of this section is applicable. If paragraph (e)(4) of this section is not applicable, the GSE shall use rent levels for comparable units in the property to determine affordability.

(2) *Model units and rental offices.* A model unit or rental office in a multifamily property may count toward achievement of the housing goals only if a GSE determines that:

(i) It is reasonably expected that the units will be occupied by a family within one year;

(ii) The number of such units is reasonable and minimal considering the size of the multifamily property; and

(iii) Such unit otherwise meets the requirements for the goal.

(3) *Income of actual tenants.* When the income of actual tenants is available, to determine whether a tenant is very-low-, low-, or moderate-income, the income of the tenant shall be compared to the median income for the area, adjusted for family size as provided in § 81.17.

(4) *Income of prospective tenants.* When income for tenants is available to a lender because a project is subject to a Federal housing program that establishes the maximum income for a tenant or a prospective tenant in rental units, the income of prospective tenants may be counted at the maximum income level established under such housing program for that unit. In determining the income of prospective tenants, the income shall be projected based on the types of units and market area involved. Where the income of prospective tenants is projected, each GSE must determine that the income figures are reasonable considering the rents (if any) on the same units in the past and considering current rents on comparable units in the same market area.

(5) *Use of rent.* When the income of the prospective or actual tenants of a dwelling unit is not available, performance under these goals will be evaluated based on rent and whether the rent is affordable to the income group targeted by the housing goal. A rent is affordable if the rent does not exceed 30 percent of the maximum income level of very-low-, low-, or moderate-income families as provided in § 81.19. In determining contract rent for a dwelling unit, the actual rent or average rent by unit type shall be used.

(6) *Timeliness of information.* In determining performance under the housing goals, each GSE shall use tenant and rental information as of the time of mortgage:

(i) Acquisition for mortgages on multifamily housing; and

(ii) Origination for mortgages on single-family housing.

(f) *Application of Median income.* (1) For purposes of determining an area's median income under §§ 81.17 through 81.19 and for the definition of "low-income area," the area is:

(i) The metropolitan area, if the property which is the subject of the mortgage is in a metropolitan area; and

(ii) In all other areas, the county in which the property is located, except that where the State nonmetropolitan median income is higher than the county's median income, the area is the State nonmetropolitan area.

(2) When a GSE cannot precisely determine whether a mortgage is on dwelling unit(s) located in one area, the GSE shall determine the median income for the split area in the manner prescribed by the Federal Financial Institutions Examination Council for reporting under the Home Mortgage Disclosure Act, if the GSE can determine that the mortgage is on dwelling unit(s) located in:

(i) A census tract;

(ii) A census place code;

(iii) A block-group enumeration district;

(iv) A nine-digit zip code; or

(v) Another appropriate geographic segment that is partially located in more than one area ("split area").

(g) *Sampling not permitted.* Performance under the housing goals for each year shall be based on a complete tabulation of mortgage purchases for that year; a sampling of such purchases is not acceptable.

(h) *Newly available data.* When a GSE uses data to determine whether a mortgage purchase counts toward achievement of any goal and new data is released after the start of a calendar quarter, the GSE need not use the new data until the start of the following quarter.

§ 81.16 Special counting requirements.

(a) *General.* In determining whether a GSE shall receive full credit for a transaction or activity toward achievement of any of the housing goals, the Secretary shall consider whether a transaction or activity of the GSE is substantially equivalent to a mortgage purchase and either creates a new market or adds liquidity to an existing market.

(b) *Not counted.* The following transactions or activities shall not count toward achievement of any of the housing goals and shall not be included in the denominator in calculating either GSE's performance under the housing goals:

(1) Equity investments in housing development projects;

(2) Purchases of State and local government housing bonds except as provided in 81.16(c)(8);

(3) Purchases of non-conventional mortgages except:

(i) Where such mortgages are acquired under a risk-sharing arrangement with a Federal agency; or

(ii) As provided in § 81.14(e)(2);

(4) Commitments to buy mortgages at a later date or time;

(5) Options to acquire mortgages;

(6) Rights of first refusal to acquire mortgages;

(7) Any interests in mortgages that the Secretary determines, in writing, shall not be treated as interests in mortgages;

(8) Mortgage purchases to the extent they finance any dwelling units that are secondary residences; and

(9) Any combination of (1) through (8) above.

(c) *Other special rules*—(1) *Credit enhancements.* (i) Dwelling units financed under a credit enhancement entered into by a GSE shall be treated as mortgage purchases and count toward achievement of the housing goals when:

(A) The GSE provides a specific contractual obligation to ensure timely payment of amounts due under a mortgage or mortgages financed by the issuance of housing bonds (such bonds may be issued by any entity, including a State or local housing finance agency);

(B) The GSE assumes a credit risk in the transaction substantially equivalent to the risk that would have been assumed by the GSE if it had securitized the mortgages financed by such bonds; and

(C) Such dwelling units otherwise qualify under this part.

(ii) When a GSE provides a specific contractual obligation to ensure timely payment of amounts due under any mortgage originally insured by a public purpose mortgage insurance entity or fund, the GSE may, on a case-by-case basis, seek approval from the Secretary for such activities to count toward achievement of the housing goals.

(2) *Real estate mortgage investment conduits ("REMICs").* (i) A GSE's purchase or guarantee of all or a portion of a REMIC shall be treated as a mortgage purchase and receive credit toward the achievement of the housing goals provided:

(A) The underlying mortgages or mortgage-backed securities for the REMIC were not:

(*1*) Guaranteed by the Government National Mortgage Association; or

(*2*) Previously counted toward any housing goal by the GSE; and

(B) The GSE has the information necessary to support counting the dwelling units financed by the REMIC, or that part of the REMIC purchased or guaranteed by the GSE, toward the achievement of a particular housing goal.

(ii) For REMICs that meet the requirements in paragraph (c)(2)(i) of this section and for which the GSE purchased or guaranteed:

(A) The whole REMIC, all of the units financed by the REMIC shall be treated as a mortgage purchase and count toward achievement of the housing goals; or

(B) A portion of the REMIC, the GSE shall receive partial credit toward achievement of the housing goals. This credit shall be equal to the percentage of the REMIC purchased or guaranteed by the GSE (the dollar amount of the purchase or guarantee divided by the total dollar amount of the REMIC) multiplied by the number of dwelling units that would have counted toward the goal(s) if the GSE had purchased or guaranteed the whole REMIC. In calculating performance under the housing goals, the denominator shall include the number of dwelling units included in the whole REMIC multiplied by the percentage of the REMIC purchased or guaranteed by the GSE.

(3) *Risk-sharing.* Mortgage purchases under risk-sharing arrangements between the GSEs and any Federal agency where the units would otherwise count toward achievement of the housing goal under which the GSE is responsible for a substantial amount (50 percent or more) of the risk shall be treated as mortgage purchases and count toward achievement of the housing goal or goals.

(4) *Participations.* Participations purchased by a GSE shall be treated as mortgage purchases and count toward the achievement of the housing goals, if the GSE's participation in the mortgage is 50 percent or more.

(5) *Cooperative housing and condominium projects.* (i) The purchase of a mortgage on a cooperative housing unit ("a share loan") or a condominium unit is a mortgage purchase. Such a purchase is counted toward achievement of a housing goal in the same manner as a mortgage purchase of single-family owner-occupied units, *i.e.*, affordability is based on the income of the owner(s).

(ii) The purchase of a mortgage on a cooperative building ("a blanket loan") or a condominium project is a mortgage purchase and shall count toward achievement of the housing goals. Where a GSE purchases both "a blanket loan" and mortgages for units in the same building ("share loans"), both the blanket loan and the share loan(s) are mortgage purchases and shall count toward achievement of the housing goals. Where a GSE purchases both a condominium project mortgage and mortgages on condominium dwelling units in the same project, both the condominium project mortgages and the mortgages on condominium dwelling units are mortgage purchases and shall count toward achievement of the housing goals.

(6) *Seasoned mortgages.* A GSE's purchase of a seasoned mortgage shall be treated as a mortgage purchase for purposes of these goals except:

(i) Where the GSE has already counted the mortgages under a housing goal applicable to 1993 or any subsequent year; or

(ii) As provided in 12 U.S.C. 4563(b)(1)(B).

(7) *Purchase of refinanced mortgages.* Except as provided in § 81.14(f), the purchase of a refinanced mortgage by a GSE is a mortgage purchase and shall count toward achievement of the housing goals to the extent the mortgage qualifies.

(8) *Mortgage revenue bonds.* (i) The purchase of a state or local mortgage revenue bond shall be treated as a mortgage purchase and units financed under such MRB shall count toward achievement of the goals where:

(A) the MRB is to be repaid only from the principal and interest of the underlying mortgages originated with funds made available by the MRB; and

(B) the MRB is not a general obligation of a state or local government or agency or is not credit enchanced by any government or agency, third party guarantor or surety.

(ii) Dwelling units financed by a mortgage revenue bond meeting the requirements of paragraph (c)(8)(i) of this section shall count toward a housing goal to the extent such dwelling units otherwise qualify under this part.

§ 81.17 Affordability—income level definitions—family size and income known (owner-occupied units, actual tenants, and prospective tenants).

In determining whether a dwelling unit is affordable to very-low-, low-, or moderate-income families, where the unit is owner-occupied or, for rental housing, family size and income information for the dwelling unit is known to the GSE, the affordability of the unit shall be determined as follows:

(a) *Moderate-income* means:

(1) In the case of owner-occupied units, income not in excess of 100 percent of area median income; and

(2) In the case of rental units, where the income of actual or prospective tenants is available, income not in excess of the following percentages of area median income corresponding to the following family sizes:

Number of persons in family	Percentage of area median income
1	70
2	80
3	90
4	100
5 or more	(*)

*100% plus (8% multiplied by the number of persons in excess of 4).

(b) *Low-income* means:

(1) In the case of owner-occupied units, income not in excess of 80 percent of area median income; and

(2) In the case of rental units, where the income of actual or prospective tenants is available, income not in excess of the following percentages of area median income corresponding to the following family sizes:

Number of persons in family	Percentage of area median income
1	56
2	64
3	72
4	80
5 or more	(*)

*80% plus (6.4% multiplied by the number of persons in excess of 4).

(c) *Very-low-income* means:

(1) In the case of owner-occupied units, income not in excess of 60 percent of area median income; and

(2) In the case of rental units, where the income of actual or prospective tenants is available, income not in excess of the following percentages of area median income corresponding to the following family sizes:

Number of persons in family	Percentage of area median income
1	42
2	48
3	54
4	60
5 or more	(*)

*60% plus (4.8% multiplied by the number of persons in excess of 4).

§ 81.18 Affordability—income level definitions—family size not known (actual or prospective tenants).

In determining whether a rental unit is affordable to very-low, low-, or moderate-income families where family size is not known to the GSE, income will be adjusted using unit size, and affordability determined as follows:

(a) *For moderate-income*, the income of prospective tenants shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	70
1 bedroom	75
2 bedrooms	90
3 bedrooms or more	(*)

*104% plus (12% multiplied by the number of bedrooms in excess of 3).

(b) *For low-income*, income of prospective tenants shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	56
1 bedroom	60
2 bedrooms	72
3 bedrooms or more	(*)

*83.2% plus (9.6% multiplied by the number of bedrooms in excess of 3).

(c) *For very-low-income*, income of prospective tenants shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	42
1 bedroom	45
2 bedrooms	54
3 bedrooms or more	(*)

*62.4% plus (7.2% multiplied by the number of bedrooms in excess of 3).

§ 81.19 Affordability—Rent level definitions—tenant income is not known.

For purposes of determining whether a rental unit is affordable to very-low-, low-, or moderate-income families where the income of the family in the dwelling unit is not known to the GSE, the affordability of the unit is determined based on unit size as follows:

(a) *For moderate-income*, maximum affordable rents to count as housing for moderate-income families shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	21
1 bedroom	22.5
2 bedrooms	27
3 bedrooms or more	(*)

*31.2% plus (3.6% multiplied by the number of bedrooms in excess of 3);

(b) *For low-income*, maximum affordable rents to count as housing for low-income families shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	16.8
1 bedroom	18
2 bedrooms	21.6
3 bedrooms or more	(*)

*24.96% plus (2.88% multiplied by the number of bedrooms in excess of 3); and

(c) *For very-low-income*, maximum affordable rents to count as housing for very-low-income families shall not exceed the following percentages of area median income with adjustments, depending on unit size:

Unit size	Percentage of area median income
Efficiency	12.6
1 bedroom	13.5
2 bedrooms	16.2
3 bedrooms or more	(*)

*18.72% plus (2.16% multiplied by the number of bedrooms in excess of 3).

(d) *Missing Information.* Each GSE shall make every effort to obtain the information necessary to make the calculations in this section. If a GSE makes such efforts but cannot obtain data on the number of bedrooms in particular units, in making the calculations on such units, the units shall be assumed to be efficiencies.

§ 81.20 Actions to be taken to meet the goals.

To meet the goals under this rule, each GSE shall operate in accordance with 12 U.S.C. 4565.

§ 81.21 Notice and determination of failure to meet goals.

If the Secretary determines that a GSE has failed or there is a substantial probability that a GSE will fail to meet any housing goal, the Secretary shall follow the procedures at 12 U.S.C. 4566(b).

§ 81.22 Housing plans.

(a) If the Secretary determines, under § 81.21, that a GSE has failed or there is a substantial probability that a GSE will fail to meet any housing goal and that the achievement of the housing goal was or is feasible, the Secretary shall require the GSE to submit a housing plan for approval by the Secretary.

(b) *Nature of plan.* Each housing plan shall:

(1) Be feasible;

(2) Be sufficiently specific to enable the Secretary to monitor compliance periodically;

(3) Describe the specific actions that the GSE will take:

(i) To achieve the goal for the next calendar year; or

(ii) If the Secretary determines that there is substantial probability that the GSE will fail to meet a housing goal in the current year, to make such improvements as are reasonable in the remainder of the year; and

(4) Address any additional matters relevant to the plan as required, in writing, by the Secretary.

(c) *Deadline for submission.* The GSE shall submit a housing plan to the Secretary within 30 days after issuance of a notice under § 81.21 requiring the GSE to submit a housing plan. The Secretary may extend the deadline for submission of a plan, in writing and for a time certain, to the extent the Secretary determines an extension is necessary.

(d) *Review of housing plans.* The Secretary shall review and approve or disapprove housing plans in accordance with 12 U.S.C. 4566(c)(4) and (5).

(e) *Resubmission.* If the Secretary disapproves an initial housing plan submitted by a GSE, the GSE shall submit an amended plan acceptable to the Secretary within 30 days of the Secretary disapproving the initial plan; the Secretary may extend the deadline if the Secretary determines an extension is in the public interest. If the amended plan is not acceptable to the Secretary, the Secretary may afford the GSE 15 days to submit a new plan.

Subpart C—Fair Housing

§ 81.41 General.

In this subpart, the Secretary: prohibits discrimination by the GSEs in their mortgage purchases because of race, color, religion, sex, handicap, familial status, age, or national origin, including any consideration of the age or location of a dwelling or age of the neighborhood or census tract where the dwelling is located in a manner that has a discriminatory effect; requires that the GSEs submit information to the Secretary to assist Fair Housing Act and ECOA investigations; provides for advising the GSEs of Fair Housing Act and ECOA violations; provides for reviewing the GSEs' underwriting and appraisal guidelines to ensure compliance with the Fair Housing Act; and requires that the GSEs take actions as directed by the Secretary following Fair Housing Act and ECOA adjudications. Because FHEFSSA provides, generally, that the Director of OFHEO shall enforce violations by the GSEs of FHEFSSA and regulations in this subpart, this subpart also provides for referral of such cases to the Director.

§ 81.42 Prohibitions against discrimination.

Neither GSE shall discriminate in any manner in making any mortgage purchases because of race, color, religion, sex, handicap, familial status, age, or national origin, including any consideration of the age or location of the dwelling or the age of the neighborhood or census tract where the dwelling is located in a manner that has a discriminatory effect.

§ 81.43 Reports; underwriting and appraisal guideline review.

(a) *Reports.* Each GSE, in the AHAR required under § 81.63, shall assess underwriting standards, business practices, repurchase requirements, pricing, fees, and procedures that affect the purchase of mortgages for low- and moderate-income families, or that may yield disparate results based on the race, color, religion, sex, handicap, familial status, age, or national origin of the borrower, including revisions thereto to promote affordable housing or fair lending.

(b) *Review of Underwriting and Appraisal Guidelines.* The Secretary shall periodically review and comment on the underwriting and appraisal guidelines of each enterprise to ensure that such guidelines are consistent with the Fair Housing Act and 12 U.S.C. 4545.

§ 81.44 Submission of information to the Secretary.

(a) *General.* Upon request from the Secretary, the GSEs shall submit information and data to the Secretary to assist in investigating whether any mortgage lender with which the GSE does business has failed to comply with the Fair Housing Act or ECOA.

(b) *Information requests and submissions.* (1) *Information requests by the Secretary.* The Secretary may require the GSEs to submit information to assist in Fair Housing Act or ECOA investigations of lenders. Under FHEFSSA, other Federal agencies responsible for the enforcement of ECOA must submit requests for information from the GSEs through the Secretary. For matters involving only ECOA, the Secretary will only issue requests for information upon request from the appropriate Federal agency responsible for ECOA.

(2) *Information from established data systems.* The Secretary may request that a GSE generate information or reports from its data system(s) to assist a Fair Housing Act or ECOA investigation.

(3) *GSE replies.* A GSE receiving any request(s) for information under this section shall reply in a complete and timely manner with any and all information that it is privy to and collects that is responsive to the request.

(c) *Submission to ECOA enforcers.* The Secretary shall submit any information received under paragraph (b) of this section concerning compliance with ECOA to appropriate Federal agencies responsible for ECOA enforcement, as provided in section 704 of ECOA.

§ 81.45 Obtaining and disseminating information.

(a) The Secretary shall obtain information from other regulatory and enforcement agencies of the Federal Government and State and local governments regarding violations by lenders of the Fair Housing Act, ECOA, and/or State or local fair housing/lending laws, and shall make such information available to the GSEs as the Secretary deems appropriate in accordance with applicable law regarding the confidentiality of supervisory information and the right to financial privacy, and subject to the terms of memoranda of understanding and other arrangements between the Secretary and Federal financial regulators and other agencies. In addition, the Secretary shall make information that the Secretary possesses regarding violations of the Fair Housing Act available to the GSEs.

(b) As contemplated in paragraph (a) of this section, the Secretary shall obtain information regarding violations by lenders of the Fair Housing Act or ECOA involving discrimination with respect to the availability of credit in a residential real-estate-related transaction from other Federal regulatory or enforcement agencies. The Secretary will obtain information from regulators regarding violations of ECOA by lenders only in circumstances in which there is either more than a single ECOA violation, or the ECOA violation could also be a violation of the Fair Housing Act.

§ 81.46 Remedial actions.

(a) *General.* The Secretary shall direct the GSEs to take one or more remedial actions, including suspension, probation, reprimand or settlement, against lenders found to have engaged in discriminatory lending practices in violation of the Fair Housing Act or ECOA, pursuant to a final adjudication on the record and an opportunity for a hearing under subchapter II of chapter 5 of title 5, United States Code.

(b) *Definitions.* For purposes of this subpart, the following definitions apply:

Indefinite suspension means that, until directed to do otherwise by the Secretary, the GSEs will refrain from purchasing mortgages from a lender.

Probation means that, for a fixed period of time specified by the Secretary, a lender that has been found to have violated the Fair Housing Act or ECOA will be subject automatically to more severe sanctions than probation,

e.g., suspension, if further violations are found.

Remedial action includes a reprimand, probation, temporary suspension, indefinite suspension, or settlement.

Reprimand means a written letter to a lender from a GSE, which has been directed to be sent by the Secretary, stating that the lender has violated the Fair Housing Act or ECOA and warning of the possibility that the Secretary may impose more severe remedial actions than reprimand if any further violation occurs.

Temporary Suspension means that, for a fixed period of time specified by the Secretary, the GSEs will not purchase mortgages from a lender.

(c) *Institution of remedial actions.* (1) The Secretary shall direct the GSE to take remedial action(s) against a lender charged with violating ECOA only after a final determination on the charge has been made by an appropriate United States District Court or any other court of competent jurisdiction. The Secretary shall direct the GSE to take remedial action(s) against a lender charged with violating the Fair Housing Act only after a final determination on the matter has been made by a United States Court, a HUD Administrative Law Judge, or the Secretary.

(2) Following a final determination sustaining a charge against a lender for violating the Fair Housing Act or ECOA, in accordance with paragraph (c)(1) of this section, the Secretary shall determine the remedial action(s) that the GSE is to be directed to take for such violation.

(3) In determining the appropriate remedial action(s), the Secretary shall solicit and fully consider the views of the Federal financial regulator responsible for the subject lender concerning the action(s) that are contemplated to be directed against such lender, prior to directing any such action(s). If such responsible Federal financial regulator makes a written determination that a particular remedial action would threaten the financial safety and soundness of a Federally-insured lender, the Secretary shall consider other remedial actions. Where warranted, the Secretary also shall solicit and fully consider the views of the Director regarding the effect of the action(s) that are contemplated on the safety and soundness of the GSE. In determining what action(s) to direct, the Secretary will also, without limitation, consider the following:

(i) The gravity of the violation;

(ii) The extent to which other action has been taken against the lender for discriminatory activities;

(iii) Whether the lender's actions demonstrate a discriminatory pattern or practice or an individual instance of discrimination;

(iv) The impact or seriousness of the harm;

(v) The number of people affected by the discriminatory act(s);

(vi) Whether the lender operates an effective program of self assessment and correction;

(vii) The extent of any actions or programs by the lender designed to compensate victims and prevent future fair lending violations;

(viii) The extent that a finding of liability against a lender is based on a lender's use of a facially-neutral underwriting guideline of a secondary mortgage market entity applied appropriately by the lender in order to sell loans to that secondary mortgage market entity; and

(ix) Any other information deemed relevant by the Secretary.

(d) *Notice of remedial action(s).* (1) Following the Secretary's decision concerning the appropriate remedial action(s) that the GSE is to be directed to take, the Secretary shall prepare and issue to the GSE and the lender a written notice setting forth the remedial action(s) to be taken and the date such remedial action(s) are to commence. The Notice shall inform the lender of its right to request a hearing on the appropriateness of the proposed remedial action(s), within 20 days of service of the Notice, by filing a request with the Docket Clerk, HUD Office of Administrative Law Judges.

(2) Where a lender does not timely request a hearing on a remedial action, the GSE shall take the action in accordance with the Notice.

(e) *Review and decision on remedial action(s).* (1) Where a lender timely requests a hearing on a remedial action, a hearing shall be conducted before a HUD Administrative Law Judge (ALJ) and a final decision rendered in accordance with the procedures set forth in 24 CFR 30.10, 30.15, and subpart E of part 30 of this title, to the extent such provisions are not inconsistent with this subpart or FHEFSSA. The lender and the Secretary, but not the GSE, shall be parties to the action. At such hearing, the appropriateness of the remedial action for the violation(s) will be the sole matter for review. The validity or appropriateness of the underlying determination on the violation(s) shall not be subject to review at such hearing.

(2) The Secretary shall transmit to the GSEs each final decision by HUD on a remedial action and any dispositive settlement of a proceeding on such action.

(3) The GSE shall take the action(s) set forth in a final decision by HUD on remedial action(s) or any dispositive settlement of such a proceeding setting forth remedial action(s) in accordance with such decision or settlement.

§ 81.47 Violations of provisions by the GSEs.

(a) FHEFSSA empowers the Director of OFHEO to initiate enforcement actions for GSE violations of the provisions of section 1325 of FHEFSSA and these regulations. The Secretary shall refer violations and potential violations of 12 U.S.C. 4545 and this subpart C to the Director.

(b) Where a private complainant or the Secretary is also proceeding against a GSE under the Fair Housing Act, the Assistant Secretary for Fair Housing and Equal Opportunity shall conduct the investigation of the complaint and make the reasonable cause/no reasonable cause determination required by section 810(g) of the Fair Housing Act. Where reasonable cause is found, a charge shall be issued and the matter will proceed to enforcement pursuant to sections 812(b) and (o) of the Fair Housing Act.

Subpart D—New Program Approval

§ 81.51 General.

This subpart details the requirements and procedures for review of requests for new program approval by the Secretary.

§ 81.52 Requirement for program requests.

(a) Before implementing a new program, a GSE shall submit a request for new program approval ("program request") to the Secretary for the Secretary's review. Submission of a program request is not required where the program that the GSE proposes to implement is not significantly different from:

(1) A program that has already been approved in writing by the Secretary; or

(2) A program that was engaged in by the GSE prior to October 28, 1992.

(b) If a GSE does not submit a program request for a program, the Secretary may request information about the program and require that the GSE submit a program request. The GSE shall comply with the request and may indicate in such response its views respecting whether the program is subject to the Secretary's review.

§ 81.53 Processing of program requests.

(a) Each program request submitted to the Secretary by a GSE shall be in writing and shall be submitted to the Secretary and the Director, Office of Government-Sponsored Enterprises, Department of Housing and Urban Development, Washington, D.C. For those requests submitted before 1 year after the effective date of the regulations issued by the Director of OFHEO under 12 U.S.C. 4611(e), the GSE shall simultaneously submit the program request to the Director.

(b) Each program request shall include:

(1) An opinion from counsel stating the statutory authority for the new program (Freddie Mac Act section 305(a) (1), (4), or (5), or Fannie Mae Charter Act section 302(b)(2)–(5) or 304);

(2) A good-faith estimate of the anticipated dollar volume of the program over the short- and long-term;

(3) A full description of: (i) The purpose and operation of the proposed program;

(ii) The market targeted by the program;

(iii) The delivery system for the program;

(iv) The effect of the program on the mortgage market; and

(v) Material relevant to the public interest.

(c) Following receipt of a program request, the Secretary and, where a program request is submitted to the Director pursuant to paragraph (a) of this section, the Director shall review the program request.

(d) *Transition standard for approval.* Program requests submitted by the GSEs before the date occurring 1 year after the effective date of the regulations issued by the Director under 12 U.S.C. 4611(e) shall be approved or disapproved by the Secretary as provided in 12 U.S.C. 4542(b)(2).

(e) *Permanent standard for approval by the Secretary.* Program requests submitted after the date occurring one year after the effective date of the regulations issued by the Director under 12 U.S.C. 4611(e) establishing the risk-based capital test shall be approved by the Secretary in accordance with 12 U.S.C. 4542(b)(1).

(f) *Time for review.* Unless the Secretary and, where appropriate, the Director of OFHEO, need additional information, a program request shall be approved or disapproved within 45 days from the date it is received by the Director, Office of Government-Sponsored Enterprises, and, where applicable, the Director of OFHEO. If within 45 days after receiving a request, the Secretary or the Director of OFHEO determine that additional information is necessary to review the matter and request such information from the GSE, the Secretary may extend the time period for consideration for an additional 15 days.

(1) Where additional information is requested, the GSE must provide the requested information to the Secretary and, where appropriate, the Director, within 10 days after the request for additional information.

(2) If the GSE fails to furnish requested information within 10 days after the request for information, the Secretary may deny the GSE's request for approval based on such failure and so report to the Committees of Congress in accordance with paragraph (g) of this section.

(g) *Approval or report.* Within 45 days or, if the period is extended, 60 days following receipt of a program request, the Secretary shall approve the request, in writing, or submit a report to the Committee on Banking and Financial Services of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate, explaining the reasons for not approving the request. If the Secretary does not act within this time period, the GSE's program request will be deemed approved.

§ 81.54 Review of disapproval.

(a) *Programs disapproved as unauthorized.* (1) Where the Secretary disapproves a program request on the grounds that the new program is not authorized, as defined in § 81.53(d) or (e), the GSE may, within 30 days of the date of receipt of the decision on disapproval, request an opportunity to review and supplement the administrative record for the decision, in accordance with paragraphs (a) (2) and (3) of this section.

(2) *Supplementing in writing.* A GSE supplementing the record in writing must submit written materials within 30 days after the date of receipt of the decision on disapproval, but no later than the date of a meeting, if requested, under paragraph (a)(3) of this section.

(3) *Meeting.* Within 10 days of the date of receipt of the decision of disapproval, the GSE may request a meeting. If the request for the meeting is timely, the Secretary shall arrange such a meeting, which shall be conducted by the Secretary or the Secretary's designee within 10 working days after receipt of the request. The GSE may be represented by counsel and may submit relevant written materials to supplement the record.

(4) *Determination.* The Secretary shall:

(i) In writing and within 10 days after submission of any materials under paragraph (a)(2) of this section or the conclusion of any meeting under paragraph (a)(3) of this section, whichever is later, withdraw, modify, or affirm the program disapproval; and

(ii) Provide the GSE with that decision.

(b) *Programs disapproved under public interest determination.* When a program request is disapproved because the Secretary determines that the program is not in the public interest or the Director makes the determination in 12 U.S.C. 4542(b)(2)(B), the Secretary shall provide the GSE with notice of, and opportunity for, a hearing on the record regarding such disapproval. A request for a hearing must be submitted by a GSE within 30 days of the Secretary's submission of a report under § 81.53(g) disapproving a program request or the provision of the notice under this paragraph (b), whichever is later. The procedures for such hearings are provided in subpart G of this part.

Subpart E—Reporting Requirements

§ 81.61 General.

This subpart establishes data submission and reporting requirements to carry out the requirements of the GSEs' Charter Acts and FHEFSSA.

§ 81.62 Mortgage reports.

(a) *Loan-level data elements.* To implement the data collection and submission requirements for mortgage data and to assist the Secretary in monitoring the GSEs' housing goal activities, each GSE shall collect and compile computerized loan-level data on each mortgage purchased in accordance with 12 U.S.C. 1456(e) and 1723a(m). The Secretary may, from time-to-time, issue a list entitled "Required Loan-level Data Elements" specifying the loan-level data elements to be collected and maintained by the GSEs and provided to the Secretary. The Secretary may revise the list by written notice to the GSEs.

(b) *Quarterly Mortgage reports.* Each GSE shall submit to the Secretary quarterly a Mortgage Report. The fourth quarter report shall serve as the Annual Mortgage Report and shall be designated as such.

(1) Each Mortgage Report shall include:

(i) Aggregations of the loan-level mortgage data compiled by the GSE under paragraph (a) of this section for year-to-date mortgage purchases, in the format specified in writing by the Secretary; and

(ii) Year-to-date dollar volume, number of units, and number of mortgages on owner-occupied and rental properties purchased by the GSE that do and do not qualify under each housing goal as set forth in this part.

(2) To facilitate the Secretary's monitoring of the GSE's housing goal activities, the Mortgage Report for the second quarter shall include year-to-date computerized loan-level data consisting of the data elements required under paragraph (a) of this section.

(3) To implement the data collection and submission requirements for mortgage data and to assist the Secretary in monitoring the GSE's housing goal activities, each Annual Mortgage Report shall include year-to-date computerized loan-level data consisting of the data elements required by under paragraph (a) of this section.

(c) *Timing of Reports.* The GSEs shall submit the Mortgage Report for each of the first 3 quarters of each year within 60 days of the end of the quarter. Each GSE shall submit its Annual Mortgage Report within 75 days after the end of the calendar year.

(d) *Revisions to Reports.* At any time before submission of its Annual Mortgage Report, a GSE may revise any of its quarterly reports for that year.

(e) *Format.* The GSEs shall submit to the Secretary computerized loan-level data with the Mortgage Report, in the format specified in writing by the Secretary.

§ 81.63 Annual Housing Activities Report.

To comply with the requirements in sections 309(n) of the Fannie Mae Charter Act and 307(f) of the Freddie Mac Act and assist the Secretary in preparing the Secretary's Annual Report to Congress, each GSE shall submit to the Secretary an AHAR including the information listed in those sections of the Charter Acts and as provided in § 81.43(a) of this part. Each GSE shall submit such report within 75 days after the end of each calendar year, to the Secretary the Committee on Banking and Financial Services of the House of Representatives, and the Committee on Banking, Housing, and Urban Affairs of the Senate. Each GSE shall make its AHAR available to the public at its principal and regional offices. Before making any such report available to the public, the GSE may exclude from the report any information that the Secretary has deemed proprietary under subpart F of this part.

§ 81.64 Periodic reports.

Each GSE shall provide to the Secretary all:

(a) Material distributed to the GSE's Housing Advisory Council;

(b) Press releases;

(c) Investor reports;

(d) Proxy statements;

(e) Seller-servicer guides; and

(f) Other information disclosed by the GSE to entities outside of the GSE, but only where the GSE determines that such information is relevant to the Secretary's regulatory responsibilities.

§ 81.65 Other information and analyses.

When deemed appropriate and requested in writing, on a case by-case basis, by the Secretary, a GSE shall furnish the data underlying any of the reports required under this part and shall conduct additional analyses concerning any such report. A GSE shall submit additional reports or other information concerning its activities when deemed appropriate to carry out the Secretary's responsibilities under FHEFSSA or the Charter Acts and requested in writing by the Secretary.

§ 81.66 Submission of reports.

Each GSE shall submit all hard copy reports or other written information required under this subpart to the Secretary and the Director, Office of Government-Sponsored Enterprises. Each GSE shall submit computerized data required under this subpart to the Director, Financial Institutions Regulations, Office of Policy Development and Research. The address for both of these offices is Department of Housing and Urban Development, 451 7th Street, S.W. Washington, D.C. 20410.

Subpart F—Access to Information

§ 81.71 General.

This subpart:

(a) Provides for the establishment of a public-use database to make available to the public mortgage data that the GSEs submit to the Secretary under subsection 309(m) of the Fannie Mae Charter Act and subsection 307(e) of the Freddie Mac Act, and AHAR information that the GSEs submit to the Secretary in the AHAR under subsection 309(n) of the Fannie Mae Charter Act and subsection 307(f) of the Freddie Mac Act;

(b) Establishes mechanisms for the GSEs to designate mortgage data or AHAR information as proprietary information and for the Secretary to determine whether such mortgage data or AHAR information is proprietary information which should be withheld from disclosure;

(c) Addresses the availability of HUD procedures to protect from public disclosure proprietary information and other types of confidential business information submitted by or relating to the GSEs;

(d) Addresses protections from disclosure when there is a request from Congress for information and sets forth protections for treatment of data or information submitted by or relating to the GSEs by HUD officers, employees, and contractors; and

(e) Provides that data or information submitted by or relating to the GSEs that would constitute a clearly unwarranted invasion of personal privacy shall not be disclosed to the public.

§ 81.72 Public-use database and public information.

(a) *General.* Except as provided in paragraph (c) of this section, the Secretary shall establish and make available for public use, a public-use database containing public data as defined in § 81.2.

(b) *Examination of submissions.* Following receipt of mortgage data and AHAR information from the GSEs, the Secretary shall, as expeditiously as possible, examine the submissions for mortgage data and AHAR information that:

(1) Has been deemed to be proprietary information under this part by a temporary order, final order, or regulation in effect at the time of submission;

(2) Has been designated as proprietary information by the GSE in accordance with § 81.73;

(3) Would constitute a clearly unwarranted invasion of personal privacy if such data or information were released to the public; or

(4) Is required to be withheld or, in the determination of the Secretary, is not appropriate for public disclosure under other applicable laws and regulations, including the Trade Secrets Act (18 U.S.C. 1905) and Executive Order 12600.

(c) *Public data and proprietary data.* The Secretary shall place public data in the public-use database. The Secretary shall exclude from the public-use database and from public disclosure:

(1) All mortgage data and AHAR information within the scope of paragraphs (b)(1), (b)(3), and (b)(4) of this section;

(2) Any other mortgage data and AHAR information under (b)(2) when determined by the Secretary under § 81.74 to be proprietary information; and

(3) Mortgage data that is not year-end data.

(d) *Access.* The Secretary shall provide such means as the Secretary determines are reasonable for the public to gain access to the public-use database. To obtain access to the public-use database, the public should contact the Director, Office of Government-Sponsored Enterprises, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone (202) 708–2224 (this is not a toll-free number).

(e) *Fees.* The Secretary may charge reasonable fees to cover the cost of providing access to the public-use database. These fees will include the costs of system access, computer use, copying fees, and other costs.

§ 81.73 GSE request for proprietary treatment.

(a) *General.* A GSE may request proprietary treatment of any mortgage data or AHAR information that the GSE submits to the Secretary. Such a request does not affect the GSE's responsibility to provide data or information required by the Secretary. Where the Secretary grants a request for proprietary treatment, HUD will not include the data or information in the public-use database or publicly disclose the data or information, except as otherwise provided in accordance with this subpart.

(b) *Request for proprietary treatment of mortgage data and AHAR information.* Except as provided in paragraph (c) of this section, a GSE requesting proprietary treatment of mortgage data or AHAR information shall:

(1) Clearly designate those portions of the mortgage data or AHAR information to be treated as proprietary, with a prominent stamp, typed legend, or other suitable form of notice, stating "Proprietary Information—Confidential Treatment Requested by [name of GSE]" on each page or portion of page to which the request applies. If such marking is impractical, the GSE shall attach to the mortgage data or information for which confidential treatment is requested a cover sheet prominently marked "Proprietary Information—Confidential Treatment Requested by [name of GSE];"

(2) Accompany its request with a certification by an officer or authorized representative of the GSE that the mortgage data or information is proprietary; and

(3) Submit any additional statements in support of proprietary designation that the GSE chooses to provide.

(c) *Alternative procedure available for mortgage data or AHAR information subject to a temporary order, final order, or regulation in effect.* When the request for proprietary treatment pertains to mortgage data or AHAR information that has been deemed proprietary by the Secretary under a temporary order, final order, or regulation in effect, the GSE may reference such temporary order, final order, or regulation in lieu of complying with paragraphs (b)(2) and (3) of this section.

(d) *Nondisclosure during pendency.* Except as may otherwise be required by law, during the time any Request for Proprietary Treatment under § 81.73 is pending determination by the Secretary, the data or information submitted by the GSE that is the subject of the request shall not be disclosed to, or be subject to examination by, the public or any person or representative of any person or agency outside of HUD.

§ 81.74 Secretarial determination on GSE request.

(a) *General.* The Secretary shall review all Requests for Proprietary Treatment from the GSEs, along with any other information that the Secretary may elicit from other sources regarding the Request.

(b) *Factors for proprietary treatment.* Except as provided in paragraph (c) of this section, in making the determination of whether to accord proprietary treatment to mortgage data or AHAR information, the Secretary's considerations shall include, but are not limited to:

(1) The type of data or information involved and the nature of the adverse consequences to the GSE, financial or otherwise, that would result from disclosure, including any adverse effect on the GSE's competitive position;

(2) The existence and applicability of any prior determinations by HUD, any other Federal agency, or a court, concerning similar data or information;

(3) The measures taken by the GSE to protect the confidentiality of the mortgage data or AHAR information in question, and similar data or information, before and after its submission to the Secretary;

(4) The extent to which the mortgage data or AHAR information is publicly available including whether the data or information is available from other entities, from local government offices or records, including deeds, recorded mortgages, and similar documents, or from publicly available data bases;

(5) The difficulty that a competitor, including a seller/servicer, would face in obtaining or compiling the mortgage data or AHAR information; and

(6) Such additional facts and legal and other authorities as the Secretary may consider appropriate, including the extent to which particular mortgage data or AHAR information, when considered together with other information, could reveal proprietary information.

(c) *Alternative criterion for mortgage data or AHAR information subject to a temporary order, final order, or regulation in effect.* Where the request for proprietary treatment pertains to mortgage data or AHAR information that has been deemed proprietary by the Secretary under a temporary order, final order, or regulation in effect, the Secretary shall grant the request with respect to any mortgage data or AHAR information which comes within the order or regulation.

(d) *Determination of proprietary treatment.* The Secretary shall determine, as expeditiously as possible, whether mortgage data or AHAR information designated as proprietary by a GSE is proprietary information, or whether it is not proprietary and subject to inclusion in the public-use database and public release notwithstanding the GSE's request.

(e) *Action when according proprietary treatment to mortgage data and AHAR information.* (1) When the Secretary determines that mortgage data or AHAR information designated as proprietary by a GSE is proprietary, and the mortgage data or AHAR information is not subject to a temporary order, a final order, or a regulation in effect providing that the mortgage data or AHAR information is not subject to public disclosure, the Secretary shall notify the GSE that the request has been granted. In such cases, the Secretary shall issue either a temporary order, a final order, or a regulation providing that the mortgage data or information is not subject to public disclosure. Such a temporary order, final order, or regulation shall:

(i) Document the reasons for the determination; and

(ii) Be provided to the GSE, made available to members of the public, and published in the **Federal Register**, except that any portions of such order or regulation that would reveal the proprietary information shall be withheld from public disclosure. Publications of temporary orders shall invite public comments when feasible.

(2) Where the Secretary determines that such mortgage data or information is proprietary, the Secretary shall not make it publicly available, except as otherwise provided in accordance with this subpart.

(f) *Determination not to accord proprietary treatment to mortgage data and AHAR information or to seek further information.* When the Secretary determines that such mortgage data or AHAR information designated as proprietary by a GSE may not be proprietary, that the request may be granted only in part, or that questions exist concerning the request, the following procedure shall apply:

(1) The Secretary shall provide the GSE with an opportunity for a meeting with HUD to discuss the matter, for the

purpose of gaining additional information concerning the request.

(2) Following the meeting, based on the Secretary's review of the mortgage data or AHAR information that is the subject of a request and the GSE's objections, if any, to disclosure of such mortgage data or AHAR information, the Secretary shall make a determination:

(i) If the Secretary determines to withhold from the public-use database as proprietary the mortgage data or AHAR information that is the subject of a request, the procedures in paragraph (e) of this section shall apply; or

(ii) If the Secretary determines that any mortgage data or AHAR information that is the subject of a request is not proprietary, the Secretary shall provide notice in writing to the GSE of the reasons for this determination, and such notice shall provide that the Secretary shall not release the mortgage data or AHAR information to the public for 10 working days.

§ 81.75 Proprietary information withheld by order or regulation.

Following a determination by the Secretary that mortgage data or AHAR information is proprietary information under FHEFSSA, the Secretary shall expeditiously issue a temporary order, final order, or regulation withholding the mortgage data or AHAR information from the public-use database and from public disclosure by HUD in accordance with 12 U.S.C. 4546. The Secretary may, from time-to-time, by regulation or order, issue a list entitled "GSE Mortgage Data and AHAR Information: Proprietary Information/Public-Use Data" providing that certain information shall be treated as proprietary information. The Secretary may modify the list by regulation or order.

§ 81.76 FOIA requests and protection of GSE information.

(a) *General.* HUD shall process FOIA requests for information submitted to the Secretary by the GSEs in accordance with:

(1) HUD's FOIA and Privacy Act regulations, 24 CFR parts 15 and 16;

(2) 12 U.S.C. 4525, 4543, and 4546 and this subpart; and

(3) Other applicable statutes, regulations, and guidelines, including the Trade Secrets Act, 18 U.S.C. 1905, and Executive Order 12600. In responding to requests for data or information submitted by or relating to the GSEs, the Secretary may invoke provisions of these authorities to protect data or information from disclosure.

(b) *Protection of confidential business information other than mortgage data and AHAR information.* When a GSE seeks to protect from disclosure confidential business information, the GSE may seek protection of such confidential business information pursuant to the provisions of HUD's FOIA regulations at 24 CFR part 15, without regard to whether or not it is mortgage data or AHAR information.

(c) *Processing of FOIA requests*—(1) *FOIA Exemption (b)(4).* HUD will process FOIA requests for confidential business information of the GSEs to which FOIA exemption 4 may apply in accordance with 24 CFR part 15, and the predisclosure notification procedures of Executive Order 12,600.

(2) *FOIA Exemption (b)(8).* Under section 1319F of FHEFSSA, the Secretary may invoke FOIA exemption (b)(8) to withhold from the public any GSE data or information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of HUD. HUD may make data or information available for the confidential use of other government agencies in their official duties or functions, but all data or information remains the property of HUD and any unauthorized use or disclosure of such data or information may be subject to the penalties of 18 U.S.C. 641.

(3) *Other FOIA exemptions.* Under 24 CFR part 15, the Secretary may invoke other exemptions including, without limitation, exemption (b)(6) (5 U.S.C. 552(b)(6)), to protect data and information that would constitute a clearly unwarranted invasion of personal privacy.

(d) *Protection of information by HUD officers and employees.* The Secretary will institute all reasonable safeguards to protect data or information submitted by or relating to either GSE, including, but not limited to, advising all HUD officers and employees having access to data or information submitted by or relating to either GSE of the legal restrictions against unauthorized disclosure of such data or information under HUD Standards of Conduct regulations, 24 CFR part O; the Government-wide Standards of Ethical Conduct, 5 CFR part 2635; and the Trade Secrets Act, 18 U.S.C. 1905. Officers and employees shall be advised of the penalties for unauthorized disclosure, ranging from disciplinary action under 24 CFR part O and 5 CFR part 2635 to criminal prosecution.

(e) *Protection of information by contractors.* (1) In contracts and agreements entered into by HUD where contractors have access to data or information submitted by or relating to either GSE, HUD shall include detailed provisions specifying that:

(i) Neither the contractor nor any of its officers, employees, agents, or subcontractors may release data submitted by or relating to either GSE without HUD's authorization; and

(ii) Unauthorized disclosure may be a basis for:

(A) Terminating the contract for default;

(B) Suspending or debarring the contractor; and

(C) Criminal prosecution of the contractor, its officers, employees, agents, or subcontractors under the Federal Criminal Code.

(2) Contract provisions shall require safeguards against unauthorized disclosure, including training of contractor and subcontractor agents and employees, and provide that the contractor will indemnify and hold HUD harmless against unauthorized disclosure of data or information belonging to the GSEs or HUD.

§ 81.77 Requests for GSE information on behalf of Congress, the Comptroller General, a subpoena, or other legal process.

(a) *General.* With respect to information submitted by or relating to the GSEs, nothing in this subpart F may be construed to grant authority to the Secretary under FHEFSSA to withhold any information from or to prohibit the disclosure of any information to the following persons or entities:

(1) Either House of Congress or, to the extent of matters within its jurisdiction, any committee or subcommittee thereof, or any joint committee of Congress or subcommittee of any such joint committee;

(2) The Comptroller General, or any of the Comptroller General's authorized representatives, in the course of the performance of the duties of the General Accounting Office;

(3) A court of competent jurisdiction pursuant to a subpoena; or

(4) As otherwise compelled by law.

(b) *Notice of proprietary or confidential nature of GSE information.* (1) In releasing data or information in response to a request as set out in paragraph (a) of this section, the Secretary will, where applicable, include a statement with the data or information to the effect that:

(i) The GSE regards the data or information as proprietary information and/or confidential business information;

(ii) Public disclosure of the data or information may cause competitive harm to the GSE; and

(iii) The Secretary has determined that the data or information is proprietary information and/or confidential business information.

(2) To the extent practicable, the Secretary will provide notice to the GSE after a request from the persons or entities described in paragraphs (a)(1)–(4) of this section for proprietary information or confidential business information is received and before the data or information is provided in response to the request.

(c) *Procedures for requests pursuant to subpoena or other legal process.* The procedures in 24 CFR 15.71–15.74 shall be followed when a subpoena, order, or other demand of a court or other authority is issued for the production or disclosure of any GSE data or information that:

(1) Is contained in HUD's files;

(2) Relates to material contained in HUD's files; or

(3) Was acquired by any person while such person was an employee of HUD, as a part of the performance of the employee's official duties or because of the employee's official status.

(d) *Requests pursuant to subpoena or other legal process not served on HUD.* If an individual who is not a HUD employee or an entity other than HUD is served with a subpoena, order, or other demand of a court or authority for the production or disclosure of HUD data or information relating to a GSE and such data or information may not be disclosed to the public under this subpart or 24 CFR part 15, such individual or entity shall comply with 24 CFR 15.71–15.74 as if the individual or entity is a HUD employee, including immediately notifying HUD in accordance with the procedures set forth in 24 CFR 15.73(a).

(e) *Reservation of additional actions.* Nothing in this section precludes further action by the Secretary, in his or her discretion, to protect data or information submitted by a GSE from unwarranted disclosure in appropriate circumstances.

Subpart G—Procedures for Actions and Review of Actions

§ 81.81 General.

This subpart sets forth procedures for:

(a) The Secretary to issue cease-and-desist orders and impose civil money penalties to enforce the housing goal provisions implemented in subpart B of this part and the information submission and reporting requirements implemented in subpart E of this part; and

(b) Hearings, in accordance with 12 U.S.C. 4542(c)(4)(B), on the Secretary's disapproval of new programs that the Secretary determines are not in the public interest.

§ 81.82. Cease-and-desist proceedings.

(a) *Issuance.* The Secretary may issue and serve upon a GSE a written notice of charges justifying issuance of a cease-and-desist order, if the Secretary determines the GSE:

(1) Has failed to submit, within the time prescribed in § 81.22, a housing plan that substantially complies with 12 U.S.C. 4566(c), as implemented by § 81.22;

(2) Is failing or has failed, or there is reasonable cause to believe that the GSE is about to fail, to make a good-faith effort to comply with a housing plan submitted to and approved by the Secretary; or

(3) Has failed to submit any of the information required under sections 309(m) or (n) of the Fannie Mae Charter Act, sections 307(e) or (f) of the Freddie Mac Act, or subpart E of this part.

(b) *Amount of penalty.* The amount of the penalty shall not exceed:

(1) For any failure described in paragraph (a)(1) of this section, $25,000 for each day that the failure occurs; and

(2) For any failure described in paragraphs (a)(2) or (a)(3) of this section, $10,000 for each day that the failure occurs.

(c) *Factors in determining amount of penalty.* In determining the amount of a penalty under this section, the Secretary shall consider the factors in 12 U.S.C. 4585(c)(2) including the public interest.

(d) *Procedures—(1) Notice of Intent.* The Secretary shall notify the GSE in writing of the Secretary's determination to impose a civil money penalty by issuing a Notice of Intent to Impose Civil Money Penalties ("Notice of Intent"). The Notice of Intent shall provide:

(i) A concise statement of the facts constituting the alleged misconduct;

(ii) The amount of the civil money penalty;

(iii) Notice of the GSE's right to a hearing on the record;

(iv) The procedures to follow to obtain a hearing;

(v) A statement of the consequences of failing to request a hearing; and

(vi) The date the penalty shall be due unless the GSE contests the matter.

(2) To appeal the Secretary's decision to impose a civil money penalty, the GSE shall, within 20 days of service of the Notice of Intent, file a written Answer with the Chief Docket Clerk, Office of Administrative Law Judges, Department of Housing and Urban Development, at the address provided in the Notice of Intent.

(3) *Administrative Law Judge.* A HUD ALJ shall preside over any hearing conducted under this section, in accordance with § 81.84 and, to the extent the provisions are not inconsistent with any of the procedures in this part, FHEFSSA, or §§ 30.10 and 30.15 and subpart E of part 30 of this title.

(4) *Issuance of order.* If the GSE consents to the issuance of the order or the ALJ finds, on the hearing record, that a preponderance of the evidence establishes the conduct specified in the notice of charges, the ALJ may issue an order imposing a civil money penalty.

(e) *Reservation of additional actions.* Nothing in this section precludes further action by the Secretary, in his or her discretion, to protect data or information submitted by a GSE from unwarranted disclosure in appropriate circumstances.

Subpart G—Procedures for Actions and Review of Actions

§ 81.81 General.

This subpart sets forth procedures for:

(a) The Secretary to issue cease-and-desist orders and impose civil money penalties to enforce the housing goal provisions implemented in subpart B of this part and the information submission and reporting requirements implemented in subpart E of this part; and

(b) Hearings, in accordance with 12 U.S.C. 4542(c)(4)(B), on the Secretary's disapproval of new programs that the Secretary determines are not in the public interest.

§ 81.82. Cease-and-desist proceedings.

(a) *Issuance.* The Secretary may issue and serve upon a GSE a written notice of charges justifying issuance of a cease-and-desist order, if the Secretary determines the GSE:

(1) Has failed to submit, within the time prescribed in § 81.22, a housing plan that substantially complies with 12 U.S.C. 4566(c), as implemented by § 81.22;

(2) Is failing or has failed, or there is reasonable cause to believe that the GSE is about to fail, to make a good-faith effort to comply with a housing plan submitted to and approved by the Secretary; or

(3) Has failed to submit any of the information required under sections 309(m) or (n) of the Fannie Mae Charter Act, sections 307(e) or (f) of the Freddie Mac Act, or subpart E of this part.

(b) *Procedures—(1) Content of notice.* The notice of charges shall provide:

(i) A concise statement of the facts constituting the alleged misconduct and the violations with which the GSE is charged;

(ii) Notice of the GSE's right to a hearing on the record;

(iii) A time and date for a hearing on the record;

(iv) A statement of the consequences of failing to contest the matter; and

(v) The effective date of the order if the GSE does not contest the matter.

(2) *Administrative Law Judge.* A HUD Administrative Law Judge (ALJ) shall preside over any hearing conducted under this section. The hearing shall be conducted in accordance with § 81.84 and, to the extent the provisions are not inconsistent with any of the procedures in this part or FHEFSSA, with §§ 30.10 and 30.15 and subpart E of part 30 of this title.

(3) *Issuance of order.* If the GSE consents to the issuance of the order or the ALJ finds, based on the hearing record, that a preponderance of the evidence established the conduct specified in the notice of charges, the ALJ may issue and serve upon the GSE an order requiring the GSE to:

(i) Submit a housing plan that substantially complies with 12 U.S.C. 4566(c), as implemented by § 81.22;

(ii) Comply with a housing plan; or

(iii) Provide the information required under subpart E of this part.

(4) *Effective date.* An order under this section shall be effective as provided in 12 U.S.C. 4581(c) and § 81.84(m).

§ 81.83 Civil money penalties.

(a) *Imposition.* The Secretary may impose a civil money penalty on a GSE that has failed:

(1) To submit, within the time prescribed in § 81.22, a housing plan

(5) *Consultation with the Director.* In the Secretary's discretion, the Director of OFHEO may be requested to review any Notice of Intent, determination, order, or interlocutory ruling arising from a hearing.

(e) *Action to collect penalty.* The Secretary may request the Attorney General of the United States to bring an action to collect the penalty, in accordance with 12 U.S.C. 4585(d). Interest on, and other charges for, any unpaid penalty may be assessed in accordance with 31 U.S.C. 3717.

(f) *Settlement by Secretary.* The Secretary may compromise, modify, or remit any civil money penalty that may be, or has been, imposed under this section.

§ 81.84 Hearings.

(a) *Applicability.* The hearing procedures in this section apply to hearings on the record to review cease-and-desist orders, civil money penalties, and new programs disapproved based upon a determination by the Secretary that such programs are not in the public interest, in accordance with 12 U.S.C. 4542(c)(4)(B).

(b) *Hearing requirements.* (1) Hearings shall be held in the District of Columbia.

(2) Hearings shall be conducted by a HUD ALJ authorized to conduct proceedings under 24 CFR part 30.

(c) *Timing.* Unless an earlier or later date is requested by a GSE and the request is granted by the ALJ, a hearing shall be fixed for a date not earlier than 30 days, nor later than 60 days, after:

(1) Service of the notice of charges under § 81.82;

(2) Service of the Notice of Intent to Impose Civil Money Penalty(ies) under § 81.83; or

(3) Filing of a request for a hearing under § 81.54(b).

(d) *Procedure.* Hearings shall be conducted in accordance with the procedures set forth in 24 CFR 30.10, 30.15, and subpart E of part 30 of this title to the extent that such provisions are not inconsistent with any of the procedures in this part or FHEFSSA.

(e) *Service.* (1) *To GSE.* Any service required or authorized to be made by the Secretary under this subpart G may be made to the Chief Executive Officer of a GSE or any other representative as the GSE may designate in writing to the Secretary.

(2) *How service may be made.* A serving party shall use one or more of the following methods of service:

(i) Personal service;

(ii) Delivering the papers to a reliable commercial courier service, overnight delivery service, or the U.S. Post Office for Express Mail Delivery; or

(iii) Transmission by electronic media, only if the parties mutually agree. The serving party shall mail an original of the filing after any proper service using electronic media.

(f) *Subpoena authority*—(1) *General.* In the course of or in connection with any hearing, the Secretary and the ALJ shall have the authority to:

(i) Administer oaths and affirmations;

(ii) Take and preserve testimony under oath;

(iii) Issue subpoenas and subpoenas duces tecum; and

(iv) Revoke, quash, or modify subpoenas and subpoenas duces tecum issued under this paragraph (f).

(2) *Witnesses and documents.* The attendance of witnesses and the production of documents provided for in this section may be required from any place in any State. A witness may be required to appear, and a document may be required to be produced, at:

(i) The hearing; and

(ii) Any place that is designated for attendance at a deposition or production of a document under this section.

(3) *Enforcement.* In accordance with 12 U.S.C. 4588(c), the Secretary may request the Attorney General of the United States to enforce any subpoena or subpoena duces tecum issued pursuant to this section. If a subpoenaed person fails to comply with all or any portion of a subpoena issued pursuant to this paragraph (f), the subpoenaing party or any other aggrieved person may petition the Secretary to seek enforcement of the subpoena. A party's petition to the Secretary for enforcement of a subpoena in no way limits the sanctions that may be imposed by the ALJ on a party who fails to comply with a subpoena issued under this paragraph (f).

(4) *Fees and expenses.* Witnesses subpoenaed under this section shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States and may seek reasonable expenses and attorneys fees in any court having jurisdiction of any proceeding instituted under this section. Such expenses and fees shall be paid by the GSE or from its assets.

(g) *Failure to appear.* If a GSE fails to appear at a hearing through a duly authorized representative, the GSE shall be deemed to have consented to the issuance of the cease-and-desist order, the imposition of the penalty, or the disapproval of the new program, whichever is applicable.

(h) *Public hearings.* (1) All hearings shall be open to the public, unless the ALJ determines that an open hearing would be contrary to the public interest. Where a party makes a timely motion to close a hearing and the ALJ denies the motion, such party may file with the Secretary within 5 working days a request for a closed hearing, and any party may file a reply to such a request within 5 working days of service of such a motion. Such motions, requests, and replies are governed by § 30.515 of this title. When a request for a closed hearing has been filed with the Secretary under this paragraph (h)(1), the hearing shall be stayed until the Secretary has advised the parties and the ALJ, in writing, of the Secretary's decision on whether the hearing should be closed.

(2) Failure to file a timely motion, request or reply is deemed a waiver of any objection regarding whether the hearing will be public or closed. A party must file any motion for a closed hearing within 10 days after:

(i) Service of the notice of charges under § 81.82;

(ii) Service of the Notice of Intent to Impose Civil Money Penalt(ies) under § 81.83; or

(iii) Filing of a request for a hearing under § 81.54(b).

(i) *Decision of ALJ.* After each hearing, the ALJ shall issue an initial decision and serve the initial decision on the GSE, the Secretary, any other parties, and the HUD General Counsel. This service will constitute notification that the case has been submitted to the Secretary.

(j) *Review of initial decision*—(1) *Secretary's discretion.* The Secretary, in the Secretary's discretion, may review any initial decision.

(2) *Requested by a party.* Any party may file a notice of appeal of an initial decision to the Secretary in accordance with § 30.910 of this title. Any waiver of the limitations contained in § 30.910(c) and (d) of this title on the number of pages for notices of appeal and responses, of the time limitation in § 30.910 of this title for filing a notice of appeal of the initial decision, or any other waivers under this subpart shall not be subject to the publication requirements in 42 U.S.C. 3535(q).

(k) *Final decision.* (1) The initial decision will become the final decision unless the Secretary issues a final decision within 90 days after the initial decision is served on the Secretary.

(2) *Issuance of final decision by Secretary.* The Secretary may review any finding of fact, conclusion of law, or order contained in the initial decision of the ALJ and may issue a final decision in the proceeding. Any decision shall include findings of fact upon which the decision is predicated. The Secretary may affirm, modify, or set aside, in whole or in part, the initial decision or may remand the initial decision for further proceedings. The final decision shall be served on all parties and the ALJ.

(l) *Decisions on remand.* If the initial decision is remanded for further proceedings, the ALJ shall issue an initial decision on remand within 60 days of the date of issuance of the decision to remand, unless it is impractical to do so.

(m) *Modification.* The Secretary may modify, terminate, or set aside any order in accordance with 12 U.S.C. 4582(b)(2).

§ 81.85 Public disclosure of final orders and agreements.

(a) *Disclosure.* Except as provided in paragraph (b) of this section, the Secretary shall make available to the public final orders; written agreements and statements; and modifications and terminations of those orders, agreements, and statements, as set forth in 12 U.S.C. 4586(a) and the implementing regulations in this subpart G. The retention of records of these orders, agreements, and statements, and their modifications and terminations, are governed by 12 U.S.C. 4586(e).

(b) *Exceptions to disclosure.* Exceptions to disclosure will be determined in accordance with 12 U.S.C. 4586 (c), (d), and (f) and paragraph (c) of this section.

(c) *Filing documents under seal*—(1) *Request by party.* Upon the denial by the ALJ of a motion for a protective order, any party may request the Secretary to file any document or part of a document under seal if the party believes that disclosure of the document would be contrary to the public interest. Any other party may file with the Secretary a reply to such a request within 5 working days after a request is made or some other time to be determined by the Secretary. Such requests and replies are governed by § 30.515 of this title.

(2) *Effect of request.* A document or part of a document that is the subject of a timely request to the Secretary to file under seal will not be disclosed under this section until the Secretary has advised the parties and the ALJ, in writing, of the Secretary's decision on whether the document or part of a document should be filed under seal. The ALJ shall take all appropriate steps to preserve the confidentiality of such documents or parts of documents, including closing portions of the hearing to the public.

(3) *Time of request.* Failure to file with the Secretary a timely request or a reply is deemed a waiver of any objection regarding the decision on whether a document is to be disclosed. A party must make its request to file a document under seal at least 10 days before the commencement of the hearing. A request may be filed at any other time before or during the course of the hearing, but the requesting party's obligation to produce the document or parts of the document will not be affected by the party's pending request to the Secretary, unless the Secretary expressly directs the ALJ to treat the document as protected from disclosure until the Secretary makes a final written decision on whether the document should be filed under seal. If the Secretary's direction to the ALJ is made orally, that direction must be reduced to writing and filed with the ALJ within 3 working days of the making of the oral order or the document will then be subject to disclosure pending the Secretary's final written decision on disclosure.

§ 81.86 Enforcement and jurisdiction.

If a GSE fails to comply with a final decision, the Secretary may request the Attorney General of the United States to bring an action in the United States District Court for the District of Columbia for the enforcement of the notice or order. Such request may be made:

(a) *For a cease-and-desist order:*

(1) Upon expiration of the 30-day period beginning on the service of the order on the GSE; or

(2) Upon the effective time specified in an order issued upon consent; and

(b) *For a civil money penalty,* when the order imposing the penalty is no longer subject to review under 12 U.S.C. 4582 and 4583 and the implementing regulations at §§ 81.84 and 81.87.

§ 81.87 Judicial review.

(a) *Commencement.* In a proceeding under 12 U.S.C. 4581 or 4585, as implemented by §§ 81.82 or 81.83, a GSE that is a party to the proceeding may obtain review of any final order issued under § 81.84 by filing in the United States Court of Appeals for the District of Columbia Circuit, within 30 days after the date of service of such order, a written petition praying that the order of the Secretary be modified, terminated, or set aside.

(b) *Filing of record.* Upon receiving a copy of a petition, the Chief Docket Clerk, Office of Administrative Law Judges, shall file in the court the record in the proceeding, as provided in 28 U.S.C. 2112.

(c) *No automatic stay.* The commencement of proceedings for judicial review under this section shall not, unless specifically ordered by the court, operate as a stay of any order issued by the Secretary.

Subpart H—Book-Entry Procedures

§ 81.91 Definitions.

As used in this subpart H, the term—

(a) *Reserve bank* means a Federal Reserve bank and its branches acting as Fiscal Agent of Fannie Mae and, when indicated, acting in its individual capacity or as Fiscal Agent of the United States.

(b) *Fannie Mae security* means any obligation of Fannie Mae (except short-term discount notes and obligations convertible into shares of common stock) issued under 12 U.S.C. 1719 (b), (d), and (e) in the form of a definitive Fannie Mae security or a book-entry Fannie Mae security.

(c) *Definitive Fannie Mae security* means a Fannie Mae security in engraved or printed form.

(d) *Book-entry Fannie Mae security* means a Fannie Mae security in the form of an entry made as prescribed in this part on the records of a Reserve bank.

(e) *Pledge* includes a pledge of, or any other security interest in, Fannie Mae securities as collateral for loans or advances or to secure deposits of public moneys or the performance of an obligation.

(f) *Date of call* is, with respect to Fannie Mae securities issued under 12 U.S.C. 1719 (d) and (e), the date fixed in the authorizing resolution of the Board of Directors of Fannie Mae on which the obligor will make payment of the security before maturity in accordance with its terms, and, with respect to Fannie Mae securities issued under 12 U.S.C. 1719(b), the date fixed in the offering notice issued by Fannie Mae.

(g) *Member bank* means any National bank, State bank, or bank or trust company which is a member of a Reserve bank.

§ 81.92 Authority of Reserve Bank.

Each Reserve bank is hereby authorized, in accordance with the provisions of this part, to:

(a) Issue book-entry Fannie Mae securities by means of entries on its records which shall include the name of the depositor, the amount, the loan title (or series) and maturity date;

(b) Effect conversions between book-entry Fannie Mae securities and definitive Fannie Mae securities;

(c) Otherwise service and maintain book-entry Fannie Mae securities; and

(d) Issue a confirmation of transaction in the form of a written advice (serially numbered or otherwise) which specifies

the amount and description of any securities, that is, loan title (or series) and maturity date, sold or transferred, and the date of the transaction.

§ 81.93 Scope and effect of book-entry procedure.

(a) (1) A Reserve bank as Fiscal Agent of Fannie Mae may apply the book-entry procedure provided for in this part to any Fannie Mae securities which have been or are hereafter deposited for any purpose in accounts with it in its individual capacity under terms and conditions which indicate that the Reserve bank will continue to maintain such deposit accounts in its individual capacity, notwithstanding application of the book-entry procedure to such securities. This paragraph (a) is applicable, but not limited, to securities deposited:

(i) As collateral pledged to a Reserve bank (in its individual capacity) for advances by it;

(ii) By a member bank for its sole account;

(iii) By a member bank held for the account of its customers;

(iv) In connection with deposits in a member bank of funds of States, municipalities, or other political subdivisions; or

(v) In connection with the performance of an obligation or duty under Federal, State, municipal, or local law, or judgments or decrees of courts.

(2) The application of the book-entry procedure under this paragraph (a) shall not derogate from or adversely affect the relationships that would otherwise exist between a Reserve bank in its individual capacity and its depositors concerning any deposits under this section. Whenever the book-entry procedure is applied to such Fannie Mae securities, the Reserve bank is authorized to take all action necessary in respect of the book-entry procedure to enable such Reserve bank in its individual capacity to perform its obligations as depositary with respect to such Fannie Mae securities.

(b) A Reserve bank as Fiscal Agent of the corporation may apply the book-entry procedure to Fannie Mae securities deposited as collateral pledged to the United States under Treasury Department Circulars Nos. 92 and 176, both as revised and amended, and may apply the book-entry procedure, with the approval of the Secretary of the Treasury, to any other Fannie Mae securities deposited with a Reserve bank, as Fiscal Agent of the United States.

(c) Any person having an interest in Fannie Mae securities which are deposited with a Reserve bank (in either its individual capacity or as Fiscal Agent of the United States) for any purpose shall be deemed to have consented to their conversion to book-entry Fannie Mae securities pursuant to the provisions of this part, and in the manner and under the procedures prescribed by the Reserve bank.

(d) No deposits shall be accepted under this section on or after the date of maturity or call of the securities.

§ 81.94 Transfer or pledge.

(a) A transfer or pledge of book-entry Fannie Mae securities to a Reserve bank (in its individual capacity or as Fiscal Agent of the United States), or to the United States, or to any transferee or pledgee eligible to maintain an appropriate book-entry account in its name with a Reserve bank under §§ 81.91 through 81.98 is effected and perfected, notwithstanding any provision of law to the contrary, by a Reserve bank making an appropriate entry in its records of the securities transferred or pledged. The making of such an entry in the records of a Reserve bank shall:

(1) Have the effect of a delivery in bearer form of definitive Fannie Mae securities;

(2) Have the effect of a taking of delivery by the transferee or pledgee;

(3) Constitute the transferee or pledgee a holder; and

(4) If a pledge, effect a perfected security interest therein in favor of the pledgee. A transfer or pledge of book-entry Fannie Mae securities effected under this paragraph (a) shall have priority over any transfer, pledge, or other interest, theretofore or thereafter effected or perfected under paragraph (b) of this section or in any other manner.

(b) A transfer or a pledge of transferable Fannie Mae securities, or any interest therein, which is maintained by a Reserve bank (in its individual capacity or as Fiscal Agent of the United States) in a book-entry account under §§ 81.91 through 81.98, including securities in book-entry form under § 81.93(a)(3), is effected, and a pledge is perfected, by any means that would be effective under applicable law to effect a transfer or to effect and perfect a pledge of the Fannie Mae securities, or any interest therein, if the securities were maintained by the Reserve bank in bearer definitive form. For purposes of transfer or pledge hereunder, book-entry Fannie Mae securities maintained by a Reserve bank shall, notwithstanding any provision of law to the contrary, be deemed to be maintained in bearer definitive form. A Reserve bank maintaining book-entry Fannie Mae securities either in its individual capacity or as Fiscal Agent of the United States is not a bailee for purposes of notification of pledges of those securities under this section, or a third person in possession for purposes of acknowledgment of transfer thereof under this section. Where transferable Fannie Mae securities are recorded on the books of a depositary (a bank, banking institution, financial firm, or similar party, which regularly accepts in the course of its business Fannie Mae securities as a custodial service for customers, and maintains accounts in the names of such customers reflecting ownership of or interest in such securities) or account of the pledgor or transferor thereof and such securities are on deposit with a Reserve bank in a book-entry account, hereunder, such depositary shall, for purposes of perfecting a pledge of such securities or affecting delivery of such securities to a purchaser under applicable provisions of law, be the bailee to which notification of the pledge of the securities may be given or the third person in possession from which acknowledgment of the holding of the securities for the purchaser may be obtained. A Reserve bank will not accept notice or advice of a transfer or pledge effected or perfected under this section, and any such notice or advice shall have no effect. A Reserve bank may continue to deal with its depositor in accordance with the provisions of this part, notwithstanding any transfer or pledge effected or perfected under this paragraph (b).

(c) No filing or recording with a public recording office or officer shall be necessary or effective with respect to any transfer or pledge of book-entry Fannie Mae securities or any interest therein.

(d) A Reserve bank shall, upon receipt of appropriate instructions, convert book-entry Fannie Mae securities and deliver them in accordance with such instructions; no such conversion shall affect existing interest in such Fannie Mae securities.

(e) A transfer of book-entry Fannie Mae securities within a Reserve bank shall be made, in accordance with procedures established by the Reserve bank not inconsistent with this part. The transfer of book-entry Fannie Mae securities by a Reserve bank may be made through a telegraphic transfer procedure.

(f) All requests for transfer or withdrawal must be made prior to the maturity or date of call of the securities.

§ 81.95 Withdrawal of Fannie Mae securities.

For all book-entry Fannie Mae securities issued prior to March 10, 1978:

(a) A depositor of book-entry Fannie Mae securities may withdraw them from a Reserve bank by requesting delivery of like definitive Fannie Mae securities to itself or on its order to a transferee.

(b) Fannie Mae securities which are actually to be delivered upon withdrawal may be issued either in registered or in bearer form.

§ 81.96 Delivery of Fannie Mae securities.

A Reserve bank which has received Fannie Mae securities and effected pledges, made entries regarding them, or transferred or delivered them according to the instructions of its depositor is not liable for conversion or for participation in breach of fiduciary duty even though the depositor had no right to dispose of or take other action in respect of the securities. Customers of a member bank or other depositary (other than a Reserve bank) may obtain Fannie Mae securities only by causing the depositor of the Reserve bank to order the withdrawal thereof from the Reserve bank under the conditions set forth in § 81.95.

§ 81.97 Registered bonds and notes.

No formal assignment shall be required for the conversion to book-entry Fannie Mae securities of registered Fannie Mae securities held by a Reserve bank (in either its individual capacity or as Fiscal Agent of the United States) on the effective date of this part for any purpose specified in § 81.93(a). Registered Fannie Mae securities deposited thereafter with a Reserve bank for any purpose specified in § 81.93 shall be assigned for conversion to book-entry Fannie Mae securities. The assignment, which shall be executed in accordance with the provisions of subpart F of 31 CFR part 306, so far as applicable, shall be to "Federal Reserve Bank of _____, as Fiscal Agent of the Federal National Mortgage Association, for conversion to book-entry Fannie Mae securities."

§ 81.98 Servicing book-entry Fannie Mae securities; payment of interest; payment at maturity or upon call.

Interest becoming due on book-entry Fannie Mae securities shall be charged to Fannie Mae's account at the New York Federal Reserve Bank on the interest due date and remitted or credited in accordance with the depositor's instructions. Such securities shall be redeemed and charged to Fannie Mae's account at the New York Federal Reserve Bank on the date of maturity, call or advance refunding, and the redemption proceeds, principal and interest, shall dispose of in accordance with the depositor's instructions.

§ 81.99 Treasury Department regulations; applicability to Fannie Mae.

The provisions of Treasury Department Circular No. 300, 31 CFR part 306 (other than subpart O), as amended from time to time, shall apply, insofar as appropriate, to obligations of Fannie Mae for which a Reserve bank shall act as Fiscal Agent of Fannie Mae and to the extent that such provisions are consistent with agreements between Fannie Mae and the Reserve banks acting as Fiscal Agents of Fannie Mae. Definitions and terms used in Treasury Department Circular No. 300 should read as though modified to effectuate the application of the regulations to Fannie Mae.

Subpart I—Other Provisions

§ 81.101 Equal employment opportunity.

Fannie Mae and Freddie Mac shall comply with sections 1 and 2 of Executive Order 11478 (3 CFR, 1966–1970 Compilation, p. 803), as amended by Executive Order 12106, (3 CFR, 1978, Compilation, p. 263), providing for the adoption and implementation of equal employment opportunity, as required by section 1216 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (12 U.S.C. 1833e).

§ 81.102 Independent verification authority.

The Secretary may independently verify the accuracy and completeness of the data, information, and reports provided by each GSE, including conducting on-site verification, when such steps are reasonably related to determining whether a GSE is complying with 12 U.S.C. 4541–4589 and the GSE's Charter Act.

Dated: November 21, 1995.

Henry G. Cisneros,

Secretary.

2. The following Appendices A through F will not appear in the Code of Federal Regulations.

Appendix A—Secretarial Considerations to Establish the Low- and Moderate-Income Housing Goal

A. Introduction

1. Establishment of Goal

In establishing the annual Low- and Moderate-Income Housing Goal, the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 requires the Secretary to consider:

1. National housing needs;
2. Economic, housing, and demographic conditions;
3. The performance and effort of the enterprises toward achieving the Low- and Moderate-Income Housing Goal in previous years;
4. The size of the conventional mortgage market serving low- and moderate-income families relative to the size of the overall conventional mortgage market;[1]
5. The ability of the enterprises to lead the industry in making mortgage credit available for low- and moderate-income families; and
6. The need to maintain the sound financial condition of the enterprises.

2. Underlying Data

In considering the statutory factors in establishing these goals, HUD relied upon data from the American Housing Survey, the 1990 Census of Population and Housing, the 1991 Residential Finance Survey, other government reports, the Home Mortgage Disclosure Act (HMDA) reports, and the GSEs. HUD used data provided by the GSEs to determine their financial condition and their prior performance in meeting the needs of low- and moderate-income families. These data included loan-level information on all mortgages purchased by the GSEs in 1993 and 1994.

Section B responds to comments from the GSEs and other commenters on Appendix A in the proposed rule and Section C presents an updated discussion of each of the factors listed above. Section D summarizes the Secretary's rationale for selecting the levels of the Low- and Moderate-Income Housing Goals for 1996 and 1997–99 and thereafter.

B. Summary and Response to Public Comments

The GSEs and several other commenters furnished comments on Appendix A as it appeared in the proposed rule. Because the GSEs' comments covered all of the points made by other commenters, this appendix refers exclusively to the GSEs' comments. The GSEs took issue with HUD's application of the factors identified in Section A above and the analysis by which HUD determined the levels of the goals. The GSEs commented that Appendix A: (1) confused general housing needs with those for which the GSEs have an

[1] "Conventional" mortgages are those which do not carry any government insurance, guarantee, or other obligation. That is, conventional mortgages exclude Federal Housing Administration (FHA), Farmers Home Administration (FmHA), and Veterans Administration (VA) loans.

appropriate responsibility; (2) failed to identify the broad range of economic conditions which might be relevant over the coming years; (3) incorrectly assessed the past performance of the GSEs and postulated a very narrow concept of market leadership; (4) minimized the potential economic impact of higher-risk multifamily mortgage purchases and assumed the GSEs should have equal penetration of single-family and multifamily markets; and (5) used flawed data estimates for calculating the size of the conventional market for the Low- and Moderate-Income Housing Goal.[2]

1. "Linking" Housing Needs to GSEs

The GSEs expressed concern that HUD did not distinguish between general housing needs of low- and moderate-income households and those needs that the GSEs could reasonably be expected to address. HUD conducted an analysis of general housing needs to comply with FHEFSSA, which requires the Secretary to consider such needs when establishing the housing goals. HUD's examination of national housing needs does not suggest that the GSEs can or should meet all of those needs. Rather, the analysis was intended to provide background on the evolution and current state of the housing markets for low- and moderate-income households. HUD recognizes that the GSEs can do little to mitigate the more extreme problems, such as homelessness, identified in this analysis (Section C.1 below).

With focused effort the GSEs can assist in addressing problems discussed in the Appendix with regard to single-family and multifamily housing. On the single-family side, the GSEs support of more customized mortgage products and underwriting with greater outreach will likely have mutually beneficial effects for both investors and low- and moderate-income borrowers who have not been served with traditional products, underwriting, and marketing. The GSEs have already embarked on this path and continued efforts are encouraged.

On the multifamily side, with new product development and partnerships the GSEs can reduce the credit gaps in the current market for affordable rental housing—specifically small existing properties, redevelopment projects, housing for the elderly, and new construction in some markets. By sustaining a secondary market in units that meet the low- and moderate-income goal, the GSEs will bring increased liquidity, added stability, and ultimately lower rents for lower-income families in these segments of the market.

Moreover, the GSEs can work to improve overall efficiency and stability of the market for financing multifamily housing by promoting increased standardization, which would allow more direct links to capital markets independent of specific financial intermediaries or investors. The GSEs have been immensely successful in this area with regard to the financing of single-family housing. While HUD recognizes that multifamily finance is different from single-family finance, improvements may well be possible through, for example, creative partnerships and risk-sharing with local institutions.

2. Mortgage Market Volatility

Both GSEs expressed concern that establishing the levels of the housing goals on the basis of experience under the recent unusually favorable mortgage market conditions for financing homeownership could place unreasonable expectations on the GSEs. The GSEs commented that the market for home purchase and finance is very dynamic and susceptible to significant changes in conditions that affect whether home purchase is feasible or accessible to low- and moderate-income households. The current levels of interest rates, home prices, borrower incomes, alternative rental costs, and consumer confidence, as well as expectations about their future levels, play a role in determining whether homeownership is feasible or desirable for any particular household. HUD agrees that forecasting all these factors for upcoming years to obtain a picture of the future climate for home purchase and finance is difficult.

However, setting goals so that they can be met even under the worst of circumstances is unreasonable. If macroeconomic conditions change dramatically, then the levels of the goals can be revised to reflect the changed conditions. FHEFSSA and HUD recognize that conditions could change in ways that would require revised expectations. Thus, HUD is given the statutory discretion: (1) to revise the goals if the need arises and (2) if a GSE fails to meet a housing goal, to determine that the goal was not feasible, and not take further action. Furthermore, as discussed in Appendix D, HUD conducted detailed sensitivity analysis for each of the housing goals to reflect economic conditions that are less conducive to homeownership than those that existed during 1993 and 1994.

3. GSEs Already Innovate and Serve Low- and Moderate-Income Borrowers

The GSEs commented that Appendix A and the proposed rule failed to recognize that the GSEs already make a sizable contribution toward serving the housing needs of a wide range of American families, including low- and moderate-income households, in diverse geographic areas, through their overall operations. Congress chartered the GSEs to carry out four public purposes: (a) provide stability; (b) respond appropriately to the private capital market; (c) provide assistance to the residential mortgage market, including serving low- and moderate-income families; and (d) promote access to mortgage credit throughout the nation. In FHEFSSA, Congress developed a mechanism to ensure that the GSEs finance housing for and provide services to low- and moderate-income families and housing in underserved areas. Congress acknowledged, as does HUD, the substantial contributions the GSEs have made and continue to make in creating liquidity and stability in the overall mortgage market. No additional measures were thought necessary to ensure that such contributions continue to take place. However, in FHEFSSA, Congress focused on enhancing the GSEs' efforts to carry out their other Charter purposes. HUD, through its focus on the goals, is carrying out that Congressional intent.

4. Multifamily Market Is Different

The GSEs commented that the origination and purchase of multifamily mortgages is fundamentally different from the origination and purchase of single-family mortgages. Both GSEs commented that the GSEs do not dominate the multifamily market to the same extent as the single-family market and that they should not be required to obtain the same multifamily market share that they have in the single-family market. Freddie Mac argued that the purchase of creditworthy multifamily loans is far more difficult than for single-family loans.

HUD agrees that the multifamily mortgage business is a different business from single-family finance, posing a different level of risk. Underwriting multifamily mortgages is more like underwriting business loans than underwriting many small and relatively uniform single-family mortgages. However, with regard to the argument that multifamily lending is much more difficult, the evidence is not convincing. Much of the difficulty with multifamily mortgages in recent years was related to the aftermath of wide swings in the tax treatment of multifamily housing. The tax-driven rather than market-driven overbuilding of the early and mid-1980s was followed by the subsequent withdrawal of tax support and the resulting credit crunch in the late 1980s and the early 1990s. During the early 1990s, underwriting of creditworthy multifamily loans may have been difficult. These conditions have now improved markedly.

Currently, multifamily properties offer less risk of loss than most commercial property classes, according to Moody's Investors Service.[3] In overbuilt markets, vacancies have declined due to depressed construction levels in the early 1990s. Accordingly, competition for multifamily loans has increased and securitization has increased in 1993 and again in 1994. Credit risk remains a concern to investors, but new techniques in multi-class securitization have helped mitigate credit risk on multifamily mortgage pools.

HUD realizes that achievement of the housing goals may require deeper penetration of the multifamily mortgage market than the GSEs have heretofore achieved. As discussed in Section C.2 below, Fannie Mae purchased a large portion (nearly half) of the large multifamily loans (those with balances of $1.0 million or more) that were originated in 1993 and reported in the HMDA data. An alternative to very deep penetration of the large loan market would be for the GSEs to broaden their penetration by shifting their focus toward purchase of smaller multifamily loans. There is no evidence that smaller loans represent higher credit risks. Such a shift may require the GSEs to develop additional capabilities to underwrite smaller loans, such as forming new partnerships with community lenders. This may pose some initial difficulty, but the suggestion that there are long-term fundamental difficulties in the purchase of smaller (less than $1 million) multifamily loans is not consistent with the current market trends toward higher multifamily lending activity and new techniques of credit risk management.

5. HUD's Market Methodology

In establishing the goals, the Secretary is required to assess, among a number of factors, the size of the conventional market for each goal. HUD developed a straightforward technique for estimating the size of the conventional conforming market for each of the goals. This technique draws on the existing major sources of data on mortgage market activity.

Both GSEs expressed strong criticism of HUD's use of specific data elements in constructing its estimates of market size, for example, estimates of the proportion of 1- to 4-unit rental properties or the level of multifamily originations. Although both GSEs criticized how data had been interpreted in HUD's market-share models, neither GSE, nor any other commenter, objected to HUD's basic model for calculating the size of the markets relevant to each of the housing goals. However, Freddie Mac provided a detailed set of objections to the use of certain data sources or assumptions, concluding that HUD's market estimates were "fatally flawed." Fannie Mae argued that market estimates employed by HUD "created an artificial market description based on interpretations of the data available to [HUD], which are not consistent." Fannie Mae commented that the Secretary deliberately selected existing data interpretations to yield higher goals.

Freddie Mac maintained that the flaws in HUD's estimation process would result in goals that were too high, because HUD had overestimated the size of the rental market. Freddie Mac presented a comparison of available market-share estimates, explained deficiencies it believed were present in the data employed by HUD, and claimed that HUD had chosen the least-favorable of the data bases that could have been employed in establishing appropriate goals for the GSEs.

Both GSEs argued that the role of multifamily financing in the mortgage market was consistently overstated in the proposed rule. Freddie Mac provided data to support its assertion that the rule's estimates of multifamily originations overstated both the total amount of originations to be expected and the degree to which multifamily originations are available to the secondary market.

In considering the levels of the goals, HUD examined carefully the comments on the methodology used to establish the market share for each of the goals. HUD contracted with the Urban Institute to conduct an independent review that drew upon its resources of well-respected academics and others in evaluating HUD's methodology. Based on that thorough evaluation, as well as HUD's additional analysis, the basic methodology employed by HUD is a reasonable and valid approach to estimating market share, and Freddie Mac's claim that the methodology is "fatally flawed" is without merit.

HUD agrees that a comprehensive source of information on mortgage markets is not available. HUD considered and analyzed a number of data sources for the purpose of estimating market size, because no single source could provide all the data elements needed. In the appendices, HUD has carefully defined the range of uncertainty associated with each of these data sources and has conducted sensitivity analyses to show the effects of various assumptions. Technical papers prepared by the Urban Institute and other academics support HUD's analysis.

A number of technical changes have been made in response to the comments and the evaluation by outside experts and HUD, but the approach for determining market size has not been substantially modified. The detailed evaluations show that the methodology, as modified, produces reasonable estimates of the market share for each goal.

Criticism of the methodology focused, in part, on the estimated size of the multifamily market. The GSEs proposed that HUD use the volume of originations as reported in the Home Mortgage Disclosure Act (HMDA) data base—$15 billion in 1994—as the accurate number of multifamily originations, as opposed to HUD's $30 billion estimate derived from other data sources. Four of the studies HUD commissioned from the Urban Institute considered various aspects of the multifamily market. HUD also consulted with experts at the Federal Reserve Board, the Bureau of the Census, and in industry trade groups to assist HUD in carefully evaluating the GSEs' claim that HMDA data provide an accurate number of total multifamily originations.

HUD found consensus that HMDA data underreport multifamily originations. HMDA, alone, is not an accurate survey of the total market; it was not designed to be one. It includes only information reported by a subset of institutions that originate multifamily loans: large commercial banks, thrifts, and mortgage bankers in metropolitan areas. In addition, HMDA underestimates multifamily lending by both mortgage bankers and commercial banks. The additional analyses conducted in response to the comments support the $30 billion multifamily estimate used by HUD.

c. Consideration of the Factors

Overview of Sections C.1 and C.2. These sections cover a range of topics on housing needs and economic and

[2] The credit risk criticism is addressed in the Economic Analysis that accompanies this rule and the market share criticism is addressed in Appendix D.

[3] "Moody's: Multifamily Offers Less Loss Risk," *National Mortgage News*, May 1, 1995.

demographic trends that are important for understanding mortgage markets. Most of the information, such as trends in refinancing activity, is provided because it describes the market environment in which the GSEs must operate and is therefore useful for gauging the reasonableness of specific levels of the Low- and Moderate-Income Housing Goal. In addition, the severe housing problems faced by lower-income families are discussed.

This information has led the Secretary to the following conclusions:

- The volume of mortgage originations fell from its 1993 record level of one trillion dollars to $773 billion in 1994 and is expected to be about $650 and $700 billion in 1995 and 1996, respectively. Purchase mortgages, including those for first-time homebuyers, have replaced refinance mortgages as the dominant mortgage type.
- The increase in interest rates from the 25-year lows of 1993 could make it more difficult for marginal borrowers to afford homeownership. However, interest rates continue to remain lower and housing more affordable than any previous extended period since 1977. Borrowers also have been helped by the rising incomes that accompany economic growth, which helped to boost the GSEs' purchases of low- and moderate-income mortgages in 1994, beyond levels recorded in 1993.
- Purchasing a home became increasingly difficult for lower-income and younger families during the 1980s. Low-income families with children, who could most benefit from the advantages of ownership, bore the brunt of the decline in ownership rates. The share of the nation's children living in owner-occupied homes fell from 71 percent to 63 percent between 1980 and 1991.
- Very-low-income renters often must pay an unduly high share of their income for rent.
- Several demographic changes will affect the demand for housing over the next few years. The continued influx of immigrants will increase the demand for both rental and owner-occupied housing and help to offset declines due to the aging of the baby-boom generation. Non-traditional households will become more important as overall household formation rates have slowed. With later marriage, divorce, and other non-traditional living arrangements, the fastest-growing household groups will be single-parent and single-person households.
- The multifamily mortgage market is far less integrated into the broader capital markets than the single-family market. Increased liquidity will bring more capital, at lower cost, to fill current and future credit gaps for maintenance of existing affordable stock and construction of affordable units in higher growth markets.

1. National Housing Needs

This section reviews the general housing problems of both low- and moderate-income homeowners and then discusses past and current economic conditions affecting the single-family and multifamily housing markets. HUD recognizes that the GSEs can do little to mitigate many of the more extreme problems discussed in the next sections. These sections are meant to portray the general state of the housing markets for low- and moderate-income households as they exist today and are expected to continue in the near future.

a. Housing Problems Among Low- and Moderate-Income Owners and Renters

Under the income definitions in FHEFSSA, almost three-fifths of U.S. households in 1993 qualified as low- or moderate-income families. Almost half of all homeowners (48 percent) had incomes below their (unadjusted) area median family income, while 76 percent of renters had income below their area's HUD-adjusted median family income.[4]

Housing needs vary with income. In 1993, roughly 21 percent of owners with moderate incomes (income 80 to 100 percent of area median) and 24 percent of moderate-income renters had a housing problem, compared to 25 percent of low-income owners and 36 percent of low-income renters (with income 60 to 80 percent of area median). Moreover, two-thirds of the 14 million households with incomes below 30 percent of median paid more than 30 percent of income for housing or lived in inadequate or crowded housing.[5]

[4] HUD is required by statute to adjust median family income in developing its official income cutoffs for each Metropolitan Statistical Area (MSA) and non-metropolitan county. Income limits based on HUD-Adjusted Area Median Family Incomes (HAMFI) are adjusted 1) with upper and lower caps for areas with low or high ratios of housing costs to income; 2) by setting state nonmetropolitan average income as a floor for nonmetropolitan counties; and 3) by household size. The adjusted annual estimates of area median family income provide the base for the "50 percent" and "80 percent" of HAMFI cutoffs that are assigned to a household of four. Household size adjustments then range from 70 percent of the base for a 1-person household to 132 percent of the base for an 8-person household.

[5] Tabulations of U.S. Departments of Housing and Urban Development and Commerce, *American Housing Survey for the United States in 1993* (April 1995) performed by HUD Office of Policy Development and Research.

b. Unmet Demands for Homeownership

Homeownership is a key aspiration for most Americans and a basic concern of government. Homeownership fosters family responsibility and self-sufficiency, expands housing choice and economic opportunity, and promotes community stability. Ownership also improves access to the larger homes and better neighborhoods particularly needed by families with children. Children of homeowners are more likely to graduate from high school, less likely to commit crime, and less likely to bear children as teenagers than children of renters.[6] Recent surveys indicate that lower-income and minority families who do not own their homes will make considerable sacrifices to attain this goal.

Ownership rates rose dramatically in the late 1940s and 1950s, increasing from 43.6 percent to 61.9 percent between 1940 and 1960. During the 1960s, homeownership rates rose more slowly, reaching 62.9 percent by 1970, and—after several years of high house price appreciation—an all-time high of 65.6 percent in 1980. In the early 1980s, historically high interest rates, low price appreciation, and a series of deep regional recessions caused the homeownership rate to decline to 63.9 percent by 1985. The rate increased only slightly between 1985 and 1994.[7]

During the 1980s, the goal of homeownership became more elusive for low- and moderate-income families. Declines in ownership rates during the 1980s were most pronounced for younger, lower-income households, particularly those with children:

Between 1980 and 1992, homeownership among younger households dropped roughly 10 percentage points, from 43.3 percent to 33.1 percent for households with the head aged 25 to 29, and from 61.1 percent to 50.0 percent for households with the head aged 30 to 34. These declines were concentrated among single-parent households and married couples with children.[8]

Homeownership rates fell by 4 percentage points each for moderate-income households and low-income households during the 1980s, and by 3 percentage points for households below 50 percent of area median, adjusted for family size. At each income level, declines were greatest for families with children. Among very low-income families with children, homeownership rates dropped by nearly a fourth.[9]

[6] These tendencies are especially strong for lower-income households. Children of low-income homeowners are 15 percent more likely to stay in school than children of non-homeowners. Michelle White and Richard Green, "Measuring the Benefits of Homeowning: Effects on Children," University of Chicago, unpublished paper, February 1994.

[7] The stability in ownership after 1985 resulted from increases among elderly households and single individuals, offset by further declines among families with children.

[8] Joint Center for Housing Studies of Harvard University, *The State of the Nation's Housing*, 1993, Table A–4.

In sum, the families with children who could most benefit from ownership were most adversely affected by declines in ownership. Between 1980 and 1991, the dip in the total ownership rate from 65.6 to 64.2 percent included a fall of seven percentage points among families with children, from 70.4 percent to 63.4 percent.

c. Obstacles to Homeownership

Insufficient income, high debt burdens, and limited savings are obstacles to homeownership for younger families. As home prices skyrocketed during the late 1970s and early 1980s, real incomes stagnated, with earnings growth particularly slow for blue collar and less educated workers. Through most of the 1980s, the combination of slow income growth and increasing rents made saving for home purchase more difficult and relatively high interest rates required larger fractions of family income for homeowner mortgage payments. Thus, fewer households had the financial resources to meet down payment requirements, closing costs, and monthly mortgage payments. One-fifth of first-time homeowners had to rely on their relatives for most of their down payment.[10] One-third of recent first-time homeowners relied on gifts and loans from parents.[11]

In addition to low income, high debts are a primary reason households cannot afford to purchase a home. Nearly 53 percent of renter families have both insufficient income and excessive debt problems that may cause difficulty in financing a home purchase.[12] High debt-to-income ratios frequently make potential borrowers ineligible for mortgages based on the underwriting criteria established in the conventional mortgage market.

d. Affordability Problems and Worst Case Housing Needs

Finding affordable housing is by far the most common housing problem for American families nationwide.[13] Between 1979 and 1991, shares of households paying more than 30 percent of their income for housing fluctuated around 42 percent among renters and rose from 17 percent to 20 percent among owners.[14] Over this period, the number of low-income renter households spending 50 percent or more of their income on housing rose from 4.3 million in 1978 to 6.0 million in 1991.[15] Poor homeowners also paid high proportions of their income for housing costs. Between 1978 and 1989, the share of poor homeowners spending over 60 percent of income on housing rose from 30.6 percent to 33.1 percent.[16]

Although affordability problems affect two-fifths of low-income renters and one-eighth of low-income owners, they are most frequent and severe among the very lowest income owners and renters. In 1991, when the average gross rent/income ratio for renters with incomes above area median income was 23 percent, this ratio was 72 percent for renters with incomes below 30 percent of area median income and 41 percent for renters with incomes between 30 and 49 percent of median.[17]

Priority problems—defined as paying more than half of income for rent and utilities, being displaced, or living in severely inadequate housing—were heavily concentrated among renters with incomes below 50 percent of area median. Half of renters with incomes below 30 percent of median, and one-fourth of those with incomes 31–50 percent of median, had these severe "worst case" housing needs.[18]

According to HUD's third Congressionally-mandated study of worst case needs, severe affordability problems were not only the overwhelming cause of worst case needs but often a family's only housing problem.[19] Fully 94 percent of the 5.3 million households with worst case needs reported severe rent burden as a problem, and for almost three-fourths, severe rent burden was their only problem.

The number of households with worst case needs increased by nearly 400,000 between 1989 and 1991, rising most rapidly among families with children. Large families were more likely than smaller ones to have priority problems and to need to move to another housing unit because of crowding or excessive rent burden. Between 1989 and 1991, worst case needs among very-low-income families with three or more children increased from 34.7 percent to 40.2 percent. Elderly households were the least likely to have worst case needs.

2. Economic, Housing, and Demographic Conditions

A number of economic, housing, and demographic considerations have influenced the Secretary's establishment of the Low- and Moderate-Income Housing Goals. Increasing income inequality and changes in household composition suggest that needs for housing affordable to very-low-income families will continue to be most acute, placing additional pressure on the inadequate stock of rental housing affordable to families with incomes below 30 percent of median income. Although volatile interest rates strongly influence both single-family starts and mortgage market activity, rates that are relatively low by historical standards have improved affordability for first-time homebuyers.

a. Underlying Demographic Conditions

(1) *Household Formations.* The demand for housing and mortgages depends heavily on household formations. During the 1970s, as the leading edge of the baby boom generation (born between 1946 and 1964) entered adulthood, household formation surged to an annual average of 1.7 million. Aided by rising incomes and low real interest rates, household heads aged 25–34 purchased homes in record numbers. During the 1980s, annual household growth fell slightly to an average of 1.5 million. Many in the "housing upgrade" group (aged 35–44) had benefitted from substantial increases in the prices of their first homes, and were able to afford bigger and higher quality homes during the 1980s. Household formation is expected to drop sharply during the 1990s. The

Census Bureau projects that the older baby boomers (aged 45 to 54) will be the fastest growing population group during this decade.

The effects of these demographic trends on housing demand have been debated in the economics literature for several years. In 1989, Gregory Mankiw and David Weil predicted that the aging of the baby boomers and the small size of the following "baby bust" generation would substantially reduce housing demand and cause housing prices to collapse during the 1990s.[20] Other researchers disagree. Reductions in housing demand due to aging of the baby boom generation could be offset by many factors, including rising incomes, pent-up demand for homeownership by those priced out of the housing market during the 1980s, and high levels of immigration.[21]

(2) *Immigration.* The continued increase in immigration during the 1990s will help offset declines in the demand for housing caused by the aging of the baby boom generation. During the 1980s, 6 million legal immigrants entered the United States, up from 4.2 million during the 1970s and 3.2 million during the 1960s. The Hispanic population residing in the U.S. increased by 50 percent during the 1980s, while the Asian population doubled. About one-quarter of the Hispanics living in the U.S. in 1990 had immigrated during the 1980s. Immigration is projected to add even more new Americans in the 1990s than it did during the 1980s. Asians and Pacific Islanders are expected to be the fastest growing group, with annual growth rates that may exceed 4 percent in the 1990s. Total population is now projected to rise by 25 million in each of the decades from 1991 to 2020. The tendency of immigrants, particularly Hispanics, to locate in certain "gateway" cities (e.g., Los Angeles and Miami) will place increased demands on the housing stock in some major urban areas.

(3) *Non-traditional Households.* While overall growth in new households has slowed, non-traditional households have become more important. With later marriages, divorce, and other non-traditional living arrangements, household growth has been fastest among single-parent and single-person households. The number of single parents with one or more children under 18 was 10.5 million in 1992; the vast majority of those single parents were women.[22] About 62 percent of African-American families with children were single-parent families in 1992, compared with 34 percent for Hispanics and 24 percent for Whites. Since only 35 percent of single-parent households are homeowners compared to 74 percent of married couples, their increase should spur demand for rental housing and for affordable ownership opportunities. In addition, HUD's analysis of the nation's worst case housing needs shows that female-headed households suffer some of the most severe housing problems.

(4) *Single Person Households* are playing an increasingly important role in the housing market. Singles accounted for one-fourth of all households in 1990. While one-half owned their own home, many of these were elderly people with little or no mortgage debt and probably no intention of entering the housing market. Never-married singles, on the other hand, have been a significant factor in the homebuying market in large urban areas. Never-married singles rose as a proportion of first-time homebuyers from just over one-quarter in 1990 and 1991 to roughly a third in 1992 and 1993 before declining to about a 30 percent share in 1994.[23] As discussed above, ownership rates among non-elderly single individuals rose steadily during the 1980s. Low interest rates during the past two years apparently enticed even more single renters to become homeowners.

(5) *Growing Income Inequality* in the distribution of income over the last 20 years has made it more difficult for those at the bottom of the income distribution to purchase adequate shelter. The share of the nation's income received by the richest 5 percent of American families rose from 18.6 percent in 1977 to 24.5 percent in 1990, while the share received by the poorest 20 percent fell from 5.7 percent to 4.3 percent. This widening income inequality was due in large part to a widening disparity in earned incomes; as the economy has moved away from manufacturing to more service industry jobs and more advanced computer and technologically-intensive industry jobs, the wages of unskilled, entry-level, and blue collar workers have fallen relative to the wages of professional and technical workers. The result has been an increase in the working poor and a decrease in the middle class.

In addition, higher real interest rates and declining inflation through the 1980s increased the return to capital, raising nonwage incomes of upper and upper middle income families. This too contributed to the increasing inequality in the distribution of income.

b. Economic and Housing Conditions—Single-Family Market

(1) *Interest Rate Trends.* As the 1980s began, mortgage interest rates were above 12 percent and rose quickly to over 15 percent. After 1982, they drifted slowly downward to the 9 percent range in 1987 before rising to over 10 percent in the 1989–1990 period. Rates returned to 9.3 percent in 1991 and then fell further to 8.2 percent in 1992 and 7.2 percent in 1993. The October 1993 rate of 6.80 percent was the lowest level in more than twenty years.[24] Rates rose nearly a full percentage point in 1994, and peaked at 8.3 percent in early 1995, but have since fallen by about 50 basis points.

Volatile interest rates were a principal cause of the housing market volatility of the 1980s and they continue to be a major determinant of housing and mortgage market activity. During 1992 and 1993, homeowners responded to the record low rates by refinancing existing mortgages. While refinancing accounted for less than 25 percent of mortgage originations in 1989–90 when interest rates exceeded 10 percent, the sharp decline in interest rates led refinancings to account for over 50 percent of all mortgage originations in 1992 and 1993.[25] Because of the heavy refinancing activity, single-family mortgage originations surged from less than $500 billion in 1990 to record levels of $894 billion in 1992 and over $1 trillion in 1993. As mortgage rates rebounded from the 1993 lows, refinancing subsided and home purchase returned as the predominant component of mortgage originations. Origination volume totalled $773 billion in 1994 and is projected to be about $650 and $700 billion in 1995 and 1996, respectively.

Single-family housing starts have also responded to interest rates, with record low volumes in 1981 and 1982, peaks in 1986 and 1987, and less severe lows in 1990 and 1991. Low interest rates and economic recovery in 1992 and 1993 made homeownership more affordable

and helped to turn the housing market around. Single-family starts increased from less than 900,000 during the recessionary years of 1990 and 1991 to 1.03 million in 1992, 1.13 million in 1993, and 1.20 million in 1994. Volume in 1994 was 43 percent higher than 1991's recessionary low of 840,000.

(2) *First-time Homebuyers* have been the driving force in the recovery of the nation's housing market over the past several years. First-time homebuyers are typically people in the 25–34 year-old age group that purchase modestly priced houses. As the post-World War II baby boom generation ages, the percentage of Americans in this age group has shrunk, from 28.3 percent in 1980 to 25.4 percent in 1992.[26] Nonetheless, first-time homebuyers have bucked these demographic trends to increase their share of home sales. During the 1980s, first-time buyers accounted for about 40 percent of home sales; this figure rose to 45 percent in 1991, 48 percent in 1992, receding to 46 percent in 1993, and rebounding to 47 percent in 1994.[27] The 1992 figure was the highest percentage for first-time buyers since the annual Home Buyers Survey was initiated in 1976.

Among the first-time buyers was a record number of single-individual households. The 1992 and 1993 Home Buyers Surveys found that approximately 30 percent of first-time buyers in these years were single, compared to 21 percent in 1991. The more affluent, move-up home buyers, on the other hand, have recently played a smaller role. A sluggish economy, uncertain outlooks for many white-collar jobs, and slow house price appreciation have kept many trade-up buyers out of the housing market.

Reflecting these trends, the average income for recent home buyers has fallen. In 1991, one of every three buyers had a family income of $50,000 or less; in 1993, those earning less than $50,000 accounted for 44 percent of all home buyers. Apparently, two years of low interest rates induced many renters who had previously been priced out of the market to become homeowners. A strong pent-up demand to own a home is not surprising given the large reductions in homeownership rates experienced by several groups during the 1980s (see Section C.1.d above). A recent survey of renters by the National Association of Realtors (NAR) indicated that only one-third prefer to remain renters for the foreseeable future.[28] Thus there are many potential home buyers among the 34 million households that are currently renting.

(3) *Potential Homebuyers.* As noted above, immigration is expected to be a major source of future homebuyers. Fannie Mae's *1995 National Housing Survey* revealed that immigrant renter households are almost 3 times as likely as renter households in general to list home purchase as their "number-one priority." Immigrants as a group are currently more than one-and-two-thirds times as likely to be renters although they appear as financially capable as the population at large.[29] The Joint Center for Housing Studies estimates that if the homebuying potential of immigrant households were realized—i.e., they purchased with the same propensity as non-immigrants with similar characteristics—that the number of homeowners in the largest 40 metropolitan areas would increase by about 900,000. In addition, the Joint Center estimates that another 950,000 native-born minority households in the same metropolitan areas would become homeowners if their rate of homeownership matched that of their native-born white counterparts with similar income and demographic characteristics.[30]

As part of the process of revising the GSE rule, HUD sought information on two key questions: how large is the underserved potential homebuyer market and what are the default risks associated with expanded homeownership among lower-income, underserved households? To help answer these questions, the Urban Institute and HUD developed a logit-based analysis of households in the 1990 Survey of Income and Program Participation (SIPP). The probability of a renter making the transition to homeownership was then estimated directly by applying a logit regression to the mid-1992 sub-sample of white suburban renters and recently-transitioned homeowners. These probabilities were then linked to all the remaining renter SIPP households to identify renters having relatively good prospects for transitioning to homeownership. Of the 20.3 million remaining renter households (i.e., 84 percent of all remaining renters) having low or moderate incomes, roughly 16 percent had a probability of transitioning into homeownership which was greater than that for half of the renter households who actually did become homeowners over the sample period. When one also took into account their likelihood of defaulting relative to the average expected for those actually transitioned to homeownership, 13.4 percent of all remaining low- and moderate-income renters had better-than-median probability of transitioning to homeownership and lower than average probability of default, assuming the purchase of a lower-cost home priced at the 10th percentile of area home prices. The proportion of high-probability, low-risk potential low- and moderate-income homebuyers declines to 10.6 percent if the purchase of homes priced at the median price for the area is assumed for these households.[31] These results indicate the existence of a significant population of lower-risk, potential homebuyer households that might be reached with more aggressive outreach.

(4) *Affordability.* Potential homebuyers in 1992–1994 enjoyed the most affordable market in almost twenty years. The National Association of Realtors (NAR) tracks housing affordability by measuring the degree to which an average family can afford monthly mortgage payments on a typical house, assuming that the family has enough cash for a 20 percent down payment. Specifically, NAR's composite affordability index measures the ratio of median family income to the income required to qualify for a conventional loan on a median-priced house. After averaging slightly over 110 between 1986 and 1991, the index jumped to 125 in 1992 and 133 in 1993, before slipping to 130 in 1994. The 1994 figure indicates that the U.S median family income was 30 percent more than was needed to qualify for a mortgage on the nation's median priced house.[32]

In addition to its overall affordability index, NAR also estimates the ability of first-time home buyers to purchase modestly-priced homes. When this index equals 100, the typical first-time buyer can afford the typical starter home under existing financial conditions with a 10 percent down payment; a score

[26] U.S. Department of Commerce, Bureau of the Census, *Money Income of Households, Families, and Persons in the United States: 1992*, Special Studies Series P–60, No. 184, Table B–25, October 1993.

[29] *Fannie Mae National Housing Survey 1995*, pp. 3 and 5.

[30] *State of the Nation's Housing, 1995*, Joint Center for Housing Studies of Harvard University, p. 30, Table A–8.

[31] George Galster and others, "Estimating the Size, Characteristics, and Risk Profile of Potential Homebuyers," (The Urban Institute, September 1995) mimeo.

[32] The South and North Central census regions were the most affordable for homebuyers, with affordability indexes of 141 and 176, respectively, in 1993. Affordability remained much more of a problem in the Northeast and West, where NAR's indexes were 110–117.

below 100 indicates that the monthly mortgage payment places a significant burden on first-time home buyers, even during a period of record low interest rates. NAR's first-time home buyer index ranged from 75 to 86 between 1991 and 1993 (84 in 1994).

(5) *Increased Interest Rates.* The 1994 jump in interest rates reduced housing affordability. According to Freddie Mac's primary market survey, interest rates for conventional, 30-year, fixed rate mortgages increased from a 25-year low of 7.05 percent in the fourth quarter of 1993 to 9.10 percent in the fourth quarter of 1994, with a subsequent decline to 7.95 percent in the second quarter of 1995. The 1994 increase made it more difficult for potential first-time home buyers to qualify for conventional mortgages, as reflected in the decline in NAR's composite affordability index from 142 in the fourth quarter of 1993 to 127 in the fourth quarter of 1994. The first-time home buyer's index dropped from 92.3 to 82.4 during this period. Both indexes would have fallen further if incomes had not risen to partially offset the effects of increased interest rates.[33] However, interest rates continue to remain lower and housing more affordable than was true for any previous extended period since 1977. Moreover, as the economic recovery continues, rising incomes should continue to offset the effects of higher interest rates.

While all of the factors identified above are subject to change, interest rates are perhaps the most volatile. HUD assessed the impact on Fannie Mae's and Freddie Mac's business from a 100- or 200-basis-point increase above actual 1993 and 1994 interest rates, that averaged 7.33 and 8.35 percent, respectively.[34] Table A.1. shows the resulting changes in purchases, assuming no offsetting increases in income or reductions in loan amounts for households with less than median incomes.

Holding everything else constant, a 100-basis-point increase in mortgage interest rates would result in a 2–3 percentage point drop in the GSEs' purchases of lower-income mortgages.[35] While the percentage of business in the lower-income category changes by less than 2 to 3 percentage points, the proportional change relative to its small base is far greater than that on the GSEs' share of higher-income business. This is because the lower the income classification, the greater the concentration of households near the 28 percent limit on the qualifying payment-to-income ratio. As Table A.1 shows, the pattern becomes more exaggerated with a 200 basis point change.

BILLING CODE 4210-32-P

[33] The qualifying payment-to-income ratio depends essentially on three elements: The interest rate, loan amount, and borrower's income. It can be shown that for every 100 basis point increase in interest rates (one percentage point), payment-to-income ratios rise by approximate 8 percent. However, this effect can be offset with either an 8 percent increase in income or an 8 percent reduction in the loan amount.

[34] The GSE data were limited to long-term, fixed-rate loans for one-unit, owner-occupied properties in metropolitan areas. A payment ratio was estimated for each loan using the Freddie Mac coupon rate prevailing 2 months prior to the origination date, an assumed annual tax and insurance rate of 1.8 percent, acquisition unpaid principal balance, and borrower's income. Estimated payment ratios would be biased upward to the extent the associated monthly Freddie Mac coupon rate or tax and insurance percentages exceed actual loan-specific rates. Because the monthly average of interest rates varied by less than one-half percentage point over any two-month period in 1993 or 1994, the potential bias is likely to be less than 1 percentage point in either direction.

[35] It was assumed that the lower-income, i.e., below-median-income, households whose payment-to-income ratios rose above 28 percent would leave the GSE distribution and either pursue non-GSE conventional or FHA mortgages to maintain their loan amount or defer their home purchase. Above-median-income households whose payment-to-income ratios rose above 28 percent were retained in the subsequent distributions under the expectation that they would either lower their loan amounts, raise their down payments, or switch to an ARM.

Table A.1

Distribution of GSEs' Business by Borrower Income Under Various Interest Rate Scenarios*

Fannie Mae

Income Class (% of Median)	Actual Rates	+100 Basis Points	+200 Basis Points
Percent of 1993 Business			
Above 100%	64.68	67.28	70.21
80 to 100%	15.68	14.60	13.36
60 to 80%	11.88	10.93	9.87
Under 60%	7.13	6.52	5.95
Percent of 1994 Business			
Above 100%	59.61	62.34	65.33
80 to 100%	16.85	15.84	14.65
60 to 80%	13.61	12.66	11.61
Under 60%	9.12	8.38	7.66

c. Economic and Housing Conditions: Multifamily Market

(1) *The Secondary Mortgage Markets: Multifamily Differs from Single-Family.* Over the past two decades, the single-family mortgage market has evolved from a fragmented set of local markets to an efficient, national market that is well integrated into the broader capital markets. In particular, the development of the secondary market for single-family mortgages has increased the flow of capital available to homeowners and lowered its cost.

The same cannot be said of multifamily rental housing. The secondary market has increased its purchase volume for multifamily mortgages in recent years, but remains much less of a factor in providing capital for multifamily housing than it does for single-family housing. About one-third of multifamily mortgage originations are sold to the secondary market, compared to about three-fourths of single-family mortgages in some years. The GSEs do not dominate the multifamily mortgage market like they dominate the single-family market—the GSE's purchases of multifamily mortgages in 1994 were $5.7 billion out of a total market estimated to be in excess of $30 billion.

(2) *Multifamily Continues to Rely on Portfolio Lenders.* As a result, debt financing for multifamily mortgages remains very dependent on portfolio lenders, many of whom are depository institutions (banks and thrifts). Yet several institutional changes in the past two decades have made it increasingly difficult for depository institutions to originate and hold multifamily mortgages.

These changes include a significant downsizing of the thrift industry after the savings and loan (S&L) debacle of the 1980s, and the enactment of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 which imposed new risk standards for depository institutions to prevent a recurrence of the S&L scandal.[36]

(3) *A Role for the GSEs in Multifamily Housing.* In addition to institutional changes, the difficulty with multifamily lending in recent years was also related to market conditions. The tax-driven overbuilding of the early 1980s was followed by a credit crunch due to the Tax Reform Act of 1986, FIRREA, and the soft market conditions for all properties (both new and existing properties) caused by the overbuilding. As a result, underwriting creditworthy multifamily deals was difficult in the early 1990s, especially for portfolio lenders. These conditions have now improved markedly.

Currently, multifamily properties offer less risk of loss than most other commercial property classes according to Moody's Investors Service.[37] In overbuilt markets, vacancies have declined due to depressed construction levels in the early 1990s. Accordingly, competition for multifamily loans has increased and spreads over Treasury rates of these loans have declined in the past year.

Credit risk remains a concern of investors, but new techniques in multiclass securitization have helped mitigate credit risk on multifamily mortgage pools.[38]

Much of the benefit of increased competition for multifamily mortgages results from reduced spreads on these mortgages, which lower capital costs for owners, and ultimately reduce rents for borrowers. As discussed in background section (7) below, the recent market upturn has not been equally beneficial to multifamily properties affordable to lower-income households. Among these are smaller, inner-city properties, which comprise a significant portion of the existing affordable stock, as well as larger redevelopment projects, seniors' housing, and affordable new construction in faster-growing markets.

By sustaining a secondary market for multifamily mortgages, the GSEs can extend the benefits that come from increased mortgage liquidity to many more lower-income families while helping private owners to maintain the quality of the existing affordable housing stock. That is, greater liquidity and stability in the secondary market due to a significant presence by the GSEs will benefit lower-income renters without the need for subsidy—much as the GSEs now provide benefits to homebuyers without subsidies. Providing liquidity and stability is the main role for the GSEs in the multifamily market, just as in the single-family market.

(4) *The Current Availability of Credit is not the Key Issue Regarding the Role of the GSEs.* As described above, an important consideration in determining the appropriate role for the GSEs in the multifamily housing market is the potential benefit from increased liquidity in the long term. The current "snapshot" of market conditions and recent trends in the availability of mortgage credit are temporary features of the mortgage market.

Today's ample supply of credit for certain multifamily properties and credit gaps for other classes of properties (see part vi of Section 7 below) are temporary features of a changeable market. For example, the current return to multifamily lending by banks and thrifts may be driven in part by a desire by these institutions to maintain loan volume and fee income following the single-family refinance boom of 1993–1994, and in part by Community Reinvestment Act considerations.

Portfolio lenders may eventually feel the burden of FIRREA standards or other portfolio management pressures and seek to reduce their holdings of multifamily mortgages. This could rather rapidly reverse many of the private investment decisions that have contributed to current market conditions. In such circumstances, the liquidity of an efficient secondary market for multifamily mortgages would help these lenders and other lenders maintain a presence in the primary market during such shifts in investment strategy.

(5) *The Importance of Increased Liquidity.* Anecdotal information available to HUD indicates that lack of liquidity, rather than credit risk, is a major obstacle preventing lenders from holding more affordable housing investments in portfolio. HUD examined the current sources of multifamily capital to determine if mortgages originated were available for purchase by the GSEs, including institutional mortgage originators and holders such as life insurance companies and pension funds.

Investors in multifamily mortgages make their investment decisions based on how well the characteristics of an asset matches their portfolio objectives. Increasing the liquidity of an asset like multifamily mortgages would increase the interest of all investors in holding these assets.

Life insurance companies report, for example, that it is generally true that they buy mortgages with the original intent of holding them. However, life insurance companies do sell multifamily mortgages from time to time, particularly when they need to make adjustments in the composition of their portfolios. These companies would increase their sales of multifamily mortgages if these investments were more liquid. In the current market, absent a highly liquid and efficient secondary market for multifamily mortgages, life companies that wish to sell a mortgage must pay the high transaction costs for a private placement. These companies might even buy and hold more multifamily mortgages, including mortgages on affordable units, in portfolio if there were a more active secondary market for these assets that made them more liquid.

(6) *Increased Liquidity Will Make More Multifamily Mortgages Available for GSE Purchase.* The GSEs have the ability to expand the multifamily secondary market and to bring increased liquidity to multifamily mortgages. The increases in liquidity that their sustained presence in this market would bring would make investments in multifamily mortgages more attractive for all investors. As noted above, even traditional portfolio investors can be a source of mortgages for GSE purchase through sales of existing, seasoned mortgages.[39]

Existing multifamily mortgages currently lack standardization with regard to loan-to-value, debt coverage, and other underwriting ratios, as well as with regard to loan terms, property use restrictions, and other factors. Not all existing mortgages would be suitable for GSE purchase. However, the GSEs can play an important role in bringing basic standards to this market, much as they have done with the single-family market, increasing the supply of seasoned mortgages available for purchase in the future.

(7) *Background on Multifamily Market Conditions.* The following discussion provides a more detailed overview of multifamily market conditions and trends.

(i) *Historical Trend: Decline in Debt Financing.* As mentioned above, the downsizing of the thrift industry in the late 1980s and the FIRREA changes contributed to a credit crunch for multifamily lending. Debt financing for multifamily housing became difficult to obtain in the early 1990s. Conventional multifamily mortgage originations peaked at $41 billion in 1986, and then declined every year to a trough of about $25 billion in 1992. In 1993 the level rose to almost $29 billion, and rose again in 1994 when originations were estimated to be about $33 billion. The recent increases in originations suggest that the credit crunch is effectively over.

The thrift industry's problems played a major role in the decline of the multifamily market. In 1985, thrift institutions originated 42 percent of multifamily mortgages. The thrifts' share of multifamily originations declined every year since that peak. Their holdings have decreased by $41 billion since 1988, due to defaults and write-offs, failure of institutions and refinancing of thrift-held mortgages. Multifamily mortgages remained close to 8.5 percent of total thrift assets from 1985 to 1992, but the high failure rate of these institutions has reduced their total assets. After passage of FIRREA in 1989, multifamily mortgage holdings by thrifts continued to decline.[40]

(ii) *Historical Trend: Decline in New Construction.* Multifamily mortgage construction activity has paralleled the decline in multifamily mortgage originations. Along with the decline in debt financing, the value of new multifamily construction declined for seven consecutive years until it edged up again in 1994 to $12.1 billion.[41] However, peaks and troughs have always characterized multifamily construction starts. The most recent peak year was 1985, in which 576,000 multifamily units were started.[42] The downturn from this peak was particularly severe. Over the next 3 years, multifamily housing production reached the lowest levels recorded since the Government began collecting these data 35 years ago. In 1993, the number of new multifamily units started fell to a low of 132,600. Multifamily starts rose to 223,500 in 1994, but even this level was far below the annual average of 435,000 units from 1964 through 1992.

Much of the current production of affordable multifamily housing is due to Low-Income Housing Tax Credits[43]—about 100,000 units per year since 1992.[44] An increasing share of affordable housing is being produced by non-traditional developers, particularly community-based, nonprofit developers. Although current production levels do not meet the demand for low-cost rental housing, housing affordable to lower-income families is a significant share of the multifamily units that are being produced.

(iii) *Supply and Demand Considerations.* Other market forces besides the thrift industry downsizing and FIRREA contributed to the decline in multifamily lending and construction in the early 1990s. For example, the generous tax treatment allowed by the Economic Recovery Tax Act of 1981 resulted in overbuilding of multifamily housing in many markets. When the Tax Reform Act of 1986 reduced the favorable tax treatment, investment decisions on multifamily mortgages appropriately returned to sound market fundamentals of supply and demand at the local market level. Accordingly, an excess supply of multifamily units in many markets kept the demand for both new construction and debt financing low for many years.

The 1994 upturn in multifamily construction is evidence that local rental markets are now stabilizing. Multifamily production has resumed in these markets, but it has been generally limited to higher-rent luxury units. HUD has anecdotal evidence of this happening throughout the Southeast, for example, and elsewhere.[45]

(iv) *Outlook for New Construction and Debt Financing.* Despite the upturn in starts, the demand for new multifamily construction, but not multifamily mortgage credit, is likely to be weak for the remainder of the decade. The aging of the baby-boom generation means that single-family tradeup homes will dominate the new-construction market, while declines in households under age 35 will limit the demand for new rental housing, except in very fast-growing areas in which migration from other parts of the nation and foreign immigration will offset the decline.[46]

HUD believes that the weak demand for new multifamily construction for the remainder of the decade will not result in a reduction in the overall demand for multifamily mortgage credit. The new

[36] Two specific changes instituted by FIRREA that affect multifamily mortgages are risk-based capital requirements under which most multifamily mortgages are assigned 100 percent risk weights (compared to 50 percent risk weights for single-family loans which are not backed by a federal credit agency), and a lending limitation to a single borrower of 15 percent of an institution's unimpaired capital.

[37] "Moody's: Multifamily Offers Less Loss Risk," *National Mortgage News*, May 1, 1995.

[38] For example, Fannie Mae "swap transactions" in which Fannie Mae swaps its securities for the top 85 percent, or the "A" piece, of a multifamily mortgage pool, leaves the riskier "B" piece, which absorbs the first credit losses from the pool, to be sold at discount on the market. Recently there has been considerable investor interest in these higher yielding B pieces.

[39] A potential new source of existing multifamily mortgages that may be available for GSE purchase in 1996 and well into the next decade could come from the Department's proposed "mark-to-market" solution to reducing the long-term costs of Section 8 project-based assistance programs. If Congress enacts the Department's proposal, several billion dollars of existing mortgages on privately-owned low-income multifamily properties could be sold as current Section 8 assistance contracts expire and are not renewed.

[40] Thrift holdings of multifamily mortgages fell by over one-third between 1989 and 1994, reducing their share of holdings among financial institutions from 34.5 percent to 23.3 percent according to the Federal Reserve Board.

[41] Joint Center for Housing of Harvard University, *State of the Nation's Housing*, 1995.

[42] The record high was 906,200 multifamily units started in 1972.

[43] The Low Income Housing Tax Credit (LIHTC) program was introduced by the Tax Reform Act of 1986.

[44] Exact figures for the LIHTC program are not yet available. The estimate in the text includes existing units under rehabilitation as well as new construction, although the majority are estimated to be new construction. Not all of these units have actually started construction or rehabilitation.

[45] HUD, Office of Policy Development and Research. May 1995. "U.S. Housing Market Conditions," pp. 27–47.

[46] Joint Center for Housing of Harvard University, 1995.

construction weakness will be offset by a growing demand associated with the existing stock. Specifically, mortgage demand in the remainder of the decade will include refinancings of long-term loans to reduce interest rates, rollover of shorter-term balloon loans coming due, refinancings to rehabilitate buildings, and existing property sales. Some observers expect that the $33 billion origination volume in 1994 to increase to over $35–$40 billion in 1996 and 1997.[47]

(v) *Interpreting the Trends.* These trends have been interpreted by some as evidence that the private capital markets in the mid-1990s are capable of providing the necessary liquidity to the multifamily market. However, there are other considerations to be weighed.

Despite the upturn in lending for new construction and the increased participation by banks, private conduits and REITs, there are indications that the private credit markets may not be meeting the full range of multifamily credit needs. The loans most likely to be originated by banks or sold to private conduits and real estate investment trusts (REITs) are not secured by affordable rental units. One market observer noted, "* * * while Wall Street has recently sought to fill multifamily lending gaps through conduits, these conduits barely nick the surface of affordable housing, concentrating primarily on market-rate multifamily properties."[48]

There are several reasons for the continued gap in multifamily finance. First, multifamily mortgages, like small business loans, lack standardization. This is particularly true for affordable housing loans because the developments often require a mix of financing sources in order to make the project affordable to low-income households. Second, multifamily loans are also relatively large, making multifamily mortgage pools more difficult to diversify than single-family pools. Third, there is far less information about the performance of multifamily mortgages than there is for single-family mortgages, particularly those secured by affordable developments.

(vi) *Current Credit Gaps: Property Types.* HUD has anecdotal evidence that credit shortages exist currently for certain classes of existing affordable properties: smaller multifamily properties (i.e., 5 to 20 unit properties) in older urban areas, and properties of all sizes in inner cities in need of rehabilitation.[49] While some may consider these to be market "niches," they are not insignificant markets. For example, small multifamily properties actually comprise a major component of the nation's affordable housing stock: the 1991 Residential Finance Survey shows that there were about 470,000 properties in the U.S. with between 5 and 19 units, but only 150,000 with 20 or more units.

Affordable housing for seniors is another class of properties that the conventional market has had difficulty financing. The primary reason for this difficulty appears to be uncertainty by the market over the nature of seniors' housing.[50] Compared to other multifamily rental housing, seniors' housing is more specialized and non-homogeneous. It is a currently evolving product, and investors are especially uncertain of its financial performance.

Finally, there is inadequate capital to finance construction of new affordable units, which usually involve low-income housing tax credits, in higher-growth markets.

(vii) *Current Credit Gaps: Lending Terms.* Terms of conventional financing can also restrict access to credit for units intended for lower-income families. For example, an obstacle to the financing of new construction or substantial rehabilitation of housing for lower-income families is the inability to lock-in an interest rate (without payment of an exorbitant fee) for the permanent loan. Over 60 percent of outstanding multifamily debt either carries a variable interest rate, or will have a balloon payment due in less than 10 years.

The construction financing for most new construction or substantial rehabilitation projects covers both the actual construction and the initial rent-up periods, while the interest rate usually floats until the project has reached the required occupancy level and is ready for permanent loan takeout and possible securitization. The inability to lock-in permanent rates without paying prohibitive lock-in fees, makes it much more difficult to finance affordable housing because a rate increase during construction and rent-up can make an affordable project infeasible.[51] If the GSEs are able to provide new financial instruments that include forward rate commitments at reasonable cost, for example, the credit gaps for affordable units can be reduced.

(viii) *The Impact of Credit Gaps.* A major problem facing low-income households is that low-cost housing units continue to disappear from the existing stock.[52] The ability of the nation to maintain the quality of the affordable housing stock and to stabilize inner city neighborhoods depends on the availability of adequate capital for small existing properties, redevelopment projects, and senior housing.

The current availability of multifamily credit for certain types of multifamily mortgages is not a valid argument that the GSEs are unneeded in the multifamily credit markets. Rather, the current competition for multifamily mortgages on amenity-rich apartments and the tightening spreads between the yields of privately issued multifamily MBS and comparable maturity Treasury bonds demonstrate the benefits that increased liquidity in multifamily markets could provide to the affordable rental housing market. That is, the GSEs' participation in the market can reduce the cost of capital and ultimately improve housing quality and/or decrease rents paid by low-income families.

(ix) *Rentals in 1- to 4-Unit Buildings.* HUD is also aware that a significant portion of the demand for rental housing is satisfied by rental units in properties containing 1 to 4 units. In 1993, about 57 percent of the rental housing in the nation was in buildings with fewer than 5 units. However, there is considerable variation across local markets in the portion of the rental stock that is contained in 1- to 4-unit properties. The New York area, for example, has only 30 percent of its rental units in 1- to 4-unit properties, while Chicago has 46 percent and Boston has 56 percent of its rental stock in 1- to 4-unit buildings. The market-specific variations suggest that rental housing in 1- to 4-unit properties is not a perfect substitute for multifamily rental housing. The need for multifamily housing is relatively greater in some cities.

The financing of 1- to 4-unit properties is provided by the standard single-family primary and secondary mortgage markets if one of the units is owner-occupied. This segment is relatively well-served by the existing capital-delivery system. If the 1- to 4-unit property is investor-owned, the single-family market is still used, but with greater restrictions such as tighter underwriting ratios. These restrictions are generally in response to the greater credit risk posed by investor-owned 1- to 4-unit properties. The investor-owned side of the 1- to 4-unit rental market also has access to the liquidity of the single-family secondary market, albeit with restrictions.

(x) *Credit Risk of Affordable Housing.* Credit risk is an important factor to be considered by the GSEs in their participation in the multifamily mortgage markets. Does credit risk pose a major obstacle to the development of an efficient and highly liquid secondary market for multifamily mortgages that addresses the full range of multifamily credit needs? If the GSEs broaden their penetration of the multifamily market to purchase more small (under $1 million) mortgages, will the GSEs be taking on additional risk? Unfortunately, the academic literature is deficient in addressing these questions. However, numerous sources suggest that credit risk is not an insurmountable obstacle.

On a whole loan basis, risk levels of multifamily lending are often higher than for single family. There are four major reasons for this. First, multifamily loans, like small business loans, lack standardization. This is particularly true for affordable housing because the financial package often involves tax credits or local subsidy which complicates the loans. Second, multifamily loans are also relatively large, making multifamily portfolios more difficult to diversify than single-family portfolios. Third, there is far less information about the performance of multifamily mortgages than there is for single-family mortgages, particularly those secured by affordable units. And finally, private mortgage insurance is not generally available for multifamily loans as it is for single-family loans.

However, multifamily investments in today's market often involve mortgage pools rather than whole loans. Credit risk remains a concern of investors, but new techniques in multiclass securitization have helped mitigate credit risk on multifamily mortgage pools. For example, Fannie Mae "swap transactions" in which Fannie Mae swaps its securities for the top 85 to 90 percent, or the "A" piece, of a multifamily mortgage pool, leaves the riskier "B" piece, which absorbs the first credit losses from the pool, to be sold at discount in the market.

The B-piece that absorbs all credit losses up to 15 percent of the total unpaid balance on a typical multiclass multifamily pool provides considerable loss protection. This makes the A-piece highly marketable. Recently there has been considerable investor interest in these higher yielding B-pieces as well.

A source of anecdotal information on the credit risk involved with affordable multifamily housing comes from participants in the low-income housing tax credit (LIHTC) program which was created by the 1986 Tax Reform Act. Tax credits are the only major Federal assistance program for new or rehabilitated low-income housing that is currently active. Detailed data on the composition and performance of tax credit projects are not yet available. However, both academic and industry experts have been observing the tax credit program since its inception, and a number of them have shared their observations with HUD.

These market observers tell HUD that tax credit deals typically are financed with 30 to 40 percent equity obtained from investors receiving the tax credits, first mortgage debt of about 40 to 60 percent, and the remaining amount up to 30 percent comes from local subsidies often in the form of "soft" second mortgages. Market observers tell us that the trend in tax credit deals is toward increased equity as a share of the total development cost due to increased competition among tax credit syndicators.

The lenders who provide first mortgage financing for tax credit deals consider their loans on these affordable units to be less risky than loans for market-rate multifamily projects. There are several reasons for this conclusion. First, the loan-to-value ratio on these deals is at most 60 percent, which gives lenders substantial protection from credit risk. If the lender must foreclose, the tax credits stay with the property, giving the lender the ability to attract equity from new investors. Other reasons that first mortgage financing on affordable tax credit deals is considered less risky are the low turnover rates of affordable units which keeps project vacancies low, the high potential for future appreciation of the property, and the close scrutiny to initial underwriting by the equity provider or syndicator.[53] This anecdotal experience suggests that not all mortgages on affordable multifamily loans need be high-credit-risk lending.

Continued achievement of the housing goals in this rule may require the GSEs to develop additional capabilities to underwrite classes of multifamily loans such as smaller existing properties, redevelopment projects, seniors' housing, and tax credit deals. This may pose some initial administrative difficulty for the GSEs, but there are no apparent fundamental difficulties in multifamily mortgage origination and purchase activities, such as unmanageable risks. If there were, such risks would be difficult to explain, given the current market trends toward higher multifamily lending activity and new techniques of risk management.

3. Performance and Effort of the GSEs toward Achieving the Low- and Moderate-Income Goal in Previous Years

Each GSE has submitted data on its 1993 and 1994 performance to the Secretary. This is the first time that such detailed information has been made available on the GSEs' activities, which in 1993 involved the purchase of 2.97 million mortgages on 3.24 million dwelling units by Fannie Mae and the purchase of 2.32 million mortgages on 2.38 million dwelling units by Freddie Mac. In 1994, due to rising interest rates and the decline in mortgage refinancings, aggregate purchase volume (in dwelling units) fell by 43 percent, with Fannie Mae purchasing 1.66 million mortgages on 1.97 million units, and Freddie Mac purchasing 1.25 million mortgages on 1.34 million units.

Each GSE also has submitted detailed loan-level data on each loan it purchased in 1993 and 1994. HUD has done extensive analyses to verify the GSEs' stated performance and to measure aspects of their mortgage purchase activities in 1993–94 not contained in tables submitted to HUD in which the GSEs' aggregate data in various ways.[54]

Fannie Mae's data for 1993 show that 34.3 percent of total units financed by its mortgage purchases were affordable to low- and moderate-income families.

[51] Another example of the terms of conventional financing that restricts access to credit for affordable units is the lack of long-term fixed rate loans. About 60 percent of conventional multifamily loans are adjustable rates or fixed rate balloon loans with terms of 10 years or less. The rollover of a balloon loan generally resets the interest rate. In either case, if the rate increases at a scheduled adjustment period, the higher debt service expense may be more difficult for an affordable property to absorb.

[52] The Joint Center's *State of the Nation's Housing* for 1995 finds that the number of unsubsidized low-cost units in the Northeast has fallen by half since 1974. In the Midwest the addition of new subsidized units has offset the loss of unsubsidized low-cost units, but in every other region the total low-cost stock (subsidized and unsubsidized) is below 1974 levels.

[53] See Stuart J. Boesky, "Tax Credits at Work," *Mortgage Banking*, September 1995.

[54] In the following discussion, the GSEs' performance is measured using the counting rules which will be in effect under the final rule, not those under the Interim Notice, which have been used by the GSEs in reporting performance to HUD. For this reason, in some cases the following data differ slightly from the data reported by the GSEs.

This represented a significant increase in the low- and moderate-income percentage from an estimated 28 percent in 1992, and Fannie Mae's performance substantially exceeded the 30 percent goal established for Fannie Mae by the Secretary.[55] A further gain was recorded in 1994, as 45.4 percent of Fannie Mae's purchases qualified for the Low- and Moderate-Income Housing Goal, which was also 30 percent in 1994.[56]

Freddie Mac's data for 1993 show that 30.0 percent of total units financed by its mortgage purchases were affordable to low- and moderate-income families. There was a significant increase from an estimated 24 percent in 1992, and Freddie Mac's performance exceeded the 28 percent goal established for Freddie Mac by the Secretary. A further gain was also recorded in 1994, when 38.0 percent of total units financed by Freddie Mac's mortgage purchases qualified for the low- and moderate-income goal, which was raised from 28 percent in 1993 to 30 percent in 1994 for Freddie Mac.

Although the GSEs surpassed the low- and moderate-income goals in 1993 and 1994, approximately 50 percent of their one-unit single-family owner-occupied purchases, the bulk of their business, were secured by housing for families with incomes in excess of 120 percent of area median income, as indicated in Table A.2.[57] These results indicate that achievement of the Low- and Moderate-Income Goal in 1993 and 1994 did not impede the GSEs from buying many mortgages on properties purchased by higher-income families.

TABLE A.2.—DISTRIBUTION OF DWELLING UNITS IN GSE SINGLE-FAMILY OWNER-OCCUPIED 1–UNIT PURCHASES BY INCOME CLASS OF MORTGAGOR, 1993–1994

Income of mortgagor(s) relative to area median income (%)	Fannie Mae, 1993 (%)	Fannie Mae, 1994 (%)	Freddie Mac, 1993 (%)	Freddie Mac, 1994 (%)
0–60	6.8	8.8	6.2	6.8
60–80	11.3	13.2	10.8	11.3
80–100	15.0	16.5	14.9	15.2
100–120	15.4	15.8	15.6	16.0
> 120	51.5	45.7	52.5	50.7
Total	100.0	100.0	100.0	100.0

4. Size of the Conventional Conforming Mortgage Market Serving Low- and Moderate-Income Families Relative to the Overall Conventional Conforming Market

The low- and moderate-income share of the mortgage market is estimated to be 48–52 percent. Appendix D presents in detail the underlying analysis for this estimate.

5. GSEs' Ability to Lead the Industry

FHEFSSA requires the Secretary to consider the GSEs' ability to lead the market in determining the level of the Low- and Moderate-Income Goal. The GSEs' ability to lead the industry depends on their dominant role in the mortgage market, their ability—through their underwriting standards and new programs and products—to influence the types of loans that private lenders are willing to make, their utilization of cutting edge technology, their highly competent and well-trained staffs, and their financial resources.

a. Dominant Role in Market

The GSEs purchased 71 percent of all conventional conforming single-family mortgages in 1993—up from 15 percent in 1980, 34 percent in 1985, 50 percent in 1991, and 64 percent in 1992.[63] The GSEs' share of the relevant market fell to 55 percent in 1994. This was due in part to the increase in the adjustable rate mortgage (ARM) share of the mortgage market, from 20 percent in 1993 to 39 percent in 1994.[64] However, the GSEs' market share in 1994 exceeded that in all years except 1992 and 1993.

Most of the mortgages purchased by the GSEs are securitized, but sizable amounts are held in portfolio—in fact Fannie Mae and Freddie Mac have the first- and fourth-largest mortgage portfolios, respectively, of all mortgage holders in the United States. The GSEs now hold or securitize about 30 percent of the total dollar volume of mortgages outstanding, compared to about 7 percent in 1980, and they have accounted for over 40 percent of the net increase in mortgages outstanding between 1980 and 1992 and over 70 percent of the net increase between 1989 and 1992.[65]

The dominant position of the GSEs is reinforced by their relationship to other market institutions. Banks and savings and loans are both their competitors and their customers—they compete as portfolio lenders, but at the same time they sell mortgages to the GSEs and buy mortgage securities from them, and also buy the debt securities that the GSEs use to finance their portfolios.

b. Set Underwriting Standards for Market

The GSEs' underwriting guidelines are followed by virtually all mortgage originators, including lenders who do not sell many of their mortgages to Fannie Mae or Freddie Mac.[66] The guidelines are also commonly followed in underwriting "jumbo" mortgages, which exceed the maximum principal amount which can be purchased by the GSEs (the conforming loan limit), because such mortgages eventually might be sold to the GSEs as the principal balance is amortized or the conforming loan limit is increased. By setting the credit standards against which the mortgage applications of lower-income families will be judged, the GSEs influence the rate at which mortgage funds flow to low-income borrowers and underserved neighborhoods. Congress realized the crucial role played by the GSEs' underwriting guidelines when it required each enterprise to submit a study on its guidelines to the Secretary and to Congress.

c. Leading Edge Technology

Both GSEs are in the forefront of new developments in mortgage industry technology. For example, Fannie Mae has developed FannieMaps®, a computerized mapping service offered to lenders, nonprofit organizations, and state and local governments to help them implement community lending programs. Both GSEs released automated underwriting systems in 1995. The Freddie Mac system is based on credit scoring, which allows explicit consideration of compensating factors, while the Fannie Mae system automates current underwriting standards. Such systems have the potential to reduce the cost of loan origination, particularly for low-risk loans.

d. Staff Resources

Both GSEs are well-known throughout the mortgage industry for the expertise of their staffs in carrying out their current programs, researching and developing improvements in the mortgage market in general, developing innovative new programs, and conducting research that may lead to new programs in the future. Their key executives frequently testify before Congressional committees on a wide range of housing issues, and both GSEs have developed extensive working relationships with a broad spectrum of mortgage market participants, including various nonprofit groups and government housing authorities.

e. Financial Strength

The benefits that accrue to the GSEs because of their GSE status and solid management have made them two of the nation's most profitable businesses. Fannie Mae's net income has increased steadily from $807 million in 1989 to $2.1 billion in 1994, and for the first two quarters of 1995 net income was accruing at an annual rate of $2.3 billion, despite a 46 percent drop in mortgage purchases and a 60 percent drop in MBS issued in comparison with the first half of 1994. Through the second quarter of 1995, Fannie Mae has recorded 30 consecutive quarters of increased net income. Fannie Mae's return on equity averaged 27.5 percent over the 1990–94 period—far above the rates achieved by most financial corporations. In addition, Fannie Mae's dividends per share more than tripled over this period, rising from $0.72 in 1990 to $2.40 in 1994.

Freddie Mac has shown similar trends. Freddie Mac's net income has increased steadily from $414 million in 1990 to $983 million in 1994, and for the first two quarters of 1995 net income was accruing at an annual rate of $1.04 billion, despite declines in business volume similar to those experienced by Fannie Mae. Freddie Mac's return on equity averaged 20.9 percent over the 1990–94 period—also well above the rates achieved by most financial corporations. Freddie Mac's dividends per share nearly doubled over this period, rising from $0.53 in 1990 to $1.04 in 1994.

One measure of the strength of the GSEs was provided by a recent ranking of American corporations. This survey found that Fannie Mae was first of all companies in total assets and Freddie Mac ranked 17th; with regard to total profits, Fannie Mae ranked 20th and Freddie Mac ranked 52nd.[67]

Under FHEFSSA, beginning with the second quarter of 1994, the GSEs must meet fully phased-in minimum core capital requirements of 2.5 percent of on-balance sheet assets and 0.45 percent of outstanding mortgage-backed securities and other off-balance sheet obligations, except as adjusted by the Director of OFHEO.[68] For the transition period from June 30, 1993 through March 31, 1994, the corresponding percentages were 2.25 percent and 0.40 percent respectively. Based on the relation between actual core capital and minimum core capital, a GSE is classified as adequately capitalized, undercapitalized, significantly undercapitalized, or critically undercapitalized.

The Director has found both GSEs adequately capitalized for all nine quarters ending June 30, 1993 through June 30, 1995. At the end of the second quarter of 1995, Fannie Mae's core capital of $10.323 billion exceeded its minimum capital requirement of $9.684 billion by $639 million, and Freddie Mac's core capital of $5.538 billion exceeded its minimum capital requirement of $5.256 billion by $282 million.

f. Conclusion About Leading the Market

In light of these factors, the Secretary has determined that the GSEs have the ability to lead the industry in making mortgage credit available for low- and moderate-income families.

6. The Need to Maintain the Sound Financial Condition of the GSEs

HUD has undertaken a separate, detailed economic analysis of this rule, which includes consideration of the financial safety and soundness implications of the housing goals. The analysis considered the likely mortgage default implications of the goals and implications for the profitability of the GSEs under various alternative economic assumptions. Among the conclusions are: that the goals will have, at most, only limited impacts on credit risk, which the GSEs should be able to handle without significant lowering of underwriting standards; that risks associated with increased multifamily mortgage purchase volumes under the goals are manageable, considering the scope of the increases implied by the goals; and that the goals imply no meaningful increase in risk to the sound financial condition of the GSEs' operations. Based on this analysis, HUD concludes that the goals raise minimal, if any, safety and soundness concerns.

D. Determination of the Low- and Moderate-Income Housing Goals

The annual goal for 1996 for each GSE's purchases of mortgages financing housing for low- and moderate-income families is established at 40 percent of the total number of dwelling units financed by each GSE's mortgage purchases. The goal for 1997 and thereafter, unless changed, is 42 percent. These goals represent an increase over the statutorily-mandated 1994 goal of 30 percent, but they are conservative relative to the market share estimates in Appendix D, below Fannie Mae's low-mod performance in 1994, and only slightly above Freddie Mac's performance in 1994. The Secretary's considerations of the six statutory factors led to the choice of these goals.

1. Housing Need

Almost three-fifths of American households qualify as low- and moderate-income under FHEFSSA's definitions—half of owners and 70 percent of renters. Data from the Census and from the American Housing Surveys demonstrate that housing problems and needs for affordable housing are indeed substantial among

[55] Some mortgage purchases are not eligible for inclusion under the low- and moderate-income goal, such as federally guaranteed mortgages, mortgages on second homes, and mortgages originated prior to January 1, 1993 that were missing relevant borrower income or rent data. Such mortgages were excluded from both the numerator and the denominator in calculating the performance under this goal. These exclusions amounted to 14 percent of Fannie Mae's purchases and 9 percent of Freddie Mac's purchases.

[56] A portion of the increase from 1993 reflects a decline in the share of refinancings, which have been less common among low- and moderate-income families.

[57] Cases with missing data have been excluded from the table.

[63] Estimates provided by Fannie Mae's Economics Department.

[64] Federal Housing Finance Board, "Rates & Terms on Conventional Home Mortgages," Annual Summary, 1994, Table 3. ARMs present less interest rate risk to lenders than fixed-rate mortgages, and therefore are more likely to be retained in portfolio.

[66] The underwriting guidelines published by the two GSEs are not identical, but they are very similar in most aspects. And since November 30, 1992, Fannie Mae and Freddie Mac have provided lenders the same Uniform Underwriting and Transmittal Summary (Fannie Mae Form 1008/Freddie Mac Form 1077), which is used by originators to collect certain mortgage information that they need for data entry when mortgages are sold to either GSE.

[67] *Business Week*, March 27, 1995, p. 154.

[68] Core capital is defined as the sum of the par or stated value of outstanding common or perpetual, noncumulative preferred stock, paid-in capital, and retained earnings.

low- and moderate-income families. These households, particularly those with very-low-incomes, are burdened by high rent payments and will likely continue to face serious housing problems, given the dim prospects for earnings growth in entry-level occupations.

With respect to homeownership, many younger, minority, and lower-income families did not become homeowners during the 1980s due to the slow growth of earnings, high real interest rates, and continued house price increases. Recently, low interest rates and low inflation have improved affordability conditions and first-time homeowners have become a major driving force in the home purchase market. A large pent-up demand for homeownership exists on the part of low-income families closed out of the market during the 1980s, particularly families with children in need of larger units and better neighborhoods.

Several demographic changes will strain the housing finance system during the 1990s. The continued influx of immigrants will increase demand for both rental and owner-occupied housing. Non-traditional households have become more important as overall household formation rates have slowed. With later marriages, divorce, and non-traditional living arrangements, the fastest growing household groups are single-parent and single-person households.

The multifamily mortgage market is far less integrated into the broader capital markets than is the single-family market. The GSEs do not dominate the multifamily secondary mortgage market as they do the single-family market, and they may never dominate the multifamily market to this extent—multifamily loans are more complex than single-family mortgages, and because of the large size of the component loans, multifamily mortgage pools are more difficult to diversify. Portfolio lending may remain a greater factor in multifamily markets.

Current market conditions indicate that the supply of multifamily mortgage credit is adequate for amenity-rich, suburban garden style apartments. However, credit gaps do exist, particularly with regard to the maintenance of the existing affordable stock and construction of affordable units in higher growth markets. Increased liquidity can make investments in affordable multifamily housing more attractive to all investors, including portfolio lenders, which would bring more capital at lower cost to fill current and future multifamily credit gaps. The GSEs' active participation in the market can lead to this needed increase in liquidity.

2. Past Performance and Ability to Lead the Industry

The GSEs have been assisting the overall secondary market, increasing their share of purchases of conventional conforming single-family mortgage origination from 42 percent in 1989 to 70 percent in 1993 before dropping to 55 percent in 1994. In fact, most industry observers would agree that the recent growth in the secondary market was the reason the decline of the thrift industry had only minor effects on the nation's housing finance system.

The GSEs' performance on the low- and moderate-income goal has also been improving. Fannie Mae's performance increased from 34.3 percent in 1993 to 45.4 percent in 1994. Freddie Mac's performance also increased from 30.0 to 38.0 percent during this period.

Single-family Market. The Secretary is concerned about the GSEs' assistance to the lower-income end of the market. Figure A.1 presents the distribution of the GSEs' single-family mortgage purchases by income category. In 1994, homeowners with incomes less than 60 percent of median represented roughly 7 percent of GSE purchases, and those with incomes less than 80 percent of median represented no more than 19 percent of GSE purchases. Families with incomes over 120 percent of median, on the other hand, accounted for approximately 50 percent of single-family mortgages purchased by the GSEs.

While the GSEs have improved their performance, they continue to purchase a smaller proportion of mortgages for very-low-income homebuyers than do portfolio lenders operating in the conforming market. According to the AHS, about 10 percent of conforming loans were originated for very-low-income homebuyers in 1993, compared to about 5 percent of GSE purchases in 1993. Figure A.2 uses HMDA data to compare the GSEs with the non-GSE portion of the conforming market. In 1993 and 1994, very-low-income loans accounted for a higher percentage of the business of portfolio (non-GSE) lenders than they did of GSE business. The 1993 and 1994 HMDA data suggest that there is room for the GSEs to improve their performance in purchasing loans at the lower-income end of the market.

Moreover, there is evidence that there is a significant population of potential homebuyers who might well respond to aggressive outreach. As mentioned above, both Fannie Mae and the Joint Center expect immigration to be a major source of future homebuyers. Furthermore, analysis by The Urban Institute indicates the existence of a large untapped potential. Indeed, the GSE's recent experience with new outreach and affordable housing initiatives is important confirmation of this potential.

Multifamily Market. The Secretary is particularly concerned about the level of Freddie Mac's activity in the multifamily area. In 1994, Freddie Mac purchased $913 million in multifamily mortgages, which was an increase over its purchase of $191 million in 1993. Given the affordability problems faced by renters and the need for a well-functioning secondary market for multifamily loans, it is imperative that Freddie Mac's multifamily business be increased. By sustaining a secondary market in units that meet the special affordable goal, the GSEs will bring increased liquidity, added stability, and ultimately lower rents for lower-income families in these segments of the market. In addition, their promotion of increased standardization in multifamily finance would allow for more direct links to capital markets and improve overall market efficiency and stability. The 1996 and 1997–99 goals are intended to encourage a minimum level of multifamily activity by Freddie Mac.

3. Market Feasibility and Changing Market Conditions

As detailed in Appendix D, the low- and moderate-income mortgage market is quite large, accounting for 48 to 52 percent of dwelling units financed by conventional conforming mortgages. Figure A.3 compares recent GSE performance, the 1996 and 1997–1999 goals, and the size of the low- and moderate-income market. Having considered the projected market and economic and demographic conditions for 1996–1999 and the GSEs' recent performance, HUD has determined that goals for low- and moderate-income purchases of 40 percent for 1996, 42 percent for 1997–1999, and 42 percent thereafter pending establishment of a new goal, are feasible.

In estimating the size of the market, HUD also used assumptions about future economic and market conditions that were less favorable than those that existed over the last two years. HUD is well aware of the volatility of mortgage markets and the possible impacts on the GSE's ability to meet the housing goals. Should conditions change such that the goals are no longer reasonable or feasible, the Secretary has the authority to revise the goals.

4. Parity Between the GSEs

The Secretary is establishing identical goals for both Fannie Mae and Freddie Mac. Freddie Mac consistently lags behind Fannie Mae on the housing goals. In part, this is due to Freddie Mac's limited multifamily activity—their 1994 multifamily mortgage purchases accounted for only 8.9 percent of their overall performance under this housing goal (versus 23.8 percent for Fannie Mae). Freddie Mac has used the past four years to rebuild its multifamily operations and has recently brought on new staff, developed new systems, and is pursuing an aggressive acquisition strategy. On the single-family side, Freddie Mac serves the same lenders and offers the same products as Fannie Mae. Therefore, Freddie Mac should be able to match Fannie Mae's performance in achieving the single-family goals. Moreover, the legislative history supports the idea of parity after the transition period, noting that "because the enterprises have essentially equal opportunities, their respective annual goals should generally be set at comparable levels."[69]

5. Conclusions

The Secretary has determined that the 1996 and 1997–1999 goals set forth above address national housing needs and current economic, housing, and demographic conditions, and that they take into account the GSEs' performance in the past in purchasing low- and moderate-income mortgages, as well as the size of the conventional mortgage market serving low- and moderate-income families. Moreover, the Secretary has considered the GSEs' ability to lead the industry as well as the GSEs' financial condition. The Secretary has determined that the goals are necessary and achievable.

BILLING CODE 4210-32-C

Appendix B—Secretarial Considerations to Establish the Central Cities, Rural Areas, and Other Underserved Areas Goal

A. Establishment of Goal

1. Introduction

The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (FHEFSSA) requires the Secretary to establish an annual goal for the purchase of mortgages on housing located in central cities, rural areas, and other underserved areas (the "Geographically Targeted Goal").

In establishing this annual housing goal, FHEFSSA requires the Secretary to consider:

1. Urban and rural housing needs and the housing needs of underserved areas;
2. Economic, housing, and demographic conditions;
3. The performance and effort of the GSEs toward achieving the Geographically Targeted Goal in previous years;
4. The size of the conventional mortgage market for central cities, rural areas, and other underserved areas relative to the size of the overall conventional mortgage market;
5. The ability of the GSEs to lead the industry in making mortgage credit available throughout the United States, including central cities, rural areas, and other underserved areas; and
6. The need to maintain the sound financial condition of the GSEs.

Organization of Appendix. Section A defines the goal and summarizes HUD's assessment of other proposed definitions of the Geographically Targeted Goal. Section B reports findings on access to mortgage credit and Section C addresses the factors listed above. Section D summarizes the Secretary's rationale for setting the level for the Geographically Targeted Goal.

2. HUD's Geographically Targeted Goal

As required by FHEFSSA, during 1993–1995 only mortgages located in central cities, as designated by the Office of Management and Budget (OMB), counted toward the Geographically Targeted Goal. FHEFSSA directed the Secretary to expand the Geographically Targeted Goal to include rural areas and other underserved areas.

HUD's definition of the Geographically Targeted Goal is based on studies of mortgage lending and mortgage credit flows conducted by academic researchers, community groups, the GSEs, HUD and other government agencies. While more research must be done before mortgage access for different types of people and neighborhoods is fully understood, one finding from the existing research literature stands out—minority and low-income neighborhoods have higher mortgage denial rates and lower mortgage origination rates than other neighborhoods. A neighborhood's minority composition and its level of income are useful proxies for measuring access to mortgage credit.

Metropolitan Areas. The rule provides that within metropolitan areas, mortgage purchases will count toward the goal when those mortgage purchases finance properties that are located in census tracts where either the median income of families in the tract does not exceed 90 percent of the area median income, or minorities comprise 30 percent or more of the residents and the median income of families in the tract does not exceed 120 percent of the area median income.

The final rule's definition includes 20,326 of the 43,232 census tracts (47 percent) in metropolitan areas and accounts for 44 percent of the metropolitan population.[1] The tracts included in this definition suffer from poor mortgage access and depressed socioeconomic conditions. The average mortgage denial rate in these tracts is 21 percent, almost twice the denial rate in non-included tracts.

The definition in the final rule adds 3,657 additional tracts to the definition in the proposed rule. These tracts have significant problems with access to credit, as evidenced by relatively high mortgage denial rates and low origination rates.

Nonmetropolitan Areas. The final rule provides that in non-metropolitan areas, mortgage purchases that finance properties that are located in counties will count toward the Geographically Targeted Goal where: minorities comprise 30 percent or more of the residents and the median income of families does not exceed 120 percent of the state nonmetropolitan median income; *or* the median income of families does not exceed 95 percent of the greater of the state nonmetropolitan median income or the nationwide nonmetropolitan median income.

Two important factors influenced HUD's definition of nonmetropolitan underserved areas—lack of available data for measuring mortgage availability in rural areas and the difficulty in operating mortgage programs at the census-tract level in rural areas. Because of these factors, the final rule uses a more inclusive, county-based definition of underservedness in rural areas. HUD's definition includes 1,511 of the 2,305 counties (66 percent) in nonmetropolitan areas and accounts for 54 percent of the nonmetropolitan population.

Goal Levels. The Geographically Targeted Goal is 21 percent in 1996 and 24 percent in 1997 and thereafter. HUD estimates that the mortgage market in areas included in the Geographically Targeted Goal accounts for 25–28 percent of the total number of newly-mortgaged dwelling units. In 1994, 29 percent of Fannie Mae's purchases financed dwelling units located in these areas, compared with 24 percent of Freddie Mac's purchases.

3. Alternative Definitions

Fannie Mae and Freddie Mac each proposed alternative definitions of underserved areas. Several other commenters suggested alternative definitions similar to those proposed by the GSEs. Fannie Mae would define all central city and nonmetropolitan census tracts as underserved; a suburban or non-central city tract would be considered underserved if minorities comprise 50 percent or more of the residents; or if the median income of families does not exceed 80 percent of the area median income. Freddie Mac would define a tract as underserved if minorities comprise 20 percent or more of the residents; or if the median income of families does not exceed 100 percent of the area median income.

HUD conducted extensive analysis of these and other alternative definitions of underserved areas. HUD also contracted with the Urban Institute to evaluate the alternative definitions of underserved areas.[2] That analysis, which is reported in Section B of this appendix, concluded that HUD's definitions in both the proposed rule and this final rule provide much better measures of mortgage access problems.

Fannie Mae Definition. The research conducted by the GSEs, other mortgage

[1] Tracts are excluded from the analysis if median income is suppressed or there are no population or owner-occupied 1–4 unit properties. There are 2,033 of these tracts. When reporting denial, origination, and application rates, tracts are excluded from the analysis if there are no purchase or refinance applications. Tracts are also excluded from the analysis if: (1) group quarters constitute more than 50 percent of housing units or (2) there are less than 15 home purchase applications in the tract and the tract denial rates equal 0 or 100 percent. Excluded tracts account for a small percentage of mortgage applications (1.4 percent). These tracts are not excluded from HUD's underserved areas if they meet the income and minority thresholds. Rather, the tracts are excluded to remove the effects of outliers from the analysis.

[2] George Galster, "Comments on Defining 'Underserved' Areas in Metropolitan Regions," Urban Institute, prepared for the U.S. Department of Housing and Urban Development, August 15, 1995.

market economists, and HUD supports the premise that the location of a census tract—whether within a central city or a suburb—has minimal relationship to whether the tract is underserved. Instead, these studies have found that mortgage flows in a census tract are strongly correlated with the minority concentration or median income of that tract. The Urban Institute criticized the continued use of OMB-designated central cities in the goal because it treats all areas in central cities as if they have access problems. However, substantial evidence shows that mortgage access problems are not the same across central city neighborhoods.

Use of the definition advanced by Fannie Mae would add 8,833 central-city tracts to 13,554 central city tracts under this rule's definition. Credit access is not a problem in these added tracts—their average mortgage denial rate is 11 percent, which is one-half of the 22 percent denial rate for central city tracts covered by this final rule.

Freddie Mac Definition. Use of the definition proposed by Freddie Mac would add substantially more tracts and tracts that have lower denial rates than the definition in the final rule. Credit access does not appear to be a problem in the 5,367 tracts added by the Freddie Mac definition. The denial rate for the added tracts is 15 percent, which is only slightly above the 13 percent denial rate for all metropolitan tracts and significantly less than the 21 percent denial rate for metropolitan area tracts covered by this final rule.

B. Underlying Data and Identifying Underserved Areas

1. Introduction and Overview

Data on mortgage credit flows are far from perfect, and issues regarding the identification of areas with inadequate access to credit are both complex and controversial. For this reason, before considering housing needs and past GSE performance, it is essential to define "underserved areas" as accurately as possible from existing data. To provide essential background for understanding the final rule's definition of underserved areas for this goal, this section carefully reviews the literature investigating access to credit and reports findings from HUD's analysis of 1993 and 1994 HMDA and Census data bases. The first part of this section discusses research and data analysis in urban areas; the latter part discusses rural areas.

Three main points are made in this section:

- The existence of substantial geographic disparities in mortgage credit is well documented for metropolitan areas. Research has demonstrated that areas with lower incomes and higher shares of minority population consistently have poorer access to mortgage credit, with higher mortgage denial rates and lower origination rates for mortgages. Thus, the income and minority composition of an area is a good method of determining whether that area is being underserved by the mortgage market.
- The research supports a targeted definition. Studies conclude that characteristics of the applicant and the neighborhood where the property is located are the major determinants of mortgage denials and origination rates. Once these characteristics are accounted for, other influences such as location in an OMB-designated central city play only a minor role in explaining disparities in mortgage lending.[3]
- Research on mortgage credit needs in rural areas is not extensive because of the lack of mortgage data. The available research does suggest that income and minority composition identify rural areas that experience housing and mortgage access problems. The lack of mortgage data, however, suggests the use of a broader underserved definition than in metropolitan areas.

2. Evidence About Access to Credit in Urban Areas

The viability of neighborhoods—whether urban, rural, or suburban—depends on the access of their residents to mortgage capital to purchase and improve their homes. While neighborhood problems are caused by a wide range of factors, including substantial inequalities in the distribution of the nation's income and wealth, there is increasing agreement that imperfections in the nation's housing and mortgage markets are hastening the decline of distressed neighborhoods. Disparate denial of credit based on geographic criteria can lead to disinvestment and neighborhood decline. Discrimination and other factors, such as inflexible and restrictive underwriting guidelines, limit access to mortgage credit and leave potential borrowers in certain areas underserved.

a. Early Credit Flow Studies

Most studies of geographical disparities have used Home Mortgage Disclosure Act (HMDA) data. A number of studies using the early HMDA data sought to test for the existence of geographical redlining, which is the refusal of lenders to make loans in certain neighborhoods regardless of the creditworthiness of the individual applicant.[4] Consistent with the redlining hypothesis, these studies found lower volumes of loans going to low-income and high-minority neighborhoods.[5] However, such analyses were criticized because they did not distinguish between demand and supply effects[6]—that is, whether loan volume was low because people in high-minority and low-income areas were unable to afford home ownership and therefore were not applying for mortgage loans, *or* because lenders refused to make loans in these areas. Moreover, the early HMDA data were incomplete because non-depository lenders (e.g., mortgage bankers, who originate most FHA loans) were not included.

Like early HMDA studies, an analysis of deed transfer data in Boston found lower rates of mortgage activity in minority neighborhoods.[7] The discrepancies held even after controlling for income, house values and other economic and non-racial factors that might explain differences in demand and housing market activity.[8]

[3] For the sake of brevity, in the remainder of this appendix, the term "central city" is used to mean "OMB-designated central city."

[4] Prior to 1990, HMDA data showed only the total number and aggregate dollar volume of loans made in each census tract for depository institutions; no information was reported on individual borrowers or on applications denied.

[5] These studies, which were conducted at the census tract level, typically involved regressing the number of mortgage originations (relative to the number of properties in the census tract) on characteristics of the census tract including its minority composition. A negative coefficient estimate for the minority composition variable was often interpreted as suggesting redlining. For a discussion of these models, see Eugene Perle, Kathryn Lynch, and Jeffrey Horner, "Model Specification and Local Mortgage Market Behavior," *Journal of Housing Research*, Volume 4, Issue 2, 1993, pp. 225–243.

[6] For critiques of the early HMDA studies, see Andrew Holmes and Paul Horvitz, "Mortgage Redlining: Race, Risk, and Demand," *The Journal of Finance*, Volume 49, No. 1, March 1994, pp. 81–99; and Michael H. Schill and Susan M. Wachter, "A Tale of Two Cities: Racial and Ethnic Geographic Disparities in Home Mortgage Lending in Boston and Philadelphia," *Journal of Housing Research*, Volume 4, Issue 2, 1993, pp. 245–276.

[7] Katherine L. Bradbury, Karl E. Case, and Constance R. Dunham, "Geographic Patterns of Mortgage Lending in Boston, 1982–1987," *New England Economic Review*, September/October 1989, pp. 3–30.

[8] Using an analytical approach similar to that of Bradbury, Case, and Dunham, Anne Shlay found evidence of fewer mortgage loans originated in black census tracts in Chicago and Baltimore. See Anne Shlay, "Not in That Neighborhood: The Effects of Population and Housing on the Distribution of Mortgage Finance within the Chicago SMSA," *Social Science Research*, Volume 17, No. 2, 1988, pp. 137–163; and "Financing Community: Methods for Assessing Residential Credit Disparities, Market Barriers, and Institutional Reinvestment Performance in the Metropolis," *Journal of Urban Affairs*, Volume 11, No. 3, 1989, pp. 201–223.

In addition, a larger percentage of transactions in such neighborhoods were financed by the seller or other non-traditional institutional lenders (e.g., credit unions, governments, universities, business leaders, real estate trusts, and pension funds). Greater seller financing may suggest unmet demand for mortgages, since it is not likely that minority sellers prefer, more than whites, to finance the sale of their homes rather than being paid in cash.[9] The study concluded that "the housing market and the credit market together are functioning in a way that has hurt African American neighborhoods in the city of Boston."

b. Improved HMDA Data—Wider Coverage and Mortgage Denial Rates

HMDA reporting was expanded in 1990 to provide information on the disposition of loan applications (originated, approved but not accepted by the borrower, denied, withdrawn, or not completed), to include the activity of large independent mortgage companies, and to provide information on the race and income of individual loan applicants. An additional expansion in 1993 covered mortgage companies that originated 100 or more home purchase loans in the preceding calendar year. HUD's analysis using the expanded HMDA data for 1993 and 1994 shows that high-minority and low-income census tracts have both higher loan application denial rates and lower loan origination rates.[10]

Table B.1 presents mortgage denial and origination rates by the minority composition and median income of census tracts for metropolitan areas. Two patterns are clear:

- Census tracts with higher percentages of minority residents have higher mortgage denial rates and lower mortgage origination rates than all-white or substantially-white tracts. For example, the denial rate for census tracts that are over 90 percent minority is over two-and-a-half times that for census tracts with less than 10 percent minority.
- Census tracts with lower incomes have higher denial rates and lower origination rates than higher income tracts. The average number of 1993 mortgage originations in the highest-income census tracts (i.e., tracts with a median income over 150 percent of area median) was 20.0 per 100 owner-occupants; this compares with a range of 4.4 to 9.0 originations for the census tract deciles with income less than 90 percent of area median.[11]

Denial rates in 1993 increased from 10.7 to 29.3 percent as minority concentration changes from low-minority to 90-percent-minority tracts.[12] They declined from 24.2 to 7.8 percent as tract income increases from 60 percent of area median to over 150 percent of area median. Similar patterns arose in 1994.

BILLING CODE 4210-32-P

[9] Analysis of 1985 American Housing Survey data also showed a greater reliance on non-institutional financing by low- and moderate-income owners in both metropolitan and rural areas. See the Urban Institute, "The Availability and Use of Mortgage Credit in Rural Areas," 1990.

[10] HUD's previous analysis of 1992 HMDA produced comparable results. For a similar analysis based on 1992 HMDA data, see Glenn B. Canner, Wayne Passmore, and Dolores S. Smith, "Residential Lending to Low-Income and Minority Families: Evidence from the 1992 HMDA Data," *Federal Reserve Bulletin*, Volume 80, February 1994, pp. 79–108.

[11] Origination rates in 1994 are lower than origination rates in 1993 for all income and minority levels because of the lower number of refinance mortgages.

[12] The denial rates in Table B.1 are for purchase mortgages. Denial rates are several percentage points lower for refinance loans than for purchase loans, but denial rates follow the same pattern for both types of loans: rising with minority concentration and falling with increasing income.

Table B.1

Origination and Denial Rates for Conventional Mortgages

Minority Percentage	Originations Per 100 Owner-Occupied Units (Purchases and Refinances) 1993	1994	Denial Rates (Purchases) 1993	1994
Less than 10%	14.6	8.2	10.7 %	10.9 %
10-20	13.7	8.0	13.2	13.7
20-30	11.9	7.3	16.2	16.7
30-40	11.1	6.8	18.4	18.5
40-50	10.1	6.5	20.1	20.2
50-60	9.4	6.4	22.0	21.1
60-70	9.2	6.3	22.7	21.6
70-80	8.5	6.3	23.2	22.1
80-90	7.0	5.6	25.3	23.9
90-100	4.1	3.9	29.3	27.3

Tract Income Relative to MSA Median	Originations Per 100 Owner-Occupied Units (Purchases and Refinances) 1993	1994	Denial Rates (Purchases) 1993	1994
Less than 20%	5.9	1.4	30.6 %	28.7 %
20-30	6.3	4.2	25.8	28.4
30-40	4.4	3.9	28.2	27.9
40-50	4.7	4.4	28.0	26.8
50-60	5.1	4.4	25.8	26.0
60-70	6.2	5.0	24.2	23.8
70-80	7.3	5.5	21.6	21.4
80-90	9.0	6.2	18.7	19.3
90-100	10.7	6.8	15.9	16.3
100-110	12.7	7.6	13.3	13.6

BILLING CODE 4210-32-C

Table B.2 aggregates the data in Table B.1 into six minority and income combinations that exhibit very different credit flows. The low-minority (less than 30 percent minority), high-income (over 120 percent of area median) group has a denial rate of 8 percent and an origination rate of 19 per 100 owner occupants. The high-minority (over 50 percent), low-income (under 90 percent of area median) group has a denial rate of 27 percent and an origination rate of only 6 per 100 owner occupants. The other groupings fall between these two extremes.

The advantages of HUD's underserved area definition can be seen by examining the minority-income combinations highlighted in Table B.2. The sharp differences in denial rates and origination rates between the underserved and remaining served categories illustrate that HUD's definition delineates areas that have significantly less success in receiving mortgage credit. Underserved areas have almost twice the average denial rate of served areas (21 percent versus 11 percent) and half the average origination rate per 100 owner occupants (8 versus 16). HUD's definition does not include high-income (over 120 percent of area median) census tracts even if they meet the minority threshold. The mortgage origination rate per 100 owner occupants (15) for high-income tracts with a minority share of population over 30 percent is about the same as the average (16) for all served areas.

c. Recent HMDA Studies—Controlling for Applicant Credit Risk

An important question is whether variations in denial rates reflect lender bias against certain kinds of neighborhoods and borrowers, or simply the credit quality of the potential borrower (as indicated by the applicant's available assets, credit rating, employment history, etc.). The technical improvements offered by recent studies of credit disparities have attempted to control for credit risk factors that might influence a lender's decision to approve a loan. Without fully accounting for the creditworthiness of the borrower, racial differences in denial rates cannot be attributed to lender bias. The best example of accounting for credit risk is the study by researchers at the Federal Reserve Bank of Boston, which analyzed mortgage denial rates.[13] To control for credit risk, the Boston Fed researchers included 38 borrower and loan variables indicated by lenders to be critical to loan decisions. The study found that minorities' higher denial rates could not be explained fully by income and credit risk factors. African Americans and Hispanics were about 60 percent more likely to be denied credit than Whites, even after controlling for credit risk characteristics such as credit history, employment stability, liquid assets, self-employment, age, and family status and composition. Although almost all highly-qualified applicants of all races were approved, differential treatment was observed among borrowers with lesser qualifications.[14]

A recent HUD study also found mortgage denial rates for minorities to be higher in ten metropolitan areas, even after controlling for credit risk.[15] In addition, the higher denial rates observed in minority neighborhoods were not purely a reflection of the higher denial rates experienced by minorities. Whites experienced higher denial rates in some minority neighborhoods than in some predominantly white neighborhoods.

A more recent reassessment and refinement of the data used by the Federal Reserve Bank of Boston has confirmed the findings of that study.[16] William C. Hunter of the Federal Reserve Bank of Chicago also found that race was a factor in denial rates of marginal applicants. While denial rates were comparable for borrowers of all races with "good" credit ratings, among those with "bad" credit ratings or high debt ratios, minorities were significantly more likely to be denied than similarly-situated whites. The study concludes that the racial differences in denial rates are due to a cultural gap between white loan officers and minority applicants, and conversely, a cultural affinity with white applicants.

The two Fed studies and the HUD study concluded that the effect of borrower race on mortgage rejections persists even after controlling for legitimate determinants of lenders' credit decisions. Thus, they give some legitimacy to denial rate comparisons such as those in Tables B.1 and B.2. However, the independent race effect identified in these studies is still difficult to interpret. In addition to lender bias, access to credit can be limited by loan characteristics that reduce profitability[17] and by underwriting standards that have disparate effects on minority and lower income borrowers and neighborhoods.[18]

d. Recent HMDA Studies—Controlling for Neighborhood Risk and Demand and Tests of the Redlining Hypothesis

Two recent statistical studies sought to test the redlining hypothesis by more completely controlling for differences in neighborhood risk and demand. These studies do not support claims of racially induced mortgage redlining—the explanatory power of neighborhood race is reduced to the extent that the effects of neighborhood risk and demand are accounted for. However, these studies cannot reach definitive conclusions about redlining because of the correlation of neighborhood race with other explanatory variables included in their models.

First, Andrew Holmes and Paul Horvitz used 1988–1991 HMDA data to examine the flow of conventional mortgage originations across census tracts in Houston.[19] Their regression model included as explanatory variables the economic viability of the loan and characteristics of residents of the tract (e.g., house value, income, age distribution and education level), measures of demand (e.g., recent movers and change in owner-occupied units between 1980 and 1990), and measures of credit risk (defaults on government-insured loans and change in tract house values between 1980 and 1990). To determine the existence of racial redlining, the model also included as explanatory variables the percentages of African American and Hispanic residents in the tract and the increase in the tract's minority percentage between 1980 and 1990. Most of the neighborhood risk and demand variables were significant determinants of the flow of conventional loans in Houston. The coefficients of the racial composition variables were insignificant which, led Holmes and Horvitz to conclude that allegations of redlining could not be supported, at least in the Houston market.

One of their more interesting findings, however, was that the racial composition variables became significant and negative, thus suggesting the existence of redlining, when they re-estimated their model twice, once without the credit risk variables and once without the demand variables. This finding is consistent with earlier credit flow studies that concluded that redlining exists. Holmes and Horvitz caution against relying on findings from these earlier studies because they did not adequately account for differences in neighborhood risk and demand. The authors conclude that "a claim of racially based geographic discrimination in mortgage lending must be based on a consideration of race *after* taking

[13] Alicia H. Munnell, Lynn E. Browne, James McEneaney, and Geoffrey M. B. Tootell, "Mortgage Lending in Boston: Interpreting HMDA Data," Federal Reserve Bank of Boston, Working Paper Series, No. 92–7, October 1992.

[14] This study was the subject of substantial criticism with regard to data quality and model specification, but even after accounting for these problems, the race conclusions were found to persist in a re-estimation of the model by Fannie Mae. See James H. Carr and Isaac F. Megbolugbe, "The Federal Reserve Bank of Boston Study on Mortgage Lending Revisited," *Journal of Housing Research*, Volume 4, Issue 2, 1993, pp. 277–313. Other criticisms, however, have also been mentioned. For instance, the fact that the credit risk variables included in the model are correlated with the minority variable suggests that the latter may be picking up the effects of still other credit risk variables omitted from the model. See John Straka, "Boston Federal Reserve Study of Mortgage Discrimination," *Secondary Mortgage Markets*, Volume 10, No. 1, Winter 1993, pp. 8–9, for a useful discussion of other aspects of the Boston Fed study.

[16] William C. Hunter, "The Cultural Affinity Hypothesis and Mortgage Lending Decisions," WP–95–8, Federal Reserve Bank of Chicago, 1995.

[17] Lenders are discouraged from making smaller loans in older neighborhoods. Since upfront loan fees are frequently determined as a percentage of the loan amount, such loans generate lower revenue and thus are less profitable to lenders.

[18] Standard underwriting practices may exclude lower income families that are, in fact, creditworthy. Such families tend to pay cash, leaving them without a credit history. In addition, the usual front-end and back-end ratios applied to applicants' housing expenditures and other on-going costs may be too stringent for lower income households, who typically pay higher shares of their income for housing than higher income households.

[19] Holmes and Horvitz also analyzed the flow of government-insured loans and obtained what are now standard results in the literature—compared with conventional loans, government-insured loans are more targeted to lower income and risky neighborhoods.

account of variables that are rationally connected with the economics of the mortgage lending process."[20]

In the second study, Michael Schill and Susan Wachter attempt to improve on earlier studies of redlining by examining whether mortgage denials are related to neighborhood racial composition.[21] Schill and Wachter argue that HMDA data on mortgage rejections, first released in 1990, allow researchers to address perhaps the major shortcoming of earlier credit flow studies—the inability to separate demand influences from supply influences. Analyzing information on whether lenders accept or reject individual loan applicants permits Schill and Wachter to study the determinants of the supply decision separately.[22]

In their empirical work, Schill and Wachter focused on loan acceptances rather than denials. Their model posits that the probability that a lender will accept a specific mortgage application depends on characteristics of the individual loan application[23] and characteristics of the neighborhood where the property collateralizing the loan is located. Because they rely on public data, Schill and Wachter did not have information on several loan and property risk variables, such as loan-to-value ratio, that are known to affect the mortgage decision. To compensate for the lack of these variables, the study includes neighborhood risk proxies that are likely to affect the future value of the properties.[24] Finally, to test for the existence of racially-induced lending patterns across census tracts, Schill and Wachter included the percentage of persons in the census tract that were African American and Hispanic.

The authors tested their model for conventional mortgages in Philadelphia and Boston. They first estimated their model including as explanatory variables only the individual loan and racial composition variables. The applicant race variables—whether the applicant was African American or Hispanic—showed significant negative effects on the probability that a loan would be accepted. Schill and Wachter stated that this finding does not provide evidence of individual race discrimination because applicant race is most likely serving as a proxy for credit risk variables omitted from their model (e.g., credit history, wealth and liquid assets). In this first analysis, the percentage of the census tract that was African American also showed a significant and negative coefficient, a result that is consistent with redlining. However, when the neighborhood risk proxies were included in the model along with the individual loan variables, the percentage of the census tract that was African American becomes insignificant. Thus, similar to Holmes and Horvitz, Schill and Wachter stated that "once the set of independent variables is expanded to include measures that act as proxies for neighborhood risk, the results do not reveal a pattern of redlining."[25]

In their conclusion, however, Schill and Wachter stated that while their results did not support the hypothesis of redlining, they could not say definitively that neighborhood race is unrelated to lenders' decisions to accept or reject loan applications. One reason for their hesitancy is that many of their individual loan variables (as well as their neighborhood risk variables) are correlated with the racial composition of the census tract. For instance, the applicant's race variable (i.e., whether the applicant is African American or Hispanic) remained highly significant and negative in all their estimations. Because of the high degree of racial segregation that exists in urban areas, the applicant race variable was positively correlated with the census tract race variable. It may be that the applicant race variable was picking up effects that should properly be attributed to the census tract race variable.[26] If this were the case, Schill and Wachter's conclusions about the existence of racially induced redlining would necessarily change.

e. Geographic Dimensions of Underserved Areas—Targeted versus Broad Approaches

An important issue for the GSE regulations is whether geographic areas under this goal should be broadly or narrowly defined. Is central city location an adequate proxy for lack of access to mortgage credit? What is gained by more targeted neighborhood-based definitions? This section reports findings from three studies that address these questions. All three support defining underserved areas in terms of the minority and/or income characteristics of census tracts, rather than in terms of a broad definition such as all areas of all central cities.

HUD's Analysis. Tables B.1 and B.2 documented the relatively high denial rates and low mortgage origination rates in underserved areas as defined by HUD. This section extends that analysis by comparing underserved and served areas within central cities and suburbs. Figure B.1 shows that HUD's definition targets central city neighborhoods that are experiencing problems obtaining mortgage credit. The 22 percent denial rate in these neighborhoods is twice the 11 percent denial rate in the remaining areas of central cities. Similarly, the average mortgage origination rate (per 100 owner occupants) in HUD-defined underserved areas of central cities is 7, much lower than the average of 15 for the remaining areas of central cities.

A broad, inclusive definition of "central city" that includes all areas of all OMB-designated central cities would include the "remaining" portions of these cities. Figure B.1 shows that these areas, which account for approximately 42 percent of the population in OMB-designated central cities, appear to be well served by the mortgage market. They are not experiencing problems obtaining access to mortgage credit.[27]

BILLING CODE 4210-32-P

[20] Holmes and Horvitz, page 97 (emphasis added). The authors recognize that many of the risk and demand variables in their model are rather highly correlated with the racial composition variables also included in their model. Thus, one could argue that their risk and demand variables are serving, to a certain extent, as proxies for race, which would mean that their results suggest a high degree of redlining in the Houston market. Holmes and Horvitz dismiss this argument by stating that several of their non-racial variables are reasonable proxies for other prudent lending variables such as wealth and job stability for which they did not have direct data.

[21] Schill and Wachter. Although their methodology and findings are similar to those of studies discussed in the next section, it is informative to review Schill and Wachter's study in detail because it illustrates issues that must be dealt with before definitive conclusions can be reached about redlining.

[22] Perle also agrees that micro-based models of mortgage denial rates are more appropriate for studying redlining than macro-based credit flow models that fail to separate demand and supply effects.

[23] Individual loan characteristics include loan size (economies of scale cause lenders to prefer large loans to small loans) and all individual borrower variables included in the HMDA data (the applicant's income, sex, and race).

[24] Their neighborhood risk proxies include median income and house value (inverse indicators of risk), percent of households receiving welfare, median age of houses, homeownership rate (an inverse indicator), vacancy rate, and the rent-to-value ratio (an inverse indicator). A high rent-to-value ratio suggests lower expectations of capital gains on properties in the neighborhood.

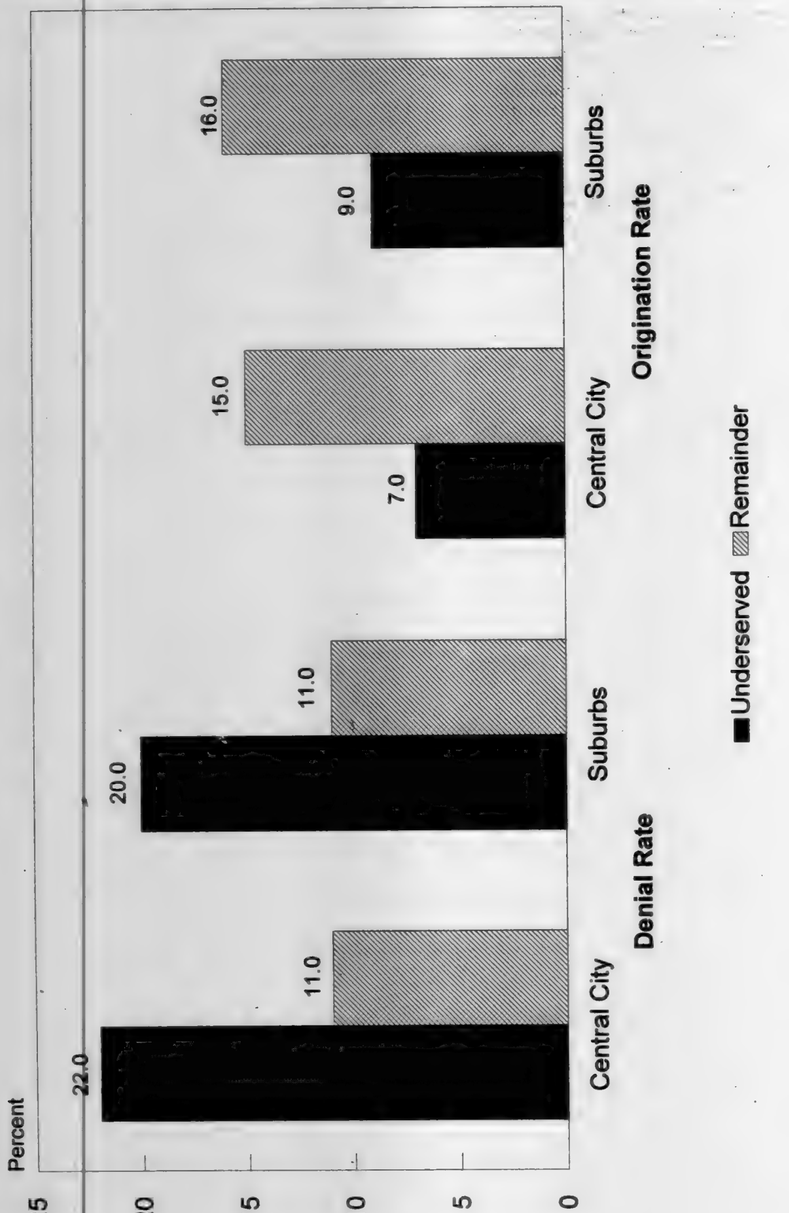
[25] Schill and Wachter, page 271. Munnell, *et al.* reached similar conclusions in their study of Boston. They found that the race of the individual mattered, but that once individual characteristics were controlled, racial composition of the neighborhood was insignificant.

[26] In their study of individual loan denial rates, Avery, Beeson, and Sniderman obtain significant and positive coefficients for the individual applicant's race. Unlike Schill and Wachter, they found that denial rates were higher in low-income tracts even after controlling for the effects of the applicant's race and income. Although denial rates were not higher overall for purchase and refinance loans in minority tracts after controlling for the race of the applicant, denial rates were higher in minority tracts for white applicants. In other words, minorities have higher denial rates wherever they attempt to borrow, but whites face higher denials when they attempt to borrow in areas dominated by minorities. In addition, denial rates were higher in minority areas for home-improvement loans. See Robert B. Avery, Patricia E. Beeson, and Mark S. Sniderman, "Underserved Mortgage Markets: Evidence from HMDA Data," Working Paper Series 94–16, Federal Reserve Bank of Cleveland, October 18, 1994.

[27] The Preamble to this rule provides additional reasons why central city location should not be used as a proxy for underserved areas.

FIGURE B.1

1993 Denial And Origination Rates
Underserved Areas And Remainder
By Central Cities And Suburbs



BILLING CODE 4210-32-C

HUD's definition also targets in the suburbs as well as in central cities—for example, the average denial rate in underserved suburban areas is almost twice that in the remaining served areas of the suburbs. Low-income and high-minority suburban tracts appear to have credit problems similar to their central city counterparts. These suburban tracts, which account for 31 percent of the suburban population, are encompassed by the definition of other underserved areas. Thus, the advantage of HUD's targeted definition of underserved areas is illustrated by sharp differences in measures of mortgage access between served and underserved areas within both central cities and suburbs.

William Shear, James Berkovec, Ann Dougherty, and Frank Nothaft, economists at Freddie Mac, recently completed an analysis of mortgage flows and application acceptance rates in 32 metropolitan areas that also supported a targeted definition of underserved areas.[28] These researchers regressed the number of mortgage originations per 100 properties in the census tract on several independent variables that are intended to account for some, but admittedly not all, of the demand and supply (i.e., credit risk) influences at the census tract level. Examples of the demand and supply variables at the census tract level include: tract income relative to the area median income, the increase in house values between 1980 and 1990, the percentage of units boarded up, and the age distributions of households and housing units. The tract's minority composition and central city location were included to test if these characteristics are associated with underserved neighborhoods after controlling for the demand and supply variables. Several of their findings relate to the issue of defining underserved areas:

- Census tracts with high concentrations of African American and Hispanic families have lower rates of applications, originations, and acceptance rates. For instance, the regression estimates suggest that all-White census tracts would have an average 10.5 originations per 100 properties, while all-African American and all-Hispanic census tracts would have about 7 originations per 100 properties.
- Tract income influences mortgage flows—tracts at 80 percent of median income are estimated to have 8.6 originations per 100 owners as compared with 10.8 originations for tracts over 120 percent of median income.
- Once census tract influences are accounted for, central city location has only a minimal effect on credit flows.

Shear, Berkovec, Dougherty, and Nothaft recognized that it is difficult to interpret their estimated minority effects—the effects may indicate lender discrimination, supply and demand effects not included in their model but correlated with minority status, or some combination of these factors. They explain the implications of their results for measuring underserved areas as follows:

> * * * While it is not at all clear how we might rigorously define, let alone measure, what it means to be underserved, it is clear that there are important housing-related problems associated with certain location characteristics, and it is possible that, in the second or third best world in which we live, mortgage markets might be useful in helping to solve some of these problems. We then might use these data to help single out important areas or at least eliminate some bad choices. * * * The regression results indicate that income and minority status are better indicators of areas with special needs than central city location.[29]

HUD Analysis. HUD used 1993 HMDA data to update the analysis of Shear *et al.* HUD focused on denial and origination rates for conforming conventional applications and included all metropolitan areas in the analysis.[30] HUD's analysis also supports a targeted underserved definition. Lower-income census tracts and census tracts with concentrations of African American and Hispanic families have lower origination rates and higher denial rates. For example, the regression estimates suggest that all-White census tracts would have an average 13.7 percent denial rate and 13.4 originations per 100 properties, while census tracts that are 50 percent African American (Hispanic) would have an average 22.3 (19.7) percent denial rate and 9.8 (12.0) originations per 100 properties. Furthermore, the regression analysis indicates central-city location has a minimal effect on denial and origination rates, after controlling for census tract effects.[31]

Robert Avery, Patricia Beeson, and Mark Sniderman of the Federal Reserve Bank of Cleveland recently presented a paper specifically addressing the issue of underserved areas in the context of the GSE legislation.[32] Their study examines variations in application rates and denial rates for all individuals and census tracts included in the 1990 and 1991 HMDA data base. They seek to isolate the differences that stem from the characteristics of the neighborhood itself rather than the characteristics of the individuals that apply for loans in the neighborhood or lenders that happen to serve them. Similar to the two studies of redlining reviewed in the previous section, Avery, Beeson and Sniderman hypothesize that variations in mortgage application and denial rates will be a function of several risk variables such as the income of the applicant and changes in neighborhood house values; they test for independent racial effects by adding to their model the applicant's race and the racial composition of the census tract. Econometrics are used to separate individual applicant effects from neighborhood effects.

Based on their empirical work, Avery, Beeson and Sniderman reach the following conclusions:

- The individual applicant's race exerts a strong influence on mortgage application and denial rates. African American applicants, in particular, have unexplainably high denial rates.
- Once individual applicant and other neighborhood characteristics are controlled for, overall denial rates for purchase and refinance loans were only slightly higher in minority census tracts than non-minority census tracts.[33] For white applicants, on the other hand, denial rates were significantly higher in minority tracts.[34] That is, minorities

See also Susan Wharton Gates, "Defining the Underserved," *Secondary Mortgage Markets,* 1994 Mortgage Market Review Issue, pp. 34–48.

[29] Shear *et al.*, p. 18.

[30] Including FHA applications in the analysis—as in Shear *et al.*—does not significantly change the results reported in this section.

[31] Central city location had no significant effect on origination rates. For denial rates, the difference between the average central city denial rate and the average suburban denial rate was .56 percent.

[32] See Avery, *et al.*

[33] Avery *et al.* find very large unadjusted differences in denial rates between white and minority neighborhoods, and although the gap is greatly reduced by controlling for applicant characteristics (such as race and income) and other census tract characteristics (such as house price and income level), a significant difference between white and minority tracts remains (for purchase loans, the denial rate difference falls from an unadjusted level of 16.7 percent to 4.4 percent after controlling for applicant and other census tract characteristics, and for refinance loans, the denial rate difference falls from 21.3 percent to 6.4 percent). However, when between-MSA differences are removed, the gap drops to 1.5 percent and 1.6 percent for purchase and refinance loans, respectively. See Avery, *et al.*, p. 16.

[34] Avery, *et al.*, page 19, note that, other things equal, a black applicant for a home purchase loan is 3.7 percent more likely to have his/her application denied in an all-minority tract than in an all-white tract, while a white applicant from an all-minority tract would be 11.5 percent more likely to be denied.

have higher denial rates wherever they attempt to borrow but whites face higher denials when they attempt to borrow in minority neighborhoods. In addition, Avery *et al.* found that home improvement loans had significantly higher denial rates in minority neighborhoods. Given the very strong effect of the individual applicant's race on denial rates, Avery *et al.* note that since minorities tend to live in segregated communities, a policy of targeting minority neighborhoods may be warranted.

- The median income of the census tract had strong effects on both application and denial rates of purchase and refinance loans, even after other variables were accounted for.
- There is little difference in overall denial rates between central cities and suburbs, once individual applicant and census tract characteristics are controlled for.

Avery, Beeson and Sniderman conclude that a tract-level definition would be a more effective way to define underserved areas in the GSE regulation than using the list of OMB-designated central cities as a proxy.

The next section will also document that there are equally widespread and pervasive differences in socioeconomic conditions across neighborhoods.

f. Conclusions From HUD's Analysis and the Economics Literature About Urban Underserved Areas

The implications of studies by HUD and others for defining underserved areas can be summarized briefly. First, the existence of large geographic disparities in mortgage credit is well documented. HUD's analysis of 1993 and 1994 HMDA data shows that low-income and high minority neighborhoods receive substantially less credit than other neighborhoods and, by most reasonable criteria, fit the definition of being underserved by the nation's credit markets.

Second, researchers are testing models that more fully account for the various risk, demand, and supply factors that determine the flow of credit to urban neighborhoods. The studies by Holmes and Horvitz and Schill and Wachter are good examples of this recent research. Their attempts to test the redlining hypothesis show the analytical insights that can be gained by more rigorous modeling of this issue. However, as those two studies show, the fact that our urban areas are highly segregated means that the various loan, applicant, and neighborhood characteristics currently being used to explain credit flows are often highly correlated with each other which makes it difficult to reach definitive conclusions about the relative importance of any single variable such as neighborhood racial composition. Thus, the need continues for further research on the underlying determinants of geographic disparities in mortgage lending.[35]

Finally, much research strongly supports a targeted definition of underserved areas. Studies by Shear, *et al.* and Avery, Beeson, and Sniderman conclude that characteristics of both the applicant and the neighborhood where the property is located are the major determinants of mortgage denials and origination rates—once these characteristics are controlled for, other influences such as central city location play only a minor role in explaining disparities in mortgage lending. HUD's analysis shows that both credit and socioeconomic problems are highly concentrated in underserved areas within central cities and suburbs. The remaining, high-income portions of central cities and suburbs appear to be well served by the mortgage market.

HUD recognizes that the mortgage origination and denial rates forming the basis for the research mentioned in the preceding paragraph, as well as for HUD's definition of underserved areas, are the result of the interaction of individual risk, demand and supply factors that analysts have yet to disentangle and interpret. The need continues for further research addressing this problem. HUD believes, however, that the economics literature is consistent with a targeted rather than a broad approach for defining underserved areas.

3. Alternative Underserved Area Definitions for Urban Areas[36]

This section compares the final rule's underserved definition to the alternative definitions advanced by Freddie Mac and Fannie Mae. Other comments were essentially variations on the two distinct approaches suggested by the GSEs. Therefore, rather than analyzing all variants, this section analyzes the two major alternative definitions—using all central cities and all rural areas, or expanding on the proposed rule's tract-based approach. The tracts added by these two alternative definitions have lower denial rates and higher origination rates than the tracts covered by the final rule. A study by the Urban Institute, summarized below, criticized both alternative definitions for being too broad in coverage.

a. The Fannie Mae Definition

Fannie Mae urged that HUD use the following definition for the geographically targeted goal: All central cities as defined by OMB, all non-metropolitan areas, *and all other* metropolitan census tracts that are more than 50 percent minority *or* that have an income less than 80 percent of area median income. The alternative definition proposed by Fannie Mae includes central city tracts that are substantially better off and have fewer problems accessing credit than underserved tracts covered by the final rule's definition. In suburban areas, the Fannie Mae definition excludes suburban tracts that appear to have mortgage access problems.

Table B.3 reports mortgage denial and origination rates and socioeconomic characteristics of served and underserved census tracts under the Fannie Mae definition. Credit access does not appear to be a problem in the added tracts—mortgage denial rates are one-half of mortgage denial rates in central city tracts covered by HUD's underserved definition. Moreover, the added central city census tracts appear substantially better off than the central-city census tracts covered by HUD's definition. The 7 percent poverty rate for the central city tracts added by Fannie Mae's underserved definition is only about one-third the 22 poverty rate for tracts included in central cities under the final rule.

The suburban tracts excluded from Fannie Mae's definition do not appear as distressed as other suburban underserved tracts covered by the final rule. For example, the 10 percent poverty rate in the excluded tracts is lower than the 14 percent poverty rate in all HUD suburban underserved tracts. But these tracts do appear to have problems accessing mortgage credit as evidenced by their high denial rates. The denial rate in the excluded tracts is 18 percent compared to the 20 percent denial rate in all underserved suburban tracts covered by the final rule.

BILLING CODE 4210-32-P

[35] Methodological and econometric challenges that researchers will have to deal with are discussed in Mitchell Rachlis and Anthony Yezer, "Serious Flaws in Statistical Tests for Discrimination in Mortgage Markets," *Journal of Housing Research*, Volume 4, 1993, pp. 315–336.

[36] The analysis in this section relies on 1993 HMDA data.

Table B.3

Characteristics of HUD's and Fannie Mae's Underserved Areas In Metropolitan Areas

	Denial Rate	Tract Income/ MSA Income	Relative Median House Value*	Minority Percentage	Poverty Rate
Central City					
HUD (Base)	21.5%	69.7	71.7	51.6%	21.9%
Additional Fannie Mae Tracts	10.8%	130.2	128.2	13.4%	7.1%
Suburbs					
HUD (Base)	20.4%	80.8	78.5	34.4%	14.0%
Tracts Excluded from Fannie Mae Definition	18.4%	88.8	86.3	18.8%	10.1%
Metropolitan Areas					
HUD (Base)	21.0%	70.9	72.3	46.9%	20.0%
Fannie Mae Definition	15.5%	89.2	89.7	39.0%	16.6%

* Median house value in tract relative to median house value in metropolitan area.

BILLING CODE 4210-32-C

b. The Freddie Mac Definition

A tract is underserved, according to Freddie Mac, if minorities comprise 20 percent or more of the residents *or* the median income of families does not exceed 100 percent of area median income. Freddie Mac's definition includes areas covered by the Geographically Targeted Goal as well as 5,367 additional tracts where median family income is between 90 and 100 percent of area median income or minorities comprise 20–30 percent of tract population.

Table B.4 reports characteristics of the census tracts added by Freddie Mac's underserved area definition. Mortgage credit access does not appear to be a major problem in these added tracts. Their 15 percent mortgage denial rate is only slightly above average and much lower than the 21 percent denial rate for tracts included in the Geographically Targeted Goal. Mortgage origination patterns in these tracts show a similar disparity.

BILLING CODE 4210-33-P

Table B.4

Characteristics of HUD's and Freddie Mac's Underserved Areas In Metropolitan Areas

	Denial Rate	Tract Income/ MSA Income	Relative Median House Value*	Minority Percentage	Poverty Rate

c. The Urban Institute Study.

HUD commissioned the Urban Institute to evaluate the Department's effort to define underserved metropolitan areas. The Urban Institute analysis examined how HUD's, Fannie Mae's, and Freddie Mac's underserved definitions are related to a measure of credit flow problems. An underserved definition can be judged on how accurately it predicts the "credit flow measure." In its analysis, the Urban Institute used mortgage denial rates as the credit flow measure.

The Urban Institute tested each of the definitions using a denial rate threshold of 22 percent.[37] The proposed rule's definitions correctly predict the credit flow measure for 71 percent of the tracts, while the Freddie Mac definition correctly predicts only 63 percent of the tracts, and the Fannie Mae definition only 58 percent of the tracts. Moreover, the HUD definition is not sensitive to changes in the threshold that defines credit flow problems. The Urban Institute also concluded that the final rule's definition is superior to the Freddie Mac and Fannie Mae definitions when the tract denial rate threshold is reduced to 17 percent.

4. Identifying Underserved Locations in Rural Areas[38]

This section discusses the final rule's definition of rural underserved areas, reviews the existing literature on rural housing needs and rural mortgage credit problems, and summarizes discussions held with rural lenders, rural housing developers, public interest groups, and the GSEs at forums on rural lending sponsored by HUD.[39] In addition, this section explains why defining underservedness in rural areas is more difficult than in metropolitan areas.

a. Basic Characteristics of Rural Areas

Identifying underserved rural areas is more difficult than identifying underserved metropolitan areas. In part, this difficulty results from the use of multiple definitions of "rural" by researchers, policy makers, and Federal agencies. The Census Bureau defines rural as communities with fewer than 2,500 residents. The Department of Agriculture's Rural Housing and Community Development Service (formerly the Farmers Home Administration) uses several definitions of rural, each specific to one of its housing programs. Maps outlining the areas covered by the various RHCDS programs are available only at local agriculture field offices.[40]

For the purposes of the final rule, HUD defines rural to be any area that lies outside of metropolitan boundaries established by OMB. The OMB nonmetropolitan definition is easily understood by lenders and the GSEs. Approximately 21 percent of the United States population lives in nonmetropolitan areas, with 75 percent of the nonmetropolitan population concentrated in the South and Midwest.

Proportionately more poor people and fewer minorities live in nonmetropolitan areas than in metropolitan areas. The poverty rate in nonmetropolitan areas is 17 percent, compared to 12 percent in metropolitan areas; minorities make up 15 percent of the population in nonmetropolitan areas compared to 27 percent in metropolitan areas. The South and West nonmetropolitan regions have the highest poverty rates and minority percentages. The South, for example, has a 21 percent poverty rate and a 23 percent minority concentration. Poverty rates are highest in remote counties that are not adjacent to a metropolitan area and have less than 2,500 in urban areas. These remote counties account for 12 percent of nonmetropolitan population.

b. Data Issues and Previous Research

Defining rural underserved areas requires a different approach than in metropolitan areas because of the lack of mortgage flow data, differences in housing needs between urban and rural areas, and the difficulty of implementing mortgage programs at the census tract level in rural areas. Evaluating which rural areas are underserved in terms of access to mortgage credit cannot be done with HMDA data, the source used for most studies of credit needs, because HMDA does not provide geographic identifiers on mortgage activity outside of metropolitan statistical areas.[41]

There are few conclusive studies on access to mortgage credit in rural areas because of the lack of adequate data.[42] The studies that do exist only suggest broad conclusions about credit flows in rural areas. Recognizing this lack of research on credit flows in rural areas, the Department consulted with researchers from academia, the Department of Agriculture, the Census Bureau, the Housing Assistance Council, and the Congressional Budget Office. The Department also conducted a series of forums to solicit information on rural mortgage markets from lenders, rural housing groups, and the GSEs. The following section summarizes the existing research on rural credit flows and describes further analysis conducted by HUD.

The Urban Institute Study ("The Availability and Use of Mortgage Credit in Rural Areas" 1990) concludes that while little data on mortgage credit in rural areas is available, evidence suggests that there is no rural credit shortage that would warrant changes in federal mortgage credit policy. Symptoms of credit shortage identified by the Urban Institute include low homeownership rates, limited borrowing to finance home purchase, adverse credit terms for qualified borrowers, and larger portions of income spent on housing. Because these symptoms do not exist in the majority of rural areas, the Urban Institute concluded that most rural areas suffering from inactive local mortgage markets have weak economies in which demand for home mortgages is low.

The Urban Institute's indicators of a credit shortage and their focus on fixed-rate conventional mortgages could have led to the wrong conclusions about mortgage credit availability in rural areas. Higher homeownership rates in rural areas, for example, are not necessarily indicative of the lack of a credit shortage. Although nonmetropolitan households are more likely to own their homes than metropolitan households—the homeownership rate is 73 and 62 percent, respectively, in nonmetropolitan and metropolitan areas—the higher homeownership rate likely reflects the lack of rental opportunities and the high percentage of mobile homes in rural areas. Mobile homes account for 15 percent of owner-occupied units in nonmetropolitan areas, compared with only 6 percent in metropolitan areas. Mobile homes are starter homes for many rural households because of their affordability and the availability of dealer financing. The homeownership rate, exclusive of mobile homes, is approximately equal in metropolitan and nonmetropolitan areas indicating that nonmetropolitan households who buy mobile homes are the counterparts of metropolitan households who live in rental housing.

Furthermore, it is not surprising that studies that focus on fixed-rate home purchase mortgages lead to the conclusion that credit terms in rural areas do not differ significantly from credit terms in urban areas.[43] Properties that meet the underwriting criteria for fixed-rate mortgages are similar to urban properties that meet these criteria. Many rural properties, however, do not satisfy the criteria designed for mortgages underwritten in urban areas.

The Center for Community Change Study ("Location, Location, Location", 1990) suggests that financing of housing in rural areas is made difficult by underwriting standards designed for urban areas: "Interviews with bankers and realtors indicate that federal mortgage assistance programs and secondary market underwriting criteria continue to be geared to an urban market with a fire hydrant on every block and hard surface roads throughout." Moreover, the Center for Community Change reports that in many remote areas and areas with high concentrations of minorities and low-income households, a number of barriers prevent borrowers from accessing mortgage credit. These barriers include lower lender participation in federal mortgage assistance programs, lack of financial expertise among rural lenders, lack of private mortgage insurance, and a decreasing number of lending institutions located in rural communities as a result of the savings and loan crisis of the 1980s.

Housing Assistance Council Study. The connection between high-minority, low-income populations and poor access to mortgage credit was examined in a 1995 study conducted by the Housing Assistance Council (HAC) for HUD. HAC focused on the impact of alternative combinations of HUD's proxies of underserved areas—minority concentration and median income. The HAC study reiterated the difficulty of establishing an underserved areas definition that balances the priority of targeting those areas with the most severe credit problems with the priority of including enough areas so that the GSEs could build an infrastructure to facilitate and stimulate mortgage lending in rural areas. HAC suggested that the income criteria be high enough to include persistent poverty areas with low minority concentrations.

USDA's Economic Research Service. "Rural Conditions and Trends", a periodic research publication, shows that urban proximity is important: Economic conditions and housing problems tend to be worse in counties most remote from metropolitan areas or smaller cities.[44] In particular, counties with "persistent low-income," which are disproportionately more rural and remote, have had little recent economic activity, stagnation in real family income during the 1980s, and continue to have the highest incidence of housing lacking complete plumbing. These high poverty counties are concentrated in Appalachia and in areas with high proportions of minority residents.

The ICF Study. Prepared for the Federal Housing Finance Board, this 1993 study examines the effect of the Federal Home Loan Bank System (FHLBS) District Banks on the housing financing system in rural areas. The study concluded that nonmetropolitan commercial banks and savings and loans are more likely than their metropolitan counterparts to hold loans in portfolio than to participate in the secondary market. Banks and savings and loans are the largest holders of fixed-rate mortgages in nonmetropolitan communities. In metropolitan areas, however, conventional mortgages are more often held or securitized by GSEs. Membership in the FHLBS is beneficial to commercial banks, savings and loans, and thrifts because the Bank System can provide them with capital, in the form of advances secured by the portfolio loans, to originate additional mortgage loans.[45] The importance of the FHLBS to rural lenders suggests that increased access to the secondary market would also be important for rural lenders.

RFS Analysis. HUD's analysis of the Residential Finance Survey shows that 17 percent of all mortgages originated between 1989 and 1991 were in nonmetropolitan areas. This percentage is consistent with the overall percentage of owner-occupied units in nonmetropolitan areas, especially after taking into account the lower mobility of nonmetropolitan residents and the fact that more households use cash and other non-bank sources to finance home purchases.[46]

Nonmetropolitan households are less likely to hold FHA mortgages than their metropolitan counterparts. According to RFS data, FHA's share of mortgages originated in nonmetropolitan areas is approximately half its share of mortgages in metropolitan areas. In part, the lower FHA share is attributable to the presence of the Rural Housing and Community Development Service (formerly the Farmers Home Administration) in nonmetropolitan areas. According to RFS data, the RHCDS 502 Direct Loan Program accounted for 5 percent of rural home purchase mortgages between 1989 and 1991.[47] The funds for this program, however, have been dwindling from $1.8 billion dollars in 1994 to $900 million in 1995. In 1991, the RHCDS created the 502 Guaranteed Rural Housing Loan Program, which guarantees losses up to 90 percent of the loan amount on 100-percent loan-to-value loans. The borrower's income cannot exceed 115% of county median income to qualify for these loans. Having to hold a 30-year fixed-rate mortgage in portfolio and being subject to recourse on the loan prevents many lenders from participating in the program.

According to the RFS, conventional mortgages held by financial institutions differ in metropolitan and nonmetropolitan areas. First, fewer nonmetropolitan mortgages are privately insured—16 percent of mortgages in nonmetropolitan areas are insured compared to 22 percent of mortgages in metropolitan areas.[48] Second,

---

[37] The unweighted average of denial rates across metropolitan census tracts is 17 percent. The weighted average, which takes into account the number of applications in a tract, is 13 percent.

[38] In this Appendix definition, "rural" is used synonymously with "nonmetropolitan," which differs from the terminology employed by the Census Bureau.

[39] Records of these forums are part of the public docket for this rule, and are available for public inspection at the HUD Headquarters Building, Room 10276.

[40] For example, the Rural Housing and Community Development Service (RHCDS) defines rural for its Rural Guaranteed Housing Program as any community with less than 10,000 people in a metropolitan area and less than 20,000 outside an MSA.

[41] Lenders are not required to report under HMDA the location of those mortgage applications for properties outside MSA boundaries. Moreover, a large portion of the data compiled by banking regulators does not distinguish between mortgage activity of rural branches of large regional banks and mortgage activity of the bank's metropolitan headquarters.

[42] Studies include: "Analysis of Underserved Rural Areas," Housing Assistance Council, 1995; "Effect of Federal Home Loan Bank System District Banks on the Housing Finance System in Rural Areas," ICF Incorporated, 1993; "The Availability and Use of Mortgage Credit in Rural Areas," The Urban Institute, 1990; and "Location, Location, Location: Report on Residential Mortgage Credit Availability in Rural Areas," The Center for Community Change, 1990.

[43] The ICF study also concludes that credit terms do not differ significantly between metropolitan and nonmetropolitan mortgages but their focus is only on fixed-rate and adjustable rate conventional mortgages.

[44] *Rural Conditions and Trends*, Volume 4, No. 3, Fall 1993, a special 1990 census issue, documents differences among counties in population, education, employment, income, poverty, and housing.

[45] ICF Incorporated, "Effect of Federal Home Loan Bank System District Banks on the Housing Finance System in Rural Areas," p.30.

[46] Using 1989 AHS data, ICF reports that the mobility rate of nonmetropolitan owners is 18 percent lower than the mobility rate of metropolitan owners. Data from the Residential Finance Survey show that 10 percent of metropolitan households and 18 percent of nonmetropolitan households use cash to acquire their homes.

[47] This Program offers 100-percent loan-to-value (including closing costs) fixed-rate mortgages for 30 years at subsidized interest rates; it is targeted to rural households at 80 percent of area median income or less. To make Program funds go further, the RHCDS created the Rural Direct Leveraging Program where the lender and the RHCDS each make a 50-percent loan-to-value loan.

[48] According to the Center for Community Change study, the higher percentage of uninsured conventional mortgages could imply that

Continued

nonmetropolitan households rely more on short-term loans with balloon payments than their metropolitan counterparts.[49] Finally, the mortgage term for conventional fixed-rate mortgages is shorter for nonmetropolitan households.[50]

Rural Forums. In addition to examining available research, HUD convened three forums on rural housing issues with rural lenders, rural housing groups, housing industry organizations, the Department of Agriculture's Economic Research Service and Rural Housing and Community Development Service, the Congressional Budget Office, and the GSEs, which focused on the unique nature of mortgage lending and the role of the secondary market in rural areas. Participants agreed that some of the difficulty associated with financing housing in rural areas results from inappropriate underwriting and appraisal standards, inadequate resources, and the lack of access to government programs and secondary mortgage funds.

Participants emphasized that mortgage lending in rural areas is very different from lending in urban areas. The heterogeneity of housing types, nontraditional and often seasonal incomes of rural borrowers, and lack of credit history for many rural borrowers make underwriting in rural areas difficult for urban-oriented lenders. Appraisers may lack comparable sales or must rely on comparables over one year old or in a nearby town in order to determine a property's value.

Participation of rural lenders in the secondary market is limited. The low volume of loans originated by rural lenders serving smaller nonmetropolitan communities makes this business less profitable, and thus less attractive, to the secondary marketing firms.[51] Rural lenders are more likely to make short-term loans, 3-to-5 year balloons or adjustable rate mortgages, and hold them in portfolio. Many rural lenders do not participate in federal housing programs because they do not want to deal with the "red tape" of government or they are unaware of how the programs work and do not have the resources necessary to train staff. Moreover, some small rural banks may not be equipped to do the kind of labor-intensive loans that are required to qualify low-income borrowers.

Larger financial institutions, which do have experience with government programs and the secondary market, target more urbanized nonmetropolitan communities because of the higher demand for loans and lower costs of business. These lenders concentrate on loans with larger loan amounts and lower servicing costs, focus less on remote areas, and originate loans that are more easily sold to the secondary market.

nonmetropolitan residents make higher down payments than metro residents because private market insurance is unavailable.

[49] In nonmetropolitan areas with fewer than 10,000 people, for example, 63 percent of conventional mortgages are fixed-rate, 16 percent are short-term with balloon payments, and 21 percent are adjustable rate mortgages. In nonmetropolitan areas with more than 10,000 people, 68 percent of conventional mortgages are fixed rate, 11 percent are short-term with balloon payments, and 20 percent are adjustable rate. In metro areas, however, 75 percent are fixed-rate, 5 percent are short-term balloons, and 19 percent are adjustable rate.

[50] In metro areas, 72 percent of fixed-rate mortgages have mortgage terms greater than 20 years, compared with only 33 percent in nonmetropolitan communities with less than 10,000 population and 59 percent in nonmetropolitan communities with more than 10,000 population. A similar story can be told for adjustable rate mortgages although the differential in percentages between metro and nonmetropolitan is not as pronounced. In particular, nonmetropolitan areas with more than 10,000 people have similar terms as metro areas. Nonmetropolitan areas with fewer than 10,000 people have shorter mortgage terms than other in nonmetropolitan and metropolitan areas.

[51] Twenty-nine percent of commercial banks (including the branches of banks headquartered elsewhere) are community banks. Fifty percent of these banks are in towns with 2,500 or fewer residents. The average community bank has only $50 million in assets.

Efforts have been made to overcome housing finance difficulties in rural areas. For example, the Farm Credit System, Farmer Mac, and Fannie Mae recently created a conduit to provide affordable loans to residents of rural communities with populations under 2,500.[52] The underwriting provisions of the program accommodate the unique features of rural housing, such as large lot sizes and few comparable sales for appraisal. In 1994, Fannie Mae established new, more flexible, underwriting guidelines for rural areas. These changes in the industry could contribute to increased secondary market activity and account for the increase in the proportion of Fannie Mae's business in rural areas. In 1994, Fannie Mae's purchases in rural areas increased to 9.3 percent of its total business, compared to 8.3 percent in 1993. Rural areas accounted for about 12.5 percent of Freddie Mac's business in both 1993 and 1994.

c. HUD's Definition of Underserved Counties

The Secretary has determined that in nonmetropolitan areas "underserved areas" are defined as counties where: minorities comprise 30 percent or more of the residents and the median income of families does not exceed 120 percent of the state nonmetropolitan median income; *or* the median income of families does not exceed 95 percent of the greater of the state nonmetropolitan median income or the nationwide nonmetropolitan median income. Comparing county median income to state nonmetropolitan median income ensures that poor counties in high-income states are included as underserved rural areas and comparing county median income to national nonmetropolitan median income ensures that poor counties in poor states are included as underserved rural areas.

Table B.5 compares the final rule's definition with Freddie Mac's and Fannie Mae's definitions of rural underserved areas as well as with a 90/30 definition that is analogous to HUD's metropolitan underserved areas definition.[53] HUD, however, chose the broader 95/30 definition for rural areas because the 90/30 definition did not include a significant number of persistent poverty counties.[54]

The final rule's definition of rural underserved areas balances the competing priorities of a targeted definition that provides greater mortgage opportunities to counties experiencing the worst problems and of a broad definition that encourages the GSEs to provide a secondary market infrastructure that encourages mortgage lending in all nonmetropolitan areas. The final rule's definition covers 54 percent of the nonmetropolitan population, 67 percent of poor persons, and 75 percent of the minority population.[55] The counties included have poverty rates (21 percent) and minority percentages (21 percent) well above the average poverty rate (17 percent) and minority percentage (15 percent) for all nonmetropolitan areas. Thus, HUD's definition encompasses 66 percent of all nonmetropolitan counties, including the most distressed nonmetropolitan counties.

BILLING CODE 4210-32-P

[52] Conduits provide assistance to smaller lenders so that they have access to secondary market funds. Moreover, conduits can provide guarantees and recourse to secondary market investors that low volume lenders cannot provide.

[53] Freddie Mac's definition includes counties as underserved if county median income does not exceed state nonmetropolitan median income or minority composition exceeds 20 percent. Fannie Mae's underserved definition includes all nonmetropolitan counties.

[54] A county experiences persistent poverty if its poverty rate is at least 20 percent over the last 3 decades.

[55] The 54 percent coverage rate in nonmetropolitan areas is similar to the 58 percent coverage rate in central cities.

Table B.5

Nonmetropolitan Counties

	All Nonmetropolitan Areas	Coverage Rates In Underserved Rural Counties				Rates In Underserved Rural Counties				
		90/30	95/30 Absolute	Freddie Mac	Fannie Mae	All Nonmetropolitan Areas	90/30	95/30 Absolute (Base)	Added by Freddie Mac	Added by Fannie Mac
Counties	2,305	42.7 %	66.0 %	75.0 %	100 %					
Population	50,860,983	33.3	54.0	66.0	100					
Poor	8,421,751	45.3	67.0	76.0	100					
Minority Population	7,495,007	63.5	75.0	83.0	100					
Substandard Housing Units	915,866	51.3	69.0	78.0	100					
Mobile Homes	2,033,730	39.7	62.0	73.0	100					
Poverty Rate						17.0 %	23.3 %	21.0 %	14.0 %	12.0 %
Minority Percentage						15.0	28.1	21.0	9.0	8.0
Substandard Housing						5.0	7.7	6.0	4.0	3.0
Mobile Homes						15.0	18.1	17.0	14.0	12.0

BILLING CODE 4210-32-C

Counties not included under the final rule's definition but included by the broader Freddie Mac or Fannie Mae definitions have relatively low poverty rates and low minority percentages. The Freddie Mac definition includes an additional 221 counties and approximately 6 million additional people. These additional counties have a 14 percent poverty rate and minorities comprise 9 percent of the population. The Fannie Mae definition includes an additional 794 counties and approximately 23 million people. These additional counties have a 12 percent poverty rate and minorities comprise 8 percent of the population.

The HUD definition also targets specific geographic areas with high poverty and minority concentrations. For example, 71 percent of the nonmetropolitan population in the South is covered by HUD's definition. Similarly, HUD's definition includes 84 percent of the population that reside in remote counties that are not adjacent to metropolitan areas and have fewer than 2,500 residents in towns.

d. Tract Versus County Definition

A number of commenters, including the GSEs, argued that a definition based on rural census tracts was ill-advised because lenders in rural areas do not understand or lend on the basis of census tracts. Fannie Mae commented that use of census tract data was inappropriate because census tracts have "no practical meaning" in rural areas from a marketing standpoint; that geographic measurements used in the rule should be "widely understood, easily measured, and practical from a marketing point of view;" and that census tracts in rural areas "fail these tests."

In contrast, some commenters, such as HAC, noted that a county-based definition is not as targeted as a tract definition since it excludes tracts which could be considered underserved in served counties and includes tracts which could be considered adequately served in underserved counties.

The final rule uses the county designation, as opposed to a census tract-based definition. Counties are easy to identify and geocode, which will simplify the reporting process for the GSEs and for the lenders who provide the GSEs with loan level data. County boundaries are commonly recognized by housing industry representatives involved in the loan and marketing process, including lenders and appraisers.

Under this county-based definition, the GSEs may have an incentive to buy mortgages in the parts of underserved counties that have higher incomes. Although 21 percent of the homeowners that live in underserved rural areas reside in served tracts, these tracts accounted for 39 percent of GSE purchases. Even though HUD recognizes that a census tract definition better targets underserved areas, HUD decided to use a county-based definition because the operational difficulties associated with census tract and Block Numbering Area (BNA) boundaries outweigh the benefits of improved targeting of underserved areas.

C. Consideration of the Housing, Economic, and Demographic Factors

As Section B shows, the most thorough studies available provide strong evidence that in metropolitan areas low income and minority composition identify neighborhoods that are underserved by the mortgage market. As this section discusses, geographical differentials in housing, social, and economic problems and past discrimination against minorities confirm that problems are greater throughout the nation in the areas covered by the Geographically Targeted Goal. Section C.1. briefly describes housing, social, and economic problems of distressed neighborhoods. Section C.2. discusses discrimination and other housing problems faced by minorities. Although few studies have yet analyzed the specific geographic areas targeted by the final rule, the segregation of minorities within the nation's inner cities and poorer rural counties makes this information pertinent to analysis of underserved areas and to the goal set by the Secretary.

1. Urban and Rural Housing Needs and the Housing Needs of Underserved Areas

Over the past three decades evidence of growing poverty concentrations has increased concern about poor living conditions in the nation's distressed neighborhoods. John Kasarda has focused on trends in the neighborhood concentration of poverty and measures of the "underclass" population such as school dropouts, unemployed and underemployed adult males, single-parent families, and families dependent upon welfare.[56] Kasarda has not only documented the extreme deprivation that exists in minority and low-income neighborhoods throughout our major urban areas, but he has also shown that neighborhood distress and concentrations of lower-income residents in tracts with high poverty worsened during the 1980s.

Analysis within 44 major metropolitan areas showed that in the late 1980s renters were most likely to have worst case needs in the poorest neighborhoods.[57] Although only one-tenth of households lived in neighborhoods with poverty rates above 20 percent, those poorest neighborhoods housed almost one-fourth of worst case renters. These poorest zones closely resemble tracts identified as poor ghettos or underclass areas. They contained older, smaller units that were more often physically inadequate and crowded than other housing in the metropolitan areas studied.[58] Additional discussion of housing needs is contained in Appendix A.

2. Economic, Housing, and Demographic Conditions

Appendix A includes detailed discussion of economic, housing, and demographic conditions. That discussion was considered in establishing the Geographically Targeted Goal. This section discusses other conditions.

a. Discrimination in the Housing Market

In addition to discrimination in the lending market, substantial evidence exists of discrimination in the housing market. The 1989 Housing Discrimination Study sponsored by HUD found that minority home buyers encounter some form of discrimination about half the time when they visit a rental or sales agent to ask about advertised housing.[59] The incidence of discrimination was higher for African Americans than for Hispanics and for homebuyers than for renters. For renters, the incidence of discrimination was 46 percent for Hispanics and 53 percent for African Americans. The incidence among buyers was 56 percent for Hispanics and 59 percent for African Americans.

While discrimination is rarely overt, minorities are more often told the unit of interest is unavailable, shown fewer properties, offered less attractive terms, offered less financing assistance, or provided less information than similarly situated non-minority homeseekers.

Some evidence indicates that properties in minority and racially-diverse neighborhoods are marketed differently from those in White neighborhoods. Houses for sale in non-White neighborhoods are rarely advertised in metropolitan newspapers, open houses are rarely held, and listing real estate agents are less often associated with a multiple listing service.[60]

b. Housing Problems of Minorities and their Neighborhoods

Because they face discrimination in access to housing or lending, minorities and their neighborhoods face severe housing problems:

• Discrimination in the housing and lending markets is evidenced by racial disparities in homeownership. In 1991, the homeownership rate was 68 percent for Whites, 43 percent for African Americans, and 39 percent for Hispanics. Although differences in income, wealth, and family structure explain much of the differences, racial disparities persist after accounting for these factors.[61]

• Discrimination, while not the only cause, contributes to the pervasive level of segregation that persists between African Americans and Whites in our urban areas.

• Hispanics are the group most likely to have worst case needs for housing assistance, but least likely to receive assistance; in 1991, only 21 percent of very low-income Hispanics lived in public or assisted housing. The 1989 to 1991 increase in worst case needs was the largest for Hispanic households, rising from 39.2 to 44.4 percent of very low-income Hispanic renters.

Homeownership rates vary consistently by neighborhood characteristics. As Table B.6 shows, on average homeownership rates decrease as the minority concentration in census tracts increases, and as income falls relative to the area median. These patterns are consistent with the demographic patterns described earlier, that minorities and low-income households have lower homeownership rates. An exception to this pattern occurs in tracts with incomes below 50 percent of the area median, in which homeownership rates rise with minority concentration in some cases. However, only a very small proportion of households live in these tracts.

3. Previous Performance and Effort of the GSEs In Connection With the Central Cities, Rural Areas and Other Underserved Areas Goal

Table B.7 summarizes GSE acquisitions in underserved areas during 1993 and 1994. Fannie Mae's performance in underserved metropolitan areas increased from 23 percent in 1993 to 29 percent in 1994, and Freddie Mac's performance increased from 21 percent to 24 percent.

Table B.7 also shows the level of the GSEs' purchases in rural underserved areas. Slightly more than 25 percent of their 1994 purchases in rural areas were in underserved areas.

BILLING CODE 4210-32-C

4. Size of the Conventional Conforming Mortgage Market for Underserved Areas

HUD estimates that underserved areas account for 25–28 percent of the conventional conforming mortgage market. The analysis underlying this estimate is detailed in Appendix D.

5. Ability to Lead the Industry

This factor is the same as the fifth factor considered under the goal for mortgage purchases on housing for low- and moderate-income families. Accordingly, see Section C.5 of Appendix A for discussion of this factor.

6. Need to Maintain the Sound Financial Condition of the Enterprises

HUD has undertaken a separate, detailed economic analysis of this rule, which includes consideration of the financial safety and soundness implications of the housing goals. The analysis considered the likely mortgage default implications of the goals and implications for the profitability of the GSEs under various alternative economic assumptions. Among the conclusions are: that the goals will have, at most, only limited impacts on credit risk, which the GSEs should be able to handle without significant lowering of underwriting standards; that risks associated with increased multifamily mortgage purchase volumes under the goals are manageable, considering the scope of the increases implied by the goals; and that the goals imply no meaningful increase in risk to the sound financial condition of the GSEs' operations. Based on this analysis, HUD concludes that the goals raise minimal, if any, safety and soundness concerns.

D. Determination of the 1995 and 1996 Central Cities, Rural Areas, and Other Underserved Areas Goal

This section summarizes the Secretary's rationale for choosing targeted definitions of central cities, rural areas, and other underserved areas, compares the characteristics of served and underserved areas, and addresses other issues related to determining the goal. The section draws heavily from earlier sections which have reported findings from HUD's analyses of mortgage credit needs as well as findings from other research studies investigating access to mortgage credit.

1. Market Failure

The nation's housing finance market is a highly efficient system where most homebuyers can put down relatively small amounts of cash and obtain long-term funding at relatively small spreads above the lender's borrowing costs. Indeed, the growth of the secondary mortgage market during the 1980s integrated a previously thrift-dominated mortgage market with the nation's capital markets so that mortgage funds are more readily available and mortgage costs are more closely tied to movements in Treasury interest rates.

Unfortunately, this highly efficient financing system does not work everywhere or for everyone. Access to credit often depends on improper evaluation of characteristics of the mortgage applicant and the neighborhood in which the applicant wishes to buy. HUD's analysis of 1993 and 1994 HMDA data shows that mortgage credit flows are substantially lower in minority and low-income neighborhoods and mortgage denial rates are much higher for minority applicants.

Admittedly, disagreement exists in the economics literature regarding the underlying causes of these disparities in access to mortgage credit, particularly as related to the roles of discrimination, "redlining" of specific neighborhoods, and the barriers posed by underwriting guidelines to potential minority and low-income borrowers. Because the mortgage system is quite complex and involves numerous participants, it will take more data and research to gain a fuller understanding of why these disparities exist. Still, studies reviewed in Section B of this Appendix found that the individual's race and the racial and income composition of neighborhoods influence mortgage access even after accounting for demand and risk factors that may influence borrowers' decisions to apply for loans and lenders' decisions to make those loans. Therefore, the Secretary concludes that minority and low-income communities are underserved by the mortgage system.

2. Identifying Urban Underserved Areas

To identify areas underserved by the mortgage market, HUD focused on two traditional measures used in a number of HMDA studies: [62] application denial rates and mortgage origination rates per 100 owner-occupied units.[63] Tables B.1 and B.2 in Section B presented detailed data on denial and origination rates by the racial composition and median income of census tracts for metropolitan areas.[64] Aggregating those data is useful for examining denial and origination rates for broader groupings of census tracts:

[62] HMDA data have been expanded in 1993 to cover independent mortgage companies that originated 100 or more home purchase loans in the preceding calendar year. HMDA provides no useful information on rural areas. In addition, although HMDA data now include applications to provide some measure of overall loan demand, pre-screening discrimination can discourage would-be homebuyers from applying for a mortgage, leading to an underestimation of demand. Nevertheless, the HMDA data, while not necessarily definitive, are still useful in helping to define underserved areas.

[63] Analysis of application rates are not reported here. Although application rates are sometimes used as a measure of mortgage demand, they provide no additional information beyond that provided by looking at both denial and origination rates. The patterns observed for application rates are still very similar to those observed for origination rates.

[64] As shown in Table B.1, no sharp breaks occur in the denial and origination rates across the minority and income deciles—mostly, the increments are somewhat similar as one moves across the various deciles that account for the major portions of mortgage activity.

Minority composition (percent)	Denial rate (percent)	Origination rate	Tract income (percent)	Denial rate (percent)	Origination rate
0–30	11.8	14.1	Less than 90	21.3	7.5
30–50	19.1	10.7	90—120	13.5	12.6
50–100	24.4	7.2	Greater than 120	8.9	18.8

Two points stand out from these data. First, census tracts with higher percentages of minority residents have higher denial and lower origination rates. Tracts that are over 50 percent minority have twice the denial rate and half the origination rate of tracts that are under 30 percent minority.[65] Second, census tracts with lower incomes have higher denial rates and lower origination rates than higher income tracts. Tracts with income less than or equal to 90 percent of area median have more than two times the denial rate and less than one-half the origination rate of tracts with income over 120 percent of area median.

HUD chose over 30-percent minority and under 90-percent of area median income as the thresholds for defining metropolitan underserved areas. There are two advantages to HUD's definition. First, the cutoffs produce sharp differentials in denial and origination rates between served and underserved areas. For instance, the overall denial rate (21 percent) in underserved areas is almost double that (11 percent) in served areas. Thus, an advantage of a targeted definition of underserved areas is illustrated by sharp differences in mortgage access between served and underserved areas.[66]

A second advantage is that the minority and income cutoffs are useful for defining mortgage problems in the suburbs as well as in OMB-defined central cities. Underserved areas account for 31 percent of the suburban population, compared with 58 percent of the central city population. The average denial rate in underserved suburban areas is almost twice that in the remaining areas of the suburbs. (See Figure B.1 in Section B.) Thus, the minority and income thresholds in HUD's definition identify those suburban tracts that seem to be experiencing mortgage credit problems.

[65] The differentials in denial rates are due, in part, to differing risk characteristics of the prospective borrowers in different areas. However, use of denial rates is supported by the findings in the Boston Fed study which found that denial rate differentials persist, even after controlling for risk of the borrower. See Section B for a review of that study.

[66] The Final Rule changed the income threshold from 80 percent to 90 percent. This added 3,645 tracts with a denial rate of 18 percent.

3. Characteristics of Urban Underserved Areas

The final rule's definition of metropolitan underserved areas includes 20,326 of the 43,232 census tracts in metropolitan areas, covering 44 percent of the metropolitan population, 58 percent of the OMB-defined central city population, and 31 percent of the suburban population. As shown in Table B.8, the final rule's definition covers most of the population of the nation's most distressed OMB-defined central cities: Newark (99 percent), Detroit (96 percent), Hartford (97 percent), Baltimore (90 percent), and Cleveland (90 percent). The nation's five largest cities also contain large concentrations of underserved areas: New York (62 percent), Los Angeles (69 percent), Chicago (77 percent), Houston (67 percent), and Philadelphia (80 percent).

High-Income-Minority Tracts. It should be noted that the final rule's definition of underserved areas excludes high minority tracts with median income above 120 percent of area median income. As shown in Table B.9, these tracts, which represent about two percent of metropolitan area population, appear to be relatively well off: they have low levels of poverty (7 percent), and high relative house values (122 percent). The high-income-minority tracts are concentrated in a few metropolitan areas: 7 percent of Los Angeles' population lives in them; the corresponding figures are 7 percent for New York, 5 percent for Miami, 25 percent for Honolulu, and 12 percent for San Antonio. By contrast, most relatively distressed metropolitan areas have few households in such areas—for example, Cleveland (1 percent), Detroit (2 percent), Memphis (1 percent), Milwaukee (0 percent), and Philadelphia (1 percent).

Income Threshold. Among other issues considered in setting the underserved definition for metropolitan areas included raising the area income threshold, to include more moderate-income census tracts. This alternative would add tracts with incomes between 90 and 100 percent of the area median. However, it should be noted that high-minority tracts (over 30 percent minority) at this income level are already included in HUD's underserved areas definition, and that raising the income limit to 100 percent would add only tracts with low-minority concentration (below 30 percent). These areas represent 4,486 census tracts, and comprise 11 percent of metropolitan population.[67]

These low-minority moderate-income tracts have denial rates almost 30 percent below the tracts that meet HUD's underserved definition (15 versus 21 percent). By contrast, high-minority moderate-income tracts have a denial rate almost identical to the overall underserved denial rate. The origination rate in moderate-income low-minority tracts (11 per 100 owner occupants) is noticeably higher than that in underserved tracts (8 per 100 owner occupants).

BILLING CODE 4210-32-P

[67] In addition to including tracts with income between 90 and 100 percent of area median as underserved, the Freddie Mac definition includes tracts between 20 and 30 percent minority concentration; this would add an additional 881 tracts. Table B.4 compares the HUD and Freddie Mac definitions.

Table B.8

Needy Areas in Central Cities Would Be Covered

Large Cities with High Concentrations of Tracts Included in the Geographically Targeted Goal (Percent of Population)	
Newark	99%
Hartford	97%
Gary	96%
Detroit	96%
Jersey City	92%
Miami	91%
Baltimore	90%
Cleveland	90%
St. Louis	85%

Five Largest Cities	
New York	62%
Los Angeles	69%
Chicago	77%
Houston	67%
Philadelphia	80%

Central Cities with Small Concentrations			
Large Cities		**Small Cities**	
Raleigh	33%	Appleton, WI	6%
Tulsa	38%	Cedar Falls, IA	8%
Nashville-Davidson	41%	Scottsdale, AZ	11%
Oklahoma City	42%	Naples, FL	13%
Wichita	43%	Orem, UT	14%
Colorado Springs	44%	Wheeling, WV	20%
Columbus	46%	Salem. OR	19%
Phoenix	51%	Elkhart, IN	20%

Table B.9

Characteristics of High Income Minority Tracts (HIMTS) and Moderate Income Tracts

	Served Tracts			Underserved Tracts
HIMTS	90- 100% of Area Median Income	Remaining Served Tracts		
Unemployment Rate	4.9 %	5.1 %	3.9 %	8.9 %
Denial Rate	15.7	15.1	9.7	21.0
Tract/MSA Income	145.2	95.2	133.2	70.9
Relative Median House Value*	122.2	93.4	136.0	72.3
Poverty Rate	7.0	8.4	5.1	20.0
African American	16.2	3.8	2.9	23.9
Hispanic	21.8	3.5	3.4	17.9
Asian	12.7	1.5	2.4	4.3

Note: High-income minority tracts (HIMTS) are census tracts with income greater than 120 percent of area median and minority percentage greater than 30 percent. Moderate-income tracts are census tracts with income between 90 and 100 percent of area median and minority percentage less than 30 percent. Tracts with zero population, zero owner-occupied units, or suppressed income are not included.

* Median house value in tract relative to median house value in metropolitan area.

BILLING CODE 4210-32-C

4. Rural Underserved Areas

Recognizing both the difficulty of defining rural underserved areas and the need to encourage GSE activity in such areas, HUD has chosen a rather broad, county-based definition of underservedness in rural areas. Its definition includes 1,511 of the 2,305 counties in nonmetropolitan areas and covers 54 percent of the nonmetropolitan population. Still, HUD's definition targets the most disadvantaged rural counties. It covers 67 percent of the nonmetropolitan poor and 75 percent of nonmetropolitan minorities. The average poverty rate of underserved counties is 21 percent, significantly greater than the 12 percent poverty rate in counties designated as "served".

The HUD definition also targets specific geographic areas with high poverty and minority concentrations. For example, HUD's definition includes 84 percent of the population that reside in remote counties that are not adjacent to metropolitan areas and have fewer than 2,500 residents in towns.

5. GSE Activity in Underserved Areas

Figure B.2 uses 1993 and 1994 HMDA data for single-family mortgages to compare GSE and non-GSE funding in underserved areas. The non-GSE part of the conventional conforming market consists mainly of bank and thrift portfolio lenders. The share of funding going to underserved areas increased between 1993 and 1994 for both GSEs and non-GSEs. A larger proportion of non-GSE mortgages finance properties in underserved areas than do mortgages purchased by the GSEs. This was particularly the case for Freddie Mac in 1994—22 percent of Freddie Mac's single-family business was in underserved areas, compared with 27 percent of non-GSE business.[68]

In terms of overall business, 29 percent of Fannie Mae's 1994 business was in underserved areas as was 24 percent of Freddie Mac's. The fact that underserved areas have much lower incomes than other areas does not mean that GSE purchase activity in underserved areas derives totally from lower income families. In 1993, above-median income households accounted for 48 percent of the mortgages that the GSEs purchased in underserved areas and in 1994, they accounted for 37 percent. This suggests these areas are quite diverse.

BILLING CODE 4210-32-P

[68] The HMDA data has been adjusted for 100,000 mobile homes along the lines discussed in Appendix D.

FIGURE B.2

The Share Of GSE And Non-GSE Mortgages in Areas Included in the Geographically Targeted Goal, 1993 and 1994

BILLING CODE 4210-32-C

6. Market Feasibility and Changing Market Conditions

As detailed in Appendix D, the market for mortgages in underserved areas accounts for 25 to 28 percent of dwelling units financed by conventional conforming mortgages. Figure B.3 compares recent GSE performance, the 1996 and 1997–1999 goals, and the size of the market. Having considered the projected market and economic and demographic conditions for 1996–1999 and the GSEs' recent performance, HUD has determined that goals for mortgage purchases in central cities, rural areas, and other underserved areas 21 percent for 1996, 24 percent for 1997–1999, and 24 percent thereafter pending establishment of a new goal, are feasible.

7. Conclusion

The Secretary has determined that the goals of 21 percent in 1996 and 24 percent in 1997 and thereafter are necessary and feasible.

Appendix C—Secretarial Considerations To Establish the Special Affordable Housing Goal

A. Introduction

1. Establishment of the Goal

The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (FHEFSSA) requires the Secretary to establish a special annual goal designed to adjust the purchase by each GSE of mortgages on rental and owner-occupied housing to meet the unaddressed needs of, and affordable to, low-income families in low-income areas and very-low-income families (the Special Affordable Housing Goal).

In establishing the Special Affordable Housing Goal, FHEFSSA requires the Secretary to consider:

(1) Data submitted to the Secretary in connection with the Special Affordable Housing Goal for previous years;

(2) The performance and efforts of the GSEs toward achieving the Special Affordable Housing Goal in previous years;

(3) National housing needs of targeted families;

(4) The ability of the GSEs to lead the industry in making mortgage credit available for low-income and very-low-income families; and

(5) The need to maintain the sound financial condition of the enterprises.

2. The Goal

The final rule provides that the Special Affordable Housing Goal for 1996 is 12 percent of the total number of dwelling units financed by each GSE's mortgage purchases. The goal for 1997 and subsequent years is 14 percent. Of the total Special Affordable Housing Goal for each year, each GSE must purchase multifamily mortgages in an amount at least equal to 0.8 percent of the total dollar volume of mortgages purchased by the GSE in 1994.

Approximately 20–23 percent of the conventional conforming mortgage market would qualify under the Special Affordable Housing Goal as defined in the final rule. Using the final rule's conventions for what will count toward the goal, 16.7 percent of Fannie Mae's 1994 business and 11.4 percent of Freddie Mac's would have qualified toward the goal.

Units that count toward the goal: Subject to further provisions specified below, units that count toward the Special Affordable Housing Goal include units occupied by low-income owners and renters in low-income areas, and very-low-income owners and renters. Low-income rental units in multifamily properties where at least 20 percent of the units are affordable to families whose incomes are 50 percent of area median income or less or where at least 40 percent of the units are affordable to families whose incomes are 60 percent or less of area median income count toward the goal.

B. Underlying Data

In considering the factors under FHEFSSA to establish the Special Affordable Housing Goal, HUD relied upon data gathered from the American Housing Survey, the Census Bureau's 1991 Residential Finance Survey, the 1990 Census of Population and Housing, other government reports, Home Mortgage Disclosure Act (HMDA) data and reports, and the GSEs. Among other new data resources, full-year 1994 data from the GSEs, as well as HMDA data for 1994, became available to HUD since publication of the proposed rule. Appendix D discusses in detail how these data resources were used and how the size of the conventional conforming market for this goal was estimated.

Section C discusses the factors listed above, and Section D provides the Secretary's rationale for establishing the special affordable goal.

C. Consideration of the Factors

1 and 2. Data Submitted to the Secretary in Connection With the Special Affordable Housing Goal for Previous Years, and the Performance and Efforts of the Enterprises Toward Achieving the Special Affordable Housing Goal in Previous Years

The discussions of these two factors have been combined because they overlap to a significant degree.

a. GSE Performance Relative to the 1993–94 Goals

For the 1993–94 transition period the Special Affordable Housing Goal was established in dollar terms. FHEFSSA called for special affordable purchases of $2.0 billion by Fannie Mae and $1.5 billion by Freddie Mac, and the legislative history made it clear that such purchases should be "above and beyond their existing performance and commitments."[1] The specified amounts of the goals were evenly divided between multifamily and single family housing.

The Special Affordable Housing Goals for 1993–94 were $12.7 billion single family and $3.6 billion multifamily for Fannie Mae, and $11.1 billion single family and $0.8 billion multifamily for Freddie Mac.[2]

Fannie Mae's qualifying mortgage purchases in 1993 and 1994 together amounted to $16.7 billion single-family and $4.5 billion multifamily. Thus Fannie Mae surpassed the 1993–94 single-family and multifamily portions of the goal by 32 percent and 26 percent, respectively.

Freddie Mac's qualifying mortgage purchases in 1993 and 1994 together amounted to $12.2 billion single-family and $495 million multifamily. Thus Freddie Mac surpassed the 1993–94 single-family goal by 10 percent but fell short on the multifamily portion of the goal by 38 percent.

b. 1993–94 GSE Performance Relative to Final Rule Special Affordable Housing Goals for 1996–1999

Owner-occupied housing. Between 1993 and 1994, both GSEs increased significantly the purchase of mortgages on owner-occupied housing that would qualify under this goal. (See Table C.1.)

Rental housing. As in the case of owner-occupied housing, between 1993 and 1994 both GSEs increased significantly the purchase of mortgages financing rental units affordable to very-low-income families. (See Table C.2.)

In this final rule, the Special Affordable Housing Goal has been broadened relative to the proposed rule, to include low-income renters in low-income areas. This change increases the number of qualifying mortgages by 8.5 percent for Fannie Mae in 1993 and 10.2 percent in 1994, and 6.1 percent for Freddie Mac in 1993 and 6.5 percent in 1994. (See Table C.3.)

This final rule also includes as eligible all rental units affordable to low-income families in properties where at least 40 percent of the units qualify as very-low-income, or where at least 20 percent of the units qualify as especially-low-income. (Especially-low-income means no more than 50 percent of area median.) This provision makes a difference of approximately 5,100 units in Fannie Mae's 1993 performance, and 11,600 in 1994. For Freddie Mac, there is no effect for 1993, and approximately 1,300 units for 1994. (See Table C.4.)

Summary. Table C.5 summarizes the GSEs' purchases in 1993 and 1994 that would qualify under the final rule's Special Affordable Housing Goal: Fannie Mae's and Freddie Mac's qualifying purchases in 1994 were 16.7 percent and 11.4 percent of total eligible purchases, respectively. Thus Fannie Mae would have achieved both the 1996 goal and the goal for 1997 and thereafter, and Freddie Mac would nearly have achieved the 1996 goal.

3. National Housing Needs of Low-Income Families in Low-Income Areas and Very-Low-Income Families

The following discussion closely follows HUD's analysis of national housing needs in Appendix C of the proposed rule, which has been updated in various respects. As in the proposed rule, this discussion concentrates on very-low-income families with the greatest needs, because Section C of Appendix A presents detailed analyses of housing problems and demographic trends for lower-income families.

a. Housing Problems Among Very-low-income Families

Data from the 1990 Census and from the 1989, 1991, and 1993 American Housing Surveys demonstrate that housing problems and needs for affordable housing are more pressing in the lowest-income categories than among moderate-income families. Analyses of special tabulations of the 1990 Census prepared for use in developing Comprehensive Housing Affordability Strategies (the CHAS database), which have been updated to 1993 using American Housing Survey Data, show clearly that sharp differentials by income characterized all regions of the nation as well as their city, suburban, and nonmetropolitan portions. Nationally, approximately one-fourth of moderate-income renters and owners experienced one or more housing problems, compared to nearly three-fourths of very-low-income renters and nearly half of very-low-income owners.[3] Severe cost burdens—paying more than half of income for housing and utilities—varied even more markedly by income, involving less than 2 percent of moderate-income households, but nearly two-fifths of the 10.5 million owners with incomes below 30 percent of area median income.

The CHAS tabulations are based on HUD-adjusted median income for both owners and renters, rather than on unadjusted median income for owners, as FHEFSSA specifies for mortgages counted toward the housing goals.[4] But tabulations of the 1993 AHS using the GSE income definitions reveal the same pattern of problems for lower-income families. As the following table details, for both owners and renters, housing problems are much more frequent for the lowest-income groups.[5] Priority problems of severe cost burden or severely inadequate housing are noticeably concentrated among renters and owners with incomes below 35 percent of area median income.

Income as % of area median income (percent)	Renters		Owners	
	Any problems (percent)	Priority problems (percent)	Any problems (percent)	Priority problems (percent)
Less than 35	89	44	62	36
35–50	78	17	40	13
51–80	48	5	29	7
81–100	24	1	21	4

Comparisons by income reveal that owners and renters (with incomes between 50 and 80 percent of area median) resemble moderate-income households in seldom having priority problems. Priority problems are heavily concentrated among households with incomes below 50 percent of median.[6] In 1991, 5.3 million unassisted renter households with incomes below 50 percent of area median income had "worst case" housing needs.[7] This total does not include homeless persons and families, although they also qualify for preference. For three-fourths of the renter families with worst case problems, the only problem was affordability—they do not have problems with housing adequacy or crowding.

b. Needs for Housing Affordable to Very-Low-Income Families

The existing housing stock satisfies the physical needs of most very-low-income renters. In most cases families are able to find adequate housing. The problem is that much of this housing is not affordable to very-low-income families—i.e., these families must pay more than 30 percent of their income for housing. The main exception to this generalization occurs among extremely-low-income families (defined as families below 30 percent of area median income) with three or more children. The 1993 American Housing Survey shows that 47 percent of these families live in crowded housing. A certain amount of variation in need exists, by region and degree of urbanization. Although 22 percent of worst case renters experience crowding or severe inadequacy, this figure varies from 11 percent in the Northeastern suburbs to 35 percent in the South's nonmetropolitan areas. Shortages of affordable housing units continued to be greatest and vacancy rates lowest in California.

The relative decline in inexpensive dwelling units has been concentrated among the least expensive rental units—those with rents affordable to families with incomes below 30 percent of area median income. In 1979, the number of units in this rent range was 28 percent less than the number of renters with incomes below 30 percent of area median income; by 1989, the gap had widened to 39 percent, a shortage of 2.7 million units.[8] This shortage is a problem particularly at the extremely low end of the rent distribution. Both nationally and in most states, there are surpluses of rental housing affordable to families with incomes between 30 and 50 percent of area median income and to those in the 50–80 percent range.[9] Furthermore, in most states, vacancy rates were high in 1990 among units with rents affordable to families with incomes at or below 50 percent of median.[10] Thus, like housing problems, unmet needs for affordable housing are heavily concentrated in rent ranges affordable to renters with incomes below 30 percent of area median income.

[3] The problems covered by the Census include paying over 30 percent of income for housing, lacking complete kitchen or plumbing, and overcrowding. See Appendix Tables 18A and 19A of Amy Bogdon, Joshua Silver, and Margery A. Turner, *National Analysis of Housing Affordability, Adequacy, and Availability: A Framework for Local Housing Strategies*, HUD–1448–PDR, 1994.

[4] To determine eligibility for Section 8 and other HUD programs, HUD adjusts income limits derived from the median family income for household size. The "very low" and "low" income limits at 50 percent and 80 percent of median apply to 4-person households. Relative to the income limits for a 4-person household, the limit is 70 percent for a 1-person household, 80 percent for a 2-person household, 90 percent for a 3-person household, 108 percent for a 5-person household, 116 percent for a 6-person household, etc.

[5] Tabulations of the 1993 American Housing Survey by HUD's Office of Policy Development and Research. The results in the table categorize renters reporting housing assistance as having no housing problems. Almost one-third of renters with incomes 0–30 percent of median and one-fifth of those with incomes 30–50 percent of median are assisted.

[6] For all housing programs of HUD (other than the GSE goals) and the Department of Agriculture, "very-low-income" is defined as not exceeding 50 percent of area median income.

[7] "Worst case housing needs" for housing assistance are defined as unassisted renters with income below 50 percent of area median income who meet a Federal preference for admission to rental assistance because they pay more than half of income for rent and utilities, have been displaced, or live in severely substandard housing (which includes being homeless).

4. The Ability of the Enterprises to Lead the Industry in Making Mortgage Credit Available for Low-Income and Very-Low-Income Families

The discussion of the ability of Fannie Mae and Freddie Mac to lead the industry in Section C.5 of Appendix A is relevant to this factor—the GSEs' dominant role in the market, their role in establishing widely-applied underwriting standards, their role in the development of new technology for mortgage origination, their strong staff resources, and their financial strength. Additional analysis on the potential ability of the enterprises to lead the industry in the low- and very-low-income market appears below—in Section D.2 generally, and in Section D.3 with respect to multifamily housing.

The ability of the GSEs to lead the industry in the special affordable market is best demonstrated by the significant gains both enterprises have made in this market. As a percentage of total units in the properties whose mortgages they purchased, the special affordable share for the GSEs combined rose from 7.7 percent in 1993 to 13.9 percent in 1994 and 16.4 percent for the first half of 1995. The 1994 increase was truly impressive, as special affordable units rose by 6 percent while total units declined by 41 percent.

5. The Need to Maintain the Sound Financial Condition of the GSEs

HUD has undertaken a separate, detailed economic analysis of this rule, which includes consideration of the financial safety and soundness implications of the housing goals. The analysis considered the likely mortgage default implications of the goals and implications for the profitability of the GSEs under various alternative economic assumptions. Among the conclusions are: that the goals will have, at most, only limited impacts on credit risk, which the GSEs should be able to handle without significant lowering of underwriting standards; that risks associated with increased multifamily mortgage purchase volumes under the goals are manageable, considering the scope of the increases implied by the goals; and that the goals imply no meaningful increase in risk to the sound financial condition of the GSEs' operations. Based on this analysis, HUD concludes that the goals raise minimal, if any, safety and soundness concerns.

D. Determination of the Goal

Several considerations, many of which have been reviewed in earlier sections of this Appendix, led to the determination of the Special Affordable Housing Goal.

1. Severe Housing Problems

The data presented in Section C.3 demonstrate that housing problems and needs for affordable housing are much more pressing in the lowest-income categories than among moderate-income families. The high incidence of severe problems among the lowest-income renters reflects severe shortages of units affordable to those renters. At incomes below 30 percent of median, two-thirds of owners and 70 percent of renters pay more than 30 percent of their income for housing, live in inadequate housing, or are crowded. As the analysis presented above shows, priority problems—paying more than half of income for housing or living in severely inadequate housing—are heavily concentrated among renters with incomes below 50 percent of median. Housing and affordability problems are particularly acute for renters with income below 30 percent of area median income.

2. GSE Performance and the Market

The Special Affordable Housing Goal is designed, in part, to ensure that the GSEs maintain a consistent focus on serving the very-low-income portion of the housing market where housing needs are greatest. The bulk of the GSEs' low- and moderate-income mortgage purchases are for the higher-income portion of the low- and moderate-income category. The lowest-income borrowers accounted for a very small percentage of each GSEs' purchases. Five percent of the GSEs' 1993 mortgage purchases financed homes for single-family homeowners with incomes below 60 percent of area median, and 7 percent in 1994. (See Figure A.1 in Appendix A.)

Specification of the goal. The Special Affordable Housing Goal is established as percentages of the GSEs' total business for the 1996–99 period. This kind of specification is preferable to a fixed, dollar-based specification because: (1) The size of the market for housing eligible to count toward the Special Affordable Housing Goal fluctuates with the size of the overall market rather than remaining at any fixed dollar level (as shown by analysis of HMDA data); and (2) fixed-dollar goals, if based on a high-volume year, could be unattainable in a low-volume year; if based on a low-volume year, could represent insufficient support by the GSEs for the special affordable market in a high-volume year; and if based on an average-volume year, could alternate between being unattainable in some years and insufficient in other years.

GSEs' Performance Relative to the Market. Analysis of American Housing Survey and HMDA data shows that the GSEs are purchasing a smaller proportion of loans for very-low-income homebuyers than are portfolio lenders operating in the conforming market (see the discussion of Figure A.2 in Appendix A). That analysis suggests that there is room in the very-low-income end of the homebuyer market for the GSEs to improve their performance.

A reasonable estimate of the size of the market for both single family and multifamily mortgages that would be eligible to count toward the Special Affordable Housing Goal is 20–23 percent of the overall conventional conforming market, as explained in Section H.2 of Appendix D.

Under the final rule's counting conventions 16.7 percent (7.9 percent owner-occupied and 8.8 percent rental) of units covered by Fannie Mae's mortgage purchases in 1994 would have been eligible to count toward this goal, and 11.4 percent (7.1 percent owner-occupied and 4.3 percent rental) of units covered by Freddie Mac's mortgage purchases would have been eligible to count toward this goal. Figure C.1 compares recent GSE performance, the 1996 and 1997–99 Special Affordable Housing Goals, and the size of the market.

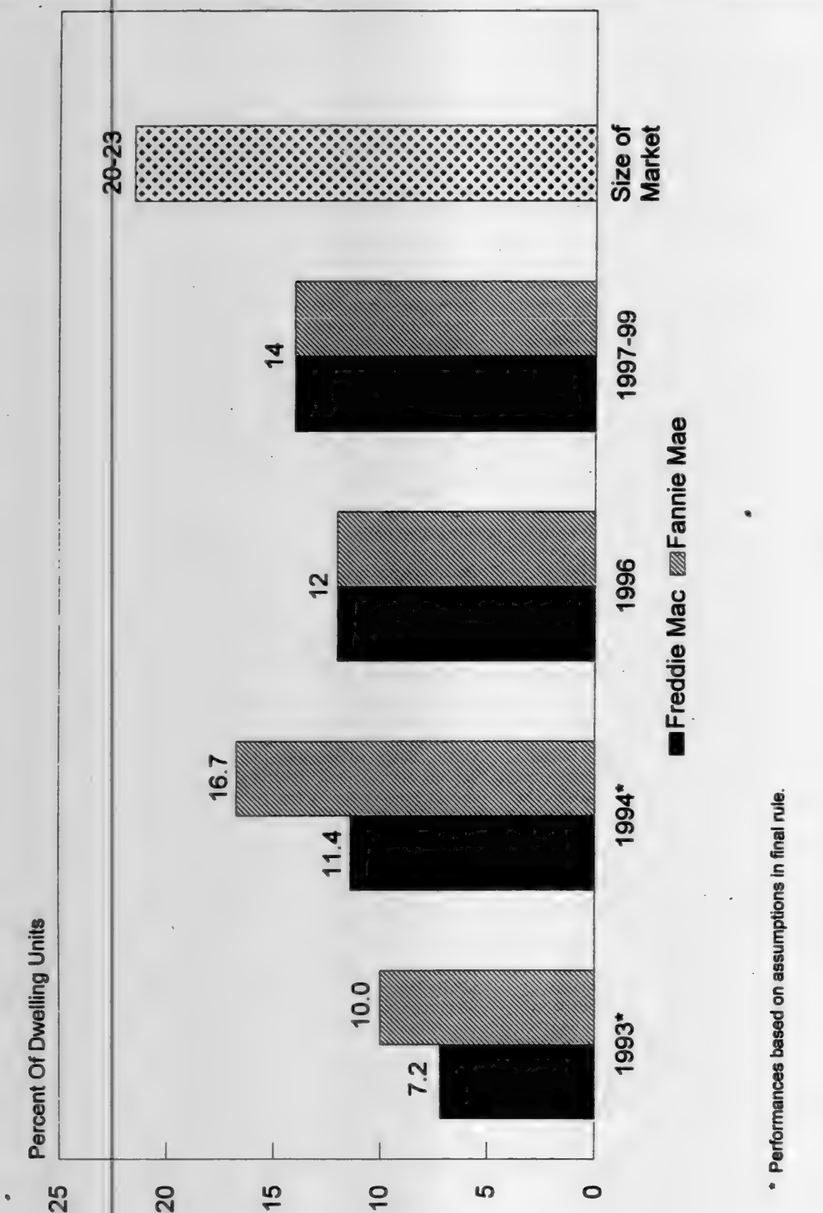
FIGURE C.1



BILLING CODE 4210-33-C

3. Multifamily Purchases

The GSEs can bring an important benefit to the multifamily market in the form of long-term liquidity. In the multifamily arena, however, a secondary market is only in its infancy (see Section C.2.c in Appendix A). Given the GSEs' overall experience and financial strength, it is reasonable to expect that they would play major roles in this development.

Recent tightening of interest rate spreads for "better" multifamily mortgage originations demonstrates that increased liquidity can lower spreads. This suggests that participation by the GSEs can lower financing costs and ultimately rents across the broad range of multifamily properties, including properties occupied by low- and very-low-income tenants. (Section C.2.c of Appendix A elaborates on these themes.)

A minimum multifamily special affordable volume of 0.8 percent of total 1994 volume of business is reasonable, both relative to the size of the market and relative to the GSEs' recent volume of qualifying multifamily purchases. The implied volumes are $950 million for Freddie Mac (relative to $118.8 billion total volume) and $1.22 billion for Fannie Mae (relative to $153.0 billion total volume). Their 1994 volumes of multifamily business that would have qualified as special affordable under this final rule were $425 million for Freddie Mac (0.36 percent of 1994 business), or half of the necessary volume for 1996, and $1.91 billion for Fannie Mae (1.25 percent of 1994 business), or $690 million more than necessary for 1996. The size of the total multifamily market that would qualify under the Special Affordable Housing Goal is approximately $10 billion annually.

Expressing the multifamily subgoals for every year covered by this rule as percentages of total 1994 purchases is a reasonable approach, since multifamily subgoals expressed as percentages of current-year total business could be difficult to achieve in some years. Total volume is driven by the single-family business, which is subject to wide swings due to refinancing waves, as in 1992–93, and to changes in the ARM share of the market.

The Secretary selected 0.8 percent of total 1994 business volume after careful review of the GSEs' past performance and consideration of the need to maintain a minimum level of attention to multifamily housing. This percentage may seem small, but that is because the multifamily market (measured in dollar terms) comprises only a fraction of the total mortgage market, and the special affordable share of the GSEs' multifamily purchases in 1994 was just above 50 percent.[11] For this same reason, changes in this subgoal of even 0.1 percent are significant.

These subgoals are below recent levels of special affordable multifamily purchases by Fannie Mae, but above recent levels of such purchases by Freddie Mac. It should be emphasized that these are minimum purchase amounts; thus HUD in no way is encouraging Fannie Mae to reduce its volume of multifamily business, which is important in its overall efforts to meet the Special Affordable Housing Goal and Low- and Moderate-Income Housing Goals. HUD very much supports Freddie Mac's actions to rebuild its multifamily business, and encourages further efforts in this area. To date Freddie Mac has had no delinquencies on its multifamily business since it reentered this market, and the GSE's multifamily business has been creditworthy and profitable.[12]

4. Conclusion

HUD has determined that the Special Affordable Housing Goal established in the final rule addresses national housing needs within the income categories specified for this goal, while accounting for the GSEs' performance in the past in purchasing mortgages meeting the needs of very-low-income families and low-income families in low-income areas. HUD has also considered the size of the conventional mortgage market serving very-low-income families and low-income families in low-income areas. Moreover, HUD has considered the GSEs' ability to lead the industry as well as their financial condition. HUD has determined that goals of 12 percent in 1996, 14 percent in 1997–1999, and 14 percent thereafter pending establishment of a new goal, with fixed multifamily subgoals of 0.8 percent of 1994 volumes of business, are both necessary and achievable.

Appendix D—Estimating the Size of the Conventional Conforming Market for Each Housing Goal

In establishing the three housing goals, the Secretary is required to assess, among a number of factors, the size of the conventional market for each goal. This Appendix explains HUD's methodology for estimating the size of the conventional market for each of the three housing goals. Section A provides an overview of public comments on the methodology described in the proposed rule. Section B describes the main components of HUD's market-share model and identifies those parameters that have a large effect on the relative market shares. Sections C and D discuss two particularly important market parameters—the size of the multifamily market and the share of the single-family mortgage market accounted for by rental properties. With this as background, Section E provides a more systematic presentation of the model's equations and main assumptions. Sections F, G, and H report HUD's estimates for the Low- and Moderate-Income Goal, the Central Cities, Rural Areas, and other Underserved Areas Goal, and the Special Affordable Housing Goal, respectively.

A. Overview of Comments on Market Methodology

1. Overall Issue

Both GSEs expressed strong criticism of HUD's use of specific data elements in constructing its estimates of market size. Although both GSEs criticized how data had been interpreted in the proposed rule's market share model, neither GSE, nor any commenter, objected to HUD's basic model for calculating the size of the markets relevant to each of the goals. However, Freddie Mac presented a detailed set of objections to the use of certain data sources or assumptions, concluding that HUD's market estimates were "fatally flawed." Freddie Mac commented that "the Proposed Rule uses a combination of data sources and a set of arbitrary assumptions in order to estimate the size of the current conforming, conventional market," adding that "in nearly every case, HUD has chosen an estimate at the highest end of calculable estimates."

Freddie Mac proposed a number of revisions to the assumptions or data sets used in the proposed rule, for example—using HMDA data to estimate the size of the multifamily and single-family rental markets, using American Housing Survey rent data on recently-completed properties to estimate the affordability of the newly-mortgaged rental properties, using discount factors to reduce the size of the rental and low-income owner markets, etc. HUD has carefully considered these comments in revising the market estimates for each of the goals. However, HUD disagrees with Freddie Mac's overarching comment that because data are not always available in the form and format desired, HUD should use minimal estimates of market activity. Such an

[11] Multifamily properties account for a much higher percentage of dwelling units financed by mortgages than their percentage of total dollar mortgage volume.

[12] *American Banker*, October 12, 1995, p. 12.

approach does not take advantage of the wealth of information currently available on mortgage activity.

In revising the rule, HUD has carefully reviewed existing information on mortgage activity in order to understand the weakness of various data sources, has conducted sensitivity analyses to show the effects of alternative parameter assumptions, and has hired independent researchers to assist in determining best estimates for the more important determinants of the housing goal market shares. HUD is well aware of uncertainties with some of the data and much of this Appendix is spent discussing the effects of these uncertainties on the market estimates.

The remainder of this section responds to several major comments about the market share methodology made by Freddie Mac and others. But with respect to Freddie Mac's statements that HUD's methodology is "fatally flawed" and based on "arbitrary assumptions," HUD has three specific comments here:

(A) HUD contracted with Urban Institute researchers to independently evaluate its methodology for estimating market shares for the various goals. They concluded that HUD's conceptual approach is "a reasonable approach to determining the size of the low- and moderate-income, underserved areas, and special affordable markets relative to the size of the overall conventional, conforming mortgage market."[1] They also concluded that Freddie Mac's approach for measuring mortgage market property shares was the wrong approach (see discussion below).

(B) Freddie Mac commissioned Abt Associates to evaluate HUD's methodology for the proposed rule. Abt Associates concluded that "the point is not that HUD misused the data. On the contrary, HUD made reasonable attempts to arrive at plausible estimates."[2] (Emphasis added.)

(C) HUD has set conservative goals. For example, the Low- and Moderate-Income Goal is 40 percent for 1996 and 42 percent for 1997 and subsequent years. These goals are well below the market shares projected by HUD and the Urban Institute. In addition, the Abt study estimated that the low- and moderate-income market was 41–57 percent, placing the Low- and Moderate-Income Goal for 1997 and subsequent years at the bottom of Abt's range of estimates of market size. It should further be noted that Abt's estimates were made based on the proposed rule. A number of liberalizations in the counting rules have been made in the final rule, which mean that market estimates should be revised upward in light of these changes.

It also should be emphasized that neither GSE objected to HUD's basic model for calculating the size of the markets relevant to each of the housing goals, which involves estimating (1) the share of the market (in dwelling units) by type of property (single-family-owner, single-family-rental, and multifamily), (2) the proportion of dwelling units financed by mortgages for each type of property meeting each goal, and (3) projecting the size of the market by weighting each such goal share by the corresponding market share. The GSEs' comments focused on how the underlying estimates were derived and the resulting impacts on the size of the market for each goal. As noted above, HUD recognizes the uncertainty regarding some of these estimates, which led the Department to undertake a number of sensitivity analyses and to contract with Urban Institute researchers to reduce some of this uncertainty.

2. Major Issues

(1) Market volatility. Freddie Mac commented that HUD's analysis ignores the impact that changes in national economic conditions can have on the size of the market, stating that its recent efforts to expand the reach of the secondary market in support of low- and moderate-income people "were aided by very favorable interest rates and macroeconomic conditions that made housing extraordinarily affordable." However, Freddie Mac observed, fluctuations of interest rates of approximately 250 basis points in the past year have demonstrated that housing can become much less affordable in a short period, but "HUD's market estimates assume that the favorable conditions of 1993 and 1994 will continue indefinitely."

HUD response. HUD has addressed the concerns about market volatility in two major ways:

(A) HUD has conducted detailed sensitivity analyses for each of the housing goals. These analyses present different estimates of market size by varying key assumptions: the size of the multifamily market; the low- and moderate-income shares of single-family owner-occupied homes[3], single-family rental homes, and multifamily units; the breakdown of the single-family market between owner-occupied units and rental units; and the multifamily loan amount per unit. These analyses support the feasibility of the goals under a wide range of conditions.

(B) With regard to volatility in the multifamily market, Freddie Mac stated the HUD's use of Residential Finance Survey (RFS) data is inappropriate, because they draw on a period when multifamily lending was unusually high. HUD did not use the RFS data in its baseline model. As the proposed rule noted, the RFS, based on a period with a high level of multifamily originations, overstates the probable level of multifamily originations in the 1996–97 period.

HUD recognizes that there is volatility in the multifamily market, and for this reason contracted with Urban Institute researchers to develop a "steady-state" multifamily originations model which abstracts from the volatility of interest rates, refinancings, and waves of maturing balloon mortgages.[4] This model generated projections of multifamily activity no less than, and in some cases substantially greater than, those used by HUD in this rule.

(2) Size of the multifamily market. Both GSEs commented that in the proposed rule the role of multifamily financing is consistently overstated. In particular, both GSEs advocated the use of data from the Home Mortgage Disclosure Act (HMDA) reports, rather than the Survey of Mortgage Lending Activity (SMLA), used by HUD in the proposed rule.

HUD response. HUD addressed this comment in two ways:

(A) HUD commissioned four papers on the multifamily market by Urban Institute researchers[5] and held two seminars on this topic with a wide range of participants, including the GSEs. These papers compared and evaluated

[1] Dixie M. Blackley and James R. Follain, "A Critique of the Methodology Used to Determine Affordable Housing Goals for the Government-Sponsored Housing Enterprises," October 1995, p. 21.

[2] Abt Associates, "Evaluation of HUD-Proposed Housing Goals for the GSEs," February 6, 1995, p. 12.

[3] The GSEs have generally advocated use of the HMDA data. In a number of the sensitivity analyses, the percentages of single-family owner-occupied homes which qualify for the low-mod goal have been reduced below the levels reported by the 1993 and 1994 HMDA data.

[4] Robert Dunsky, James R. Follain, and Jan Ondrich, "An Alternative Methodology to Estimate the Volume of Multifamily Mortgage Originations," September 1995.

[5] These are: The previously cited papers by Blackely and Follain (1995) and Dunsky, Follain, and Ondrich (1995); "Estimating the Volume of Multifamily Mortgage Originations by Commercial Banks Using the Survey of Mortgage Lending Activity and Home Mortgage Disclosure Act data," by Amy D. Crews, Robert Dunsky, and James Follain (October 1995); and "What We Know About Multifamily Mortgage Originations," by Amy D. Crews, Robert M. Dunsky, and James R. Follain (October 1995).

information about the size of the multifamily market in detail. They supported HUD's projections of the size of the market, and at least one of their analyses suggested that higher estimates were reasonable. They concluded that the HMDA data base underreports multifamily originations. Details are presented in section C.2, below.

(B) In its sensitivity analyses, HUD has used lower estimates of the size of the multifamily market than the base case in the proposed rule.

Section C below provides a more detailed response to the GSEs' comments about the size of the multifamily market.

(3) Size of the single-family rental market. Freddie Mac stated that HUD's use of the Survey of Mortgage Lending Activity (SMLA) caused it to overstate the size of the single-family rental market, arguing that a more accurate estimate is derived from HMDA.

HUD response. HUD did not use the SMLA to estimate the rental share of the single-family market—rather, it closely analyzed data from the Residential Finance Survey (RFS) and the HMDA reports. In its base case HUD projected the investor share of the single-family market at 10.0 percent, well below the 17.3 percent reported by the RFS, but slightly above the 8.0 percent reported by the 1994 HMDA data. Again, the Urban Institute researchers concluded that the HMDA estimate was too low and a 10–12 percent estimate was reasonable. At the same time, HUD has acknowledged that there is some uncertainty about the rental share of the single-family market, and has reflected this in its sensitivity analyses (Table D.3).

(4) Multifamily market penetration. Fannie Mae stated that the multifamily lending industry is fundamentally different from the single-family industry and that the GSEs do not dominate the multifamily market to the degree that they dominate the single-family market. Fannie Mae concluded that "origination volumes in multifamily lending are not a reliable indicator of what is available to either Fannie Mae or Freddie Mac in the secondary market." Freddie Mac concurred with this view.

HUD response. The GSEs are able to purchase loans from any multifamily lender. Explicitly considering only multifamily loans originated by certain lenders in the estimate of market size would implicitly amount to intervention in the GSEs' mortgage purchase decisions, and be tantamount to "micromanagement" of the GSEs' operations, which both HUD and the GSEs wish to avoid. (Appendix A discusses HUD's response to this issue in more detail.)

At the same time, HUD realizes that the GSEs have been and are likely to continue to be less active in the multifamily market than in the single-family market. It is also true that multifamily originations play a significant role in estimating the size of the Low- and Moderate-Income and Special Affordable Housing Goals. For these reasons, both of these goals have been conservatively set in relation to HUD's estimates of the size of these markets, including all multifamily originations.

Other Issues

(5) Distortions caused by mobile home loans in the HMDA data. Fannie Mae commented that the HMDA data used in HUD's analysis included mobile home loans, which "are an important source of affordable housing for low- and moderate-income families, but which are not a significant product line for either Fannie Mae or Freddie Mac," adding that if mobile home originations are eliminated, "the amount of mortgages meeting this [low- and moderate-income] goal available to Fannie Mae and Freddie Mac is significantly reduced." Freddie Mac was in general agreement with this view.

HUD response. HUD has undertaken discussions with industry representatives and mobile home lenders and has examined the effects of adjusting the HMDA data for mobile homes.[6] However, as Section F discusses in detail, it is not clear how many mobile home loans are included in the HMDA data. Thus, HUD also uses American Housing Survey data that does not include mobile homes. To a certain extent, HUD had anticipated this issue in its proposed rule by excluding small loans from its analysis of HMDA data.

(6) American Housing Survey (AHS) data on housing affordability. Freddie Mac stated that HUD's use of the AHS led to an overstatement of housing affordability, because "it is well known that income reported in the AHS [is] lower than other independent estimates of income."

HUD response. This issue requires distinguishing between owner-occupied and rental units using special 1990 Census tabulations. HUD compared data on household income to official HUD estimates of area median income for each location in the country. These Census tabulations should be more accurate than the AHS in two ways—because the Census income data are better, and because the Census income data were compared to accurate median family income data for each metro area or nonmetro county in the country. The AHS estimates of the income of very-low-, low-, and moderate-income homeowners are about two percentage points higher than the corresponding Census data. However, these comparisons fail to take into account the changes which were made in the AHS in 1993, which has reduced income underreporting by the AHS. (See Section F.1.c below.) Thus, it appears that income underreporting is not a serious problem with the recent AHS data. As noted above, one advantage of the AHS data is that it excludes mobile home loans.

The Census tabulations show that the AHS and the Census data are remarkably similar with regard to renters' incomes. But the Department used rent data, not income data, in measuring affordability of rental units. The AHS asks more questions about rent components than any other survey and it is the only source of information on gross rent (contract rent plus the cost of utilities), thus it is the best source of information about rents.

(7) Use of rent levels inflates rental housing importance. Freddie Mac stated that the proposed rule uses rent levels to qualify rental units as serving low- or moderate-income levels. They added that "This is reasonable, but has the effect of increasing the importance of rental housing in meeting goals," because "many higher income households live in lower cost rental units."

HUD response. It is true that many higher-income households live in lower-rent units, but this is irrelevant. If the GSEs undertook a concerted effort to gather comprehensive data on renter income, as allowed (but not required) by the FHEFSSA, HUD would base its low- and moderate-income rental share on renters' income data. But in fact both GSEs have repeatedly said that data on tenant income is not generally available, and HUD has therefore allowed the GSEs to use data on rents in determining affordability. To be consistent with this practice, HUD has used rents in estimating the size of the market related to the various goals. This procedure does not inflate the importance of rental housing relative to what is available for purchase by the GSEs.

[6] These adjustments involved identifying all loans originated by four mobile home lenders, examining borrower income data for these loans, extrapolating from this data to estimate the size of the total mobile home market by income level in the HMDA data, and deducting the resulting estimates from the HMDA data.

B. Overview of HUD's Market Share Methodology

1. Definition

The size of the market for each housing goal is one of the factors that the Secretary is required to consider when setting the level of each housing goal.[7] Using the Low- and Moderate-Income Housing Goal as an example, the market share in a particular year is defined as follows:

Low- and Moderate-Income Share of Market: The number of dwelling units financed by the primary mortgage market in a particular calendar year that are occupied by (or affordable to, in the case of rental units) families with incomes less than the area median income *divided by* the total number of dwelling units financed in the conforming conventional primary mortgage market.

There are three important aspects to this definition. First, the market is defined in terms of "dwelling units" rather than, for example, "value of mortgages" or "number of properties." Second, the units are "financed" units rather than the entire stock of all mortgaged dwelling units; that is, the market-share concept is based on the mortgage flow in a particular year, which will be smaller than total outstanding mortgage debt. Third, the low- and moderate-income market is expressed relative to the overall conforming conventional market, which is the relevant market for the GSEs.[8] The low- and moderate-income market is defined as a percentage of the conforming market; this percentage approach maintains consistency with the method for computing each GSE's performance under the low- and moderate-income goal (that is, the number of low- and moderate-income dwelling units financed by GSE mortgage purchases relative to the overall number of dwelling units financed by GSE mortgage purchases).

2. Three-Step Procedure

Ideally, computing the low- and moderate-income market share would be straightforward, consisting of three steps:

(Step 1) Projecting the market shares of the four major property types included in the conventional conforming mortgage market:

(a) Single-family owner-occupied dwelling units (SF-O units);

(b) Rental units in 2–4 unit properties where the owner occupies one unit (SF 2–4 units);[9]

(c) Rental units in one-to-four unit investor-owned properties (SF investor units); and,

(d) Rental units in multifamily (5 or more units) properties (MF units).[10]

(Step 2) Projecting the "goal percentage" for each of the above four property types (for example, the "low- and moderate-income goal percentage for single-family owner-occupied properties" is the percentage of those dwelling units financed by mortgages in a particular year that are occupied by households with incomes below the area median).

(Step 3) Multiplying the four percentages in (2) by their corresponding market shares in (1), and summing the results to arrive at an estimate (weighted average) of the overall share of dwelling units financed by mortgages that are occupied by low- and moderate-income families.

The four property types are analyzed separately because of their differences in low- and moderate-income occupancy. Rental properties have substantially higher percentages of low- and moderate-income occupants than owner-occupied properties. This can be seen by the following illustration of Step 3's basic formula for calculating the size of the low- and moderate-income market: [11]

Property type	(Step 1) share of market (percent)	(Step 2) low-mod share (percent)	(Step 3) multiply (1) x (2) (percent)
(a) SF–O	71.0	36	25.6
(b) SF 2–4	2.0	85	1.7
(c) SF Investor	10.6	85	9.1
(d) MF	16.4	90	14.8
Total Market	100.0		51.2

In this example, low- and moderate-income dwelling units are estimated to account for slightly over 51 percent of the total number of dwelling units financed in the conforming mortgage market. To examine the other housing goals, the "goal percentages" in Step 2 would be changed and the new "goal percentages" would be multiplied by Step 1's property distribution, which remains constant.

3. Data Issues

Unfortunately, complete and consistent mortgage data are not readily available for carrying out the above three steps. A single data set for calculating either the property shares or the housing goal percentages does not exist. However, there are several major data bases that provide a wealth of useful information on the mortgage market. HUD combined information from the following sources: the Home Mortgage Disclosure Act (HMDA) reports, the American Housing Survey (AHS), HUD's Survey of Mortgage Lending Activity (SMLA), and the Census Bureau's Residential Finance Survey (RFS).

Property Shares. To derive the property shares, HUD started with forecasts of single-family mortgage originations. These forecasts, which are readily available from industry groups and the GSEs, are based on HUD's SMLA. The SMLA does not provide information on conforming mortgages, on owner versus renter mortgages, or on the number of units financed. Thus, to estimate the number of single-family units financed in the conforming conventional market, HUD had to project certain market parameters based on its judgment about the reliability of different data sources. Sections D and E report HUD's findings related to the single-family market.

Total market originations are obtained by adding multifamily originations to the single-family estimate. Because of the wide range of estimates available, the size of the multifamily mortgage market turned out to be one of the most controversial issues raised in the public comments. In 1994, HMDA reported about $15 billion in conventional multifamily originations while the SMLA reported double that amount ($30 billion). Because most renters qualify under the low- and moderate-income goal, the chosen market size for multifamily can have a substantial effect on the overall estimate of the low- and moderate-income market (as well as on the estimate of the special affordable market). Thus, it is important to have a reliable estimate of the size of the multifamily market. Section C discusses this issue in detail.

Goal Percentages. To derive the goal percentages for each property type, HUD relied heavily on HMDA and AHS data. For single-family owner originations, HMDA provides comprehensive information on borrower incomes and census tract locations for metropolitan areas. Unfortunately, it provides no information on the incomes of renters living in mortgaged properties (either single-family or multifamily) or on the affordability of rental units in mortgaged properties. The AHS, however, does provide a wealth of information on the affordability of rental properties. Thus, an important issue here concerns whether affordability data from rental properties can serve as a proxy for the affordability of newly-mortgaged rental properties. This issue as well as other technical issues related to the goal percentages (such as the need to exclude mobile homes from HMDA data) are discussed in Sections F, G, and H.

4. Conclusions

HUD has attempted to reduce the range of uncertainty around its market estimates by carefully reviewing all known major mortgage data sources and by conducting numerous sensitivity analyses to show the effects of alternative assumptions. The remainder of this Appendix reports findings from the additional analyses that HUD has conducted in response to public comments received. Sections C, D, and E report findings related to the property share distributions called for in Step 1, while Sections F, G, and H report findings related to the goal-specific market parameters called for in Step 2. These latter sections also report the overall market estimates for each housing goal calculated in Step 3.

HUD contracted with the Urban Institute to comment on the reasonableness of its market share approach and to conduct analyses related to specific comments received from the public about its market share methodology. Findings from several Urban Institute reports will be discussed throughout this Appendix.

C. Size of the Multifamily Mortgage Market

This section derives projections of multifamily mortgage originations, in dollars and in numbers of units in mortgaged properties.

The multifamily sector is especially important in the establishment of housing goals for Fannie Mae and Freddie Mac because multifamily properties are overwhelmingly occupied by low- and moderate-income families. For example, in 1994 11 percent of units financed by Fannie Mae were multifamily, but 93 percent of those units were low- and moderate-income units, accounting for 23 percent of all of Fannie Mae's low- and moderate-income purchases for that year.

This discussion is organized as follows: Section 1 reviews the proposed rule's approach to multifamily market estimation, the public comments on the methodology, and HUD's approach to resolve various questions raised. Section 2 identifies and evaluates available historical data resources. Section 3 undertakes an analysis of projected aggregate origination volume for 1996 and 1997 for the entire multifamily market and then considers the portion of the market relevant as a basis for establishing housing goals for Fannie Mae and Freddie Mac.

1. The Proposed Rule, Public Comments, and HUD's Approach to Resolving Issues Raised

Proposed rule. The proposed rule presented two projections of the size of the multifamily market. The first, based on the Bureau of the Census's 1991 Survey of Residential Finance (RFS), was $35 billion of conventional multifamily originations, which was projected to be 7 percent of the total dollar volume of conventional originations. The second, based on HUD's Survey of Mortgage Lending Activity (SMLA), was $33 billion of conventional multifamily originations, which was projected to be 5 percent of the total dollar volume of conventional originations.

Public comments. Both GSEs maintained that in deriving market-share estimates for all three of the statutory goals, HUD had made projections of the size of the multifamily market that were unreasonably high. They claimed that HUD had chosen the poorest and least-favorable of the data bases that could have been employed for this purpose.

The following points were made by the GSEs in support of this general criticism:

a. HUD's reliance on the Survey of Mortgage Lending Activity (SMLA): The GSEs commented that this survey's estimates of multifamily lending volumes in the early 1990s are based on data for a sample of commercial banks that is known to be out-of-date and too small, yet this survey is the one on which HUD relied most heavily.

b. HUD's use of the Residential Finance Survey (RFS): The GSEs commented that HUD used mortgage assumptions data that should have been excluded in estimating mortgage origination volumes; that HUD improperly ignored the nature of RFS as a survey of outstanding mortgages still outstanding after a period of time had passed since their origination and did not adequately allow for differential prepayment rates between multifamily and single-family mortgages over that passage of time; that HUD had relied on RFS data for mortgages originated over a longer-than-necessary time interval (1987–1991, when 1989–91 could have been used); that HUD had not recognized the decline in origination rates that occurred in the early 1990s, after the end of the period reflected in RFS and after a period of turmoil in the market in 1990–91; that HUD had failed to recognize that originations in 1990–91 included significant numbers of multifamily loan restructurings that would have been reported as new loans in RFS (as well as SMLA) but would not have been available for GSE purchase.

c. HUD's neglect of evidence on the multifamily market in the Home Mortgage Disclosure Act (HMDA) data base: The GSEs stated their belief that HMDA covers nearly 100 percent of the relevant lender base; and that commercial banks are known to file HMDA reports reliably, making this a better source of information on banks than SMLA. As a general matter, Fannie Mae and Freddie Mac contended that the HMDA figure for 1993 mortgage originations is the more accurate one, based on what they understood to be methodological deficiencies in SMLA and limited applicability of RFS.

Activities to resolve issues. HUD contracted with the Urban Institute for a wide-ranging evaluation of data sources and exploration of factors that could potentially affect multifamily originations in the next few years. This work included analyses of RFS, SMLA, and HMDA data, investigations of the methodologies used to construct these three data sources, and discussions with knowledgeable individuals in the lending community. This was supplemented by HUD in-house analyses of RFS, HMDA, SMLA, and GSE data on multifamily volumes. In addition, HUD convened two meetings with experts involved in the collection and compilation of RFS, SMLA, and HMDA data and other experts on mortgage originations. HUD also organized a discussion of affordable multifamily development and the secondary market involving a diverse group of lenders, with Urban Institute researchers. Representatives of Fannie Mae and Freddie Mac were present at all of these meetings. The results of these analyses are summarized below.

2. Multifamily Origination Volumes, 1987–1994

The principal sources of evidence on historical multifamily origination volumes are RFS, SMLA, and HMDA. RFS data show the aggregate face value of mortgage loans by year of origination

[7] Sections 1332(b)(4), 1333(a)(2), and 1334(b)(4).

[8] So-called "jumbo" mortgages, greater than $203,150 for 1-unit properties, are excluded in defining the conforming market. There is some overlap of loans eligible for purchase by the GSEs with loans insured by the FHA and guaranteed by the Veterans Administration.

[9] The owner of the SF 2–4 property is counted in (a).

[10] Property types (b), (c), and (d) consist of rental units. Property types (b) and (c) must sometimes be combined due to data limitations; in this case, they are referred to as "single-family rental units" (SF-R units).

[11] The property shares and low-mod percentages reported here are based on one set of model assumptions; other sets of assumptions are discussed in Section E.

(in groups of years in the public use RFS data base) which were still outstanding as of the spring 1991 survey date. SMLA and HMDA data represent annual aggregate dollar volumes of loan originations. Table D.1 presents figures for 1987 through 1994.

TABLE D.1.—MULTIFAMILY MARKET ESTIMATES

[Billions of dollars]

Origination year	RFS mortgages outstanding, spring 1991	SMLA originations	HMDA originations
1987	35.7 (avg.)	45.1	.....
1988	35.7 (avg.)	38.2	.....
1989	37.4 (avg.)	31.1	.....
1990	37.4 (avg.)	23.6	.....
1991	37.4 (avg.)	25.5	.....
1992	37.4 (avg.)	25.7	10.2
1993	37.4 (avg.)	31.7	13.3
1994	37.4 (avg.)	31.3	15.2

The RFS figures in Table D.1 are expressed on an annualized basis, i.e., value of mortgages originated in 1987 and 1988 (and still outstanding as of 1991) divided by 2, and value originated in 1989–1991 (similarly), divided by 2⅓ (based on the survey date approximately one-third of the way through 1991).

To address the public comments, it is necessary to understand the methods used to compile each of these sources. Findings from HUD's comparative analysis will then be presented.

RFS begins with a sample of properties based on the lists of properties constructed for the decennial censuses of population and housing. The owner of each property is then located and interviewed—whether an owner-occupant or an absentee owner of a property that contains entirely rental or vacant units. The survey instrument includes questions on the mortgage(s) that apply to the property, as well as on property and owner characteristics. Each owner is asked to identify the holder or servicer of any applicable mortgage loans, and a separate lender survey instrument is administered. Responses from the owner questionnaires are linked to responses from the lender questionnaires in the data base as released by the Census Bureau. The strength of this survey is that it presents a highly comprehensive picture of residential financing, since it is based on a property sample rather than on a survey of lenders. Consistent and rigorous statistical and operational quality control procedures are applied throughout.

The data that enter into SMLA are compiled by HUD from source materials generated in various ways from the different institutional types of mortgage lenders. Data on savings associations are collected for HUD by the Office of Thrift Supervision; these data cover all thrifts, not a sample. Mortgage company and life insurance company data are collected through sample surveys conducted by the Mortgage Bankers Association of America and the American Council of Life Insurance, respectively. Data on commercial banks and mutual savings banks are collected on a HUD form from samples of such lenders. The Federal credit agencies and State credit agencies report their data directly to HUD. Local credit agency data are collected by HUD staff from a publication that lists their mortgage financing activities. HUD contracted with ICF, Inc., in 1994 to evaluate the methodology used in constructing the SMLA.[12] ICF concluded that, with respect to the survey of commercial banks and mutual savings banks, "while there do not appear to be any significant problems with the sampling plan, the sample has never been redrawn since the origination of the [SMLA], and . . . has very likely become seriously outdated . . .."[13] With respect to mortgage bankers, ICF said that MBA staff had expressed "concern that estimated data on multifamily . . . originations may not be as reliable as corresponding data on single-family mortgage originations." Subsequently, MBA has stopped reporting multifamily originations data to HUD and has begun work to revise its survey procedures. With these two exceptions, ICF concluded that no efforts to improve data collection methodologies appeared warranted.

HMDA data are collected by lending institutions and reported to their respective regulators as required by law. HMDA was enacted as a mechanism to permit the public to determine locations of properties on which local depository institutions make mortgage loans, "to enable them to determine whether depository institutions are filling their obligations to serve the housing needs of the communities and neighborhoods in which they are located . . ." (12 USC 2801). HMDA reporting requirements apply to lenders which have offices in Metropolitan Statistical Areas and which have more than $10 million in total assets. (For mortgage bankers, the $10 million includes assets of any parent corporations, reporting is required only if home purchase loan originations exceed 10 percent of total loan originations, and reporting since 1993 has been required only if the institution's annual home purchase loan origination volume is at least 100.) Reporting is required for all loans closed in the name of the lending institution and loans approved and later acquired by the lending institution, including multifamily loans. Thus, the HMDA data base concentrates on lending by depository institutions in metropolitan areas but, unlike SMLA and RFS, it is not a sample survey; it is intended to include loan-level data on all loans made by the institutions that are required to file reports.

The Urban Institute researchers concluded, based on comparison of the methodologies used in the three surveys and on reported problems with SMLA and HMDA (reviewed above), and on direct analyses of each data base (discussed below) that the RFS is "an excellent survey which represents a good source of information about multifamily originations in the years just prior to the survey, i.e., 1989–1991".[14] They infer from RFS an estimate of at least $30 billion per year of multifamily originations in 1987–1991.

With this in mind, we proceed to an examination of origination volumes reported by the three data sources by type of lender. Table D.2 shows the basic figures. The column headed "RFS" shows the annualized aggregate face value of multifamily loans outstanding as of the 1991 survey date that were originated in the indicated years, as in Table D.1, but disaggregated in table D.2 by category of loan servicer as of the 1991 survey date. The columns headed "SMLA" and "HMDA" show aggregate dollar volumes of loan originations by category of originator in the indicated years.

In addition to category of loan servicer, RFS also reports the category of holder. Use of data from the servicer category, as in Table D.2, produces the more reliable comparison with the other surveys because multifamily loans that are sold into the secondary market tend to remain serviced by the same category of originating lender. There are several major differences between the servicer and holder breakdowns in RFS. Commercial banks hold 20–30 percent more loans for each origination period than they service. Mortgage bankers hold about one-quarter of the value of loans that they service—one would expect even fewer. Since independent mortgage banking companies are not

[12] Evaluation of Design and Implementation of the Gross Flows Survey of Mortgage Lending Activity, Final Report submitted to HUD, July 31, 1994.

[13] HUD's Office of Housing has issued a Request for Proposals for help with improving the commercial banks component of SMLA.

[14] "What We Know About Multifamily Mortgage Originations", p. 5.

chartered to hold loans, these holdings presumably reflect a mis-categorization problem such as loans held by depository institutions of which the mortgage bankers are affiliates. Life insurance companies, pension funds, and REITs hold more than double the value of loans than they service. Federally-sponsored secondary market agencies and pools, and to a lesser extent conventional pools, are significant non-servicing holders of mortgages.

The total SMLA figure for 1987–88 is greater than the corresponding total RFS figure, consistent with attrition from the inventory of multifamily mortgages outstanding before the date of administration of the RFS. SMLA figures are also greater than RFS figures for lender categories, except for mortgage bankers.

The total RFS figure for 1989–91 is greater than the corresponding SMLA figure. To a significant extent, the difference reflects categories of lenders that SMLA does not cover: finance companies, individuals and estates, and "other" lenders—these include trust accounts administered by banks, nonprofit organizations, and insurance companies other than life insurance companies.

The main question raised by this comparison is why SMLA and HMDA report such different multifamily estimates for 1993. SMLA reports $31.7 billion while HMDA reports $13.3 billion. The Urban Institute conducted extensive analysis to answer this question. The researchers concluded both that the SMLA multifamily origination volume was too high and the HMDA estimate was too low, creating the large gap in reported 1993 multifamily originations. They concluded that the 1993 lending volume was actually in the range of $25–30 billion, i.e., the SMLA figure may be as much as $7 billion too high and the 1993 HMDA figure is likely at least $12 billion too low. This conclusion is supported by the following analyses:

BILLING CODE 4210-32-P

Table D.2
Comparison of RFS, SMLA, and HMDA Figures
(billions of dollars)

	1987-88		1989-91		1993	
Type of lender	SMLA	RFS	SMLA	RFS	SMLA	HMDA

BILLING CODE 4210-32-C

(a) A commercial banks figure of $7–8 billion is more plausible than SMLA's $18.8 billion for 1993. Comparison of HMDA and SMLA data on loans purchased in 1993 indicates that HMDA missed a significant volume of multifamily loan originations; thus the $4.8 billion HMDA figure is too low. A $7–8 billion figure is implied by combining the HMDA and SMLA data.[15]

(b) The SMLA overestimate for banks is offset by underestimation of multifamily loans for some lender categories, particularly mortgage bankers, loans by individuals, and life insurance companies.[16]

(c) A conclusion that HMDA underreports multifamily originations is supported by a comparison between HMDA and Fannie Mae data. Loans reported in HMDA as sold to Fannie Mae in 1993 tend to be smaller in size than Fannie Mae's 1993 multifamily originations as shown in the Fannie Mae data base. In addition, 41 percent of Fannie Mae's 1993 multifamily mortgage purchases were found to be in tracts where HMDA reported no multifamily originations. It appears that larger multifamily loans tend not to be reported in HMDA. Further evidence of the poor quality of the HMDA multifamily data is the fact that it reported that in 1993 more multifamily loans were sold to Freddie Mac than to Fannie Mae, when in fact Freddie Mac's purchases were only a small fraction of Fannie Mae's purchases.

(d) In addition, the HMDA data base does not cover a number of important categories of multifamily lenders such as life insurance companies and State housing finance agencies, providing another reason that the HMDA data understates the size of the multifamily market.

(e) The conclusion regarding HMDA is further supported by an analysis of RFS data, projecting loan terminations for to 1993 based on RFS's estimates of loans outstanding by maturity in 1991, using a hazard modeling framework.[17]

The SMLA figures, with the adjustments for 1993 discussed above, indicate a volume of multifamily mortgage originations of at least $30 billion around 1990, dropping to around $25 billion in the early 1990s. The inconsistency between the revised SMLA estimate and the HMDA 1993 estimate is the result of HMDA's underestimation for commercial banks and mortgage companies, and omission of several important lending categories shown in SMLA and RFS.

The estimate of $25–30 billion annual lending volume for 1993 and other years in the early 1990s represents around 10 percent of the aggregate value of multifamily mortgage debt outstanding, which was estimated by RFS at $329 billion as of Spring 1991.[18] Such an originations-to-outstanding debt ratio is consistent with the value of this ratio during the preceding several years, which provides further support both for the conclusion regarding 1993 and for HUD's extrapolation to 1996 and beyond.

3. Projections for 1996 and Beyond

Of the three data bases described above, the greatest confidence appears warranted for the RFS. The Urban Institute researchers therefore developed a model to project multifamily origination volumes from the 1991 survey date forward, based on RFS data on mortgages by year since origination. They applied a statistical model of mortgage terminations based on Freddie Mac's experience from the mid-1970s to around 1990. While mortgage characteristics in 1990 are not wholly similar to the characteristics of these historical mortgages financed by Freddie Mac, nevertheless the prepayment propensities of contemporary mortgages may at least be approximated by the prepayment experience of these historical mortgages. The research methodology took account of the influence of interest rate fluctuations on prepayments of the historical mortgages; the projections assumed that prepayments are motivated mainly by property sales.[19]

The analysis began with the $273 billion of outstanding first mortgage debt shown by RFS for 1991. Forecast mortgage origination volumes based on mortgages existing in 1991 were: $27 billion for 1993 (providing a useful point of comparison with the HMDA and SMLA figures referenced earlier), $37 billion for 1996 and $40 billion for 1997, the years to which this rulemaking applies. New construction was projected to add slightly less than $7 billion of mortgage lending volume each year to these figures.

These analyses imply an aggregate volume approaching $40 billion for the whole multifamily market in 1996. To derive an estimate of the market relevant to Fannie Mae and Freddie Mac, we exclude (a) FHA-insured loans, and (b) loans insured by State bonding agencies and held by State and local credit agencies. Other categories of mortgages, considering the type of insurer, servicer, or holder, do not tend to have mortgage characteristics that differ substantially from the multifamily mortgages that are purchased by Fannie Mae and Freddie Mac. There is thus no particular basis for excluding them.

Based on this analysis, $30-$35 billion per year are reasonable projections of multifamily mortgage origination volumes for 1996. Urban Institute analysis indicates an increasing level in 1997 and beyond.[20]

D. Single-Family Owner and Rental Mortgage Market Shares

1. Available Data

HUD projects that originations for single-family properties will total $700 billion in 1996. Because this projection is based on HUD's Survey of Mortgage Lending Activity, it combines mortgage originations for the three different types of single-family properties: owner-occupied, one-unit properties (SF-O); 2–4 unit rental properties (SF 2–4); and 1–4 unit rental properties owned by investors (SF-Investor). The fact that the goal percentages are much higher for the two rental categories argues strongly for disaggregating single-family mortgage originations by property type. This section discusses available data for estimating the relative size of the single-family rental mortgage market.

The RFS and HMDA are the two data sources for estimating the relative size of the single-family rental market. The RFS provides mortgage origination estimates for each of the three single-family property types. HMDA divides single-family mortgage originations into two property types:[21]

(1) Owner-occupied originations, which include both SF–O and SF 2–4.

(2) Non-owner-occupied mortgage originations, which include SF Investor.

The percentage distributions of mortgages from these data sources are as follows:

[15] "Estimating the Volume of Multifamily Mortgage Originations for Commercial Banks."

[16] "What We Know About Mortgage Originations," p. 20.

[17] "An Alternative Methodology to Estimate the Volume of Multifamily Mortgage Originations."

[18] SMLA's figure is $245 billion as of the end of 1992. SMLA's coverage is less than RFS's. This figure is based on call reports and not subject to the methodological comments concerning SMLA's bank origination volume estimates.

[19] This is the methodology used to construct the 1993 RFS-based estimate cited above.

[20] "An Alternative Methodology to Estimate the Volume of Multifamily Mortgage Originations."

[21] This ignores the HMDA loans with "non-applicable" for owner type.

	1993 HMDA (percent)	1994 HMDA (percent)	1987–91[22] RFS (percent)	HUD's proposed rule (percent)
SF–O	94.3	92.0	80.4	86.0
SF 2–4	(Included above).		2.3	2.0
SF Investor	5.7	8.0	17.3	10.0
Total	100.0	100.0	100.0	100.0

Because HMDA combines the first two categories, the comparisons between the data bases must necessarily focus on the SF investor category. The RFS estimate of 17.3 percent is over twice HMDA's highest estimate. In its proposed rule, HUD projected a 10.0 percent share for the SF investor group, only two percentage points higher than the 1994 HMDA figure. In fact, HUD's projection appears quite conservative relative to the RFS estimate of 17.3 percent.

2. Urban Institute Analysis—Investor Market Share

HUD asked the Urban Institute to analyze the differences between the RFS and HMDA investor shares and determine which was the more reasonable. The Urban Institute's analysis of this issue is contained in a report by Dixie Blackley and James Follain.[23] Blackley and Follain provide reasons why HMDA should be adjusted upward as well as reasons why the RFS should be adjusted downward. One reason for adjusting HMDA's investor share upward is that the investor share of mortgage originations as reported by HMDA is much lower that the investor share of the single-family rental stock as reported by the AHS. The fact that investor loans prepay at a faster rate than other single-family loans suggests to Blackley and Follain that the investor share of single-family mortgage originations should be higher—not lower—than the investor share of the single-family housing stock. Follain and Blackley conclude that "this brings into question the investor share based upon HMDA data" (page 15).

The RFS's investor share should be adjusted downward in part because the RFS assigns all vacant properties to the rental group, but some of these are likely intended for the owner market, especially among one-unit properties. Blackley and Follain's analysis of this issue suggests lowering the investor share from 17.3 percent to about 14–15 percent.

Blackley and Follain note that a conservative estimate of the SF investor share is advisable because of the difficulty of measuring the magnitudes of the various effects that they analyzed.[24] They conclude that 10 percent and 12 percent are reasonable estimates of the investor share of single-family mortgage originations.[25] As noted earlier, HUD projected an investor share of 10 percent in its proposed rule. Blackley and Follain caution that uncertainty exists around these estimates because data bases needed to estimate these parameters do not provide precise measures of their size.

3. Single-Family Market in Terms of Unit Shares

The market share estimates for the housing goals need to be expressed as percentages of units rather than as percentages of mortgages. Thus, it is necessary to compare unit-based distributions of the single-family mortgage market under the alternative estimates discussed so far. The mortgage-based distributions given above in Section D.1 were adjusted in two ways. First, the owner-occupied HMDA data were disaggregated between SF–O and SF 2–4 mortgages based on RFS data, which show that SF 2–4 mortgages represent approximately 2 percent of all single-family mortgages. Second, the resulting mortgage-based distributions were shifted to unit-based distributions by applying the unit-per-mortgage assumptions in HUD's proposed rule. HUD assumed 2.25 units per SF 2–4 property and 1.35 units per SF investor property; both figures were derived from the 1991 RFS.[26]

[22] The year-by-year distributions from the RFS were not too different from the average distribution given in the text.

[23] Dixie M. Blackley and James R. Follain, "A Critique of the Methodology Used to Determine Affordable Housing Goals for the Government Sponsored Housing Enterprises," October 1995.

[24] For example, they note that discussions with some lenders suggest that because of higher mortgage rates on investor properties, some HMDA-reported owner-occupants may in fact be "hidden" investors; however, it would be difficult to quantify this effect. They also note that some properties may switch from owner to renter properties soon after the mortgage is originated. While such loans would be classified by HMDA as owner-occupied at the time of mortgage origination, they could be classified by the RFS as rental mortgages. Again, it would be difficult to quantify this effect given available data.

[25] *Ibid.*, page 22.

[26] The unit-per-mortgage data from the 1991 RFS match closely the GSE purchase data for 1993 and 1994. Blackley and Follain show that an adjustment for vacant investor properties would raise the average units per mortgage to 1.4; however, this increase is so small that it has little effect on the overall market estimates.

	1994 HMDA (percent)	1987–91 RFS (percent)	HUD's proposed rule (percent)	Blackley/Follain alternative (percent)
SF–O	85.4	73.8	83.0	80.6
SF–2–4 Owner[27]	1.9 (est.)	2.1	1.9	1.9
SF 2–4 Renter	2.4 (est.)	2.7	2.4	2.3
SF Investor	10.3	21.4	12.7	15.2
Total	100.0	100.0	100.0	100.0
SF-Rental	12.7	24.1	15.1	17.5

Three points should be made about these data. First, notice that the "SF-Rental" row highlights the share of the single-family mortgage market accounted for by all rental units.

Second, notice that the rental categories represent a larger share of the unit-based market than they did of the mortgage-based market reported earlier. This, of course, follows directly from applying the loan-per-unit expansion factors.

Third, notice that the rental share under HMDA's unit-based distribution is again about one-half of the rental share under the RFS's distribution. The rental share in HUD's proposed rule is slightly larger than that reported by HMDA. The rental share in the "Blackley-Follain" alternative is slightly above that in HUD's proposed rule.[28]

4. Conclusions

This section has reviewed data and analyses related to determining the rental share of the single-family mortgage market. There are two main conclusions:

(1) The analytical findings do not support public commenters who argued that HUD had overestimated the single-family rental market in its proposed rule. While there is uncertainty concerning the relative size of this market, the projections made by HUD appear reasonable and, in fact, are below one set of the "best estimates" provided by Blackley and Follain.

(2) HMDA likely underestimates the single-family rental mortgage market. Thus, this part of the HMDA data are not considered reliable enough to use in computing the market shares for the housing goals. HMDA's rental data are included, however, in various sensitivity analyses of the market shares conducted in Sections F, G, and H. These analyses will show the effects on the overall market estimates of the different projections about the size of the single-family rental market.

E. HUD's Market Share Model

This section integrates findings from the previous two sections about the absolute size of the multifamily mortgage market and the relative distribution of single-family owner and rental mortgages into a single model of the mortgage market. The section provides the basic equations for HUD's market share model and identifies the remaining parameters that must be estimated.

The output of this section is a unit-based distribution for the four property types discussed in Section B.[29] Sections F–H will apply goal percentages to this property distribution in order to determine the size of the mortgage market for each of the three housing goals.

1. Basic Equations for Determining Units Financed in the Mortgage Market

The model first estimates the number of dwelling units financed by conventional conforming mortgage originations for each of the four property types. It then determines each property type's share of the total number of dwelling units financed.

a. Single-Family Units

This section estimates that 5.11 million single-family units will be financed in the conventional conforming market in 1996, where single-family units (SF–UNITS) are defined as:

SF–UNITS = SF–O + SF 2–4 + SF–INVESTOR

First, we estimate the dollar volume of conventional conforming single-family mortgages (CCSFM$):

(1) CCSFM$ = CONF% * CONV% * SFORIG$

Where:

CONF% = conforming mortgage originations as a percent (measured in dollars) of conventional single-family originations; estimated to be 83%.[30]

CONV% = conventional mortgage originations as a percent of total mortgage originations; forecasted to 78% by industry and GSEs.[31]

SFORIG$ = dollar volume of single-family one-to-four unit mortgages; projected to be $700 billion[32] in 1996 based on industry and GSE market forecasts.[33]

Substituting these values into (1) yields an estimate for CCSFM$ of $453 billion.

[27] Notice that the SF 2–4 category has been divided into its owner and renter subcomponents. This is easily done based on the assumption of 2.25 units per SF 2–4 mortgage. For each mortgage, one unit represents the owner occupant and 1.25 additional units represent renter occupants. The owner-occupant is included in the SF–O category in this Appendix. This is necessary because different data sources are used to estimate the owner's income and the affordability of the rental units. The income of owners of 2–4 properties are included in the borrower income data reported by HMDA. The AHS will be used to estimate the affordability of the rental units.

[28] Blackley and Follain say that 10 or 12 percent are reasonable estimates. Since HUD's proposed rule was approximately 10 percent, the "Blackley-Follain" alternative assumes that investors account for 12 percent of all single-family mortgages.

[29] The property distribution reported in Section A is an example of the output of the market share model. Thus, this section completes Step 1 of the three-step procedure outlined in Section A.

[30] The model projects that the conventional market share will increase slightly over its 81.4 percent of total mortgage originations in 1994.

[31] Data provided by Fannie Mae show that conforming loans have been about 78 percent of total conventional loans over the past few years.

[32] Single-family mortgage originations are estimated to be $700 billion in 1996, a reduction of $310 billion from the record setting $1,010 billion in 1993 and a reduction of $70 billion from the $770 billion in 1994. These reductions are due to the decline in refinance activity which is projected to fall from almost 60 percent of originations in 1993 to 25 percent in 1996.

[33] Fannie Mae, Freddie Mac, and the Mortgage Bankers Association have provided HUD with projections of 1996 single-family originations. Because the 1997 market is expected to be similar to the 1996 market, the discussion focuses on the 1996 market. The various market estimates reported in Sections E, F, and G for the 1996 market serve as a proxy for the 1997 market.

Second, we estimate the number of conventional conforming single-family mortgages (CCSFM#):

(2) CCSFM# = CCSFM$/SFLOAN$

Where:

SFLOAN$ = the average conventional conforming mortgage amount for single-family properties; estimated to be $94,000.[34]

Substituting this value into (2) yields an estimate of 4.82 million mortgages in 1996.

Third, we estimate the total number of single-family mortgages among the three single-family property types. Using the 88/2/10 percentage distribution for single-family mortgages from HUD's proposed rule (see Section C), the following results are obtained:

(3a) SF–OM# = .88 * CCSFM# = number of owner-occupied, one-unit mortgages = 4.24 million.

(3b) SF–2–4M# = .02 * CCSFM# = number of owner-occupied, two-to-four unit mortgages = .10 million.

(3c) SF–INVM# = .10 * CCSFM# = number of one-to-four unit investor mortgages = .48 million.

Fourth, we determine the number of dwelling units financed by these single-family mortgages:

(4a) SF–O = SF–OM# + SF–2–4M# = number of owner-occupied dwelling units financed = 4.34 million.

(4b) SF 2–4 = 1.25 * SF–2–4M# = number of rental units in 2–4 properties where a owner occupies one of the units = .12 million.[35]

(4c) SF–INVESTOR = 1.35 * SF–INVM# = number of single-family investor dwelling units financed = .65 million.

Summing equations 4a–4c gives 5.11 million for the projected number of newly-mortgaged single-family units (SF–UNITS).

b. Multifamily Units

The number of dwelling units financed by conventional conforming multifamily originations is:

(5) MF–UNITS = CCMFM$/MFLOAN$

Where:

CCMFM$ = conventional conforming mortgage originations, which are projected to be $30 billion; as discussed in Section C, alternative estimates of the multifamily market will be included in the analysis.

MFLOAN$ = average loan amount per housing unit in multifamily properties = $30,000.[36]

Substituting these values into (5) yields a projection for MF–UNITS of 1.0 million.

c. Total Units Financed

The total number of dwelling units financed by the conventional conforming mortgage market (TOTAL) can be expressed in three useful ways:

(6a) TOTAL = SF–UNITS + MF–UNITS = 6.11 million

(6b) TOTAL = SF–O + SF 2–4 + SF–INVESTOR + MF–UNITS

(6c) TOTAL = SF–O + SF–RENTAL + MF–UNITS

Where SF–RENTAL equals SF–2–4 plus SF–INVESTOR.

2. Property Distributions

The next step is to express the number of dwelling units financed for each property type as a percentage of the total number of units financed by conventional conforming mortgage originations.[37]

The projections used above in equations (1)–(6) produce the following distributions of financed units by property type:

	Percent share		Percent share
SF–O	71.0		
SF 2–4	2.0	SF–O	[38]71.8
SF INVESTOR.	10.6	SF–RENTER.	12.6
MF–UNITS	16.4	MF–UNITS	16.4
Total	100.0		100.0

Sections C and D discussed alternative projections for the volume of the multifamily originations and the investor share of single-family mortgages. The analysis in this appendix will consider three multifamily origination levels—$23 billion, $30 billion, and $35 billion—and three projections about the investor share of single-family mortgages—7 percent, 10 percent, and 12 percent. The middle values ($30 billion and 10 percent) will be considered the "baseline" projections throughout the Appendix.

Table D.3 reports the unit-based distributions produced by HUD's market share model for different combinations of these projections. The effects of the different projections can best be seen by examining the owner category which varies by 9 percentage points, from a low of 67.2 percent (multifamily originations of $35 billion coupled with an investor mortgage share of 12 percent) to a high of 76.0 percent (multifamily originations of $23 billion coupled with an investor mortgage share of 7 percent). The owner share under the baseline projections ($30 billion and 10 percent) is 71.0 percent.

BILLING CODE 4210–32–P

[34] The Federal Housing Finance Board's 1994 Mortgage Interest Rate Survey (MIRS) reported an average loan size of $109,900 for one-unit, owner-occupied conventional mortgages. Assuming that 78 percent of the dollar volume of conventional single-family originations is conforming and that 90 percent of the number of conventional originations are conforming, the average loan amount for one-unit, owner-occupied mortgages in the conforming market is obtained by multiplying $109,900 by (.78/.90); this produces $95,240. A small adjustment (based on GSE data) is applied to this figure to reflect the fact that SFORIG$ includes a relatively small volume of mortgages for two-to-four-unit and investor properties (see Section C above). This produces an average loan size of about $94,000 for the conventional conforming market.

[35] Based on the RFS, there is an average of 2.25 housing units per mortgage for 2–4 properties. 1.25 is used here because one (i.e., the owner occupant) of the 2.25 units is allocated to the SF–O category. The RFS is also the source of the 1.35 used in (4c).

[36] Blackley and Follain, *op. cit.*, p. 10.

[37] The share of the mortgage market accounted for by owner occupants is (SF–O)/TOTAL; the share of the market accounted for by all single-family rental units is SF–RENTAL/TOTAL; and so on.

[38] Owners of 2–4 properties account for 1.6 percentage points of the 71.0 percent for SF–O.

Table D-3

Distribution of Financed Dwelling Units by Property Type For Different Projections of Multifamily and Single-Family Investor Originations

Investor Share Percentage / Single-Family Mortgage Market	Size of Multifamily Market: $23 Billion	$30 Billion	$35 Billion
10 Percent			
Single-Family Owner-Occupied	73.0 %	71.0 %	69.1 %
Single-Family Rental	12.9	12.6	12.3
Multifamily	14.1	16.4	18.6
Total	100.0	100.0	100.0
7 Percent			
Single-Family Owner-Occupied	76.0 %	74.0 %	72.0 %
Single-Family Rental	9.8	9.5	9.3
Multifamily	14.2	16.5	18.7
Total	100.0	100.0	100.0
12 Percent			
Single-Family Owner-Occupied	70.9 %	69.1 %	67.2 %
Single-Family Rental	15.1	14.7	14.3
Multifamily	14.0	16.3	18.5
Total	100.0	100.0	100.0

BILLING CODE 4210–32–C

Comparison with the RFS. The Residential Finance Survey is the only mortgage data source that provides unit-based property distributions similar to those reported in Table D.3. Based on RFS data for 1987 to 1991, HUD estimated that, of total dwelling units in properties financed by recently acquired conventional conforming mortgages, 56.5 percent were owner-occupied units, 17.9 percent were single-family rental units, and 25.6 percent were multifamily rental units.[39] Thus, the RFS presents a much lower owner share than does HUD's model. This difference is due mainly to the relatively high level of multifamily originations during the mid- to late-1980s, which is the period covered by the RFS.[40]

3. Sensitivity of Property Distributions to Changes in Other Model Parameters

The multifamily and single-family rental markets are not the only areas where some degree of uncertainty exists about their magnitudes. HUD examined the sensitivity of the property distributions given in Table D.3 to changes in several other model parameters. Most of these sensitivity analyses will be reported when discussing the market estimates for each of the housing goals. Suffice it to say here that any changes that reduce the owner category—such as reducing the overall level of single-family origination activity or raising the per unit loan amounts for single-family mortgages—tend to increase the market estimates for each of the housing goals. This occurs because the goal percentages for owner mortgages are lower than those for rental housing.

F. Size of the Conventional Conforming Mortgage Market Serving Low- and Moderate-Income Families

This section estimates the size of the low- and moderate-income market by applying low- and moderate-income percentages to the property shares given in Table D.3. This section essentially accomplishes Steps 2 and 3 of the three-step procedure discussed in Section B.

Technical issues and data adjustments related to the low- and moderate-income percentages for owners and renters are discussed in the first two subsections. Then, estimates of the size of the low- and moderate-income market are presented along with several sensitivity analyses. Based on these analyses, HUD concludes that 48–52 percent is a reasonable estimate of the mortgage market's low- and moderate-income share for 1996 and 1997. It is assumed that similar shares will exist following 1997.

The final rule establishes the Low- and Moderate-Income Goal for 1996 at 40 percent of the total number of dwelling units financed by the GSE's mortgage purchases for 1996. The level of the goal for 1997 and subsequent years is 42 percent of each year's mortgage purchases.

1. Low- and Moderate-Income Percentage for Single-Family Owner Mortgages

a. HMDA Data

The most important determinant of the low- and moderate-income share of the mortgage market is the income distribution of single-family borrowers. HMDA reports annual income data for families living in metropolitan areas who purchase a home or refinance their existing mortgage.[41] Table D.4 gives the percentage of mortgages taken out by low- and moderate-income families for the years 1992, 1993, and 1994. For each year, an unadjusted low- and moderate-income percentage is reported as well as one based on the adjustments that HUD made in its proposed rule, that is, excluding loans less than $15,000 and excluding loans where the loan-to-income ratio was greater than six.[42] The additional adjustments reported for 1993 and 1994 will be discussed below.

Table D.4 also reports similar data for very-low-income families (that is, families with incomes less than 60 percent of area median income). These data will be used in Section H to estimate the special affordable mortgage market.

Two trends in the income data should be mentioned. First, the percentage of borrowers with less than area median income has increased significantly over the past three years—borrowers with less than median income increased from 33.5 percent of the home purchase market in 1992 to 42.6 percent of that market in 1994. This jump in low-income lending has been attributed to historically low interest rates during this period and to affordable lending initiatives and outreach efforts on the part of lenders, private mortgage insurers, and the GSEs. Second, the characteristics of borrowers refinancing mortgages appears to have changed between 1993 and 1994. During the refinancing waves of 1992 and 1993, refinancing borrowers had much higher incomes than borrowers purchasing homes. But during 1994 these two groups exhibited practically the same income distributions.

BILLING CODE 4210-32-P

[39] Restricting the RFS analysis to 1991 resulted in only minor changes to the market shares.

[40] Between 1987 and 1991, annual multifamily mortgage originations averaged $32 billion, representing 7.2 percent of conventional mortgage originations. In 1994, conventional multifamily originations stood at $30 billion but because of the increase in single-family originations since the late 1980s, the multifamily share of total originations had dropped to 4.5 percent. In HUD's projection model, the $30 billion in multifamily originations represents 4.9 percent of total conventional originations for 1996.

[41] As noted earlier, HMDA data are expressed in terms of number of loans rather than number of units. In addition, HMDA data do not distinguish between owner-occupied one-unit properties and owner-occupied 2–4 properties. This is not a particular problem for this section's analysis of owner incomes.

[42] The purpose of the first adjustment was to drop from the analysis small loans (such as mobile home loans) which the GSEs do not typically purchase; the purpose of the second adjustment was to cleanse the data base of outliers and likely coding errors. As discussed below, a more direct adjustment for mobile homes is made in this final rule.

Table D-4

Single-Family Owner-Occupied Mortgage Market by Borrower Income

	Low- and Moderate- Income			Very- Low- Income		
	Purchase	Refinance	Total	Purchase	Refinance	Total
1992 HMDA						
A. All Loans	35.0%	26.2%	29.0%	9.4%	5.4%	6.7%
B. Proposed Rule	33.5%	25.1%	27.8%	7.8%	4.2%	5.4%
1993 HMDA						
A. All Loans	39.6%	30.1%	32.9%	11.5%	6.4%	7.9%
B. Proposed Rule	38.2%	29.3%	32.0%	10.0%	5.6%	6.9%
C. All Without Mobile Homes						
(1) 75,000	37.9%	30.1%	32.3%	10.3%	6.4%	7.5%
(2) 100,000	37.3%	30.0%	32.1%	9.9%	6.4%	7.3%
(3) 125,000	36.6%	30.0%	31.9%	9.4%	6.3%	7.2%
(4) 150,000	36.0%	30.0%	31.7%	9.0%	6.3%	7.1%
D. C Plus Additional Adjustments						
(1) 75,000	36.9%	29.4%	31.5%	9.1%	5.6%	6.6%
(2) 100,000	36.4%	29.4%	31.3%	8.8%	5.6%	6.5%
1994 HMDA						
A. All Loans	42.6%	40.4%	41.6%	13.1%	11.8%	12.5%
B. Proposed Rule Method	41.1%	39.1%	40.2%	11.2%	10.4%	10.9%
C. All Without Mobile Homes						
(1) 100,000	40.8%	40.3%	40.6%	11.9%	11.7%	11.8%

1993	38.7%	28.6%	33.0%	12.9%	8.1%	10.1%
Average(1985-93)			32.3%			10.6%

BILLING CODE 4210-32-C

b. Adjustment for Mobile Home Loans

The GSEs do not purchase mobile home loans under their seller/servicer guidelines unless they are real estate loans, that is, the home must have a permanent foundation and the site must be either purchased as part of the transaction or already owned by the borrower. A 1993 study estimated that only 10 percent of existing mobile homes could qualify under GSE guidelines, but industry trends (more homes on private lots and on concrete foundations) suggest that this percentage has grown in the past few years.[43] Mobile home loans present a problem for this analysis because an unknown number of them are included in the HMDA data. Since mobile homes are disproportionately occupied by lower-income families, their inclusion in HMDA data overstates the number of low-income loans eligible for GSE purchase under their seller/servicer guidelines. In other words, the 42.6 percent share for less-than-median-income home purchasers given in Table D.4 overstates the low- and moderate-income share of home purchase loans available to the GSEs in 1994.

According to industry representatives, it is unclear how many mobile home lenders report to HMDA, and for those that do report to HMDA, how many provide information on their non-real estate loans. HUD was able to identify four lenders in the HMDA data that primarily originate mobile home loans.[44] According to HMDA, these lenders originated 101,493 owner-occupied loans in 1993 and 124,251 in 1994. Reflecting the fact that over half of all mobile homes are sold in nonmetropolitan areas, only 33,813 (33 percent) of the four lenders' 1993 loans and 48,400 (39 percent) of their 1994 loans had geocode information (such as census tract or MSA code) indicating that the loans were for properties located in metropolitan areas.

With this information, "ineligible" mobile home loans under the GSE seller/servicer guidelines could be deducted from the unadjusted HMDA data in three steps. First, the percentage income distribution of the above-mentioned geocoded mobile home loans[45] could be applied to an "estimate" of the total number of geocoded mobile home loans included in the HMDA data base. (As discussed below, obtaining this "estimate" is the difficult part.) This would produce numbers of projected mobile home loans by income category. Next, the projected mobile home loans could be deducted from HMDA's unadjusted numbers for each income category. This would produce estimates of HMDA-reported, non-mobile-home loans by income category. Finally, a percentage income distribution could be calculated from these adjusted HMDA data.

HUD examined other data on the size of the mortgage market for mobile homes in order to determine some upper bounds for the "estimate" required in the first step. According to the American Housing Survey, there were 235,000 newly-constructed mobile homes in 1993, and 99,300 of these were located in metropolitan areas. About 85,000 of the newly-constructed mobile homes in metropolitan areas were financed with a mortgage or installment contract, rather than purchased "free and clear." The other major category of mobile home lending involves purchases of existing mobile homes.[46] According to the AHS, 95,000 existing mobile homes located in metropolitan areas were sold and purchased using a mortgage or installment contract during 1993. Thus, the AHS estimates that there were about 180,000 owner-occupied mobile homes purchased and financed during 1993.[47] Assuming that 10–15 percent of these 180,000 loans are "eligible" under the GSE guidelines would reduce the estimate of ineligible loans to the 155,000–165,000 range.

Adjusted HMDA Data. Table D.4 shows the effects of a series of estimates of the size of the mobile home loan market included in HMDA. Adjusting HMDA data in the manner described earlier reduces the low- and moderate-income percentage for 1993 home purchase loans from the unadjusted HMDA figure of 39.6 percent to 37.9 percent if one assumes that 75,000 ineligible mobile home loans are included in HMDA income data, and to 37.3 percent if one assumes 100,000.[48] Increasing the assumptions to 125,000 and 150,000 ineligible mobile home loans reduces the low- and moderate-income percentage further to 36.6 percent and 36.0 percent, respectively.

As shown in Table D.4, the market share for very-low-income families is proportionately more affected by the adjustment than is the market share for less-than-median-income families. For instance, the home purchase share for very-low-income home purchase borrowers falls from 11.5 percent to 10.3 percent assuming that 75,000 mobile home loans are included in the 1993 HMDA data, and to 9.0 percent assuming that 150,000 mobile home loans are included in the HMDA data.

Mobile home loans were excluded from the AHS income data reported in Table D.4. For home purchase loans, that data show a 38.7 percent low- and moderate-income percentage and a 12.9 percent very-low-income percentage for 1993. Thus, the AHS income data suggest that the larger deductions for mobile homes (125,000 and 150,000) are probably too high.[49] In addition, when the 150,000 "estimate" was applied in the above three-step procedure, mobile homes accounted for all of the low- and moderate-income loans less than $15,000 included in the 1993 HMDA data base.[50] While the appropriate deduction of mobile home loans from HMDA data is not known, it appears to be much less than the higher estimates reported in Table D.4.

[43] See the study conducted by The Hamilton Securities Group (dated September 1993) for the National Commission on Manufactured Housing. Data supporting the 10 percent estimate for existing mobile homes was not provided by Hamilton.

[44] These lenders were Green Tree Acceptance, Vanderbilt Mortgage, The CIT Group, and Oakwood. Green Tree is estimated to account for 20–30 percent of the mobile home market.

[45] The income distribution for the 48,400 loans included in the 1994 HMDA data is: 34.5% had income less than 60% of AMI, 23.6% had income 60–80% of AMI, 17.2% had income 80–100% of AMI, and 24.7% had income greater than 100% of AMI. This can be compared with the income distribution for all HMDA loans reported in Table D.4. A mobile home loan borrower is almost three times more likely to have a very low income than the typical borrower (34.5% versus 12.5%). (Similar results were obtained for 1993 HMDA data.)

[46] Only about 5 percent of the identified mobile home loans were refinance loans. This explains why the income percentages for refinance loans in Table D.4 do not change very much, and why the change in total loans is much less than the change in home purchase loans. Manufactured Housing insurance staff tell us that mobile home refinance loans are uncommon. Even if mobile home refinance loans were important, the 25 percent refinance share for 1996 loans in HUD's model would reduce the importance of this issue.

[47] It should be noted that the AHS sample for recent movers purchasing mobile homes was small which means that this estimate is subject to some degree of uncertainty.

[48] It should be noted that the adjustments made in HUD's proposed rule produce about the same effects as the mobile home adjustments discussed above; this can be seen by comparing percentages in row B with those in rows C(1) and C(2) of Table D.4. One reason for this similarity is that many mobile home loans are less than $15,000 and these were excluded from HUD's analysis in the proposed rule.

[49] Even adjusting the 12.9 percent figure for possible underreporting of income in the AHS (see discussion below) would not affect this conclusion. The AHS estimate of the very-low-income percentage would remain much higher than the 9.4 (9.0) percent figure associated with deducting 125,000 (150,000) mobile home loans from the 1993 HMDA data.

[50] This also happened when the 200,000 "estimate" was applied to 1994 HMDA data. Table D.4 gives higher "estimates" for 1994 HMDA because the U.S. Census reports that newly-constructed mobile homes increased by 50,000 (on a nationwide basis) between 1993 and 1994. Whether purchases of existing mobile homes also increased, or even declined, is not known.

c. Additional Adjustments to HMDA Data

Proposed Rule Adjustments. After deducting estimates of ineligible mobile home loans, HUD made the same deductions as in its proposed rule—that is, from the remaining estimate of non-mobile-home loans, HUD deducted loans less than $15,000 and loans with a loan-to-income ratio greater than six. The effects of these adjustments are shown in rows D(1) and D(2) of Table D.4. For instance, the low- and moderate-income percentage for 1994 home purchase loans falls from 42.6 percent (unadjusted HMDA) to 40.6 percent (due to dropping 100,000 mobile homes) to 39.6 percent (due to the proposed rule adjustments). In this case, the 1994 market share for very-low-income borrowers falls from 13.1 percent to 11.9 percent to 10.3 percent—a reduction of over 20 percent. When the AHS percentages given in Table D.4 are adjusted for loans less than $15,000 and for loans with a loan-to-income ratio greater than six, the low- and moderate-income percentage for home purchase loans falls from 38.7 to 37.2, while the very-low-income percentage for home purchase loans falls from 12.9 to 11.1.

Possible Bias in HMDA Data. There is evidence that HMDA may be over-reporting lower-income loans relative to higher-income loans. Jim Berkovec and Peter Zorn compared loans that were reported by HMDA as being sold to Freddie Mac with loans that Freddie Mac's own records show as being purchased by Freddie Mac.[51] Their major conclusion was that 1992 and 1993 HMDA data contain only 65–70 percent of conventional mortgage loans. They also found that HMDA's coverage varied across census tracts, with coverage being higher in lower-income census tracts.[52] While there was some correlation with the percent minority population in the census tract, it largely disappeared when controlling for income.

For a census tract configuration approximating the underserved area definition in HUD's proposed rule, Berkovec and Zorn's simulations suggest that the market share for these tracts should be adjusted by a factor of 90%-95% in 1992 and by 85%-95% in 1993.[53] However, Berkovec and Zorn caution that their analysis does not look at the whole mortgage market; rather, it looks only at HMDA loans reported as being sold to Freddie Mac. Loans sold to Fannie Mae are not included in Berkovec and Zorn's analysis. Thus, systematic over-reporting of low income loans sold to Freddie Mac could also explain their findings.

The low- and moderate-income goal is defined in terms of borrower incomes, not census tract incomes as analyzed by Berkovec and Zorn. Thus, HUD compared income distributions of loans that HMDA reports were originated in 1993 and 1994 and sold to one of the GSEs in the year of origination with income distributions of loans that the GSEs report were purchased by them in 1993 and 1994 in the same year as origination. The results were consistent with Berkovec and Zorn's findings that HMDA may be over-reporting lower-income loans and that the over-reporting may be greater the lower the income. In 1993, the low- and moderate-income share of loans reported by HMDA as being sold to the GSEs was 1.7 percentage points greater than the low- and moderate-income share of loans that the GSEs report they purchased in 1993 (34.2 percent versus 32.5 percent); this translates into a five percent rate of over-reporting. The corresponding very-low-income shares, on the other, differed by almost ten percent (7.1 percent based on HMDA data versus 6.5 percent based on GSE data). But as noted by Berkovec and Zorn, the absolute difference (0.6 percent in this case) is not so great because of the relatively small number of loans originated for very-low-income borrowers. Similar results were obtained when comparing 1994 HMDA and GSE data.

The above comparisons suggest that low- and moderate-income percentages reported in row D of Table D.4 may need a slight further adjustment for HMDA's over-reporting of lower income loans. But, as noted earlier, 1993 AHS data suggest that HMDA data does not need to be adjusted downward. Because of this uncertainty, HUD considers several possible values of the low- and moderate-income percentage for owners when computing the low- and moderate-income market share estimates in Section F.3 below.

d. American Housing Survey Data

Borrower income data from the American Housing Survey are included in Table D.4.[54] The low- and moderate-income percentages from the 1993 AHS are similar to those reported by 1993 HMDA data. According to the AHS, 38.7 percent of those families who recently purchased their homes, and who obtained conventional mortgages below the conforming loan limit, had incomes below the area median; this compares with 37.3 percent based on 1993 HMDA data that excludes 100,000 mobile homes.

A longer-term perspective of the mortgage market can be gained by examining income data from the last five American Housing Surveys, conducted in 1985, 1987, 1989, 1991, and 1993. The low- and moderate-income share was in the 32–34 percent range except for 1985 (27 percent) and 1991 (36 percent). The overall average during the 1985–93 period was 32.3 percent.

AHS Under-Reporting of Income. In commenting on the proposed rule, the GSEs criticized HUD's reliance on AHS data on the grounds that income reported in the AHS is lower than other independent estimates of income,[55] and questioned AHS estimates that 60 percent of all households qualify as low- or moderate-income under definitions of the Act.[56] The reported discrepancy is

[51] Jim Berkovec and Peter Zorn, "How Complete is HMDA?: HMDA Coverage of Freddie Mac Purchases," Freddie Mac, January 4, 1995.

[52] Berkovec and Zorn offer two possible reasons for why HMDA reporting may be better in low-income areas. First, regulatory and CRA pressure is greater on larger banks and thrifts and all of these are required to report to HMDA. Smaller suburban lenders making loans in higher income tracts are not all required to report to HMDA and less likely to encounter intense regulatory pressure. Second, lenders have more incentive to report lower-income loans and thus are more careful in reporting these loans.

[53] These percentages were derived from their Tables 8 and 9 by comparing market shares under the three adjustment methods with the market share actually reported by HMDA. To approximate the underserved definition in HUD's proposed rule, high-minority tracts (31–100 percent) with incomes between 100 and 120 percent of area median income were assigned one-half of the market share of the high-minority tracts with income greater than area median income.

[54] The AHS data reported in this final rule were derived using different methods than the corresponding data reported in HUD's proposed rule. The differences will be explained below when discussing AHS data on rent affordability.

[55] See *Codebook for the American Housing Survey Data Base: 1973–1993*, at page 1–11.

[56] Claiming that 50 percent of the country's households are "below the true median by definition," Freddie Mac proposed adjusting for AHS underreporting of income by inflating incomes of all households until 50 percent of AHS households are "above median income." This suggestion has a major flaw: it fails to distinguish between median household income and the Act's definition of "median income" as: the unadjusted median family income for the area, as determined and published annually by the Secretary. [Sec. 1303 (9), emphasis added.] Because more than 30 percent of households are occupied by single persons or unrelated individuals and families often have more earners than households, median family income is appreciably higher than median household income. In 1990, for example, U.S. median family income was $35,353, 18 percent above the median household income of $29,943. Interpolating from the household income distribution, in 1990 58.3 percent of households had income less than national median family income. Table 695 of the 1992 Statistical Abstract gives the 1990 household income distribution in dollars with $35,000 as one cutoff. It shows that 57.9% of households had

Continued

based on a comparison with sources such as Gross Domestic Product (GDP) and the Social Security Administration, and relates to specific sources of income, such as interest income and assistance income, which are more significant portions of the incomes of households at the upper and lower ends of the spectrum. AHS estimates of wage and salary income are quite comparable to these aggregate sources. It is unclear how these discrepancies affect the percentages of interest here.

A more relevant issue is a comparison of AHS sample data with special tabulations of 1990 Census data, which has more accurate income data, since it explicitly asks amounts of income by source for each individual. Moreover, decennial Census data on median family income are the basic source of HUD's official estimates of area median income that define "median income" for this rule.[57]

In special Comprehensive Housing Affordability Strategy (CHAS) tabulations, 1990 Census data on household income were compared to official HUD estimates of area median income for each location in the country. These CHAS tabulations should be more accurate than the AHS in two ways—because the Census income data are better, and because the CHAS income data were compared to accurate median family income data for each metro area or nonmetro county in the country.

Comparison between the 1989 AHS income distribution (which, taken in fall of 1989, is the closest in time to the April 1, 1990 Census) and the CHAS tabulations shows that two income distributions are remarkably similar for renters:

Income cutoff	Percent of total below cutoff	
	CHAS	AHS
50% of median	38.7%	38.5%
80% of median	59.0%	59.0%
95% of median	68.0%	67.5%

For owners, shares appear to differ by about 2 percentage points throughout the very low- to moderate-income range.[58]:

Income cutoff	Percent of total below cutoff	
	CHAS	AHS
50% of median	15.5%	17.6%
80% of median	29.7%	32.2%
95% of median	37.8%	40.1%

This suggests that reducing the 1989 AHS estimates for owners by no more than 2 percentage points would appropriately adjust for income underreporting.

Improvements to the 1993 Survey. Income underreporting in the AHS was reduced after changes were made in the questionnaire for the 1993 Survey. Formerly, the AHS reported dividend and interest income for a household only if it exceeded $400. Now the Survey reports all dividend and interest income, regardless of the amount, and various sources of interest are specified. In addition to unemployment and worker's compensation and "any other income," Survey respondents were explicitly asked about "other disability payments," and "veterans' payments." As a result, the percentage of respondents reporting income in this category rose from 9.6 percent in 1991 to 13.8 percent in 1993. In general, the percentage of AHS households reporting income other than wages or salaries rose sharply, from 63 percent in 1991 to 79 percent in 1993.

income below $35,000 in 1990 and 17.5% had income in the $35,000–$49,999 category.

[57] Note that in setting the median family income for an MSA, HUD compares the Census estimate to the AHS estimate. The Census estimate is used, unless it falls outside the confidence interval for the AHS estimate, in which case the AHS estimate is used. Currently, the Census estimate is used for all MSAs.

[58] These estimates of income are adjusted for family size, and therefore should not be taken as direct estimates of shares of owners qualifying as "low or moderate income" under GSE income definitions. The comparison should however provide a valid estimate of the effect of income underreporting on the AHS estimates of low or moderate income made without family size adjustments.

Thus, it is not clear that AHS underreporting of income is a major problem, especially since the 1993 improvement. In any event, there does not appear to be a need for an adjustment of more than a couple of percentage points for owner-occupied units surveyed prior to 1993, and no adjustment is needed for rental units.

2. Low- and Moderate-Income Percentage for Renter Mortgages

a. American Housing Survey Data

The American Housing Survey does not include data on mortgages for rental properties; rather, it includes data on the characteristics of the existing rental housing stock and recently completed rental properties. Current data on the income of prospective or actual tenants has also not been readily available for rental properties. Where such income information is not available, FHEFSSA provides that a rent level is affordable if it does not exceed 30 percent of the maximum income level for the low- and moderate-income category, with appropriate adjustments for family size as measured by the number of bedrooms. The GSEs' performance under the housing goals is measured in terms of the affordability of the rental dwelling units that are financed by mortgages that the GSEs purchase; the income of the occupants of these rental units is generally not considered in the calculation of goals' performance. Thus, it is appropriate to base estimates of market size on rent affordability data rather than on renter income data.[59]

Table D.5 presents AHS data on the affordability of the rental housing stock for the survey years between 1985 and 1993. The 1993 AHS shows that for 1–4 unit unsubsidized rental properties, 98 percent of all units, and 92 percent of units constructed in the preceding three years had gross rent (contract rent plus the cost of all utilities) less than or equal to 30 percent of area median income. For multifamily unsubsidized rental properties, the corresponding figures are 96 percent of all units, and 88 percent of units constructed in the preceding three years. The AHS data for 1989 and 1991 are similar to the 1993 data.

Several commenters expressed concern about using affordability data from the outstanding rental stock to proxy affordability data for mortgage flows. Some have argued that data based on the recently completed stock would be a better proxy for mortgage flows. In the above case, there is not a large difference between the affordability percentages for the recently constructed stock and those for the outstanding stock of rental properties. But this is not the case when affordability is defined at the very-low-income level. As shown in Table D.5, the recently completed stock houses substantially fewer very-low-income renters than does the existing stock. Because this issue is important for the special affordable goal, it will be further analyzed in Section H when that goal is considered.

For purposes of the Low- and Moderate-Income Goal, the analysis in Section H concludes that the existing stock is an adequate proxy for the mortgage flow when rent affordability is defined in terms of less than 30 percent of area median income. More specifically, that analysis suggests that 85 percent of single-family rental units and 90 percent of multifamily units are reasonable estimates for projecting the percentage of financed units affordable at the low- and moderate-income level.[60]

BILLING CODE 4210-32-P

[59] Because the "low- and moderate-income share" of rental units is based on rents rather than incomes, Freddie Mac's comment on the proposed rule, that estimates of the low-mod share for rental units should be adjusted for AHS income underreporting, is not valid.

[60] In 1994, 87 percent of GSE purchases of single-family investor rental units and 95 percent of their purchases of multifamily units qualified under the low-mod goal.

Table D-5

Rental Market By Affordability of Dwelling Unit: American Housing Survey, 1985-1993

Units Affordable at 100% of Area Median Income	Recently Constructed Stock(a)	Stock 4 Years Or Older	Existing Stock
1-4 Properties			
1985	75%	94%	93%
1987	80%	93%	92%
1989	90%	97%	97%
1991	92%	97%	97%
1993	92%	98%	98%

b. Improvements to AHS Analysis

The AHS data for both owners and renters differ from those reported in HUD's proposed rule due to several improvements in HUD's methodology. The major changes are as follows:

- The income limits for the 1989–93 surveys are now based on 1990 Census results, and those for the 1985 and 1987 survey are now based on 1980 Census results. Previous versions had used income limits from 1970 Census data for 1985, and from 1980 Census data for all other years. These changes basically use income limits that are more "correct" for each year than was the case in the earlier analysis. The newly available income limits based on 1990 Census data should more accurately describe income distributions in 1989 and 1991 than the ones extrapolated from 1980 Census data.
- A bedroom-size adjustment factor used by HUD for units with four or more bedrooms has been added; this is important because these large-bedroom units represent almost one-fourth of rental units with three or more bedrooms. This change increases accuracy because earlier, the 3-plus bedroom adjustment factor was used for all units with more than three bedrooms.
- Utility payments in the 1985 and 1987 surveys are constrained to independent (lower) estimates so that they are comparable with procedures begun by the Census Bureau for the 1989 AHS. The new Census Bureau procedures were instituted to correct errors in reported utility payments that were known to cause upward bias. This change should also increase accuracy.

The main effects of these changes are higher affordability estimates than reported in the proposed rule. The portion of the outstanding stock that is affordable at less than area median income goes up by only 3–6 percentage points across the five survey years; however, the portion of the recently completed stock shows increases from 5 to 20 percentage points. The portion of the outstanding stock affordable at the very-low-income level rises from 4 to 14 percent in four of the survey years and declines in the other one.[61]

3. Size of the Low- and Moderate-Income Mortgage Market

a. Market Estimates

This section provides estimates for the size of the low- and moderate-income mortgage market. Three alternative sets of projections about property shares and property low- and moderate-income percentages are given in Table D.6. Case 1 projections represent the baseline and intermediate case; it assumes that investors account for 10 percent of the single-family mortgage market. Case 2 assumes a lower investor share (7 percent) based on HMDA data and slightly more conservative low- and moderate-income percentages for single-family rental and multifamily properties (80 percent and 85 percent, respectively). Case 3 assumes a higher investor share (12 percent) consistent with Follain and Blackley's suggestions.

The low- and moderate-income percentage for owners is the most important determinant of the market estimates. Thus, Table D.7 provides market estimates for different owner percentages as well as for different sizes of the multifamily market—the $30 billion baseline projection bracketed by $23 and $35 billion. Most low- and moderate-income estimates reported for the baseline projections are around 50 percent. The market estimate is 53 percent if the owner percentage is at its 1994 level (40 percent), and it is 51 percent if the owner percentage is at its 1993 level (37 percent). If the low- and moderate-income percentage for owners falls to 32 percent (about its 1992 level), the overall market estimate falls to 48 percent. Under HUD's baseline projections, the owner percentage can fall to as low as 30 percent—about ten (seven) percentage points lower than its 1994 (1993) level—and the low- and moderate-income market share would still be at 46 percent.

The size of the multifamily market is also an important determinant of the low- and moderate-income market share. The market estimates increase by about a percentage point as multifamily volume moves from $23 billion to $35 billion. The market estimates for Case 2 and Case 3 bracket those for Case 1. The smaller rental market and lower low- and moderate-income percentages for rental properties result in the Case 2 estimates being almost three percentage points below the Case 1 estimates.

The various market estimates presented in Table D.7 are not all equally likely. Most of them equal or exceed 48 percent, suggesting that this is a reasonable lower bound for the size of the low- and moderate-income market.

BILLING CODE 4210-32-P

[61] Except for 1991, which showed an increase from 31 to 36 percent in the percentage of borrowers with less than median income, the income percentages for owners showed only slight increases or no increases at all.

Table D-6

Alternative Assumptions for Single-Family Rental Mortgage Shares and other Variables

	Case 1	Case 2	Case 3
1. Single-Family Mortgage Shares			
Single-Family Owner-Occupied	88.0%	91.0%	86.0%
Single-Family 2-4	2.0%	2.0%	2.0%
Single-Family 1-4 Investor	10.0%	7.0%	12.0%
2. Units Per Single-Family Mortgage			
Single-Family 2-4	2.25	2.25	2.25
Single-Family 1-4 Investor	1.35	1.35	1.40
3. Multifamily Loan Per Unit			
$23 Billion	$27,500	$27,500	$27,500
$30-$35 Billion	$30,000	$30,000	$30,000
4. Percentage Affordable at Area Median Income (AMI):			
Single-Family Rental	85.0%	80.0%	85.0%
Multifamily	90.0%	85.0%	90.0%
5. Percentage Underserved			
Single-Family Rental	37.5%	35.0%	40.0%
Multifamily	42.5%	40.0%	45.0%
6. Percentage Affordable at 60% of AMI			
Single-Family Rental	45.0%	40.0%	50.0%
Multifamily	42.0%	40.0%	45.0%
7. Percentage Low-Income in Low-Income Areas:			
Single-Family Rental	10.0%	8.0%	10.0%
Multifamily	10.0%	8.0%	10.0%

Table D-7

Low- and Moderate- Income Mortgage Market: Sensitivity Analysis

Case 1 with Different Percentages for Single-Family Owner-Occupied's With Incomes less than AMI:	Size of Multifamily Market		
	$23 Billion	$30 Billion	$35 Billion
Single-Family: [1] 40% (1994 HMDA adjusted)	52.1 %	53.2 %	54.1 %
38%	50.7	51.7	52.7
37% (1993 HMDA adjusted)	50.0	51.1	52.1
36%	49.2	50.3	51.4
34%	47.8	48.9	50.0
32%	46.3	47.5	48.6
30%	44.9	46.1	47.2
28%	43.4	44.6	45.8
Single-Family: 36% With:			
Case 1	49.2 %	50.3 %	51.4 %
Case 2	46.5	47.5	48.5
Case 3	50.4	51.4	52.5
Single-Family: 34% With:			
Case 1 (above)	47.8 %	48.9 %	50.0 %
Case 2	45.0	46.0	47.1
Case 3	49.0	50.1	51.1

[1] These percentages are used for home purchase loans. Refinanced loans were assumed to be 4 percentage points less for each alternative .

BILLING CODE 4210-32-C

b. Economic Conditions, Market Estimates, and the Feasibility of the Low- and Moderate-Income Housing Goal

The public comments indicated a concern that the market share estimates and the housing goals failed to recognize the volatility of housing markets and the existence of macroeconomic cycles. There was particular concern that the market shares and housing goals were based on a period of record low interest rates and high affordability. This section discusses these issues, noting that the Secretary can consider shifts in economic conditions when evaluating the performance of the GSEs on the goals, and noting further that the market share estimates can be examined in terms of less favorable market conditions than existed during 1993 and 1994.

Volatility of Market. Industry forecasts of the 1996 mortgage market are the starting point for HUD's estimates of market share for each housing goal. HUD projected $700 billion in single-family originations for 1996 based on forecasts of $720 billion by the Mortgage Bankers Association and $700 billion by Fannie Mae. These industry forecasts are based on certain underlying economic conditions. Unanticipated shifts in economic activity will obviously affect the degree to which these forecasts are borne out. Thus, changing economic conditions can affect the validity of HUD's market estimates as well as the feasibility of accomplishing the housing goals.

One only has to recall the volatile nature of the mortgage market in the past few years to appreciate the uncertainty around projections of that market. Large swings in refinancing, consumers switching between adjustable-rate mortgages and fixed-rate mortgages, increased first-time homebuyer activity due to record low interest rates, and shifts in FHA activity have all characterized the recent mortgage market. These conditions are beyond the control of the GSEs but they would affect their performance on the housing goals. A mortgage market dominated by heavy refinancing on the part of middle-income homeowners would reduce the GSEs' ability to reach a specific target on the low- and moderate-income goal, for example. A jump in interest rates would reduce the availability of very-low-income mortgages for the GSEs to purchase. But on the other hand, the next few years may be highly favorable to achieving the goals because of the high refinancing activity in 1993. A period of low interest rates would sustain affordability levels without causing the rush to refinance seen in 1993. A high percentage of potential refinancers have already done so, and are less likely to do so again. Year-to-date 1995 data support this argument.

Feasibility Determination. HUD is well aware of the volatility of mortgage markets and the possible impacts on the GSEs' ability to meet the housing goals. FHEFSSA allows for changing market conditions.[62] If HUD has set a goal for a given year and market conditions change dramatically during or prior to the year, making it infeasible for the GSE to attain the goal, HUD must determine "whether (taking into consideration market and economic conditions and the financial condition of the enterprise) the achievement of the housing goal was or is feasible." This provision of FHEFSSA clearly allows for a finding by HUD that a goal was not feasible due to market conditions, and no subsequent actions would be taken.

Affordability and Market Estimates. The market share estimates rely on 1993 and 1994 HMDA data for the percentage of low- and moderate-income borrowers. As discussed earlier, record low interest rates and affordability initiatives of the private sector encouraged first-time buyers and low-income borrowers to enter the market during this period. A significant increase in interest rates over their 1993–94 levels would reduce the presence of low-income families in the mortgage market and the availability of low-income mortgages for purchase by the GSEs.

HUD simulated the effects of a two-percentage point increase in interest rates on the payment-to-income ratios of 1993 and 1994 GSE borrowers (see Appendix A). Lower-income borrowers started with higher payment ratios and were thus disproportionately affected by the simulated increase in interest rates. Dropping from the GSE data all less-than-median income borrowers whose payment-to-income ratios increased to above 28 percent reduced the low- and moderate-income percentage of GSE business by 15 percent (about 5 percentage points) and the very-low-income percentage by 17 percent (about 1.25 percentage points). While this is only a partial look at the effects of higher interest rates, it indicates that the effects will be concentrated at the lower-income end of the market. A counter-balancing effect would be that a rise in interest rates reduces the refinance rate. In 1993, refinance borrowers had higher incomes than home purchase borrowers, but in 1994, purchase and refinance mortgage borrowers had more similar incomes.

As discussed in Appendix A, the effects of higher interest rates on affordability have to be considered in the context of other market changes. Rising employment, incomes, and consumer confidence, for example, can mitigate the effects of higher rates on the demand for mortgage credit. Unfortunately, it is difficult to quantify the impacts of these economic changes on the market estimates for the housing goals. What one can do, however, is examine the sensitivity of the market estimates to changes in the percentage of borrowers that have an income less than area median income. As noted earlier, reducing that percentage to 30 percent from its 1993–94 level of 37–40 percent drops the overall low- and moderate-income estimate to 46 percent under the baseline projections.

The market model was re-estimated assuming an even higher interest rate environment—lower origination volumes ($535 billion for single-family and $23 billion for multifamily) and an owner low- and moderate-income percentage (26) that was only two-thirds of the 1994 level.[63] In this case, the market estimate of 44 percent remains above HUD's goals of 40 percent for 1996 and 42 percent for 1997. Obviously, there are combinations of projections that would drive the low- and moderate-income market estimate even lower; however, setting the goals to ensure their feasibility under the most pessimistic of economic conditions is not appropriate, given that the Secretary can re-evaluate goal feasibility if market conditions change dramatically.

c. Conclusions About the Size of Low- and Moderate-Income Market

Based on the above findings as well as numerous sensitivity analyses, HUD concludes that 48–52 percent is a reasonable estimate of the mortgage market's low- and moderate-income share for 1996 and beyond. HUD recognizes that shifts in economic conditions could increase or decrease the size of the low- and moderate-income market during that period.

4. Further Considerations—Factors Not Taken Into Account in Developing the Market Estimates

The 48–52 percent low- and moderate-income market estimate does not take into account several factors which could enhance the GSEs' performance with regard to the goals.

[62] Section 1336(b)(3)(A).

[63] The $535 billion is a lower bound estimate provided by Freddie Mac.

a. Purchases of Seasoned Mortgages

Both GSEs buy a number of seasoned mortgages, where the date of the mortgage note is more than one year before the date the GSE purchased the mortgage. HUD's market share estimates are based on current mortgage originations, thus there is no way for HUD to take into account the availability of seasoned mortgages. But many such mortgages would qualify for one or more of the goals.

b. Small Second Loans

The final rule will allow the GSEs to count second mortgages for full credit toward the housing goals. In 1993, the GSEs purchased only a small number of second mortgages: Fannie Mae purchased 658 seconds, totalling $28.1 million, and Freddie Mac purchased 27 seconds, totalling $1.4 million. In 1994, the GSEs purchased both fewer such loans and smaller loans. Fannie Mae's second mortgage purchases fell to 207 loans, totalling $7.8 million, while Freddie Mac's purchases of second mortgages fell to 1, in the amount of $24,000.

It is unclear how the GSEs will react to the fact that seconds will be eligible under the goals. One scenario might involve a substantial increase in their purchases of small home improvement loans in inner-city areas which would increase their performance under the goals. Another scenario might involve only incremental changes to their current business which would only marginally increase their performance under the goals. It is also unclear how to delineate the overall market in which the GSEs might be operating, because their past purchases have been so small. Admittedly, they could purchase second mortgages in all segments of the market (from inner city low-income loans to suburban high-income loans); however, given their current small share of the overall market, it might not be appropriate to assume their purchases would cover the entire market. In any case, HUD has made no adjustments in its market estimate to allow for the possible effects of making second mortgages eligible under the goals.

The HMDA data do include information on home improvement loans (HILs). In 1993, 620,000 home improvement loans were originated, with an average loan amount of $20,700. Using RFS data, for the period 1989–1991, the average loan amount for HILs was $26,700. The loan distribution for all HILs shows that 59 percent of these loans were for amounts less than $15,000. Compared with purchase mortgages, HILs are more targeted to lower-income borrowers. Almost 47 percent of conforming conventional owner-occupied HILs went to low- and moderate-income borrowers.

G. Size of the Conventional Conforming Market Serving Central Cities, Rural Areas, and Other Underserved Areas

The following discussion presents the estimates of the size of the conventional conforming market for the Central City, Rural Areas, and other Underserved Areas Goal (Geographically-Targeted Goal). The first two sections focus on central cities and other underserved areas. Section 1 presents area percentages for different property types while section 2 presents market estimates for these areas. Section 3 discusses rural areas.

The final rule establishes the Central Cities, Rural Areas, and other Underserved Areas Goal for 1996 at 21 percent of the total number of dwelling units financed by the GSE's mortgage purchases. The level of the goal for 1997 and subsequent years is 24 percent.

1. Central City and Other Underserved Area Shares by Property Type

For purposes of the definitions of central cities and other underserved areas, underserved areas are defined as census tracts with:

(a) Tract median income at or below 90 percent of the MSA median income; or

(b) A minority composition equal to 30 percent or more and a tract median income no more than 120 percent of MSA median income.

Table D.8 presents central cities and other underserved areas percentages for mortgages on owner, single-family rental, and multifamily properties. In 1994, 24.6 percent of home purchase loans financed properties located in these areas; this represents an increase from 22.4 percent for 1993.[64] In 1994, refinance loans were slightly more likely than home purchase loans to be located in these areas (27.7 versus 24.6 percent) while in 1993 the situation was reversed (20.1 versus 22.4 percent). As table D.8 shows, the adjustments for mobile home loans are not nearly as large as those reported earlier for the borrower income data. The possibility that HMDA over-reports loans in low-income areas suggests that these percentages should be adjusted by another percent or two (see discussion of the Berkovec-Zorn paper in section F.1.c). Because of the importance of owner properties, the sensitivity analyses will examine a range of values for this variable.

Based on 1993 and 1994 HMDA data, the central cities and other underserved areas percentage for single-family rental units is 41–43 percent while that for multifamily properties is 48–51 percent. Thus, rental mortgages are about twice as likely as owner mortgages to finance properties located in these areas.

2. Market Estimates for Central Cities and Other Underserved Areas

Table D.9 presents estimates for the central cities and other underserved areas market for the same combinations of projections used to analyze the Low- and Moderate-Income Goal. Table D.6 in Section F.3 defines Cases 1, 2, and 3; Case 1 (the baseline) projects a 37.5 percent share for single-family rentals and a 42.5 percent share for multifamily properties while the more conservative Case 2 projects 35.0 percent and 40.0 percent, respectively.

The single-family owner percentages are the driving force in the market for the estimate, even more so than in the low- and moderate-income analysis. Table D.9 reports results under the baseline projections but for owner percentages ranging from 25 percent (1994 HMDA without mobile homes) to 20 percent (1993 HMDA) to 17 percent. The market share estimates are mostly in the 25–28 percent range if the single-family owner central cities and other underserved areas percentage is 18 percent or more. If the owner percentage is at the 1994 HMDA level of 25 percent, the market share estimate is as high as 29 percent.

At the lower extreme, the single-family owner percentage can go as low as 17 percent, which is 8 percentage points lower than the 1994 HMDA value, and the market estimate is still 24 percent in the base case. Thus, the Geographically Targeted Goal allows for a market not as affordable as the 1993–94 period.

Unlike the low- and moderate-income goal, the market estimates differ only slightly as one moves from Case 1 to Case 3 and from $23 billion to $35 billion in the size of the multifamily market. This is because the central cities and other underserved areas differentials between the owner and rental properties are not as large as the low- and moderate-income differentials reported earlier.

[64] The corresponding percentages for the definitions in the proposed rule are 15.4 percent for 1993 and 17.1 percent in 1994. Thus, the effect of the additional 3,657 census tracts is to increase the home purchase percentage by 7.0 percent in 1993 and by 7.5 percent in 1994.

BILLING CODE 4210-32-C

3. Size of Rural Underserved Area Market

Rural areas are nonmetropolitan counties with:

(a) County median income at or below 95 percent of the greater of statewide nonmetropolitan median income or nationwide nonmetropolitan income; or

(b) A minority composition equal to 30 percent or more and a county median income no more that 120 percent of statewide nonmetropolitan median income.

HMDA does not provide mortgage data for nonmetropolitan counties, which makes it impossible to estimate the size of the mortgage market in rural areas. However, all indicators suggest that counties in rural areas comprise a larger share of the nonmetropolitan mortgage market than the census tracts in central cities and other underserved areas comprise of the metropolitan mortgage market. Counties within rural areas include 54 percent of nonmetropolitan residents as well as 54 percent of nonmetropolitan homeowners. Central cities and other underserved census tracts, on the other hand, account for 44 percent of metropolitan population and 34 percent of metropolitan homeowners.

In 1994, 26.9 percent of Fannie Mae's total purchases in nonmetropolitan areas were in rural areas while 29.2 percent of Fannie Mae's purchases in metropolitan areas were in central cities and other underserved areas. The corresponding percentages for Freddie Mac were 26.3 and 23.9, respectively. These data suggest that if the market share for counties in rural areas were available, it would be similar to the market share for census tracts in central cities and other underserved areas. Thus, HUD will use the metropolitan estimate to proxy the overall market for this goal, including rural areas.

4. Conclusions

Based on the above findings as well as numerous sensitivity analyses, HUD concludes that 25–28 percent is a reasonable estimate of mortgage market originations that would qualify toward achievement of the Geographically Targeted Goal if purchased by a GSE. HUD recognizes that shifts in economic and housing market conditions could affect the size of this market; however, the market estimate allows for the possibility that adverse economic conditions can make housing less affordable than it has been in the last two years.

H. Size of the Conventional Conforming Market for the Special Affordable Housing Goal

This section presents estimates of the conventional conforming mortgage market for the Special Affordable Housing Goal. The special affordable market consists of owner and rental dwelling units which are occupied by: (a) very-low-income families; *or* (b) low-income families in low-income census tracts[65]; *or* (c) low-income families in multifamily projects that meet minimum income thresholds patterned on the low-income housing tax credit (LIHTC).[66] HUD estimates that the special affordable market is 20–23 percent of the conventional conforming market. This market share estimate is three percentage points higher than the estimate in HUD's proposed rule mainly because low-income renters living in low-income census tracts or rural counties now qualify under the goal as defined in the final rule.

The final rule establishes the Special Affordable Housing Goal for 1996 at 12 percent of the total number of dwelling units financed by each GSE's mortgage purchases. The goal for 1997 and subsequent years is 14 percent. Of the total Special Affordable Housing Goal, each GSE must purchase annually in multifamily mortgages at least an amount equal to 0.8 percent of the total dollar volume of mortgages purchased by the GSE in 1994.

Section F described HUD's methodology for estimating the size of the low- and moderate-income market. Essentially the same methodology is employed here except that the focus is on the very-low-income market (0–60 percent of Area Median Income) and that portion of the low-income market (60–80 percent of Area Median Income) that is located in low-income areas. Data do not exist to estimate the number of renters with incomes between 60 and 80 percent of Area Median Income who live in projects that meet the tax credit thresholds. Thus, this part of the Special Affordable Housing Goal is not included in the market estimate.

1. Special Affordable Shares by Property Type

The basic approach involves estimating for each property type the share of dwelling units financed by mortgages in a particular year that are occupied by very-low-income families or by low-income families living in low-income areas. HUD has combined mortgage information from HMDA and the American Housing Survey in order to estimate these special affordable shares.

a. Very-Low-Income Owner Percentages

The percentage of borrowers with very-low-incomes was reported earlier when discussing the Low- and Moderate-Income Goal. HMDA data show that very-low-income borrowers accounted for 9.4 percent of all conforming home purchase loans in 1992, 11.5 percent in 1993, and 13.1 percent in 1994. Several adjustments were made to the HMDA data (see Table D.4). Excluding mobile home loans, for instance, reduced the 1993 and 1994 very-low-income borrower percentages to the 9–10 percent range. The AHS reports a higher very-low-income percentage of 12.9 percent for home purchase loans in 1993.

b. Very-Low-Income Rental Percentages

Table D.5 in Section F reported the percentages of the single-family rental and multifamily stock affordable to very-low-income families. According to the AHS, 61 percent of single-family units and 51 percent of multifamily units were affordable to very-low-income families in 1993. The corresponding average values for the AHS's five surveys between 1985 and 1993 were 58 percent and 46 percent, respectively.

c. Outstanding Housing Stock versus Mortgage Flow

An important issue concerns whether affordability data based on the existing rental stock can be used to proxy affordability of mortgaged rental units. Previous analysis of this issue has focussed on the relative merits of data from the recently completed stock versus data from the outstanding stock. The very-low-income percentages are much lower for the recently completed stock—for instance, the averages across the five AHS surveys were 15 percent for recently completed multifamily properties versus 46 percent for the multifamily stock. But it seems obvious that data from the recently completed stock would underestimate the affordability of newly-mortgaged units because they exclude purchase and refinance transactions involving older buildings, which generally charge lower rents than newly-constructed buildings. Blackley and Follain concluded that newly-constructed properties did not provide a satisfactory basis for estimating the affordability of newly-mortgaged properties.[67]

The remaining question is how much the affordability percentages from the existing rental stock should be reduced to reflect the flow of mortgage financing.[68] HUD used the 1991 Residential Finance Survey to compare rents of the outstanding stock with rents of properties receiving mortgages. There were two main findings. The first finding—and the important one for the Special Affordable Housing Goal—was that rents of newly-mortgaged properties were higher than those of the existing stock. About 44 percent of the units in newly-mortgaged, multifamily properties were affordable to very-low-income families; this compares with 52 percent for the entire multifamily stock.[69]

The corresponding percentages for single-family rental properties showed an even greater gap—47 percent for the newly-mortgaged stock and 60 percent for the existing stock. These comparisons suggest that in order to serve as a proxy for mortgage flows, the affordability percentages reported by the AHS should be adjusted downward by about 15 percent in the case of multifamily properties and 20 percent in the case of single-family properties. The baseline analysis below will use very-low-income percentages of 42.5 percent for multifamily properties and 45 percent for single-family rentals.[70]

The second finding—and the one important for the low- and moderate-income goal—was that the percentage of newly-mortgaged properties renting at a level affordable to families with less than median income was only slightly lower than the percentage of the stock renting at that level. This finding is not particularly surprising given that most of the rental stock rents at levels affordable to median income families. It suggests that only a small reduction (about 5 percent) in the affordability percentage of the existing stock is needed for it to proxy the mortgage flow.

d. Low-Income in Low-Income Areas

According to HMDA data, the percentage of home purchase borrowers who had an income between 60 and 80 percent of area median income and who lived in a low-income census tract was 1.7 percent in 1992, 1.8 percent in 1993, and 2.2 percent in 1994. The analysis below will vary this rate between 1 and 2 percent, depending on the percentage of very-low-income owners being assumed at the time.

[65] Or in the case of rural areas, in low-income counties.

[66] There are two LIHTC thresholds: at least 20 percent of the units are affordable at 50 percent of AMI or at least 40 percent of the units are affordable at 60 percent of AMI.

[67] "A Critique of the Methodology Used to Determine Affordable Housing Goals for the Government Sponsored Housing Enterprises."

[68] Some might argue that no adjustment is needed because the existing stock represents the underlying demand for mortgage credit and thus mortgage flows will have the same characteristics as the stock. While appealing at first sight, particularly if one takes a longer-run perspective, this argument ignores the host of reasons why the mortgage flow might not take on the characteristics of the underlying rental stock—the most obvious being that new construction mortgages are a significant part of mortgage activity (almost 15 percent in 1994) but new properties represent only a minute part of the outstanding housing stock.

[69] First, HUD computed the distribution of units by rent category for existing and newly-mortgaged properties in the RFS. Because only average rent per property is reported in the RFS, all units in a particular property were assigned the same rent. Next, HUD computed the percentage of units that were affordable to families with less than 60 percent of area median income based on 1989 and 1991 AHS data; this was about 50 percent for multifamily units. This 50 percent figure was used to define the absolute rent amount ($400) in the RFS that included the bottom 50 percent of rental units. (Because the rent brackets were in $100 increments, the bottom 52 percent of rents had to be used in the RFS analysis.) Finally, HUD computed the percentage of newly-mortgaged units below $400; as the text discusses, only 44 percent of the newly-mortgaged units were below $400.

[70] Another approach would simply take the weighted average of the very-low-income percentages for newly-constructed multifamily properties (15 percent) and remaining stock (46 percent) with the weights determined by the estimated share of new construction mortgages (almost 15 percent in 1994). Doing this for multifamily also gives 42 percent.

HMDA does not provide similar data for renters. As a substitute, HUD examined the rental housing stock located in low-income zones of 41 metropolitan areas surveyed as part of the AHS between 1989 and 1993. While the low-income zones do not exactly coincide with low-income tracts, they were the only proxy readily available to HUD.[71] Slightly over 13 percent of single-family rental units were both affordable at the 60–80 percent of AMI level and located in low-income zones; almost 16 percent of multifamily units fell into this category.[72] The baseline analysis below assumes that 10 percent of the financed rental units are affordable at 60–80 percent of AMI and located in low-income areas.

2. Size of the Special Affordable Market

The size of the special affordable market depends in large part on the size of the multifamily market and on the very-low-income percentages of both owners and renters. Table D.10 gives market estimates for different combinations of these factors.[73] As before, Case 2 is slightly more conservative than the baseline projections (Case 1) mentioned above. For instance, Case 2 assumes that only 7 percent of rental units are affordable to low-income renters living in low-income areas.

The market estimates in Table D.10 suggest that 20–23 percent is a conservative estimate of the special affordable market. Under HUD's baseline projections, the market estimates remain above 20 percent even if the very-low-income percentage for owners falls as low as 6 percent. Thus, HUD's market estimate allows for the possibility that adverse economic conditions could keep very-low-income families out of the housing market. On the other hand, if the very-low-income percentage stays at its recent levels of 10 percent, the market estimate is as high as 24 percent.

The market estimate drops by approximately one percent if the estimate of the multifamily mortgage market changes from $30 billion to $23 billion. The market estimates under the more conservative Case 2 projections are almost 3 percentage points below those under the Case 1 projections. This is due mainly to Case 2's lower share of single-family rental mortgages (7 percent versus 10 percent in Case 1) and its lower affordability and low-income-area percentages for rental housing (e.g., a combined 48 percent for single-family rental units versus 55 percent for Case 1).

BILLING CODE 4210–32–P

[71] It would have been ideal for this purpose if AHS had identified its respondents by whether they live in a low-income census tract within a metropolitan area or low-income nonmetropolitan county (i.e., a tract or county whose median income is no more than 80 percent of metropolitan area or statewide non-metro median income). AHS would then have yielded an estimate of the percentage of rental units located in such areas whose median income is less than 80 percent of area median, and this could have been combined with an AHS estimate of the percentage of those units whose rents are affordable at 60–80 percent of area median income to generate the desired figure. Instead, AHS identifies respondents in its metropolitan area surveys by a variable called ZONE and provides no corresponding variable outside of metropolitan areas. Zones were defined in the 1970s to be areas of at least 100,000 population that were socioeconomically homogeneous, and their boundaries have been fixed since then. HUD estimated the percentage of rental units in metropolitan areas affordable at 60–80 percent of area median income based on the AHS distribution of rental units by income of zone (relative to 80 percent of area median) and the AHS percentages of units affordable at 60–80 percent of area median within each zone. Because of the size difference between tracts and zones—around 100,000 vs. around 4,000—the percentages that would have been generated if a tract-based analysis had been feasible would probably have been at least as large as the 13 percent and 16 percent figures generated in this analysis. This is because the larger the zones, the closer their median income would tend to be to the metropolitan area median income. HUD has no basis for estimating the degree of bias in extrapolating from this analysis of metropolitan area data to nonmetropolitan areas.

[72] The corresponding figures for the recently completed stock were 8 and 9 percent, respectively.

[73] Table D.10 shows the size of the special affordable market based on alternative assumptions about the share of single-family owner-occupied units that are occupied by very-low-income households. Special affordable units also include those that are occupied by low-income households in low-income areas. For a very-low-income assumption of 10 percent, the low-income in low-income area assumption is 2 percent. The 2 percent low-income in low-income area assumption is prorated downward as the very-low-income assumption is reduced, falling to 1.2 percent for a very-low-income assumption of 7 percent.

Table D-10
Special Affordable Mortgage Market:
Sensitivity Analysis

	Size Of Multifamily Market		
	$23 Billion	$30 Billion	$35 Billion
Case 1 With:			
(a) Rent Affordable at 60% AMI: Single-Family Rental Percentage= 45%, Multifamily= 42%;

[a] These percentages are used for home purchase loans. Refinaced loans were assumed to be 1.75 percentage points lower for each alternative.

BILLING CODE 4210–32–C

Tax Credit Definition. Data are not available to measure the increase in market share associated with including low-income units located in multifamily buildings that meet threshhold standards for the low-income housing tax credit. Currently, the effect on GSE performance under the Special Affordable Housing Goal is rather small. For instance, adding the tax credit condition increases Fannie Mae's 1994 performance by only 0.6 percentage points, from 16.1 to 16.7 percent. At first glance, this small effect seems at odds with the fact that almost 25 percent of Fannie Mae's multifamily purchases during 1994 involved properties with a very-low-income occupancy of 100 percent, and 57 percent involved properties with a very-low-income occupancy of over 40 percent. The explanation, of course, is that most of the rental units in these "tax-credit" properties are covered by the very-low-income part of the special affordable goal.

3. Conclusions

Sensitivity analyses were conducted for the market shares of each property type, for the very-low-income shares of each property type, and for various assumptions in the market projection model. These analyses suggest that 20–23 percent is a reasonable estimate of the size of the conventional conforming market for the Special Affordable Housing Goal. This estimate allows for the possibility that homeownership will not remain as affordable as it has over the past two years.

Appendix E—Required Loan-Level Data Elements

As required under 24 CFR part 81, subpart E, the GSEs are required to provide to the Secretary the loan level mortgage data listed below.

(a) Loan level data on single family mortgage purchases. Each GSE's submission of loan level data shall include the following information for each single family mortgage purchased by the GSE:

(1) Loan number—a unique numerical identifier for each mortgage purchased;

(2) U.S. postal state—the two-digit numerical Federal Information Processing Standard (FIPS) code;

(3) U.S. postal zip code—the five digit zip code for the property;

(4) MSA code—the four-digit numerical code for the property's metropolitan statistical area (MSA) if the property is located in an MSA;

(5) Place code—the five-digit numerical FIPS code;

(6) County—the county, as designated in the most recent decennial census by the Bureau of the Census, in which the property is located;

(7) Census tract/Block Numbering Area (BNA)—the tract/BNA number as used in the most recent decennial census by the Bureau of the Census;

(8) 1990 census tract—percent minority—the percentage of a census tract's population that is minority based on the most recent decennial census by the Bureau of the Census;

(9) 1990 census tract—median income—the median family income for the census tract;

(10) 1990 local area median income—the median income for the area;

(11) Tract income ratio—the ratio of the 1990 census tract median income to the 1990 local area median income;

(12) Borrower(s) annual income—the combined income of all borrowers;

(13) Area median family income—the current median family income for a family of four for the area as established by the Secretary;

(14) Borrower income ratio—the ratio of borrower(s) annual income to area median family income;

(15) Acquisition UPB—the unpaid principal balance (UPB) in whole dollars of the mortgage when purchased by the GSE; where the mortgage purchase is a participation, the acquisition UPB reflects the participation percentage;

(16) Loan-to-Value Ratio at Origination—the loan-to-value (LTV) ratio of the mortgage at the time of origination;

(17) Date of Mortgage Note—the date the mortgage note was created;

(18) Date of Acquisition—the date the GSE purchased the mortgage;

(19) Purpose of Loan—indicates whether the mortgage was a purchase money mortgage, a refinancing, a second mortgage;

(20) Cooperative Unit Mortgage—indicates whether the mortgage is on a dwelling unit in a cooperative housing building;

(21) Special Affordable, Seasoned Loan Proceeds Recycled—for purposes of the special affordable housing goal, indicates whether the mortgage purchased by the GSE meets the requirements in section 81.14(h)(1)(B);

(22) Product Type—indicates the product type of the mortgage, *i.e.*, fixed rate, adjustable rate mortgage (ARM), balloon, graduated payment mortgage (GPM) or growing equity mortgages (GEM), reverse annuity mortgage, or other;

(23) Federal guarantee—a numeric code that indicates whether the mortgage has a federal guarantee from: the Federal Housing Administration (FHA) or the Department of Veterans Affairs (VA); the Farmers Home Administration's Guaranteed Rural Housing Loan program; or other federal guarantee;

(24) RTC/FDIC—for purposes of the special affordable housing goal, indicates whether the mortgage purchased by the GSE meets the requirements in section 81.14(h)(1)(C);

(25) Term of Mortgage at Origination—the term of the mortgage at the time of origination in months;

(26) Amortization Term—for amortizing mortgages, the amortization term of the mortgage in months;

(27) Lender Institution—the name of the institution that loaned the money for the mortgage;

(28) Lender City—the city location of the institution that loaned the money for the mortgage;

(29) Lender State—the State location of the institution that loaned the money for the mortgage;

(30) Type of Seller Institution—the type of institution that sold the mortgage to the GSE, *i.e.*, mortgage company, Savings Association Insurance Fund (SAIF) insured depositary institution, Bank Insurance Fund (BIF) insured depositary institution, National Credit Union Association (NCUA) insured credit union, or other seller;

(31) Number of borrowers—the number of borrowers;

(32) First-time home buyer—a numeric code that indicates whether the mortgagor(s) are first-time home buyers; second mortgages and refinancings are treated as not first-time home buyers;

(33) Mortgage Purchased under GSE's Community Lending Program—indicates whether the GSE purchased the mortgage under its community lending program;

(34) Acquisition Type—indicates whether the GSE acquired the mortgage with cash, by swap, with a credit enhancement, a bond or debt purchase, reinsurance, risk-sharing, real estate investment trust (REIT), or a real estate mortgage investment conduit (REMIC), or other;

(35) GSE Real Estate Owned—indicates whether the mortgage is on a property that was in the GSE's real estate owned (REO) inventory;

(36) Borrower race or national origin—a numeric code that indicates whether the borrower is: an American Indian or Alaskan Native; an Asian or Pacific Islander; black; Hispanic; white; or other;

(37) Co-borrower race or national origin—a numeric code that indicates whether the co-borrower is: an American Indian or Alaskan Native; an Asian or Pacific Islander; black; Hispanic; white; or other

(38) Borrower gender—a numeric code that indicates whether the borrower is male or female;

(39) Co-borrower gender—a numeric code that indicates whether the co-borrower is male or female

(40) Age of borrower;

(41) Age of co-borrower;

(42) Occupancy Code—indicates whether the mortgaged property is an owner-occupied principal residence, a second home, or a rental/investment property;

(43) Number of Units—indicates the number of units in the mortgaged property;

(44) Number of Bedrooms—where the property contains non-owner-occupied dwelling units, the number of bedrooms in each of those units;

(45) Owner-Occupied—indicates whether each of those units are owner-occupied;

(46) Affordability Category—where the property contains non-owner-occupied dwelling units, indicates under which, if any, of the special affordable goals the units qualified;

(47) Reported Rent Level—where the property contains non-owner-occupied dwelling units, the rent level for each unit in whole dollars;

(48) Reported Rent Plus Utilities—where the property contains non-owner-occupied dwelling units, the rent level plus the utility cost for each unit in whole dollars;

(b) Loan level data on multifamily mortgage purchases. Each GSE's submission of loan level data shall include the following information for each multifamily mortgage purchased by the GSE:

(1) Loan number—a unique numerical identifier for each mortgage purchased;

(2) U.S. postal state—the two-digit numerical Federal Information Processing Standard (FIPS) code;

(3) U.S. Postal Zip Code—the five digit zip code for the property;

(4) MSA code—the four-digit numerical code for the property's metropolitan statistical area (MSA) if the property is located in an MSA;

(5) Place code—the five-digit numeric FIPS code;

(6) County—the county, as designated in the most recent decennial census by the Bureau of the Census, in which the property is located;

(7) Census tract/Block Numbering Area (BNA)—the tract/BNA number as used in the most recent decennial census by the Bureau of the Census;

(8) 1990 census tract—percent minority—the percentage of a census tract's population that is minority based on the most recent decennial census by the Bureau of the Census;

(9) 1990 census tract—median income—the median family income for the census tract;

(10) 1990 local area median income—the median income for the area;

(11) Tract income ratio—the ratio of the 1990 census tract median income to the 1990 local area median income;

(12) Area median family income—the current median family income for a family of four for the area as established by the Secretary;

(13) Affordability Category—indicates under which, if any, of the special affordable goals the property qualified;

(14) Acquisition UPB—the unpaid principal balance (UPB) in whole dollars of the mortgage when purchased by the GSE; where the mortgage purchase is a participation, the acquisition UPB reflects the participation percentage;

(15) Participation Percent—where the mortgage purchase is a participation, the percentage of the mortgage that the GSE purchased;

(16) Date of Mortgage Note—the date the mortgage note was created;

(17) Date of Acquisition—the date the GSE purchased the mortgage;

(18) Purpose of Loan—indicates whether the mortgage was a purchase money mortgage, a refinancing, a new construction mortgage, a mortgage financing property rehabilitation;

(19) Cooperative Project Loan—indicates whether the mortgage is a project loan on a cooperative housing building;

(20) Refinancing Loan from Own Portfolio—indicates, where the GSE has purchased a refinanced mortgage, whether the GSE owned the previous mortgage on the same property;

(21) Special Affordable, Seasoned Loans: Proceeds Recycled?—for purposes of the special affordable housing goal, indicates whether the mortgage purchased by the GSE meets the requirements in section 81.14(h)(1)(ii);

(22) Mortgagor Type—indicates the type of mortgagor, *i.e.*, an individual, a for-profit entity such as a corporation or partnership, a nonprofit entity such a corporation or partnership, a public entity, or other type of entity;

(23) Term of Mortgage at Origination—the term of the mortgage at the time of origination in months;

(24) Loan Type—indicates the type of the loan, *i.e.*, fixed rate, adjustable rate mortgage (ARM), balloon, or graduated payment mortgage (GPM);

(25) Construction Loan—indicates whether the mortgage is for a construction-loan;

(26) Amortization Term—for amortizing mortgages, the amortization term of the mortgage in months;

(27) Lender Institution—the name of the institution that loaned the money for the mortgage;

(28) Lender City—the city location of the institution that loaned the money for the mortgage;

(29) Lender State—the State location of the institution that loaned the money for the mortgage;

(30) Type of Seller Institution—the type of institution that sold the mortgage to the GSE, *i.e.*, mortgage company, Savings Association Insurance Fund (SAIF) insured depositary institution, Bank Insurance Fund (BIF) insured depositary institution, National Credit Union Association (NCUA) insured credit union, or other seller;

(31) Government insurance—indicates whether any part of the mortgage has government insurance;

(32) FHA Risk Share Percent—the percentage of risk assumed for the mortgage purchased under a risk-sharing arrangement with the Department.

(33) Acquisition Type—indicates whether the GSE acquired the mortgage with cash, by swap, with a credit enhancement, a bond or debt purchase, reinsurance, risk-sharing, real estate investment trust (REIT), or a real estate mortgage investment conduit (REMIC), or other;

(34) GSE Real Estate Owned—indicates whether the mortgage is on a property that was in the GSE's real estate owned (REO) inventory;

(35) Public Subsidy Program—indicates whether the mortgage property is involved in a public subsidy program and which level(s) of government are involved in the subsidy program, *i.e.*, Federal government only, state or local government only, other only, Federal government and either state or local government, Federal government and other, state or local government and other, and Federal, state, or local government and other;

(36) Total Number of Units—indicates the number of dwelling units in the mortgaged property;

(37) The following data apply to unit types in a particular mortgaged property. The unit types are defined by the GSEs for each property and are differentiated based on the number of bedrooms in the units and on the average contract rent for the units. A unit type must be included for each bedroom size category represented in the property:

(A) Unit Type XX—Number of Bedroom(s)—the number of bedrooms in the unit type;

(B) Unit Type XX—Number of Units—the number of units in the property within the unit type;

(C) Unit Type XX—Average Reported Rent Level—the average rent level for the unit type in whole dollars;

(D) Unit Type XX—Average Reported Rent Plus Utilities—the average reported rent level plus the utility cost for each unit in whole dollars; and

(E) Unit Type XX—Affordability Level—the ratio of the average reported rent plus utilities for the unit type to the adjusted area median income;

BILLING CODE 4210-32-P

APPENDIX F

ORDER

GSE MORTGAGE DATA AND AHAR INFORMATION:
PROPRIETARY INFORMATION/PUBLIC-USE DATA

THIS ORDER SETS FORTH THAT CERTAIN INFORMATION SUBMITTED BY THE FEDERAL NATIONAL MORTGAGE ASSOCIATION AND THE FEDERAL HOME LOAN MORTGAGE CORPORATION TO HUD IS PROPRIETARY AND SHALL NOT BE DISCLOSED TO THE PUBLIC AT THIS TIME. THIS ORDER SHALL BE EFFECTIVE UNTIL SUCH TIME AS IT IS DETERMINED NECESSARY AND/OR APPROPRIATE TO WITHDRAW OR MODIFY IT.

Note: The following matrices distinguish proprietary from public-use mortage data elements. A "YES" designation indicates that the data element is included in the public-use data base in the format indicated. For some data elements, where disclosure of census tract information would divulge proprietary information, alternative formats for disclosure that will not divulge proprietary information are indicated.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice to extend closing of OUST Docket during the move.

SUMMARY: As announced in the November 14, 1995, **Federal Register**, the Office of Underground Storage Tanks (OUST) Docket will move from M2616, 401 M Street, SW, Washington, DC to Crystal Gateway, First Floor, 1235 Jefferson Davis Highway, Arlington, VA. Due to the shutdown of the federal government, the Office of Underground Storage Tanks Office must extend the time the OUST Docket will be closed. The OUST Docket, originally scheduled to be closed from November 14, 1995 through November 24, 1995, will now be closed through December 1, 1995. Closing the OUST Docket during the move will facilitate the moving of the Docket's collection and ensure the integrity of the regulatory dockets. The move will allow the OUST Docket to provide improved services to its patrons.

FOR FURTHER INFORMATION CONTACT: OUST Docket (5305W), 401 M Street, SW, Washington, DC 20460, (202/260–9720). Beginning December 4, the phone number will be 703/603–9231.

Dated: November 27, 1995.

Dana Tulis,

Acting Director, Office of Underground Storage Tanks.

Department of Commerce

Bureau of the Census

1996 Race and Ethnic Targeted Test; Notice

DEPARTMENT OF COMMERCE

Bureau of the Census

1996 Race and Ethnic Targeted Test (RAETT) and Its Content Reinterview, Also Identified as the 1996 Census Survey

ACTION: Proposed Agency Information Collection Activity; Request for comments.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before January 30, 1996.

ADDRESSES: Direct all written comments to Gerald Taché, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Nampeo R. McKenney, Assistant Division Chief, Population Division, at the Bureau of the Census, Room 2011, FOB#3, Washington, D.C. 20233; or call (301) 457-2075.

SUPPLEMENTARY INFORMATION:

I. Abstract

The June 1996 Race and Ethnic Targeted Test (RAETT) is the principal vehicle for testing and evaluating several major proposed changes in, or alternatives to, the 1990 census race and ethnic questions. These include:

- A "Multiracial or biracial" category;
- A "Check more than one category" approach to reporting as multiracial;
- Alternative sequencing of the race and Hispanic origin items;
- A combined race, Hispanic origin and ancestry question;
- A combined "Indian (Amer.) or Alaska Native" category; and
- A "Native Hawaiian" category.

These proposals arose from:

- The Office of Management and Budget's (OMB) review of the Federal standards for racial and ethnic classification (Statistical Policy Directive No. 15), with particular attention to the research agenda developed by the Research Subcommittee of the OMB Interagency Committee for the Review of Racial and Ethnic Standards;
- Evaluation research on the 1990 census data, on early tests of alternative 2000 census forms (e.g., the Alternative Questionnaire Experiment and the Simplified Questionnaire Test), and on the Current Population Survey, May 1995 Supplement on Race and Ethnicity funded by the Bureau of Labor Statistics; and
- Consultations with the Census Advisory Committees and other data users, including a conference on undercounted ethnic populations, an international conference on the measurement of race and ethnicity, and recommendations in reports by the National Research Council and the General Accounting Office.

The RAETT is essential for evaluating how proposed changes to Directive No. 15, such as a multiracial classification and combined race and Hispanic origin questions, might affect the distribution and quality (e.g., reinterview consistency) of responses in the current race and Hispanic origin items. Substantial changes could affect the historical continuity of race and ethnic data and the usefulness of data for Federal agencies that monitor and enforce legislation (e.g., the Voting Rights Act). In addition, the RAETT is needed to determine whether alternative sequencing of the race and Hispanic origin items or combining the Indian (Amer.) and Alaska Native categories provide improvements over the 1990 census. The RAETT will also be used for evaluating the terminology of "Native Hawaiian."

The RAETT will target about 90,000 urban and rural households representing American Indians, Alaska Natives, Asians, Pacific Islanders, Hispanics, Blacks, White ethnic groups, and multiracial persons.

The RAETT will include a reinterview which will permit assessments of effects of changes on relatively smaller populations not reliably measured in national samples.

The test will also assess alternative approaches to household rostering, including special probes designed to improve coverage in undercounted minority households.

The RAETT will include six forms (one control and five experimental). We are only including the questions on race and ethnicity in this notice because they are pertinent to the survey. If you want to obtain a copy of the questionnaire in its entirety, you may write to Nampeo R. McKenney, Assistant Division Chief, Population Division, at the address listed above. The following is a list of the form numbers and précis of the race and ethnicity questions.

Form No.	Précis of race and ethnic questions on forms
DL–1A	Control.
DL–1B	Separate Hispanic origin and race questions; multiracial category; combined "Indian (Amer.) or Alaska Native" category.
DL–1C	Separate Hispanic origin and race questions; mark more than one race; combined "Indian (Amer.) or Alaska Native" category.
DL–1D	Race question followed by Hispanic origin question; combined "Indian (Amer.) or Alaska Native" category; "Native Hawaiian" category.
DL–1E	Combined race, Hispanic origin, and ancestry; multiracial category.
DL–1F	Combined race, Hispanic origin, and ancestry; mark more than one box.

Attachment A, "Proposed Race and Ethnic Questions for RAETT," is included to assist with the review of the race and ethnic questions. Attachment B contains the race and ethnic questions that will appear on forms DL–1A through DL–1F.

II. Method of Collection

The proposed information collection will be a one-time mailout-mailback census test needed for planning the 2000 census. The mailing operations for the proposed RAETT will be conducted through the U.S. Postal Service, using first-class postage rates for all pieces.

The RAETT will also include a Computer Assisted Telephone Interview (CATI) reinterview, which will compare individual responses collected on the self-enumeration forms to those collected in the CATI reinterview. Measures of response error will be generated from the reinterview to estimate the error associated with question wording.

Repeated callbacks will be made to each household to obtain a completed reinterview. The automatic call scheduler in the CATI instrument is designed to maximize response by optimizing the callback times based on prior call records for the household.

III. Data

OMB Number: Not Available

Form Number: DL–1A, DL–1B, DL–1C, DL–1D, DL–1E, and DL–1F.

Type of Review: Regular Submission.

Affected Public: Households and Individuals.

Estimated Number of Respondents: 90,000 Households.

Estimated Time Per Response: Mailout—10 minutes Reinterview—20 minutes.

Estimated Total Annual Burden Hours: Mailout—15,000 hours; Reinterview—15,000 hours.

Estimated Total Annual Cost: $2.2 Million.

IV. Request for Comments

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: November 22, 1995.

Gerald Taché,

Departmental Forms Clearance Officer, Office of Management and Organization.

Form DL-1A

4. What is this person's race? Mark ☒ ONE box for the race that the person considers himself/herself to be.

- ☐ White
- ☐ Black, African Am., or Negro
- ☐ Indian (Amer.) – Print name of enrolled or principal tribe.
- ☐ Eskimo
- ☐ Aleut
- ☐ Chinese
- ☐ Filipino
- ☐ Hawaiian
- ☐ Korean
- ☐ Vietnamese
- ☐ Japanese
- ☐ Asian Indian
- ☐ Samoan
- ☐ Guamanian
- ☐ Other Asian or Pacific Islander – Print race, for example: Hmong, Fijian, Laotian, Thai, Tongan, Pakistani, Cambodian, and so on.
- ☐ Other race – Print race.

7. Is this person Spanish/Hispanic/Latino? Mark ☒ the "No" box if **not** Spanish/Hispanic/Latino.

- ☐ **No**, not Spanish/Hispanic/Latino
- ☐ Yes, Mexican, Mexican-Am., Chicano
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latino – Print one group, for example: Argentinean, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on.

Form DL-1B

Note: Please answer both Questions 5 and 6.

5. Is this person Spanish/Hispanic/Latino? Mark ☒ the "No" box if **not** Spanish/Hispanic/Latino.

- ☐ **No**, not Spanish/Hispanic/Latino
- ☐ Yes, Mexican, Mexican-Am., Chicano
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latino – Print one group.

6. What is this person's race? Mark ☒ ONE box for the race that the person considers himself/herself to be.

- ☐ White
- ☐ Black, African Am., or Negro
- ☐ Indian (Amer.) or Alaska Native (Print name of enrolled or principal tribe.)
- ☐ Chinese
- ☐ Filipino
- ☐ Hawaiian
- ☐ Korean
- ☐ Vietnamese
- ☐ Japanese
- ☐ Asian Indian
- ☐ Samoan
- ☐ Guamanian
- ☐ Other Asian or Pacific Islander – Print race.
- ☐ Some other race – Print race.
- ☐ Multiracial or biracial – Print races.

Form DL-1C

Note: Please answer both Questions 5 and 6.

5. Is this person Spanish/Hispanic/Latino? Mark ☒ the "No" box if **not** Spanish/Hispanic/Latino.

- ☐ **No**, not Spanish/Hispanic/Latino
- ☐ Yes, Mexican, Mexican-Am., Chicano
- ☐ Yes, Puerto Rican
- ☐ Yes, Cuban
- ☐ Yes, other Spanish/Hispanic/Latino – Print one group.

6. What is this person's race? Mark one or more races to indicate what this person considers himself/herself to be.

- ☐ White
- ☐ Black, African Am., or Negro
- ☐ Indian (Amer.) or Alaska Native (Print name of enrolled or principal tribe.)
- ☐ Chinese
- ☐ Filipino
- ☐ Hawaiian
- ☐ Korean
- ☐ Vietnamese
- ☐ Japanese
- ☐ Asian Indian
- ☐ Samoan
- ☐ Guamanian
- ☐ Other Asian or Pacific Islander – Print race.
- ☐ Some other race – Print race.

Form DL-1D

Note: Please answer both Questions 5 and 6.

5. What is this person's race? Mark ☒ ONE box for the race that the person considers himself/herself to be.

- ☐ White
- ☐ Black, African Am., or Negro
- ☐ Indian (Amer.) or Alaska Native (Print name of enrolled or principal tribe.)
- ☐ Native Hawaiian
- ☐ Chinese
- ☐ Filipino
- ☐ Korean
- ☐ Vietnamese
- ☐ Japanese

The United States Government Manual 1995/96

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to contact about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or renamed subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, Long Beach, CA, and Seattle, WA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is **$494**, or **$544** for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is **$8.00** for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Reader Aids
Additional information, including a list of public laws, telephone numbers, and finding aids, appears in the Reader Aids section at the end of this issue.

New Feature in the Reader Aids!
Beginning with the issue of December 4, 1995, a new listing will appear each day in the Reader Aids section of the **Federal Register** called "Reminders". The Reminders will have two sections: "Rules Going Into Effect Today" and "Comments Due Next Week". Rules Going Into Effect Today will remind readers about Rules documents published in the past which go into effect "today". Comments Due Next Week will remind readers about impending closing dates for comments on Proposed Rules documents published in past issues. Only those documents published in the Rules and Proposed Rules sections of the **Federal Register** will be eligible for inclusion in the Reminders.
The Reminders feature is intended as a reader aid only. Neither inclusion nor exclusion in the listing has any legal significance.
The Office of the Federal Register has been compiling data for the Reminders since the issue of November 1, 1995. No documents published prior to November 1, 1995 will be listed in Reminders.

Electronic Bulletin Board
Free **Electronic Bulletin Board** service for Public Law numbers, **Federal Register** finding aids, and a list of documents on public inspection is available on 202–275–1538 or 275–0920.

Rules and Regulations

Federal Register
Vol. 60, No. 232
Monday, December 4, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1002

[DA–95–23A]

Milk in the New York-New Jersey Marketing Area; Removal of Certain Regulations Under the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This document removes certain provisions in the regulations issued under the New York-New Jersey Federal milk marketing order (Order 2) from publication in the Code of Federal Regulations. Specifically, this action removes the Order 2 subparts that contain the market administrator's Classification and Accounting Rules and Regulations, and the Determination and Public Announcement of Freight Zones. The market administrator will continue to maintain these provisions as separate documents. This action is taken to reduce printing costs and to comply with the President's regulatory reform initiative.

EFFECTIVE DATE: December 4, 1995.

FOR FURTHER INFORMATION CONTACT: Gino Tosi, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 690–1366.

SUPPLEMENTARY INFORMATION: This regulatory action is being taken as part of the National Performance Review program to eliminate unnecessary regulations and improve those that remain in force.

The Department is issuing this rule in conformance with Executive Order 12866.

The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this rule will not have a significant economic impact on a substantial number of small entities. This rule reduces the cost involved with publishing in the Code of Federal Regulations a publication that is already made publicly available. Furthermore, this action makes no changes to the operation of the order or the provision of the rules and regulations issued thereunder.

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have a retroactive effect. This rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with the rule.

The Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

This rule is issued pursuant to the provisions of the Agricultural Marketing Agreement Act and of the order regulating the handling of milk in the New York-New Jersey marketing area. It is hereby found and determined that the following provisions of the regulations issued under the order do not need to be published in the Code of Federal Regulations:

1. Subpart—Classification and Accounting Rules and Regulations (§§ 1002.100 through 1002.260).

2. Subpart—Determination and Public Announcement of Freight Zones (§§ 1002.500 and 1002.501).

Findings and Determinations

This action removes the aforementioned subparts issued by the market administrator of the New York-New Jersey order (Order 2) from publication in annual Code of Federal Regulations.

The market administrator will continue to promulgate and maintain classification and accounting rules and regulations and to determine and publicly announce freight zones pursuant to the provisions of the order and subject to the approval of the Secretary. The market administrator will also continue to publish these documents and make them available upon request from any interested party. Industry representatives may request a copy of these documents from the market administrator at any time.

The publication of the aforementioned subparts for Order 2 is furnished to the industry by the market administrator in the performance of his duties. The provisions of these subparts are issued and administered by the Order 2 market administrator as specified in § 1002.46 and § 1002.52 of the order. Thus, it is not necessary to replicate the administrator's efforts in this regard by publishing these subparts in the Code of Federal Regulations. Furthermore, this removal action is consistent with the President's regulatory reform initiative.

Pursuant to 5 U.S.C. 553, it is hereby found and determined, upon good cause, that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice or to engage in further public procedure prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because the removal of these subparts will not affect the operation or administration of the order or the provisions issued thereunder.

List of Subjects in 7 CFR Part 1002

Milk marketing orders.

For the reasons set forth in the preamble, 7 CFR Part 1002 is amended as follows:

PART 1002—MILK IN NEW YORK-NEW JERSEY MARKETING AREA

1. The authority citation for 7 CFR Part 1002 continues to read as follows:

Authority: 7 U.S.C. 601–674.

§ 1002.100–1002.260 [Removed]

2. In part 1002, Subpart—Classification and Accounting Rules and Regulations, §§ 1002.100 through 1002.260 and their undesignated centerheadings and the subpart heading are removed.

§ 1002.500–1002.501 [Removed]

3. In part 1002, Subpart—Determination and Public Announcement of Freight Zones, §§ 1002.500 through 1002.501, and their subpart heading are removed.

Dated: November 27, 1995.

Shirley R. Watkins,

Acting Assistant Secretary, Marketing and Regulatory Programs.

[FR Doc. 95–29460 Filed 12–1–95; 8:45 am]

BILLING CODE 3410–02–P

7 CFR Part 1002

[DA–95–23B]

Milk in the New York-New Jersey Marketing Area; Interim Rule: Termination of Certain Order Provisions and Removal of Certain Regulations of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim Rule terminating certain provisions with request for comments.

SUMMARY: This document removes certain provisions of the New York-New Jersey Federal milk marketing order (Order 2) and removes two subparts of provisions issued thereunder from publication in the Code of Federal Regulations. Specifically, this document terminates the requirement that certain changes to the market administrator's rules and regulations be published in the **Federal Register**. Additionally, this document removes the publication of two Order 2 subparts containing the market administrator's rules and regulations—Conduct of Hearings Relating to Suspended Cooperative Payments, and Cooperative Payment Rules and Regulations Approval of Tentative Amendment—from the annual Code of Federal Regulations. Nevertheless, the provisions of the subparts will continue to apply to the administration of the order and will be maintained by the market administrator as separate documents. This action is taken to reduce printing costs and to comply with the President's regulatory reform initiative.

DATES: Effective: December 4, 1995. Comments are due on or before January 3, 1996.

ADDRESSES: Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Gino Tosi, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202)690–1366.

SUPPLEMENTARY INFORMATION: This regulatory action is being taken as part of the National Performance Review program to eliminate unnecessary regulations and improve those that remain in force. The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that these actions would not have a significant economic impact on a substantial number of small entities. These actions would reduce the cost involved with publishing in the Code of Federal Regulations regulations that are available to the industry from the market administrator. Furthermore, except for order provisions concerning publication in the **Federal Register**, this action makes no changes in the operation of the order or the provisions of the rules and regulations issued thereunder.

The Department is issuing these interim rules in conformance with Executive Order 12866.

These interim rules have been reviewed under Executive Order 12778, Civil Justice Reform. They are not intended to have a retroactive effect. These interim rules will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with the rules.

The Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to the provisions of the Agricultural Marketing Agreement Act, the following provisions of the order regulating the handling of milk in the New York-New Jersey marketing area are terminated by this interim rule:

1. In § 1002.77(I)(1), the following words: "published in the **Federal Register** and".

2. In § 1002.77(I)(3), the following words: "approval, and shall be published in the **Federal Register** following such".

In addition, the following provisions of the rules and regulations issued under the order do not need to be published in the Code of Federal Regulations:

3. Subpart—Conduct of Hearings Relating to Suspended Cooperative Payments (§§ 1002.300 through 1002.353).

4. Subpart—Cooperative Payment Rules and Regulations Approval of Tentative Amendment (§§ 1002.400 through 1002.444).

All persons who want to send written data, views, or arguments about these interim actions should send two copies of them to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2971, South Building, P.O. Box 96456, Washington, DC 20090–6456, by the 30th day after the publication of this document in the **Federal Register**.

The comments that are received will be made available for public inspection in the Dairy Division during normal business hours (7 CAR 1.27(b)).

Statement of Consideration

This interim rule terminates the requirement which provides that certain rules and regulations issued by the market administrator of the New York-New Jersey order (Order 2) be published in the **Federal Register** after they have been approved by the Secretary. Additionally, two Order 2 subparts, which contain the market administrator's rules and regulations involving the conduct of hearings related to suspended cooperative payments and cooperative payment rules and regulations, would no longer be published in the annual Code of Federal Regulations.

The market administrator will continue to issue any specific rules and regulations that are needed to effectuate the provisions of the order regulating the handling of milk in the Order 2 marketing area. These rules and regulations are, and will continue to be, issued to facilitate the administration of the order and are updated as necessary, published, and made available to interested parties. Industry representatives may request a copy of the rules and regulations from the market administrator at any time.

This action will not change the rules and regulations previously issued by the Order 2 market administrator and now in effect to carry out the regulatory provisions of the order. Order 2 establishes specific procedures that must be followed by the market administrator in revising the rules and regulations. It also sets forth methods whereby interested parties are informed about proposals to change the rules and regulations and how they may participate in the promulgation process.

The printing and procedural functions involving the implementation of rules and regulations for Order 2 are accomplished by the market administrator in the performance of his duties. These matters are being adequately performed by the Order 2 market administrator. Thus, it should not be necessary to replicate the market administrator's efforts by requiring that certain portions of the rules and regulations, all of which must be approved by the Secretary, be published in the **Federal Register** or that the Order 2 subparts containing the rules and regulations be published in the Code of Federal Regulations each year. Furthermore, this action is consistent with the President's regulatory reform initiative.

Accordingly, with regard to the termination of the provisions of the order as hereinafter set forth, it is found in accordance with the Act that these provisions no longer tend to effectuate the declared policy of the Act. Pursuant to 5 U.S.C. 553, it is hereby found and determined, upon good cause, That it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule in effect and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because, except for order provisions concerning publication in the **Federal Register**, this action will not affect the operation or administration of the order or the provisions issued thereunder.

Written comments are invited from interested parties concerning this action.

List of Subjects in 7 CFR Part 1002

Milk marketing orders.

Order

For the reasons set forth in the preamble, 7 CFR part 1002 is amended as follows:

PART 1002—MILK IN NEW YORK-NEW JERSEY MARKETING AREA

1. The authority citation for 7 CFR part 1002 continues to read as follows:

Authority: 7 U.S.C. 601–674.

§ 1002.77 [Amended]

2. In § 1002.77, paragraph (i)(1), the words "published in the **Federal Register** and" are removed.

3. In § 1002.77, paragraph (i)(3), the words "approval, and shall be published in the **Federal Register** following such" are removed.

§§ 1002.300–1002.353 [Removed]

4. In part 1002, Subpart—Conduct of Hearings Relating to Suspended Cooperative Payments (§§ 1002.300 through 1002.353) is removed.

§§ 1002.400–1002–444 [Removed]

5. Subpart—Cooperative Payment Rules and Regulations Approval of Tentative Amendment, §§ 1002.400 through 1002.444 and their undesignated centerheadings and the subpart heading are removed.

Dated: November 27, 1995.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule adjusts representation on the Cattlemen's Beef Promotion and Research Board (Board), established under the Beef Promotion and Research Act (Act) of 1985, to reflect changes in cattle inventories and cattle and beef imports that have occurred since the Board was reapportioned in 1993. These adjustments are required by the Beef Promotion and Research Order (Order) and would result in an increase in Board membership from 107 to 111, effective with the Secretary's 1996 appointments.

EFFECTIVE DATE: January 3, 1996.

FOR FURTHER INFORMATION CONTACT: Ralph L. Tapp, Chief, Marketing Programs Branch, Livestock and Seed Division, Agricultural Marketing Service (AMS), USDA, Room 2606–S, P.O. Box 96456, Washington, DC 20090–6456. 202/720–1115.

SUPPLEMENTARY INFORMATION:

Executive Orders 12866 and 12778 and the Regulatory Flexibility Act

This final rule has been determined to be not significant for purposes of Executive Order 12866 and therefore has not been reviewed by the Office of Management and Budget (OMB).

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. It is not intended to have retroactive effect. Section 11 of the Act provides that nothing in the Act may be construed to preempt or supersede any other program relating to beef promotion organized and operated under the laws of the United States or any State. There are no administrative proceedings that must be exhausted prior to any judicial challenge to the provisions of this rule.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Administrator of AMS has determined that this final rule will not have a significant impact on a substantial number of small entities as defined by RFA since it only adjusts representation on the Board to reflect changes in domestic cattle inventory and imports.

The Board was initially appointed August 4, 1986, pursuant to the provisions of the Act (7 U.S.C. 2901 *et seq.*) and the Order issued thereunder (7 CFR 1260.101 *et seq.*). Domestic representation on the Board is based on cattle inventory numbers, and importer representation is based on the conversion of the volume of imported cattle, beef, or beef products into live animal equivalencies.

Section 1260.141(b) of the Order provides that the Board shall be composed of cattle producers and importers appointed by the Secretary from nominations submitted by certified producer and importer organizations. A producer may only be nominated to represent the unit in which that producer is a resident.

Section 1260.141(c) of the Order provides that at least every 3 years and not more than every 2 years, the Board shall review the geographic distribution of cattle inventories throughout the United States and the volume of imported cattle, beef, and beef products and, if warranted, shall reapportion

units and/or modify the number of Board members from units in order to reflect the geographic distribution of cattle production volume in the United States and the volume of cattle, beef, or beef products imported into the United States.

Section 1260.141(d) of the Order authorizes the Board to recommend to the Secretary modifications in the number of cattle per unit necessary for representation on the Board.

Section 1260.141(e)(1) provides that each geographic unit or State that includes a total cattle inventory equal to or greater than 500,000 head of cattle shall be entitled to one representative on the Board. Section 1260.141(e)(2) provides that States that do not have total cattle inventories equal to or greater than 500,000 head shall be grouped, to the extent practicable, into geographically-contiguous units, each of which have a combined total inventory of not less than 500,000 head. Such grouped units are entitled to at least one representative on the Board. Each unit that has an additional 1 million head of cattle within a unit qualifies for additional representation on the Board as provided in § 1260.141(e)(4). As provided in § 1260.141(e)(3), importers are represented by a single unit, with the number of Board members based on a conversion of the total volume of imported cattle, beef, or beef products into live animal equivalencies.

The initial Board appointed in 1986 was composed of 113 members. Reapportionment based on a 3-year average of cattle inventory numbers and import data, reduced the Board to 111 members in 1990 and 107 members in 1993.

The current Board representation by States or units has been based on an average of the January 1, 1990, 1991, and 1992 inventory of cattle in the various States as reported by the National Agricultural Statistics Service of the Department of Agriculture (USDA). Importer representation has been based on a combined total average of the 1989, 1990, and 1991 live cattle imports as published by the Foreign Agricultural Service (FAS) of USDA and the average of the 1989, 1990, and 1991 live animal equivalents for imported beef products.

Recommendations concerning Board reapportionment were approved by the Board at its July 24, 1995, meeting. In considering reapportionment, the Board reviewed cattle inventories as well as cattle, beef, and beef product import data for the period January 1, 1992, to January 1, 1995. The Board recommended that a 3-year average of cattle inventories and import numbers should be continued. The Board determined that an average of the January 1, 1993, 1994, and 1995 USDA cattle inventory numbers would best reflect the number of cattle in each State or unit since the 1993 reapportionment.

The Board reviewed the March 1995 FAS circular, "U.S. Trade and Prospects, Dairy, Livestock, and Poultry," to determine proper importer representation. The Board recommended the use of a combined total of the average of the 1992, 1993, and 1994 cattle import data and the average of the 1992, 1993, and 1994 live animal equivalents for imported beef products. The method used to calculate the total number of live cattle equivalents was the same as that used in the previous reapportionment of the Board. The recommendation for importer representation is based on the most recent 3-year average of data available to the Board at its July 24, 1995, meeting to be consistent with the procedures used for domestic representation.

On September 8, 1995, AMS published in the **Federal Register** (60 FR 46781) for public comment a proposed rule providing for the adjustment in Board membership.

The Department did not receive any comments concerning the proposed rule. Thus, the reapportionment of the Board in this final rule is unchanged from the proposed rule. This final rule increases the number of representatives on the Board from 107 to 111. Two States—Iowa and Ohio—lose one member each; three States—Missouri, Montana, and South Dakota—gain one member each; Texas gains two members; and the importer unit gains one member. Nevada loses its only member. Nevada will be merged with Oregon, a contiguous State that has only one member, to form a Western unit. The combined cattle inventory of Nevada and Oregon will entitle the Western unit to two seats on the Board, thus enabling both States to be jointly represented. The States and units affected by the reapportionment plan and the current and revised member representation per unit are as follows:

States	Current representation	Revised representation
1. Iowa	5	4
2. Missouri	4	5
3. Montana	2	3
4. Ohio	2	1
5. South Dakota	3	4
6. Texas	13	15
7. Western	0	2
Nevada	1	
Oregon	1	

New Board representation for the entire 40 units is shown in the revised § 1260.141(a) contained herein. The new Board reapportionment will become effective with 1996 nominations and appointments.

This action makes final the provisions of the proposed rule published at 60 FR 46781 on September 8, 1995.

List of Subjects in 7 CFR Part 1260

Administrative practice and procedure, Advertising, Agricultural research, Imports, Marketing agreement, Meat and meat products, Reporting and recordkeeping requirements.

For reasons set forth in the preamble, 7 CFR part 1260 is amended as follows:

PART 1260—BEEF PROMOTION AND RESEARCH

1. The authority citation for 7 CFR part 1260 continues to read as follows:

Authority: 7 U.S.C. 2901 *et seq.*

2. In section 1260.141, paragraph (a) and the table immediately following it, are revised to read as follows:

§ 1260.141 Membership of Board.

(a) For Board nominations and appointments beginning with those in 1996, the United States shall be divided into 39 geographical units and 1 unit representing importers, and the number of Board members from each unit shall be as follows:

CATTLE AND CALVES [1]

State/unit	(1,000 head)	Directors

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

[INS No. 1654–94]

RIN 1115–AD66

Temporary Alien Workers Seeking H Classification for the Purpose of Obtaining Graduate Medical Education or Training

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: After consideration of comments filed and the relevant issues, the Immigration and Naturalization Service (Service) has decided not to implement one of the changes previously proposed, to preclude the use of the H–1B non-immigrant classification for graduates of foreign medical schools pursuing medical residencies in the United States. However, this rule amends the Service's regulations in other respects by modifying the filing procedures for certain H nonimmigrant petitions involving multiple beneficiaries. The rule allows a petitioner to file a single petition even when the beneficiaries listed on the petition will be applying for nonimmigrant visas at different consulates or for entry into the United States at different Ports-of-Entry, provided that the aliens will be performing the same service or receiving the same training, for the same period of time, and in the same location. This rule further amends the Service's regulations by clearly differentiating between an H–3 alien trainee and an H–3 special education trainee with respect to the time limitations on admission for these types of classifications. This rule will ease the burden on the public when filing H petitions involving multiple beneficiaries and will correct a regulatory inconsistency regarding the limitations on stay for H–3 nonimmigrant aliens.

EFFECTIVE DATE: December 4, 1995.

FOR FURTHER INFORMATION CONTACT: John W. Brown, Adjudications Officer, Adjudications Division, Immigration and Naturalization Service, 425 I Street NW., Room 3214, Washington, DC 20536, telephone (202) 514–3240.

SUPPLEMENTARY INFORMATION: On July 14, 1994, at 59 FR 35866–35867, the Immigration and Naturalization Service (Service) published a proposed rule in the **Federal Register** addressing three issues within the H nonimmigrant classification. The principal proposal related to the treatment of certain foreign medical graduates seeking to be classified under the H–1B nonimmigrant classification as amended by the Miscellaneous and Technical Immigration and Naturalization Amendments of 1991 (MTINA). The Service proposed that graduates of foreign medical schools should be prohibited from seeking H–1B classification for the purpose of pursuing a medical residency in the United States and that, instead, these aliens should be required to avail themselves of the J–1 nonimmigrant classification. The Service also proposed that those aliens already admitted to the United States as H–1B nonimmigrant aliens for the purpose of pursuing a medical residency be required to seek a change of nonimmigrant status to that of a J–1 nonimmigrant alien to complete the residency. After reviewing the comments received from the public, the Service has decided not to promulgate this portion of the proposed rule.

The comment period for the proposed rule ended on September 12, 1994. In response to the proposed rule, the Service received a total of 325 comments. The following is a discussion of the comments and the Service's response.

Multiple Beneficiaries and Time Limitations on Certain H–3 Trainees

Of the 325 comments received, only one addressed the Service's proposal relating to multiple beneficiaries on H petitions and its proposal regarding time limitations for H–3 alien trainees. The commenter opined that these two proposals comported with Congressional intent and recommended that they be adopted. The Service concurs and accordingly will incorporate those two proposals in the final rule.

Medical Residencies Under the H–1B Nonimmigrant Classification

The Service received 325 comments addressing the issue of medical residencies under the H–1B nonimmigrant classification. Only 11 commenters agreed with the Service's proposal that graduates of foreign medical schools be prohibited from using the H–1B nonimmigrant classification for the purpose of pursuing a medical residency. The remainder of the commenters expressed the opinion that Congress intended that graduates of foreign medical schools be permitted to pursue medical residencies under the H–1B nonimmigrant classification. In addition, 235 of the commenters stated that it was not fair or appropriate for the Service to require that an alien already admitted into the United States as an H–1B nonimmigrant alien in order to pursue a medical residency be required to change his or her nonimmigrant status to a J–1 nonimmigrant alien in order to complete the residency.

In proposing this rule, the Service expressed its opinion that Congress did not intend the H–1B nonimmigrant classification to be used by graduates of foreign medical schools coming to the United States to pursue medical residencies or otherwise receive graduate medical education or training, and that, therefore, these aliens should

seek classification as J–1 nonimmigrant aliens. This opinion was based on the Service's examination of the relevant legislation, including the Health Professionals Education Assistance Act of 1976 (HPEAA), Pub. L. 94–484 and MTINA. The Service took note that the HPEAA established the J–1 classification as the sole vehicle, with certain limited exceptions, for graduates of medical schools to obtain graduate medical education or training in the United States, including medical residencies. *See* sections 101(a)(15)(J) and 212(j)(1) of the Act; *see also* pre-IMMACT (Immigration and Nationality Act of 1990) section 101(a)(15)(H)(i) of the Act. The Service further noted that, by amending sections 101(a)(15)(H)(i)(b) and 212(j)(2) of the Act, MTINA provided an avenue for foreign medical graduates to enter the United States in H–1B status to perform services in the medical professions. The Service opined, however, that MTINA did not alter the HPEAA's requirement, as set forth in section 212(j)(1) of the Act, that a graduate of a foreign medical school seeking education or training do so only as a J–1 nonimmigrant alien. In support of this position, the Service expressed its belief that Congress would not have placed in juxtaposition two such clearly different statutory provisions as section 212(j)(1) and section 212(j)(2) of the Act had it intended for the H–1B and J–1 classifications to overlap with respect to foreign medical graduates seeking graduate medical education or training.

After a careful review of the comments received in response to the proposed rule and a further review of the relevant legislative history, the Service has opted to withdraw this portion of the proposed rule. The Service is now of the opinion that the statute can be reasonably interpreted either to provide that as proposed by the Service, the H–1B classification is not available for graduates of foreign medical schools to take medical residencies or, as is the current practice, the H–1B classification is available for graduates of foreign medical schools for medical residencies.

The Service has elected to adopt the second interpretation and continue its current practice of allowing graduates of foreign medical schools to take residencies under the H–1B classification. In so doing, the Service notes first that nothing in the statute or the relevant legislative history specifically precludes H–1B classification for aliens seeking graduate medical training, and second, under the language of section 214(i) of the Act, a graduate medical education program, such as a residency, could in some cases meet the definition of "specialty occupation" for H–1B purposes. *See also* 8 CFR 214.2(h)(4)(i). In addition, we note, as did some commenters, that a medical residency can reasonably be considered to be either a training program or a specialty occupation. This position is consistent with that taken by the Service in *Matter of Bronx Municipal Hospital Center*, 12 I&N Dec. 768 (1968), where the Regional Commissioner held that a medical residency is primarily clinical in nature and, therefore, does not qualify as an H–3 training program.

In deciding to withdraw this portion of the rule, the Service also found persuasive the comments submitted by a number of large urban medical facilities indicating that they would be unable to recruit qualified individuals to pursue residencies under the J–1 program. These commenters indicated that they have relied heavily on the use of the H–1B program to staff their residency programs and that the requirement that these aliens use the J–1 program would result in a curtailment of medical services which could otherwise be provided to the surrounding community.

Finally, the Service was also impressed by the sheer number of comments received in opposition to the rule. While three major organizations involved in the medical health field supported the Service's proposed rule, over 300 other commenters expressed the opinion that graduates of foreign medical schools should be permitted to pursue medical residencies as H–1B nonimmigrant aliens. The three commenters based their opinion on the belief that medical residencies should be characterized as training programs as opposed to temporary employment as a specialty occupation. However, as indicated above, the Service is of the opinion that a medical residency can be considered either a training program or a specialty occupation. *See Bronx Municipal Hospital Center, supra.*

As a result of the Service's withdrawal of this portion of the proposed rule, graduates of foreign medical schools will continue to be permitted to pursue a medical residency under the H–1B classification provided, of course, that all regulatory and statutory requirements for the classification are met. In addition, graduates of foreign medical schools will also continue to be eligible to pursue medical residencies under the J–1 nonimmigrant classification.

Prospective petitioners for H–1B nonimmigrant aliens seeking to pursue medical residencies should be aware of the obligations which are assumed when an H–1B petition is filed. These obligations include both the requirement that the prospective employer pay the alien's return transportation if the alien is dismissed before the expiration of the validity of the petition and compliance with section 212(n) of the Act.

This rule will have no adverse effect on family well-being.

Regulatory Flexibility Act

The Commissioner of the Immigration and Naturalization Service, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that the rule will not have a significant economic impact on a substantial number of small entities. This regulation merely modifies certain filing procedures for H petitions.

Executive Order 12866

This rule is not considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, and the Office of Management and Budget has waived its review process under section 6(a)(3)(A).

Executive Order 12612

The regulation proposed herein will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Employment, Organization and functions (Government agencies).

Accordingly, part 214 of chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 214—NONIMMIGRANT CLASSES

1. The authority citation for part 214 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1182, 1184, 1186a, 1187, 1221, 1281, 1282; 8 CFR part 2.

2. Section 214.2 is amended by:

a. Revising paragraph (h)(2)(ii); and by

b. Revising paragraph (h)(13)(iv), to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(h) * * *

(2) * * *

(ii) *Multiple beneficiaries.* More than one beneficiary may be included in an H–2A, H–2B, or H–3 petition if the beneficiaries will be performing the same service, or receiving the same training, for the same period of time, and in the same location.

* * * * *

(13) * * *

(iv) *H–2B and H–3 limitation on admission.* An H–2B alien who has spent 3 years in the United States under section 101(a)(15)(H) and/or (L) of the Act; an H–3 alien participant in a special education program who has spent 18 months in the United States under section 101(a)(15)(H) and/or (L) of the Act; and an H–3 alien trainee who has spent 24 months in the United States under section 101(a)(15)(H) and/or (L) of the Act may not seek extension, change status, or be readmitted to the United States under section 101(a)(15)(H) and/or (L) of the Act unless the alien has resided and been physically present outside the United States for the immediate prior 6 months.

BILLING CODE 4410–10–M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1145

Regulation of Products Subject to Other Acts Under the Consumer Product Safety Act

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule; revocation of rules.

SUMMARY: The Commission revokes seven rules transferring regulation of risks of injury from the Federal Hazardous Substances Act to the Consumer Product Safety Act. The Commission is revoking these rules because they are no longer needed.

EFFECTIVE DATE: December 4, 1995.

FOR FURTHER INFORMATION CONTACT: Allen F. Brauninger, Attorney, Office of the General Counsel, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504–0980, extension 2216.

SUPPLEMENTARY INFORMATION: The Consumer Product Safety Act (CPSA) (15 U.S.C. 2051 *et seq.*) established the Consumer Product Safety Commission (the Commission) to protect the public from unreasonable risks of injury associated with consumer products. Section 3(a)(1) of the CPSA (15 U.S.C. 2052(a)(1)) defines the term "consumer product" to mean an article which is produced or distributed for sale to, or use by, consumers.

Section 30(a) of the CPSA (15 U.S.C. 2079(a)) transferred to the Commission the authority formerly exercised by the Secretary of Health, Education, and Welfare under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261 *et seq.*). Section 30(d) of the CPSA requires the Commission to regulate under the FHSA any risk of injury associated with a "consumer product" which can be eliminated or reduced to a sufficient extent by action under the FHSA, unless the Commission issues a rule to transfer regulation of that risk of injury to the CPSA.

B. Regulation of Toys and Children's Articles

Toys and other articles intended for use by children are "consumer products," as that term is defined by section 3(a)(1) of the CPSA, because they are articles which are produced for sale to consumers. Sections 2(f) and 3(e) of the FHSA (15 U.S.C. 1261(f), 1262(e)) authorize the Commission to issue rules to ban any "toy or other article intended for use by children" which presents a "mechanical hazard." The procedural steps required to issue a banning rule are set forth in sections 3(e) through (i) of the FHSA (15 U.S.C. 1262(e)–(i)).

C. Corrective Action Under the FHSA

Before 1984, the Commission's authority to order corrective action for toys and children's articles under section 15 of the FHSA (15 U.S.C. 1264) was limited to those items which violated an applicable banning rule.

Between 1981 and 1984, the Commission received reports of deaths and injuries associated with several types of toys and children's articles. These products included:

- Stuffed toys suspended from cords or strings which presented a risk of strangulation death or injury.
- Squeeze toys which presented a risk of suffocation death or injury.
- Mesh-sided playpens and mesh-sided portable cribs which presented a risk of asphyxia to children from airway blockage or chest compression.
- Expandable enclosures made from criss-crossed slats which presented a strangulation hazard to children.
- Baby cribs with hardware failures or omissions which presented risks of death or injury to children.
- Baby bassinets with legs that collapsed and presented risks of death or injury to infants.

All of these products were "toys or other articles intended for use by children" which presented a "mechanical hazard." However, none of these products was subject to a banning rule issued under provisions of the FHSA. The Commission estimated that issuance of a banning rule would take about two years for each product.

D. Corrective Action Under the CPSA

Then as now, provisions of section 15 of the CPSA (15 U.S.C. 2064) authorized the Commission to issue a corrective action order for any consumer product which contains a defect which creates a "substantial risk of injury to the public" whether or not the product is in violation of a consumer product safety rule or other regulation.

E. Issuance of Transfer Rules

After considering the risks of injury to children presented by the products described above and the provisions of the FHSA and the CPSA, the Commission decided to transfer regulation of those risks from the FHSA to the CPSA. Although the risks of injury might ultimately be eliminated or reduced to a sufficient extent by action under the FHSA, issuance of rules to ban the products under consideration would be required before the Commission could issue a corrective action under the FHSA. The Commission concluded that transfer of regulation of the risks of injury from the FHSA to the CPSA was necessary because corrective action, if appropriate, could be accomplished more efficiently and expeditiously under the CPSA than under the FHSA.

From 1982 through 1984, the Commission issued seven rules under provisions of section 30(d) of the CPSA to transfer regulation of risks of injury associated with toys and children's articles from the FHSA to the CPSA. Those rules are codified in title 16 of the Code of Federal Regulations as:

§ 1145.9 Certain stuffed toys; risk of strangulation injury (issued March 31, 1982, 47 FR 13516).

§ 1145.10 Certain squeeze toys; risk of strangulation injury and/or suffocation injury from lodging in the throat (issued March 15, 1984, 49 FR 9722).

§ 1145.11 Certain play yards (playpens) with mesh sides; risk of asphyxia from airway blockage or chest compression (issued July 27, 1983, 48 FR 34023).

§ 1145.12 Certain portable cribs with mesh sides; risk of asphyxia from airway blockage or chest compression (issued July 27, 1983, 48 FR 34023).

§ 1145.13 Certain expandable children's enclosures; risk of strangulation (issued March 5, 1984).

§ 1145.14 Baby cribs with certain hardware failures or omissions; risks of death or injury (issued April 10, 1984, 49 FR 14101).

§ 1145.15 Baby bassinets having legs that collapse; risks of death or injury (issued July 27, 1984, 49 FR 30171).

Thereafter, the Commission obtained voluntary corrective action plans from manufacturers of the products which were the subjects of the transfer rules.

F. Amendment of the FHSA

On October 17, 1984, the Toy Safety Act of 1984 (Pub. L. 98–491, 98 Stat. 2269) became law. This legislation is codified as section 15(c) of the FHSA (15 U.S.C. 1274(c)). It authorizes the Commission to order corrective action with regard to any toy or children's article which is not in violation of a banning rule but which nevertheless presents a "substantial risk of injury to children." With the addition of section 15(c) to the FHSA, the provisions of the FHSA and the CPSA authorizing the Commission to order corrective action are now substantially similar.

G. Revocation of Transfer Rules

Manufacturers of the products subject to the transfer rules described above have taken all actions required by the corrective action plans accepted by the Commission. If, in the future, the Commission learns of similar risks of injury presented by such toys and children's articles, section 15(c) of the FHSA authorizes the Commission to issue an order for corrective action without first issuing a banning rule. Consequently, the Commission is revoking the transfer regulations codified at 16 CFR 1145.9 through 1145.14 because they are no longer needed.

Generally, the Administrative Procedure Act (APA) (5 U.S.C. 553) requires agencies to publish a notice of proposed rulemaking before issuing or revoking a regulation. However, the APA provides at 5 U.S.C. 553(b)(A) that requirements for a notice of proposed rulemaking are not applicable to rules of agency procedure or practice. Because the rules being revoked are procedural rules, notice of proposed rulemaking is not required.

The APA also requires at 5 U.S.C. 553(d) that a substantive rule must be published at least 30 days before its effective date. However, the rules being revoked are procedural rules which do not have any substantive effect. Because the rules at issue meet these criteria, this revocation shall become effective immediately.

H. Conclusion

Therefore, under the authority of section 553 of the Administrative Procedure Act and section 30(d) of the Consumer Product Safety Act, the Commission hereby amends title 16 of the Code of Federal Regulations, Chapter II, Subchapter B, Part 1145 to read as follows:

PART 1145—AMENDED

1. The authority for Part 1145 continues to read as follows:

Authority: Sec. 30(d), Pub. L. 92–573, 86 Stat. 1231 as amended 90 Stat. 510; 15 U.S.C. 2079(d).

§§ 1145.9 through 1145.15 [Removed and reserved]

2. Sections 1145.9, 1145.10, 1145.11, 1145.12, 1145.13, 1145.14, and 1145.15 are removed and reserved.

Dated: November 28, 1995.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

RIN 1545–AM15

Definition of a Controlled Foreign Corporation, Foreign Base Company Income and Foreign Personal Holding Company Income of a Controlled Foreign Corporation; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to final regulations (TD 8618) which were published in the **Federal Register**, Thursday, September 7, 1995 (60 FR 46500), governing the definition of a controlled foreign corporation and the definitions of foreign base company income and foreign personal holding company income of a controlled foreign corporation.

EFFECTIVE DATE: September 7, 1995.

FOR FURTHER INFORMATION CONTACT: Valerie Mark, (202) 622–3840 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections amend the Income Tax Regulations (26 CFR Part 1) under sections 954(b), 954(c) and 957(a) of the Internal Revenue Code.

Need for Correction

As published, the final regulations (TD 8618) contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulations (TD 8618), which was the subject of FR Doc. 95–21838, is corrected as follows:

1. On page 46501, column 3, in the preamble under the paragraph heading "*Section 1.954–1: Foreign Base Company Income*", paragraph 1 in the column, the sixth line from the bottom of the paragraph, the language "904(f)(5). Commentators stated that" is corrected to read "904(f)(5). Commenters stated that".

2. On page 46503, column 2, in the preamble under the paragraph heading "*Section 1.954–2: Foreign Personal Holding Company Income*", the first full paragraph in the column, line 6, the language "transactions entered on or after March 7," is corrected to read "transactions entered into on or after March 7,".

3. On page 46505, column 2, in the preamble under the paragraph heading "*Section 1.954–2: Foreign Personal Holding Company Income*", the second full paragraph in the column, line 3, the language "1.952–2(e)(3)(iv) excludes from foreign" is corrected to read "1.954–2(e)(3)(iv) excludes from foreign".

§ 1.954–0 [Corrected]

4. On page 46509, middle of column 1, § 1.954–0 (b), the entry for § 1.954–2(b)(3), "(3) Treatment of tax-exempt interest. [RESERVED.]" is corrected to read "(3) Treatment of tax-exempt interest. [RESERVED]".

§ 1.954–1 [Corrected]

5. On page 46513, column 2, § 1.954–1(d)(7)(i), paragraph (ii) of Example 1, line 7, the language "subpart F under the rules of this paragraph" is corrected to read "subpart F income under the rules of this paragraph".

6. On page 46513, column 2, § 1.954–1(d)(7)(i), paragraph (ii) of Example 1, line 18, the language "year is 34 percent. Accordingly, the net item" is corrected to read "year is 35 percent. Accordingly, the net item".

7. On page 46513, column 2, § 1.954–1(d)(7)(i), paragraph (ii) of Example 1, the third and fourth lines from the bottom of the paragraph, the language "that is greater that 30.6 percent (90 percent of 34 percent). However, for purposes of" is corrected to read "that is greater than 31.5 percent (90 percent of 35 percent). However, for purposes of".

8. On page 46513, column 2, § 1.954–1(d)(7)(i), paragraph (ii) of Example 2, line 2, the language "greater than 30.6 percent. The net item of" is corrected to read "greater than 31.5 percent. The net item of".

9–11. On page 46513, column 3, § 1.954–1 (d)(7)(i), paragraph (ii) of Example 3, line 3, the language "greater than 30.6 percent, but Item 2 is not." is corrected to read "greater than 31.5 percent, but Item 2 is not.".

12–13. On page 46513, column 3, § 1.954–1 (d)(7)(i), Example 4, line 7, the language "effective rate greater than 30.6 percent. The" is corrected to read "effective rate greater than 31.5 percent. The".

14. On page 46514, column 2, § 1.954–1 (d)(7)(ii), paragraph (iv) of Example 1, the last two lines of the paragraph, the language "States rate of taxation under section 11 is 34 percent." is corrected to read "States rate of taxation under section 11 is 35 percent.".

15. On page 46514, column 3, § 1.954–1 (d)(7)(ii), paragraph (v) of Example 1, the fourteenth line from the bottom of the column, the language "tax rate ..... 30.6%" is corrected to read "tax rate ..... 31.5%".

16. On page 46515, column 1, § 1.954–1 (d)(7)(ii), paragraph (v) of Example 1, in item "(29)", the last line, the language

"line (27) over line (26) ..... 100" is corrected to read

"line (27) over line (26)) ..... 100".

17. On page 46515, column 2, § 1.954–1 (d)(7)(ii), paragraph (iv) of Example 2, the last line, the language "of taxation under section 11 is 34 percent" is corrected to read "of taxation under section 11 is 35 percent".

18. On page 46515, column 3, § 1.954–1 (d)(7)(ii), paragraph (v) of Example 2, in item "(15)", the last line, the language "tax rate ..... 30.6%" is corrected to read

"tax rate ..... 31.5%".

19. On page 46517, column 1, § 1.954–1 (f)(2)(iv), line 4, the language "the principles of section 958(a) shall be" is corrected to read "the principles of section 958 shall be".

§ 1.954–2 [Corrected]

20. On page 46521, column 3, § 1.954–2 (b)(4)(x), is corrected to read as follows:

§ 1.954–2 Foreign personal holding company income.

* * * * *

(b) * * *

(4) * * *

(x) *Treatment of certain stock interests.* Stock in a controlled foreign corporation (lower-tier corporation) that is incorporated in the same country as the payor and that is more than 50-percent owned, directly or indirectly, by the payor within the meaning of section 958(a) shall be considered located in the payor's country of incorporation and, solely for purposes of section 954(c)(3), used in a trade or business of the payor in proportion to the value of the assets of the lower-tier corporation that are used in a trade or business in the country of incorporation. The location of assets used in a trade or business of the lower-tier corporation shall be determined under the rules of this paragraph (b)(4).

* * * * *

21. On page 46523, column 2, § 1.954–2 (d)(1)(i), line 6, the language "creation, or production of, or in the" is corrected to read "creation or production of, or in the".

22. On page 46523, column 3, § 1.954–2 (d)(3), Example 1, line 4, the language "country X. At the research facility employees" is corrected to read "country X. At the research facility, employees".

23. On page 46523, column 3, § 1.954–2 (d)(3), Example 1, line 18, the language "creation, or production of, or in the" is corrected to read "creation or production of, or in the".

24. On page 46524, column 3, § 1.954–2 (e)(2)(ii) introductory text, line 2, the language "the sale, exchange, or retirement of a" is corrected to read "the sale, exchange or retirement of a".

25. On page 46525, column 2, § 1.954–2 (f)(2)(iii)(A), line 6, the language "merchant, or handler of commodities if" is corrected to read "merchant or handler of commodities if".

26. On page 46525, column 2, § 1.954–2 (f)(2)(iii)(B) introductory text, line 5, the language "producer, processor, merchant, or" is corrected to read "producer, processor, merchant or".

27. On page 46525, column 3, § 1.954–2 (f)(2)(iii)(C), line 4, the language "processor, merchant, or handler of" is corrected to read "processor, merchant or handler of".

28. On page 46525, column 3, § 1.954–2 (f)(2)(iii)(E), line 4, the language "producer, processor, merchant, or" is corrected to read "producer, processor, merchant or".

29. On page 46526, column 1, § 1.954–2 (g)(2)(ii)(A), line 1, the language "*General Rule.* Foreign currency gain or" is corrected to read "*General rule.* Foreign currency gain or".

30. On page 46527, column 2, § 1.954–2 (g)(3)(iv), paragraph (ii) of the Example, third line from the bottom of the paragraph, the language "transactions generate a net foreign currency" is corrected to read "transactions generate a net foreign base company sales".

31. On page 46528, column 1, § 1.954–2 (h)(2)(i)(A), line 3, the language "payments, cash flows, or return" is corrected to read "payments, cash flows or return".

32. On page 46528, column 1, § 1.954–2 (h)(2)(i)(G), lines 2 and 3, the language "provide financing, whether or not such financing actually is provided;" is corrected to read "provide financing, if any portion of such financing is actually provided;".

33. On page 46528, column 3, § 1.954–2 (h)(4)(iv), Example 1, line 10, the language "receivable is acquired by *FS*). *FS* purchases" is corrected to read "receivables are acquired by *FS*). *FS* purchases".

34. On page 46528, column 3, § 1.954–2 (h)(4)(iv), Example 1, line 13, the language "obligor under the receivable on Day 40." is corrected to read "obligor under the receivables on Day 40.".

35. On page 46528, column 3, § 1.954–2 (h)(4)(iv), Example 2, lines 4 through 9, the language "under the factored receivable on Day 40, *FS* sells the receivable to controlled foreign corporation *Y* on Day 15 for $97. Both the income derived by *FS* on the factored receivable and the income derived by *Y* (other than stated interest) on the receivable" is corrected to read "under the factored receivables on Day 40, *FS* sells the receivables to controlled foreign corporation *Y* on Day 15 for $97. Both the income derived by *FS* on the factored receivables and the income derived by *Y* (other than stated interest) on the receivables".

36. On page 46529, column 1, § 1.954–2 (h)(4)(iv), Example 5, line 3, the language "receivable to *Y* for $99 on day 45, at which" is corrected to read "receivables to *Y* for $99 on Day 45, at which".

37. On page 46529, column 1, § 1.954–2 (h)(4)(iv), Example 5, lines 7 through 10, the language "receivable at a rate equal to at least 120 percent of the applicable Federal short-term rate, income derived by *Y* from the factored receivable is excluded from factoring income" is corrected to read "receivables at a rate equal to at least 120 percent of the applicable Federal short-term rate, income derived by *Y* from the factored receivables is excluded from factoring income".

38. On page 46529, column 1, § 1.954–2 (h)(4)(iv), Example 6, line 4, the language "controlled foreign corporation. On Day 1" is corrected to read "controlled foreign corporation. On Day 1,".

39. On page 46529, column 2, § 1.954–2 (h)(6), Example 1, is corrected to read as follows:

§ 1.954–2 Foreign personal holding company income.

* * * * *

(h) * * *

(6) * * *

Example 1. *CFC*, a controlled foreign corporation, promises that Corporation *A* may borrow up to $500 in principal for one year beginning at any time during the next three months at an interest rate of 10 percent. In exchange, Corporation *A* pays *CFC* a commitment fee of $2. Pursuant to this agreement, *CFC* lends $80 to Corporation *A*. As a result, the entire $2 fee is included in the computation of *CFC*'s foreign personal holding company income under paragraph (h)(2)(i)(G) of this section.

* * * * *

40. On page 46529, column 2, § 1.954–2 (h)(6), paragraph (i) of Example 3, lines 7 and 8, the language "a floating rate of interest set at the London Interbank Offered Rate (LIBOR) plus one" is corrected to read "a floating rate of interest set at LIBOR plus one".

41. On page 46529, column 3, § 1.954–2 (h)(6), paragraph (i) of Example 4, line 1 in the column, the language "contemporaneously, enters into a 3 month" is corrected to read "contemporaneously, enter into a 3-month".

§ 1.957–1 [Corrected]

42. On page 46529, column 3, § 1.957–1 (a)(2), the third line from the bottom of the paragraph, the language "association, joint stock company, or" is corrected to read "association, joint stock company or".

RIN 1545–AL57

Certain Publicly Traded Partnerships Treated as Corporations

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the classification of certain publicly traded partnerships as corporations. These regulations provide guidance needed by taxpayers to comply with changes to the law made by the Omnibus Budget Reconciliation Act of 1987. The regulations affect the classification of certain partnerships for federal tax purposes.

DATES: These regulations are effective December 4, 1995.

For dates of applicability of these regulations, see § 1.7704–1(l).

FOR FURTHER INFORMATION CONTACT: Christopher T. Kelley, (202) 622–3080 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Introduction

This document adds § 1.7704–1 to the Income Tax Regulations (26 CFR part 1) relating to the definition of a publicly traded partnership under section 7704(b) of the Internal Revenue Code (Code).

Background

Section 7704 was added to the Code by section 10211(a) of the Omnibus Budget Reconciliation Act of 1987 (Public Law 100–203), as amended by sections 2004(f)(1)–(5) of the Technical and Miscellaneous Revenue Act of 1988 (Public Law 100–647). Section 7704(a) provides that a publicly traded partnership is treated as a corporation for federal tax purposes unless the partnership meets the 90 percent qualifying income test of section 7704(c) or qualifies as an existing partnership. The term *existing partnership* is defined in § 1.7704–2. Under section 7704(b), a partnership is a publicly traded partnership if interests in the partnership are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof. Section 7704 applies to all domestic and foreign entities treated as partnerships under section 7701, including limited liability companies and other entities treated as partnerships for federal tax purposes.

Notice 88–75 (1988–2 C.B. 386) was issued to provide interim guidance on the definition of a publicly traded partnership under section 7704(b). Notice 88–75 provides that interests in a partnership are not treated as readily tradable on a secondary market or the substantial equivalent thereof for purposes of section 7704(b)(2) if the interests are: (1) Issued in certain private placements; (2) transferred pursuant to transfers not involving trading; (3) traded in amounts that meet the requirements of a 5-percent or 2-percent safe harbor; (4) transferred through a matching service that meets certain requirements; or (5) transferred pursuant to a qualifying redemption or repurchase agreement. Notice 88–75 does not address when partnership interests are treated as traded on an established securities market for purposes of section 7704(b)(1).

On May 2, 1995, the IRS published in the **Federal Register** a notice of proposed rulemaking (60 FR 21475) to provide guidance regarding section 7704(b). A number of public comments were received concerning the proposed regulations, and a public hearing was held on July 31, 1995. After consideration of the comments received, the proposed regulations are adopted as revised by this Treasury decision.

Summary of Significant Comments and Revisions

The significant comments on the proposed regulations and the revisions made in the final regulations are discussed below.

Public Trading

Several commentators requested clarification of the definition of an established securities market, a secondary market, and the substantial equivalent of a secondary market. The definitions in the proposed regulations, however, are drawn directly from the legislative history to section 7704(b) and incorporate the most important elements of public trading within the meaning of section 7704(b). As a result, the final regulations generally adopt the definitions in the proposed regulations.

The final regulations contain two changes to the definition of a secondary market and the substantial equivalent thereof. The final regulations clarify that the determination of whether interests in a partnership are readily tradable on a secondary market or the substantial equivalent thereof is based on all the facts and circumstances. In addition, the final regulations eliminate the separate definitions of a secondary market and the substantial equivalent thereof. This distinction is relevant in the proposed regulations because several of the safe harbors apply only to the substantial equivalent of a secondary market. As discussed below, this distinction is eliminated in the safe harbors. As a result, the separate definitions of a secondary market and the substantial equivalent thereof are no longer necessary, and they are combined into one definition in the final regulations.

The proposed regulations provide that the transfer of an interest in a partnership is taken into account for purposes of section 7704(b) only if the partnership recognizes the transfer of the interest or the interest is redeemed by the partnership. The preamble to the proposed regulations explains that this provision is intended to prevent a partnership from becoming publicly traded without the knowledge or participation of the partnership. Several commentators requested a clarification of this provision because the definition of a secondary market requires only that the interests be readily tradable, thereby creating some concern that the partnership could be publicly traded even if there were no actual transfer of an interest in the partnership.

The final regulations address this concern by providing more explicitly that interests in a partnership will not be treated as readily tradable on a secondary market or the substantial equivalent thereof unless (i) the partnership participates in the establishment of the market or the inclusion of its interests thereon, or (ii) the partnership recognizes transfers made on that market. This rule also applies to an established securities market that consists of an interdealer quotation system that regularly disseminates firm buy or sell quotations. These modifications will prevent a partnership from being publicly traded without the participation or consent of the partnership. This rule is not extended to established securities markets that consist of the exchanges described in the regulation because these exchanges list interests in the partnership only with the knowledge and participation of the partnership. In addition, the final regulations provide that transfers not recognized by the partnership are treated as private transfers and therefore do not count for purposes of the two-percent and 10-percent limitations in the safe harbors described below.

Safe Harbors

Several commentators requested clarification that, as in Notice 88–75, the failure of a partnership to satisfy the safe harbors does not establish or give rise to a presumption that the partnership was publicly traded. In response, the final regulations clarify that the fact that a partnership does not qualify for a safe harbor or that a transfer of an interest in the partnership is not within a safe harbor is disregarded in determining whether interests in the partnership are readily tradable on a secondary market or the substantial equivalent thereof. Thus, these transfers are examined under the general facts and circumstances test in the regulations.

Private Transfers

Several commentators requested that the definition of a block transfer be expanded to include transfers by a partner or any person related to the partner within the meaning of section 267(b) or section 707(b)(1). The commentators noted that interests in a partnership are often held by related persons and that, while the related group as a whole may hold more than a two-percent interest in the partnership, no individual partner in the group might hold more than a two-percent interest. This comment is adopted in the final regulations.

One commentator also suggested that the exception for transfers at death be clarified to include transfers from an estate or a testamentary trust. This comment is adopted in the final regulations.

Another commentator suggested that the exception for transfers by one or more partners of interests representing more than 50 percent of the total interests be expanded to include transfers of less than 50 percent. This comment is not adopted in the final regulations. The exception is provided to allow acquisition of control of a partnership without raising a concern that the transfers pursuant to the acquisition would result in the partnership being publicly traded. The exception is, however, amended by reducing the required amount to 50 percent or more of the interests in partnership capital and profits to coordinate the exception with section 708(b)(1)(B) terminations.

Redemption and Repurchase Agreements

Several commentators suggested that redemptions by an investment partnership for the net asset value of the redeemed interest should not be treated as a transfer for purposes of section 7704(b) because these transfers do not involve a third party broker or a commission or mark-up. This comment is not adopted in the final regulations. The redemption of a partnership interest combined with the issuance of an interest to a new partner can result in the creation of a secondary market or the substantial equivalent thereof within the meaning of section 7704(b), even if no third party or commission is present.

Qualified Matching Service

The proposed regulations provide that, to qualify as a matching service, the selling partner cannot enter into a binding agreement to sell an interest until the 15th calendar day after the date information regarding the offering is made available to potential buyers and the closing cannot occur until the 30th calendar day after the date the selling partner can enter into a binding agreement. One commentator suggested a reduction in these fixed time periods. This comment is not adopted in the final regulations. The time periods are necessary to ensure that the matching service does not rise to the level of a secondary market or the substantial equivalent thereof.

Several commentators raised various concerns about the provisions in the proposed regulations requiring subscribers to make certain representations and the provisions preventing the operator of the matching service from quoting certain prices and buying or selling interests for itself or on behalf of others. These provisions are deleted in the final regulations because the requirements for a matching service already provide that the service cannot list quotes that commit any person to buy or sell an interest. This modification, however, does not affect the general rule that a secondary market may exist if anyone, including the operator of a matching service, quotes prices at which it stands ready to buy or sell partnership interests.

Private Placements

The proposed regulations generally provide that interests in a partnership are not readily tradable on the substantial equivalent of a secondary market if (i) all interests in the partnership were issued in a transaction not required to be registered under the Securities Act of 1933; (ii) the partnership does not have more than 500 partners or the initial offering price of each unit was at least $20,000; and (iii) if the partnership has more than 50 partners, no more than 10 percent of the total interests in capital or profits are transferred during the year. Several

commentators suggested expanding this safe harbor to apply to the determination of a secondary market. Other commentators suggested eliminating the 10-percent limitation. Several commentators suggested increasing the 50-partner limit, such as to 100, and modifying the rule for counting the number of partners that looked through partners that were partnerships, grantor trusts, or S corporations. In response to these comments, the final regulations modify the private placement exception in the following respects.

First, the safe harbor is expanded to apply to a secondary market as well as the substantial equivalent of a secondary market. As a result, interests in a partnership that qualifies for the private placement safe harbor will not be readily tradable on a secondary market or the substantial equivalent thereof.

Second, the final regulations provide that the safe harbor does not apply to partnerships subject to Regulation S (17 CFR 230.901 et seq.), unless the offering and sale of interests in the partnership would not have been required to be registered if offered and sold within the United States. Regulation S, adopted after the issuance of Notice 88–75, provides an exception from registration for any offerings and sales outside of the United States, even if registration would have been required if the interests were offered and sold within the United States. This modification ensures that the private placement exception applies in a similar manner to offerings within and outside of the United States.

Third, the 10-percent limitation is not adopted in the final regulations. Instead, the final regulations provide that the safe harbor applies only if the partnership has no more than 100 partners at any time during the taxable year of the partnership.

Finally, the final regulations provide a new rule for determining the number of partners in a partnership. Under the proposed regulations, each person owning an interest in a partnership (lower-tier partnership) through another partnership, an S corporation, or a grantor trust (flow-through entity) is treated as a partner in the lower-tier partnership. The final regulations provide that an owner of a flow-through entity is treated as a partner in the lower-tier partnership only if (i) substantially all of the value of the flow-through entity is attributable to the lower-tier partnership interest, and (ii) a principal purpose for the tiered arrangement is to permit the partnership to satisfy the 100-partner requirement. The requirement that substantially all of the value of the flow-through entity be attributable to the lower-tier partnership is intended to limit the look-through rule to flow-through entities that are economically equivalent to an interest in the lower-tier partnership. For example, if the only asset held by a flow-through entity is an interest in a lower-tier partnership, an interest in the flow-through entity is economically equivalent to an interest in the lower-tier partnership and the members of the flow-through entity should be counted as partners in the partnership. The requirement that there be a principal purpose to avoid the 100 partner rule recognizes that looking through a flow-through entity is not appropriate in all cases, even if the flow-through entity owns no interest other than an interest in the lower-tier partnership, but should be limited to situations in which a principal purpose of the flow-through entity is to avoid the 100 partner limitation.

Lack of Actual Trading

The proposed regulations provide that interests in a partnership are not readily tradable on the substantial equivalent of a secondary market if the sum of the percentage interests transferred during the taxable year does not exceed two percent. Several commentators suggested expanding this safe harbor to secondary markets so that partnerships could be assured that some level of trading would not result in public trading. This comment is adopted in the final regulations.

Qualifying Income

Several commentators requested guidance on the definition of *qualifying income* and *financial business* for purposes of the qualifying income exception of section 7704. These regulations are intended to address only the definition of public trading and therefore do not provide guidance on the definition of qualifying income. The IRS and Treasury, however, are actively considering guidance on the definition of qualifying income and financial businesses for investment partnerships and other partnerships engaged in various types of securities transactions. The IRS and Treasury invite comments on the scope and form of such guidance.

Transitional Relief

The proposed regulations provide that they will be effective for taxable years of a partnership beginning on or after the date final regulations are published. The preamble to the proposed regulations requests comments on whether transitional relief is necessary for partnerships that qualified for an exclusion under Notice 88–75. Many commentators suggested some form of transitional relief, ranging from 180 days to a permanent grandfather provision.

The final regulations provide that, for partnerships that were actively engaged in an activity before December 4, 1995, the regulations apply for taxable years beginning after December 31, 2005. This ten-year grandfather provision is similar to the grandfather rule provided on the enactment of section 7704. The final regulations provide that this transitional relief expires if the partnership adds a substantial new line of business within the meaning of § 1.7704–2. The transitional relief is not affected by a termination of the partnership under section 708(b)(1)(B). Finally, partnerships subject to transitional relief may continue to rely on Notice 88–75 for guidance.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Small Business Administration for comment on its impact on small business.

Drafting Information. The principal author of these regulations is Christopher T. Kelley, Office of Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.7704–1 is added to read as follows:

§ 1.7704–1 Publicly traded partnerships.

(a) *In general*—(1) *Publicly traded partnership.* A domestic or foreign partnership is a publicly traded partnership for purposes of section 7704(b) and this section if—

(i) Interests in the partnership are traded on an established securities market; or

(ii) Interests in the partnership are readily tradable on a secondary market or the substantial equivalent thereof.

(2) *Partnership interest*—(i) *In general.* For purposes of section 7704(b) and this section, an interest in a partnership includes—

(A) Any interest in the capital or profits of the partnership (including the right to partnership distributions); and

(B) Any financial instrument or contract the value of which is determined in whole or in part by reference to the partnership (including the amount of partnership distributions, the value of partnership assets, or the results of partnership operations).

(ii) *Exception for non-convertible debt.* For purposes of section 7704(b) and this section, an interest in a partnership does not include any financial instrument or contract that—

(A) Is treated as debt for federal tax purposes; and

(B) Is not convertible into or exchangeable for an interest in the capital or profits of the partnership and does not provide for a payment of equivalent value.

(iii) *Exception for tiered entities.* For purposes of section 7704(b) and this section, an interest in a partnership or a corporation (including a regulated investment company as defined in section 851 or a real estate investment trust as defined in section 856) that holds an interest in a partnership (lower-tier partnership) is not considered an interest in the lower-tier partnership.

(3) *Definition of transfer.* For purposes of section 7704(b) and this section, a transfer of an interest in a partnership means a transfer in any form, including a redemption by the partnership or the entering into of a financial instrument or contract described in paragraph (a)(2)(i)(B) of this section.

(b) *Established securities market.* For purposes of section 7704(b) and this section, an established securities market includes—

(1) A national securities exchange registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);

(2) A national securities exchange exempt from registration under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f) because of the limited volume of transactions;

(3) A foreign securities exchange that, under the law of the jurisdiction where it is organized, satisfies regulatory requirements that are analogous to the regulatory requirements under the Securities Exchange Act of 1934 described in paragraph (b) (1) or (2) of this section (such as the London International Financial Futures Exchange; the Marche a Terme International de France; the International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited; the Frankfurt Stock Exchange; and the Tokyo Stock Exchange);

(4) A regional or local exchange; and

(5) An interdealer quotation system that regularly disseminates firm buy or sell quotations by identified brokers or dealers by electronic means or otherwise.

(c) *Readily tradable on a secondary market or the substantial equivalent thereof*—(1) *In general.* For purposes of section 7704(b) and this section, interests in a partnership that are not traded on an established securities market (within the meaning of section 7704(b) and paragraph (b) of this section) are readily tradable on a secondary market or the substantial equivalent thereof if, taking into account all of the facts and circumstances, the partners are readily able to buy, sell, or exchange their partnership interests in a manner that is comparable, economically, to trading on an established securities market.

(2) *Secondary market or the substantial equivalent thereof.* For purposes of paragraph (c)(1) of this section, interests in a partnership are readily tradable on a secondary market or the substantial equivalent thereof if—

(i) Interests in the partnership are regularly quoted by any person, such as a broker or dealer, making a market in the interests;

(ii) Any person regularly makes available to the public (including customers or subscribers) bid or offer quotes with respect to interests in the partnership and stands ready to effect buy or sell transactions at the quoted prices for itself or on behalf of others;

(iii) The holder of an interest in the partnership has a readily available, regular, and ongoing opportunity to sell or exchange the interest through a public means of obtaining or providing information of offers to buy, sell, or exchange interests in the partnership; or

(iv) Prospective buyers and sellers otherwise have the opportunity to buy, sell, or exchange interests in the partnership in a time frame and with the regularity and continuity that is comparable to that described in the other provisions of this paragraph (c)(2).

(3) *Secondary market safe harbors.* The fact that a transfer of a partnership interest is not within one or more of the safe harbors described in paragraph (e), (f), (g), (h), or (j) of this section is disregarded in determining whether interests in the partnership are readily tradable on a secondary market or the substantial equivalent thereof.

(d) *Involvement of the partnership required.* For purposes of section 7704(b) and this section, interests in a partnership are not traded on an established securities market within the meaning of paragraph (b)(5) of this section and are not readily tradable on a secondary market or the substantial equivalent thereof within the meaning of paragraph (c) of this section (even if interests in the partnership are traded or readily tradable in a manner described in paragraph (b)(5) or (c) of this section) unless—

(1) The partnership participates in the establishment of the market or the inclusion of its interests thereon; or

(2) The partnership recognizes any transfers made on the market by—

(i) Redeeming the transferor partner (in the case of a redemption or repurchase by the partnership); or

(ii) Admitting the transferee as a partner or otherwise recognizing any rights of the transferee, such as a right of the transferee to receive partnership distributions (directly or indirectly) or to acquire an interest in the capital or profits of the partnership.

(e) *Transfers not involving trading*—(1) *In general.* For purposes of section 7704(b) and this section, the following transfers (private transfers) are disregarded in determining whether interests in a partnership are readily tradable on a secondary market or the substantial equivalent thereof—

(i) Transfers in which the basis of the partnership interest in the hands of the transferee is determined, in whole or in part, by reference to its basis in the hands of the transferor or is determined under section 732;

(ii) Transfers at death, including transfers from an estate or testamentary trust;

(iii) Transfers between members of a family (as defined in section 267(c)(4));

(iv) Transfers involving the issuance of interests by (or on behalf of) the partnership in exchange for cash, property, or services;

(v) Transfers involving distributions from a retirement plan qualified under section 401(a) or an individual retirement account;

(vi) Block transfers (as defined in paragraph (e)(2) of this section);

(vii) Transfers pursuant to a right under a redemption or repurchase agreement (as defined in paragraph (e)(3) of this section) that is exercisable only—

(A) Upon the death, disability, or mental incompetence of the partner; or

(B) Upon the retirement or termination of the performance of services of an individual who actively participated in the management of, or performed services on a full-time basis for, the partnership;

(viii) Transfers pursuant to a closed end redemption plan (as defined in paragraph (e)(4) of this section);

(ix) Transfers by one or more partners of interests representing in the aggregate 50 percent or more of the total interests in partnership capital and profits in one transaction or a series of related transactions; and

(x) Transfers not recognized by the partnership (within the meaning of paragraph (d)(2) of this section).

(2) *Block transfers.* For purposes of paragraph (e)(1)(vi) of this section, a block transfer means the transfer by a partner and any related persons (within the meaning of section 267(b) or 707(b)(1)) in one or more transactions during any 30 calendar day period of partnership interests representing in the aggregate more than 2 percent of the total interests in partnership capital or profits.

(3) *Redemption or repurchase agreement.* For purposes of section 7704(b) and this section, a redemption or repurchase agreement means a plan of redemption or repurchase maintained by a partnership whereby the partners may tender their partnership interests for purchase by the partnership, another partner, or a person related to another partner (within the meaning of section 267(b) or 707(b)(1)).

(4) *Closed end redemption plan.* For purposes of paragraph (e)(1)(viii) of this section, a redemption or repurchase agreement (as defined in paragraph (e)(3) of this section) is a closed end redemption plan only if—

(i) The partnership does not issue any interest after the initial offering (other than the issuance of additional interests prior to August 5, 1988); and

(ii) No partner or person related to any partner (within the meaning of section 267(b) or 707(b)(1)) provides contemporaneous opportunities to acquire interests in similar or related partnerships which represent substantially identical investments.

(f) *Redemption and repurchase agreements.* For purposes of section 7704(b) and this section, the transfer of an interest in a partnership pursuant to a redemption or repurchase agreement (as defined in paragraph (e)(3) of this section) that is not described in paragraph (e)(1) (vii) or (viii) of this section is disregarded in determining whether interests in the partnership are readily tradable on a secondary market or the substantial equivalent thereof only if—

(1) The redemption or repurchase agreement provides that the redemption or repurchase cannot occur until at least 60 calendar days after the partner notifies the partnership in writing of the partner's intention to exercise the redemption or repurchase right;

(2) Either—

(i) The redemption or repurchase agreement requires that the redemption or repurchase price not be established until at least 60 calendar days after receipt of such notification by the partnership or the partner; or

(ii) The redemption or repurchase price is established not more than four times during the partnership's taxable year; and

(3) The sum of the percentage interests in partnership capital or profits transferred during the taxable year of the partnership (other than in private transfers described in paragraph (e) of this section) does not exceed 10 percent of the total interests in partnership capital or profits.

(g) *Qualified matching services*—(1) *In general.* For purposes of section 7704(b) and this section, the transfer of an interest in a partnership through a qualified matching service is disregarded in determining whether interests in the partnership are readily tradable on a secondary market or the substantial equivalent thereof.

(2) *Requirements.* A matching service is a qualified matching service only if—

(i) The matching service consists of a computerized or printed listing system that lists customers' bid and/or ask quotes in order to match partners who want to sell their interests in a partnership (the selling partner) with persons who want to buy those interests;

(ii) Matching occurs either by matching the list of interested buyers with the list of interested sellers or through a bid and ask process that allows interested buyers to bid on the listed interest;

(iii) The selling partner cannot enter into a binding agreement to sell the interest until the 15th calendar day after the date information regarding the offering of the interest for sale is made available to potential buyers and such time period is evidenced by contemporaneous records ordinarily maintained by the operator at a central location;

(iv) The closing of the sale effected by virtue of the matching service does not occur prior to the 45th calendar day after the date information regarding the offering of the interest for sale is made available to potential buyers and such time period is evidenced by contemporaneous records ordinarily maintained by the operator at a central location;

(v) The matching service displays only quotes that do not commit any person to buy or sell a partnership interest at the quoted price (nonfirm price quotes) or quotes that express interest in a partnership interest without an accompanying price (nonbinding indications of interest) and does not display quotes at which any person is committed to buy or sell a partnership interest at the quoted price (firm quotes);

(vi) The selling partner's information is removed from the matching service within 120 calendar days after the date information regarding the offering of the interest for sale is made available to potential buyers and, following any removal (other than removal by reason of a sale of any part of such interest) of the selling partner's information from the matching service, no offer to sell an interest in the partnership is entered into the matching service by the selling partner for at least 60 calendar days; and

(vii) The sum of the percentage interests in partnership capital or profits transferred during the taxable year of the partnership (other than in private transfers described in paragraph (e) of this section) does not exceed 10 percent of the total interests in partnership capital or profits.

(3) *Closing.* For purposes of paragraph (g)(2)(iv) of this section, the closing of a sale occurs no later than the earlier of—

(i) The passage of title to the partnership interest;

(ii) The payment of the purchase price (which does not include the delivery of funds to the operator of the matching service or other closing agent to hold on behalf of the seller pending closing); or

(iii) The date, if any, that the operator of the matching service (or any person related to the operator within the meaning of section 267(b) or 707(b)(1)) loans, advances, or otherwise arranges for funds to be available to the seller in anticipation of the payment of the purchase price.

(4) *Optional features.* A qualified matching service may be sponsored or operated by a partner of the partnership (either formally or informally), the underwriter that handled the issuance of the partnership interests, or an unrelated third party. In addition, a qualified matching service may offer the following features—

(i) The matching service may provide prior pricing information, including information regarding resales of interests and actual prices paid for interests; a description of the business of the partnership; financial and reporting information from the partnership's financial statements and reports; and information regarding material events involving the partnership, including special distributions, capital distributions, and refinancings or sales of significant portions of partnership assets;

(ii) The operator may assist with the transfer documentation necessary to transfer the partnership interest;

(iii) The operator may receive and deliver funds for completed transactions; and

(iv) The operator's fee may consist of a flat fee for use of the service, a fee or commission based on completed transactions, or any combination thereof.

(h) *Private placements*—(1) *In general.* For purposes of section 7704(b) and this section, except as otherwise provided in paragraph (h)(2) of this section, interests in a partnership are not readily tradable on a secondary market or the substantial equivalent thereof if—

(i) All interests in the partnership were issued in a transaction (or transactions) that was not required to be registered under the Securities Act of 1933 (15 U.S.C. 77a et seq.); and

(ii) The partnership does not have more than 100 partners at any time during the taxable year of the partnership.

(2) *Exception for certain offerings outside of the United States.* Paragraph (h)(1) of this section does not apply to the offering and sale of interests in a partnership that was not required to be registered under the Securities Act of 1933 by reason of Regulation S (17 CFR 230.901 through 230.904) unless the offering and sale of the interests would not have been required to be registered under the Securities Act of 1933 if the interests had been offered and sold within the United States.

(3) *Anti-avoidance rule.* For purposes of determining the number of partners in the partnership under paragraph (h)(1)(ii) of this section, a person (beneficial owner) owning an interest in a partnership, grantor trust, or S corporation (flow-through entity), that owns, directly or through other flow-through entities, an interest in the partnership, is treated as a partner in the partnership only if—

(i) Substantially all of the value of the beneficial owner's interest in the flow-through entity is attributable to the flow-through entity's interest (direct or indirect) in the partnership; and

(ii) A principal purpose of the use of the tiered arrangement is to permit the partnership to satisfy the 100-partner limitation in paragraph (h)(1)(ii) of this section.

(i) [Reserved].

(j) *Lack of actual trading*—(1) *General rule.* For purposes of section 7704(b) and this section, interests in a partnership are not readily tradable on a secondary market or the substantial equivalent thereof if the sum of the percentage interests in partnership capital or profits transferred during the taxable year of the partnership (other than in transfers described in paragraph (e), (f), or (g) of this section) does not exceed 2 percent of the total interests in partnership capital or profits.

(2) *Examples.* The following examples illustrate the rules of this paragraph (j):

Example 1. Calculation of percentage interest transferred. (i) ABC, a calendar year limited partnership formed in 1996, has 9,000 units of limited partnership interests outstanding at all times during 1997, representing in the aggregate 95 percent of the total interests in capital and profits of ABC. The remaining 5 percent is held by the general partner.

(ii) During 1997, the following transactions occur with respect to the units of ABC's limited partnership interests—

(A) 800 units are sold through the use of a qualified matching service that meets the requirements of paragraph (g) of this section;

(B) 50 units are sold through the use of a matching service that does not meet the requirements of paragraph (g) of this section; and

(C) 500 units are transferred as a result of private transfers described in paragraph (e) of this section.

(iii) The private transfers of 500 units and the sale of 800 units through a qualified matching service are disregarded under paragraph (j)(1) of this section for purposes of applying the 2 percent rule. As a result, the total percentage interests in partnership capital and profits transferred for purposes of the 2 percent rule is .528 percent, determined by—

(A) Dividing the number of units sold through a matching service that did not meet the requirements of paragraph (g) of this section (50) by the total number of outstanding limited partnership units (9,000); and

(B) Multiplying the result by the percentage of total interests represented by limited partnership units (95 percent) ([50/9,000]×.95=.528 percent).

Example 2. Application of the 2 percent rule. (i) ABC operates a service consisting of computerized video display screens on which subscribers view and publish nonfirm price quotes that do not commit any person to buy or sell a partnership interest and unpriced indications of interest in a partnership interest without an accompanying price. The ABC service does not provide firm quotes at which any person (including the operator of the service) is committed to buy or sell a partnership interest. The service may provide prior pricing information, including information regarding resales of interests and actual prices paid for interests; transactional volume information; and information on special or capital distributions by a partnership. The operator's fee may consist of a flat fee for use of the service; a fee based on completed transactions, including, for example, the number of nonfirm quotes or unpriced indications of interest entered by users of the service; or any combination thereof.

(ii) The ABC service is not an established securities market for purposes of section 7704(b) and this section. The service is not an interdealer quotation system as defined in paragraph (b)(5) of this section because it does not disseminate firm buy or sell quotations. Therefore, partnerships whose interests are listed and transferred on the ABC service are not publicly traded for purposes of section 7704(b) and this section as a result of such listing or transfers if the sum of the percentage interests in partnership capital or profits transferred during the taxable year of the partnership (other than in transfers described in paragraph (e), (f), or (g) of this section) does not exceed 2 percent of the total interests in partnership capital or profits. In addition, assuming the ABC service complies with the necessary requirements, the service may qualify as a matching service described in paragraph (g) of this section.

(k) *Percentage interests in partnership capital or profits*—(1) *Interests considered*—(i) *General rule.* Except as otherwise provided in this paragraph (k), for purposes of this section, the total interests in partnership capital or profits are determined by reference to all outstanding interests in the partnership.

(ii) *Exceptions*—(A) *General partner with greater than 10 percent interest.* If the general partners and any person related to the general partners (within the meaning of section 267(b) or 707(b)(1)) own, in the aggregate, more than 10 percent of the outstanding interests in partnership capital or profits at any one time during the taxable year of the partnership, the total interests in partnership capital or profits are determined without reference to the interests owned by such persons.

(B) *Derivative interests.* Any partnership interests described in paragraph (a)(2)(i)(B) of this section are taken into account for purposes of determining the total interests in partnership capital or profits only if and to the extent that the partnership satisfies paragraph (d) (1) or (2) of this section.

(2) *Monthly determination.* For purposes of this section, except in the

case of block transfers (as defined in paragraph (e)(2) of this section), the percentage interests in partnership capital or profits represented by partnership interests that are transferred during a taxable year of the partnership is equal to the sum of the percentage interests transferred for each calendar month during the taxable year of the partnership in which a transfer of a partnership interest occurs (other than a private transfer as described in paragraph (e) of this section). The percentage interests in capital or profits of interests transferred during a calendar month is determined by reference to the partnership interests outstanding during that month.

(3) *Monthly conventions.* For purposes of paragraph (k)(2) of this section, a partnership may use any reasonable convention in determining the interests outstanding for a month, provided the convention is consistently used by the partnership from month to month during a taxable year and from year to year. Reasonable conventions include, but are not limited to, a determination by reference to the interests outstanding at the beginning of the month, on the 15th day of the month, or at the end of the month.

(4) *Block transfers.* For purposes of paragraph (e)(2) of this section (defining block transfers), the partnership must determine the percentage interests in capital or profits for each transfer of an interest during the 30 calendar day period by reference to the partnership interests outstanding immediately prior to such transfer.

(5) *Example.* The following example illustrates the rules of this paragraph (k):

Example. Conventions. (i) ABC limited partnership, a calendar year partnership formed in 1996, has 1,000 units of limited partnership interests outstanding on January 1, 1997, representing in the aggregate 95 percent of the total interests in capital and profits of ABC. The remaining 5 percent is held by the general partner.

(ii) The following transfers take place during 1997—

(A) On January 15, 10 units of limited partnership interests are sold in a transaction that is not a private transfer;

(B) On July 10, 1,000 additional units of limited partnership interests are issued by the partnership (the general partner's percentage interest is unchanged); and

(C) On July 20, 15 units of limited partnership interests are sold in a transaction that is not a private transfer.

(iii) For purposes of determining the sum of the percentage interests in partnership capital or profits transferred, ABC chooses to use the end of the month convention. The percentage interests in partnership capital and profits transferred during January is .95 percent, determined by dividing the number of transferred units (10) by the total number of limited partnership units (1,000) and multiplying the result by the percentage of total interests represented by limited partnership units ([10/1,000]×.95). The percentage interests in partnership capital and profits transferred during July is .7125 percent ([15/2,000]×.95). ABC is not required to make determinations for the other months during the year because no transfers of partnership interests occurred during such months. ABC may qualify for the 2 percent rule for its 1997 taxable year because less than 2 percent (.95 percent+.7125 percent=1.6625 percent) of its total interests in partnership capital and profits was transferred during that year.

(iv) If ABC had chosen to use the beginning of the month convention, the interests in capital or profits sold during July would have been 1.425 percent ([15/1,000]×.95) and ABC would not have satisfied the 2 percent rule for its 1997 taxable year because 2.375 percent (.95 + 1.425) of ABC's interests in partnership capital and profits was transferred during that year.

(l) *Effective date*—(1) *In general.* Except as provided in paragraph (l)(2) of this section, this section applies to taxable years of a partnership beginning after December 31, 1995.

(2) *Transition period.* For partnerships that were actively engaged in an activity before December 4, 1995, this section applies to taxable years beginning after December 31, 2005, unless the partnership adds a substantial new line of business after December 4, 1995, in which case this section applies to taxable years beginning on or after the addition of the new line of business. Partnerships that qualify for this transition period may continue to rely on the provisions of Notice 88–75 (1988–2 C.B. 386) (see § 601.601(d)(2) of this chapter) for guidance regarding the definition of readily tradable on a secondary market or the substantial equivalent thereof for purposes of section 7704(b).

(3) *Substantial new line of business.* For purposes of paragraph (1)(2) of this section—

(i) Substantial is defined in § 1.7704–2(c); and

(ii) A new line of business is defined in § 1.7704–2(d), except that the applicable date is "December 4, 1995" instead of "December 17, 1987".

(4) *Termination under section 708(b)(1)(B).* The termination of a partnership under section 708(b)(1)(B) due to the sale or exchange of 50 percent or more of the total interests in partnership capital and profits is disregarded in determining whether a partnership qualifies for the transition period provided in paragraph (l)(2) of this section.

Margaret Milner Richardson,
Commissioner of Internal Revenue.

Approved: November 21, 1995.

Leslie Samuels,
Assistant Secretary of the Treasury.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[AD–FRL–5339–1]

Title V Clean Air Act Final Interim Approval of Operating Permits Program; State of Delaware

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Final interim approval.

SUMMARY: EPA is promulgating interim approval of the operating permits program submitted by the State of Delaware. This program was submitted by the State for the purpose of complying with federal requirements for an approvable program to issue operating permits to all major stationary sources, and to certain other sources.

EFFECTIVE DATE: January 3, 1996.

ADDRESSES: Copies of the State of Delaware's submittal and other supporting information used in developing the final interim approval are available for inspection during normal business hours at the following location: Air, Radiation, and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107.

FOR FURTHER INFORMATION CONTACT: Robin M. Moran, (3AT23), Air, Radiation and Toxics Division, U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107, (215) 597–3023.

SUPPLEMENTARY INFORMATION:

I. Background

A. Introduction

Title V of the 1990 Clean Air Act Amendments (section 501–507 of the Clean Air Act (CAA)), and implementing regulations at 40 Code of Federal Regulations (CFR) part 70 require that states seeking to administer a Title V operating permits program develop and submit a program to EPA by November 15, 1993, and that EPA act to approve or disapprove each program

within 1 year after receiving the submittal. EPA's program review is conducted pursuant to section 502 of the Act and the part 70 regulations, which together outline criteria for approval or disapproval of an operating permits program submittal. Where a program substantially, but not fully, meets the requirements of part 70, EPA may grant the program interim approval for a period of up to 2 years. If EPA has not fully approved a program by November 15, 1995, or, in the case of interim approval, by the expiration of the interim approval period, it must establish and implement a federal program.

On September 21, 1995, EPA proposed interim approval of the operating permits program for the State of Delaware. (See 60 FR 48944). EPA compiled a Technical Support Document (TSD) which describes the operating permits program in greater detail. In this notice, EPA is taking final action to promulgate interim approval of the operating permits program for the State of Delaware.

II. Analysis of State Submittal

On November 15, 1993, the State of Delaware submitted an operating permits program to satisfy the requirements of the CAA and 40 CFR part 70. The submittal was supplemented by additional materials on November 22, 1993, and was found to be administratively incomplete pursuant to 40 CFR 70.4(e)(1) on January 18, 1994. Additional materials were submitted on February 9, 1994, and May 15, 1995. Based on the additional information, EPA found the submittal to be administratively complete on May 19, 1995. The State submitted supplemental information on September 5, 1995. EPA reviewed Delaware's program against the criteria for approval in section 502 of the CAA and the part 70 regulations. EPA determined, as fully described in the notice of proposed interim approval of Delaware's operating permits program (see 60 FR 48944; September 21, 1995) and the TSD for this action, that Delaware's operating permits program substantially meets the requirements of the CAA and part 70.

III. Public Comments

EPA received no public comments on the notice of proposed interim approval.

IV. Insignificant Activities

In the notice of proposed interim approval, EPA generally described Delaware's list of insignificant activities contained in Appendix A of Regulation No. 30. Today, EPA is clarifying its rationale for approving Delaware's insignificant activities provision. Although Delaware's Regulation No. 30 states that any information required by the permit application need not be submitted for insignificant activities listed or described in Appendix A, sources must provide a list of any activities excluded because of size, emissions rate, or production rate. The application form reflects this requirement and provides detail on the specific information that must be included. Delaware's regulation also requires applications to include information needed to determine the applicability of, or to impose, any applicable requirement, and that the emissions from insignificant activities shall be included when determining the applicability of any applicable requirement.

Paragraph (i) of Appendix A allows sources flexibility to consider as insignificant those activities for which no applicable requirement applies and which are not otherwise listed in the rule if they have the potential to emit at less than the following aggregate rates: 25 tons per year (tpy) of VOC in New Castle or Kent Counties or 50 tpy of VOC in Sussex County; 40 tpy of particulate [matter]; 15 tpy of PM–10; 40 tpy of sulfur dioxide (SO2); and 25 tpy of nitrogen oxides (NOx) in New Castle or Kent Counties or 100 tpy of NOx in Sussex County. While these emission levels for insignificant activities are higher than those approved by EPA for other states, EPA believes that Delaware's program is acceptable because Delaware, in fact, requires the application to contain more detailed information about these activities than many other State programs. Delaware's permit application form (#AQM–1001DD, submitted on February 9, 1994 and May 15, 1995) requires sources to identify the following information for insignificant activities based on emissions levels: the pollutant, emission rate (e.g., tons per year, pounds per day), number of units and type of source. This level of detail should ensure that Delaware has enough information to adequately establish permitting requirements and the applicable requirements of the Act. Because Delaware requires an acceptable level of information in the permit application form, EPA believes that the emission thresholds established in paragraph (i) of Appendix A need not be an interim approval issue for Delaware's program. Since this decision depends on the safeguard provided by the requirements in the application form, EPA will process changes to the application form that may reduce the quality or level of information relative to insignificant activities as a formal program revision; that is, application form revisions relative to insignificant activities will not be approved by way of an exchange of letters between EPA and the State of Delaware. Further, EPA's approval of Delaware's insignificant activities is based on Section 5(d) of Regulation No. 30 (Standard Application Form and Required Information) which states that the activities listed in Appendix A are to be included for purposes of determining whether a source is subject to the regulation. This provision ensures that the emissions levels established in paragraph (i) of Appendix A will not interfere with the determination of whether a source is major under the Clean Air Act.

Final Action

EPA is promulgating interim approval of the operating permits program submitted by the State of Delaware on November 15, 1993, with supplemental submittals on November 22, 1993, February 9, 1994, May 15, 1995, and September 5, 1995. The State of Delaware must make the changes identified in the notice of proposed rulemaking in order to fully meet the requirements of the July 21, 1992 version of part 70. (See 60 FR 48944, September 21, 1995). Delaware must adopt acid rain regulations by July 1, 1996, consistent with the commitment made in a September 5, 1995 letter to EPA.

The scope of the State's part 70 program applies to all part 70 sources ("covered sources" as defined in the State's program) within the State, except for sources of air pollution over which an Indian Tribe has jurisdiction. See, e.g., 59 FR 55813, 55815–18 (Nov. 9, 1994). The term "Indian Tribe" is defined under the CAA as "any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village, which is federally recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians." See section 302(r) of the CAA; see also 59 FR 43956, 43962 (Aug. 25, 1994); 58 FR 54364 (Oct. 21, 1993).

This interim approval, which may not be renewed, extends until January 5, 1998. During the interim approval period, Delaware is protected from sanctions for failure to have a fully approved Title V, part 70 program, and EPA is not obligated to promulgate, administer and enforce a federal permits program in the State. Permits issued

under a program with interim approval have full standing with respect to part 70, and the 1-year time period for submittal of permit applications by subject sources begins upon the effective date of interim approval, as does the 3-year time period for processing the initial permit applications.

If the State fails to submit a complete corrective program for full approval by July 7, 1997, EPA will start an 18-month clock for mandatory sanctions. If the State then fails to submit a corrective program that EPA finds complete before the expiration of that 18-month period, EPA will be required to apply one of the sanctions in section 179(b) of the CAA, which will remain in effect until EPA determines that the State has corrected the deficiency by submitting a complete corrective program. Moreover, if the Administrator finds a lack of good faith on the part of the State, both sanctions under section 179(b) will apply after the expiration of the 18-month period until the Administrator determines that the State has come into compliance. In any case, if, six months after application of the first sanction, the State still has not submitted a corrective program that EPA finds complete, a second sanction would be required.

If EPA disapproves the State's complete corrective program, EPA would be required to apply one of the section 179(b) sanctions on the date 18 months after the effective date of the disapproval, unless prior to the date on which the sanction would be applied the State has submitted a revised program and EPA has determined that this program corrected the deficiencies that prompted the disapproval. Moreover, if the Administrator finds a lack of good faith on the part of the State, both sanctions under section 179(b) would apply after the expiration of the 18-month period until the Administrator determines that the State has come into compliance. In all cases, if, six months after EPA applies the first sanction, the State has not submitted a revised program that EPA has determined corrects the deficiencies that prompted disapproval, a second sanction is required.

In addition, discretionary sanctions may be applied where warranted any time after the expiration of an interim approval period if the State has not timely submitted a complete corrective program or EPA has disapproved a submitted corrective program. Moreover, if EPA has not granted full approval to the State's program by the expiration of the interim approval period, EPA must promulgate, administer and enforce a federal operating permits program for the State upon the date the interim approval period expires.

Requirements for approval, specified in 40 CFR 70.4(b), encompass the CAA's section 112(l)(5) requirements for approval of a program for delegation of section 112 standards as promulgated by EPA as they apply to part 70 sources. Section 112(l)(5) requires that the State's program contain adequate authorities, adequate resources for implementation, and an expeditious compliance schedule, which are also requirements under part 70. Therefore, EPA is also promulgating approval under section 112(l)(5) and 40 CFR 63.91 of the State's program for receiving delegation of section 112 standards that are unchanged from federal standards as promulgated. This program for delegations only applies to sources covered by the part 70 program.

Additionally, EPA is promulgating approval of Delaware's operating permit program under the authority of Title V and part 70 for the purpose of implementing section 112(g) to the extent necessary during the transition period between promulgation of the federal section 112(g) rule and adoption of any necessary State rules to implement EPA's section 112(g) regulations. However, since this approval is for the purpose of providing a mechanism to implement section 112(g) during the transition period, the approval of the operating permits program for this purpose will be without effect if EPA decides in the final section 112(g) rule that sources are not subject to the requirements of the rule until state regulations are adopted. Although section 112(l) generally provides the authority for approval of state air toxics programs, Title V and section 112(g) provide authority for this approval because of the direct linkage between implementation of section 112(g) and Title V. The duration of this approval is limited to 18 months following promulgation by EPA of section 112(g) regulations, to provide the State with adequate time to adopt regulations consistent with federal requirements.

The Office of Management and Budget has exempted this action from Executive Order 12866 review.

EPA's actions under section 502 of the Act do not create any new requirements, but simply address operating permits programs submitted to satisfy the requirements of 40 CFR part 70. Because this action to propose interim approval of the State of Delaware's operating permits program pursuant to Title V of the CAA and 40 CFR part 70 does not impose any new requirements, it does not have a significant impact on a substantial number of small entities.

EPA has determined that this action, promulgating interim approval of the State of Delaware's operating permits program, does not include a federal mandate that may result in estimated costs of $100 million or more to either state, local, or tribal governments in the aggregate, or to the private sector. This federal action approves pre-existing requirements under state or local law, and imposes no new federal requirements. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector result from this action.

List of Subjects in 40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, and Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401–7671q.

Dated: November 22, 1995.

W. Michael McCabe,

Regional Administrator.

Part 70, title 40 of the Code of Federal Regulations is amended as follows:

PART 70—[AMENDED]

1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

2. Appendix A to part 70 is amended by adding the entry for Delaware in alphabetical order to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs

* * * * *

Delaware

(a) Department of Natural Resources and Environmental Control: submitted on November 15, 1993 and amended on November 22, 1993, February 9, 1994, May 15, 1995 and September 5, 1995; interim approval effective on January 3, 1996; interim approval expires January 5, 1998.

(b) [Reserved]

BILLING CODE 6560–50–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 25 and 32

RIN 1018–AC80

Refuge-Specific Hunting and Fishing Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Fish and Wildlife Service (Service) adds and/or amends certain regulations governing sport fishing and hunting for migratory game bird, upland/small game, and big game on individual national wildlife refuges. Refuge Managers continuously review hunting and fishing programs to respond to visitor interest in recreation activities and to ensure compatibility with the purposes for which the individual refuges were established. Modifications to existing programs may include programs deleted, modified or expanded based on fluctuating environmental conditions, changes to State and other Federal regulations, and other factors. Modifications are also designed, to the extent practical, to make refuge hunting and fishing programs consistent with existing State hunting and fishing regulations.

EFFECTIVE DATE: December 4, 1995.

FOR FURTHER INFORMATION CONTACT: Stephen R. Vehrs, Division of Refuges, U.S. Fish and Wildlife Service; Telephone (703) 358–2029, X–5242.

SUPPLEMENTARY INFORMATION: 50 CFR part 25 contains general administrative provisions which govern national wildlife refuges. 50 CFR part 32 contains provisions governing hunting and fishing on national wildlife refuges (NWRs). Hunting and fishing are regulated on refuges to: (1) Ensure compatibility with refuge purposes, (2) properly manage the wildlife resource, (3) protect other refuge values, and (4) ensure refuge user safety. On many refuges, the Service policy of adopting State hunting regulations is adequate in meeting these objectives. On other refuges, it is necessary to supplement State regulations with more restrictive Federal regulations to ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." Refuge-specific hunting and fishing regulations may be issued only after a wildlife refuge is opened to migratory game bird hunting, upland or other small game hunting, big game hunting or sport fishing through publication in the **Federal Register**. These regulations may list the wildlife species that may be hunted or the species subject to sport fishing, seasons, bag limits, methods of hunting or fishing, descriptions of open areas, and other provisions as appropriate. Previously issued refuge-specific regulations for hunting and fishing are contained in 50 CFR part 32. Many of the amendments to these sections are being promulgated to standardize and clarify the existing language of these regulations.

In the August 16, 1995, issue of the **Federal Register**, 60 FR 42668, the Service published a proposed rulemaking and invited public comment on the proposed annual additions and/or modifications to the National Wildlife Refuge Hunting and Fishing Regulations. All substantive comments were reviewed and considered following a 30-day public comment period. The following represents a cross-section of the total concerns expressed.

Four State conservation agencies, one non-government organization, and 28 individuals commented on the proposed rulemaking. Nearly all comments were concerning the proposal to require the use or expansion of nontoxic shot on several refuges. This specific proposal would require the use of nontoxic shot while hunting on refuges for one or more species of wildlife other than waterfowl and coots, because of the likelihood of depositing toxic lead shot pellets on the land with resulting impacts to waterfowl and other migratory birds.

After evaluating the comments received, the Service has decided to delay nontoxic shot implementation until the 1996–97 hunting season on those refuges which were proposed to convert to nontoxic shot during the 1995–96 season. This action is being taken to allow adequate time for additional coordination and educational outreach with the affected States, hunting organizations and the general public on the effects of toxic lead shot to waterfowl and other migratory birds. Voluntary hunter use of nontoxic shotshells is requested during the 1995–96 hunting season.

The State of Wisconsin, Department of Natural Resources expressed the opinion that the Service has:

1. Not adequately documented the need for requiring nontoxic shot for hunting certain wildlife species other than ducks, geese and swans; and

2. Not provided the results of the scientific nontoxic shot studies to the public. The State believes the public is supportive of biologically sound regulations, but opposed to regulations without justification; and

3. Proposed the required use of nontoxic shot in an inconsistent manner. The State used Necedah NWR as an example where nontoxic shot would be required to hunt ruffed grouse, but not for hunting woodcock in the same general habitat.

Response

1. Lead shot from hunters' shotguns that is deposited in wetlands, seasonally flooded habitats, and upland habitats in close proximity to these wetlands is toxic to wildlife that directly ingest lead pellets during feeding, and secondarily toxic to predators and carrion feeders that consume these toxic wildlife carcasses. The documented scientific evidence is clear in this regard, and is available as indicated at the end of this response. What has not been adequately communicated to, and considered by some hunters and habitat managers, is the deposition of toxic lead shot into marginal or fringe wetland areas by hunting activities other than waterfowl and coot hunting. Nationwide, efforts are now underway to educate and activate programs to reduce this threat to waterfowl, raptors and other susceptible wildlife species. The proposed regulations were specific to point out that a scientifically recognized toxic lead problem exists in uplands that are periodically flooded and become feeding grounds for waterfowl and secondarily for bald eagles.

Scientific research has established that lead pellets ingested by waterfowl and secondarily by raptors including bald eagles results in the death of these animals due to toxic lead poisoning. When lead shot pellets are deposited during upland or small game hunting in dry areas that are subject to seasonal flooding, waterfowl and other migratory birds that feed in these areas during the period of high water are vulnerable to lead poisoning. Scientific information on the "Toxicity of Lead Shot to Wildlife" may be obtained by calling the U.S. Fish and Wildlife Reference Service at 1–800–582–3421 or by accessing the bibliographic databases information directly on the INTERNET at "http://www.fws.gov/fwrefser.html".

2. News articles concerning proposed regulations to address the adverse affects of hunting upland and other small game with toxic lead shot in upland areas subject to periodic flooding and seasonal wetland areas have been published in newspapers during the last 3 years. Nontoxic shot for hunting upland and other small game was first introduced to west coast refuges in the 1991–92 hunting season,

and to southwestern refuges during the 1992–93 hunting season. Refuges in Alaska and waterfowl production areas in the lower 48 States are scheduled to phase in nontoxic shot to hunt certain upland and small game by the 1997–98 and 1998–99 seasons respectively. Additional scientific information and data that forms the basis for these regulations will be provided to the States and public over the next few months, or may be requested as indicated in the previous paragraph.

3. The original proposal to require nontoxic shot while hunting woodcock at Necedah NWR was based on the fact that past hunting occurred in some areas subject to periodic flooding. After receiving public comments expressing concern that this specific requirement would cause confusion among hunters, the Service has agreed that neither grouse nor woodcock hunting will require nontoxic shot at Necedah NWR. This decision was based on the fact that areas subject to flooding can be partitioned away from the hunt area.

The Illinois Department of Conservation expressed general support for reducing the risks of lead poisoning in waterfowl, endangered species, and improving environmental quality, but could not support the proposed rule without the Service:

1. Providing adequate scientific evidence showing that a problem exists from upland/small game hunting with lead shot.

2. Conducting more site-specific studies in relation to lead shotshells and lead rifle bullets for hunting squirrels. Their recent study indicated that 47% of squirrel hunters in the northern half of Illinois hunted with shotguns, and the remainder used .22 caliber rimfire rifles and other weapons.

3. Providing adequate lead-time for hunters to become educated to toxic lead shot problems when hunting upland and other small game and supportive of corrective actions before the Service imposes this rule.

4. Delaying of the rule until at least the 1996–97 hunting season.

Response

1. Refer to Wisconsin number 1 response.

2. The regulations relating to nontoxic shot requirements were not intended to apply to rifle bullets and large buckshot. The rule has been clarified on this point. Site-specific evidence will be determined in accordance with Service policy before nontoxic shot will be required for hunting with larger shot such as buckshot, small rifle bullets such as .22 caliber or for shotgun hunting on nonseasonally flooded uplands.

3. The nontoxic shot program will be phased in starting in the 1996–97 season, rather than the 1995–96 hunting season. Voluntary compliance is requested during the 1995–96 season (refer to Wisconsin number 2 response).

4. The final rules adopting requirements to use nontoxic shot to hunt wildlife species other than waterfowl and coots on certain refuges will be applicable beginning with the 1996–97 hunting season, however, voluntary compliance will be requested prior to that time. Delays until the 1997–98 season are also authorized for Alaska, to allow coordination with the State and the outlying villages. Delays are also provided for the waterfowl production areas principally in the Dakotas, Montana, Wisconsin, and Iowa until the 1998–99 season, with voluntary compliance requested in the meantime.

The Florida Game and Freshwater Fish Commission requested that the Service reconsider the proposal to require nontoxic shot for hunting upland and other small game on certain National Wildlife Refuges. They expressed concern that:

1. requiring use of nontoxic shot for hunting small game in the absence of documented lead ingestion problems amounts to regulatory overkill.

2. the Service should require nontoxic shot only where specific documentation of toxic lead problems exist.

Response

1. Refer to Wisconsin number 1 response.

2. For the reasons, and based on the data referred to in the Wisconsin number 1 response, the Service has concluded that it is well documented that toxic problems indeed exist in the hunting situation as described in the regulations developed for the specific refuges.

The State of Indiana, Department of Natural Resources expressed the opinion that:

1. the amount of lead deposited in the wetlands of Muscatatuck NWR by the estimated 122 quail hunter visits would be very incidental and would contribute insignificantly to the adverse welfare of waterfowl using the refuge; and

2. they would rather not see this proposed regulation, which is a disparity to their State regulations, imposed on Indiana's upland game hunters at this time.

Response

After evaluating the comments from the State of Indiana, and re-evaluating the on-ground relationship of where quail and rabbit hunting occurs on the refuge, the Service has decided to remove Muscatatuck NWR from the listing of refuges requiring nontoxic shot to hunt upland and other small game. The Service believes it is possible to adequately zone the hunting area away from the margins of existing wetlands and those refuge lands subject to periodic flooding. Migratory waterfowl and other migratory birds will be adequately protected by implementing this measure.

The National Rifle Association of America objects to the proposed rule because:

1. The document fails to inform the public of the basis and purposes for imposing the nontoxic shot restrictions for upland game hunting on listed refuges.

2. The public has not been afforded a meaningful opportunity to comment on the proposal.

For these reasons, they recommend:

3. That a clear and concise statement of basis and purpose for the nontoxic shot requirements for upland game hunting on specific refuges be provided before a procedurally correct rulemaking on this issue is moved forward.

4. That this rulemaking be withdrawn and a new rulemaking initiated that recognizes this deficiency.

Response

As a basis for this rule, the Service has a responsibility to protect migratory birds as well as threatened and endangered species of wildlife from the toxic effects of lead shot poisoning due to hunting. The purpose of this rulemaking is to avoid the use of a known toxic substance, such as lead shot pellets, while hunting upland and other small game in an area where waterfowl and other migratory birds could be harmed or killed. The Service does not agree that there are any deficiencies in its procedures, but in order to more adequately educate and inform hunters and the general public of the new requirements, and coordinate with affected States, the Service will delay application of the nontoxic shot requirements until the 1996–97 season. Also, refer to Wisconsin number 1 response.

With respect to number 2 concern, a 30-day public comment period has been afforded the public to comment on the proposed rule. News articles concerning proposed regulations that address the adverse affects of hunting upland and other small game with toxic lead shot in upland areas subject to periodic flooding and seasonal wetland areas have been published in newspapers during the last 3 years. Nontoxic shot for hunting upland and small game was first introduced to west coast refuges in the 1991–92 hunting season, and to southwestern refuges during the 1992–93 hunting season. Refuges in Alaska and waterfowl production areas in the lower 48 states are scheduled to phase in nontoxic shot to hunt certain upland and other small game by the 1997–98 and 1998–99 seasons respectively. Refer to Wisconsin number 2. response.

Individual comments received ranged from strong, general support for the proposed rule to total disagreement with the need to implement regulations. Specific concerns included:

1. All refuge lands should be off-limits to lead deposition because lead is a toxic environmental pollutant.

Response

The use of lead shot on National Wildlife Refuges will continue to be monitored and its use will be prohibited in those habitats where scientific evidence shows it is detrimental to wildlife resource values.

2. Support for a lead shot ban on refuge hunt areas, if the Service does not encourage the States to impose lead shot restrictions on State lands.

Response

The Service will continue to cooperate with State wildlife agencies to understand the toxic effects of lead shot deposition from hunting. The Service will also work with States in which waterfowl production areas are located to explore opportunities for conversion of both State and Federal areas where it will reduce threats to wildlife and minimize confusion to hunters.

3. Support for prohibition on private and public trap and skeet ranges using lead shot.

Response

Trap and skeet ranges are located outside of Service jurisdiction and, therefore, are regulated by private landowners, or in certain cases local jurisdictions.

4. Nontoxic shot is not readily available for purchase in the smaller shot sizes, and this will prevent the use of .410, 28 ga., and 20 ga. shotguns. Also, this would pose a disadvantage to young hunters and women who regularly use these shotguns for hunting.

Response

The Service acknowledges that commercial manufacture of steel shot is very limited in .410 and 28 gauge shotshells, however steel is being reloaded in these gauges by individual hunters. The Service's decision, however, must be based on its responsibilities to protected migratory birds from toxic shot hazards.

5. Most hunting for upland and small game is on high and dry terrain and not in wetlands.

Response

The intent of the Service's policy is to protect migratory birds whenever there are potential lead poisoning impacts in wetlands and associated uplands. Refuge managers followed national policy in selecting which refuges and what areas of those refuges to include in the regulations. Nontoxic shot conversions were proposed following these policy guidelines:

1. Nontoxic shot would be required for nonwaterfowl hunting programs that take place in wetlands, lands adjacent to wetlands, and lands seasonally flooded that have a potential for lead poisoning impacts to waterfowl and other migratory birds. 2. Nontoxic shot requirements do not apply to small-caliber rifle hunting for mammals or birds, or shotgun hunting for mammals in the absence of site-specific evidence of a significant impact. 3. This policy does not affect big game hunting programs, including turkey hunting.

6. A significant law enforcement problem exists when hunters are allowed to use both lead and nontoxic shot within the same hunt area at the same time, even though for different game species.

Response

Nontoxic shot hunting zones within refuges include those upland areas that are interspersed with wetlands, or where no distinct geographical or physical boundaries (fences, dikes, or roads) exist to distinguish the upland areas from the seasonal wetland areas. When hunters can easily distinguish wetlands from uplands through posting or mapping, then this entire area can be managed for both lead shot on the uplands and nontoxic shot on the lowlands. Likewise, a particular hunt program (i.e., a species hunt) that occurs on both wetlands *and* uplands will be converted to nontoxic shot refuge-wide when there are significant hunter compliance and/or enforcement problems. In general, if hunt areas can be posted, mapped or regulated adequately so that the hunter can reasonably expect to distinguish a nontoxic shot zone from a lead shot zone, then lead shot may be used within that respective zone. Also, if State game laws require nontoxic shot for hunting a particular species, then the refuges in that State will also require nontoxic shot for hunting that species.

7. Nontoxic shot (steel) is not compatible with shooting older, softer metal barreled shotguns, such as certain doubles, over-and-unders, general Damascus type, and the original Winchester Model 12 shotguns.

Response

Steel shot is definitely harder than lead shot, however modern shotgun barrels are designed to handle this shot without difficulty. The Service is aware that possible damage may occur from shooting modern loads in older model shotguns. However, the Service's responsibility is to protect migratory birds from the toxic shot impacts.

8. Cost of nontoxic shot is prohibitively expensive and hard to locate.

Response

Nontoxic shot (steel) costs more than the equivalent lead shotshell loads. Competition between manufacturers, due to waterfowl hunting nontoxic shot requirements, has increased the supply and somewhat reduced the overall price of steel shot. Nontoxic shot usually sells for $2–12 per box more than the equivalent size lead shot. Again, the Service's objective and responsibilities are to protect the migratory bird populations.

9. Crippling loss using nontoxic shot far outweighs the potential loss from using lead shot for hunting upland and other small game in fringe wetland areas.

Response

Most hunters find that if the target is within the 30–45 yard range, clean kills will occur. Some experienced hunters find that steel shot will penetrate better than lead shot. As hunters become more proficient with shooting nontoxic shot, crippling loss will be reduced dramatically.

10. Required use of nontoxic shot will cause hunters to abandon the sport, thereby resulting in a significant loss to Federal taxes on sporting arms and ammunition, and therefore less money for wildlife/habitat enhancement projects.

Response

Long-range indications are that hunting will account for less and less of the total percentage of recreational use on refuges, and funding sources for habitat protection and management will be harder to find in times of shrinking budgets. However, the Service does not believe that conversion to nontoxic shot

on selected refuges will contribute significantly to that trend.

11. The 104th Congress has banned Federal agencies from imposing new regulations, and this proposed rule is just another form of gun control, an anti-hunting ploy and a slap at our fundamental freedom.

Response

The regulation setting process is not intended as a manner of gun control, but rather as a resource protection measure and was drawn as narrowly as possible in order to provide the least restrictive hunting opportunity.

The intent of Congress is to reduce Federal regulatory burdens, and the Administration is in the process of reducing outdated and unnecessary rules. Congress, however, realizes that the hunting of migratory birds involves several treaty obligations with neighboring countries where migratory birds spend part of the year. Whether migratory birds are using national wildlife refuges or being hunted on State or private lands, there must be certain fair and equitable rules established. Therefore annual regulations are promulgated based on annual biological determinations of harvestable surpluses of game species.

Also, fishing on national wildlife refuges would be closed to the public without the establishment of annual regulations. Therefore, Congress has been receptive to appropriate rulemakings which allow hunters and fishermen the opportunity to participate in annual harvests.

The following questions and answers respond to the range of additional comments received from individuals concerning this proposed rule:

• What is the history of nontoxic shot requirements while hunting?

A nationwide phase-out program on the use of lead shot for waterfowl hunting began in 1986. By the 1991–92 season, only nontoxic (steel) shot was allowed for waterfowl and coot hunting. Prior to 1986 many national wildlife refuges required the use of steel shot because of locally documented lead poisoning in waterfowl.

• How will I know where to use nontoxic shot?

Site-specific brochures and information are available. Contact the refuge manager of the refuge you plan to hunt, and ask for an explanation of the nontoxic boundaries.

• Where can upland game continue to be hunted using lead?

Since State wildlife agencies and national wildlife refuges have limited the use of lead shot for the hunting of waterfowl and coots and now several areas are phasing in controls on upland and other small game hunting around wetlands, hunters should consult specific wildlife refuge regulations. The refuges proposed for nontoxic shot conversion in this rulemaking will remain open to the use of lead shot for upland and small game in the 1995–96 season, although voluntary use of nontoxic shot will be requested. Most waterfowl production areas of the prairie pothole country will remain open to the use of lead shot until the 1998–99 hunting season. Again, the Service will encourage the voluntary use of nontoxic shot on those areas.

• Where will hunters be required to use nontoxic shot?

A list of refuges by State is available from the Service's 7 regional offices, and from local refuge offices. The **Federal Register**, which also lists each refuge, is accessible from The National Wildlife Refuge Home Page on the INTERNET, location: "http://bluegoose.ARW.R9.FWS.gov/", or by calling 1–800–344–WILD and requesting a refuge brochure and a 1996–97 list of refuges where nontoxic shot is required to hunt one or more species of wildlife other than waterfowl and coot.

• How many kinds of nontoxic shot can hunters purchase?

Even though manufacturers are experimenting with other metals and alloys, steel shot is still the best and most readily available nontoxic shot. Bismuth shot has only recently become available on a limited and conditional basis.

• Where can nontoxic shot be purchased?

Steel shot is available locally at many large sporting goods stores that cater to waterfowl hunters. If they don't have exactly what you are looking for, they will no doubt recommend an alternate source.

• Are states requiring the use of nontoxic shot?

Many State wildlife agencies have imposed nontoxic shot regulations on wildlife management areas where waterfowl hunting also takes place, such as Indiana (for dove hunting), Missouri (for snipe and rail), and Tennessee (for doves). Other States, such as Nebraska, require nontoxic shot for all bird hunting on certain State management areas. In Utah, nontoxic shot is required to hunt sandhill cranes, and for all upland and small game hunting on two State management areas.

• Why do you permit hunting at all on National Wildlife Refugues?

Hunting is a part of our country's heritage. Many refuges were purchased with funds derived from the sale of duck stamps to waterfowl hunters. The National Wildlife Refuge System Administration Act authorizes recreation that is compatible with the primary purpose for which the refuges were established. Some refuges have hunting as a specific purpose of being acquired.

• Will big game (buckshot deer hunting) be included in the nontoxic shot requirement?

No. The regulation requires the use of nontoxic shot for certain upland and other small game only when hunting takes place in or near permanent or seasonal wetlands.

• What wildlife are considered upland or small game and covered by this regulation?

Each specific refuge regulation will specify what wildlife species can be hunted on that particular refuge. The intent of the regulation is to include all species of upland and small game that are hunted by shotgun in or near a permanent or seasonal wetland. The hunted species present there may include, but are not limited to, the following: pheasants, quail, snipe, dove, rabbits, woodcock, partridge, grouse, and rails.

• Why do raptors including bald eagles die from ingesting lead shot?

When a duck ingests lead shot into the gizzard/stomach while feeding, the lead will be deposited and lodge in the gizzard and stay there while being worn away through natural grinding processes. A mallard, for example, may ingest 2 pellets of #4 lead shot in the gizzard, and as the bird becomes weak and disoriented from the lead poisoning, it becomes an easy food source for all predators including raptors. When the bird is eaten by a marsh hawk or bald eagle, the lead is now going to enter the raptor's body. The toxic (secondary) effect of the lead may have caused the death of both the prey and the predator.

• Will small bore rifle hunting be included in the nontoxic shot regulation.

No, small bore rifle hunting is not included in the nontoxic shot requirement.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k) govern the administration and public use of national wildlife refuges. Specifically, section 4(d)(1)(A) of the NWRSAA authorizes the Secretary of the Interior to permit the use of any area within the Refuge System for any purpose, including but not limited to, hunting, fishing, other public recreation, accommodations, and access, when the Secretary determines that such uses are compatible with the major purpose(s) for which the area was established.

The Refuge Recreation Act authorizes the Secretary to administer areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purpose(s) for which the areas were established. The Refuge Recreation Act also authorizes the Secretary to issue regulations to carry out the purposes of the Act. Hunting and sport fishing plans are developed for each refuge prior to opening it for hunting or fishing. In many cases, refuge-specific hunting and fishing regulations are included in the hunting and sport fishing plans to ensure the compatibility of the hunting and sport fishing programs with the purposes for which the refuge was established. Initial compliance with the NWRSAA and Refuge Recreation Act is ensured when hunting and sport fishing plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting and fishing in 50 CFR part 32. Continued compliance is ensured by annual review of hunting and sport fishing programs and regulations.

Consideration was given to delaying this final rule for a 30-day period, however, the Service determined that any further delay in the implementation of these refuge-specific hunting and fishing regulations will hinder the effective planning and administration of the programs. Public comment was received on this proposal during the 30-day comment period for this rule. A delay of an additional 30 days will jeopardize holding the hunts or fishing programs this year, or shorten their duration and thereby lessen the management effectiveness of this regulation. Many of these rules also relieve restrictions and allow the public to participate in recreational activities on a number of refuges. In addition, good cause exists in that, in order to continue to provide for previously authorized hunting opportunities while at the same time provide for adequate resource protection, the Service must immediately put into place modifications to some of the hunting programs on some refuges. Therefore, in accordance with (5 U.S.C. 553(d)(3), these rules will become effective as of the date of publication in the **Federal Register**.

Economic Effect

This rulemaking is not subject to Office of Management and Budget review under Executive Order 12866. In addition, a review under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) has revealed that the rulemaking would not have a significant effect on a substantial number of small entities, which include businesses, organizations or governmental jurisdictions. Hunting and fishing programs take place throughout the United States on a very broad scale. No single program has a significant localized impact. While the proposed hunting and fishing programs could increase the number of hunting and fishing licenses purchased and boost sales of hunting and fishing gear, the impact would still not be considered significant when compared to other commercial activities in the surrounding area. This proposed rule would have minimal effect on such entities.

Paperwork Reduction Act

The information collection requirements for part 32 are found in 50 CFR part 25 and have been approved by the Office of Management and Budget under Public law 104–13 and assigned clearance number 1018–0014. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information requested in the application form is required to obtain a benefit.

The public reporting burden for the application form is estimated to average six (6) minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing the form. Direct comments on the burden estimate or any other aspect of this form may be sent to the Service Information Collection Clearance Office, U.S. Fish and Wildlife Service, 1849 C Street NW., MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20530.

Federalism

This final rule will not have substantial direct effects on the States, in their relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) is ensured when hunting and sport fishing plans are developed, and the determinations required by this act are made prior to the addition of refuges to the lists of areas open to hunting and fishing in 50 CFR Part 32. The changes in hunting and fishing have been reviewed with regard to Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and have been found to either, have no affect on, or are not likely to adversely affect listed species or critical habitat. The amendment of refuge-specific hunting and fishing regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular national wildlife refuge. The B.(5) Service exclusion is employed here as these amendments are considered "[m]inor changes in the amounts or types of public use on FWS or State-managed lands, in accordance with regulations, management plans, and procedures." These refuge-specific hunting and fishing revisions to existing regulations simply qualify or otherwise define an existing hunting or fishing activity for purposes of resource management. Information regarding hunting and fishing permits and the conditions that apply to individual refuge hunts, sport fishing activities and maps of the respective areas are retained at refuge headquarters and can be obtained from the regional offices of the U.S. Fish and Wildlife Service at the addresses listed below:

Region 1—California, Hawaii, Idaho, Nevada, Oregon, and Washington.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Eastside Federal Complex, Suite 1692, 911 N.E. 11th Avenue, Portland, Oregon 97232–4181; Telephone (503) 231–6214.

Region 2—Arizona, New Mexico, Oklahoma and Texas.
Assistant Regional Director—Refuges and Wildlife U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.

Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort

Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.

Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Tennessee, South Carolina, Puerto Rico and the Virgin Islands.

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1875 Century Boulevard, Room 324, Atlanta, Georgia 30345; Telephone (404) 679–7152.

Region 5—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia.

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 300 Westgate Center Drive, Hadley, Massachusetts 01035; Telephone (413) 253–8550.

Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming.

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone (303) 236–8145.

Region 7—Alaska.

Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Rd., Anchorage, Alaska 99503; Telephone (907) 786–3545.

Primary Author. Stephen R. Vehrs, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC 20240, is the primary author of this rulemaking document.

List of Subjects

50 CFR Part 25

Administrative practice and procedures, Reporting and recordkeeping requirements, Concessions, Safety, Wildlife refuges.

* * * * *

50 CFR Part 32

Hunting, Fishing, Reporting and recordkeeping requirements, Wildlife, Wildlife refuges.

Accordingly, Parts 25 and 32 of Chapter I of Title 50 of the *Code of Federal Regulations* are amended as follows:

PART 25—[AMENDED]

1. The authority citation for Part 25 continues to read as follows:

Authority: 16 U.S.C. 460k, 664, 668dd, and 715i, and 3901 et seq.

§ 25.12 [Amended]

2. Section 25.12(a) is amended by adding the definition of nontoxic shot following the definition of National Wildlife Refuge System.

§ 25.12 Definitions.

* * * * *

Nontoxic shot means steel shot or other shot approved pursuant to 50 CFR 20.134.

* * * * *

PART 32—[AMENDED]

3. The authority citation for Part 32 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, and 715i.

§ 32.7 [Amended]

4. Section 32.7 is amended by adding the alphabetical listing of "North Platte National Wildlife Refuge" under the State of Nebraska.

5. Section 32.22 Arizona, is amended by revising paragraph A. of the Bill Williams River National Wildlife Refuge; and by adding paragraphs A., 8., through A.13. inclusive, revising paragraph B.4., and adding paragraphs B.5. and B.6. to Cibola National Wildlife Refuge to read as follows:

§ 32.22 Arizona.

* * * * *

Bill Williams River National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of mourning and white-winged doves is permitted on designated areas of the refuge subject to the following condition: Legal weapon is shotgun only.

* * * * *

Cibola National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

8. Hunting is not permitted within 50 yards of any road or levee.

9. Decoys are required for waterfowl hunting and must be removed from the refuge daily.

10. Waterfowl hunters are limited to 10 shells per day in Farm Unit 2.

11. During the Arizona waterfowl season, Farm Unit 2 is closed to dove hunting until noon each day.

12. In Farm Unit 2, waterfowl hunters must remain within 50 feet of designated station while hunting except when actively retrieving downed birds.

13. During the goose season the Hart Mine Marsh Area is closed to hunting until 10 a.m. daily.

B. Upland Game Hunting. * * *

4. Hunting of cottontail rabbit is permitted from September 1 through the last day of the respective State's quail season.

5. During the Arizona waterfowl season, hunting of quail and rabbit is not permitted in Farm Unit 2 until noon.

6. Hunting is not permitted within 50 yards of any road or levee.

* * * * *

6. Section 32.23 *Arkansas* is amended by revising paragraphs B. and C. of Felsenthal National Wildlife Refuge; by revising paragraphs B. and C. of Overflow National Wildlife Refuge; and by revising paragraphs D.1. and D.4. of White River National Wildlife Refuge to read as follows:

§ 32.23 Arkansas.

* * * * *

Felsenthal National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of quail, squirrel, rabbit, raccoon, opossum, beaver, nutria, and coyote is permitted on designated areas of the refuge subject to the following condition: Permits are required.

C. Big Game Hunting. Hunting of white-tailed deer, turkey, and feral hogs is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

Overflow National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of quail, squirrel, rabbit, raccoon, opossum, beaver, nutria, and coyote is permitted on designated areas of the refuge subject to the following condition: Permits are required.

C. Big Game Hunting. Hunting of white-tailed deer, turkey, and feral hogs is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

White River National Wildlife Refuge

* * * * *

D. Sport Fishing. * * *

1. Fishing is permitted from March 1 through November 30 except as posted and as follows: fishing is permitted year-round in LaGrueu, Essex, Prairie, and Brooks Bayous, Big Island Chute, Moon Lake and Belknap Lake next to Arkansas Highway 1, Indian Bay, the Arkansas Post Canal and adjacent drainage ditches, those borrow ditches located adjacent to the West bank of that portion of the White River Levee north of the Arkansas Power and Light Company power line right-of-way, and all refuge owned waters located North of Arkansas Highway 1.

* * * * *

4. Frogging is permitted on all refuge owned waters open for sport fishing as follows: South of Arkansas Highway 1, frogging is permitted from the beginning of the State season through November 30; North of Arkansas Highway 1, frogging is permitted for the entire State season. The use of bow and arrow for taking bullfrogs is prohibited.

7. Section 32.24 *California* is amended by revising paragraphs A.1., A.2., and A.3. of Delevan National Wildlife Refuge; by adding new paragraph A.5. to Kesterson National Wildlife Refuge; by revising paragraphs A.1. and A.2. of Modoc National Wildlife Refuge; by revising paragraphs A.1., A.2., and B.1. of Sacramento National Wildlife Refuge; and by adding new paragraph A.5. and revising paragraph B. of San Luis National Wildlife Refuge to read as follows:

§ 32.24 California.

* * * * *

Delevan National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

1. Firearms must be unloaded while being transported between parking areas and spaced blind areas.

2. Snipe hunting is not permitted in the spaced blind area.

3. Hunters assigned to the spaced blind area are restricted to within 100 feet of their assigned hunt site except for retrieving downed birds, placing decoys, or traveling to and from the area.

* * * * *

Kesterson National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

5. Access to Salt Slough is via boats only. Boats may only be launched at the Highway 140 (Fremont Ford State Recreational Area) and Highway 165 access points. the use of air-thrust and/or inboard water thrust boats is not permitted. The speed limit of 5 mph is in effect.

* * * * *

Modoc National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

1. A permit issued by the refuge to hunters with advance reservations only is required for the first weekend.

2. After the first weekend of the open season, hunting is permitted only on Tuesdays, Thursdays, and Saturdays.

Hunters must check in and out of the refuge by use of self-service permits.

* * * * *

Sacramento National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

1. Firearms must be unloaded while being transported between parking areas and spaced blind areas.

2. Snipe hunting is not permitted in the spaced blind area.

* * * * *

B. Upland Game Hunting. * * *

1. A special one-day only, pheasant hunt is permitted in the spaced blind area on the first Monday after the opening of the State pheasant hunting season.

* * * * *

San Luis National Wildlife Refuge

A. Hunting of Migratory Game Birds.

* * *

5. Vehicles may stop only at designated parking areas. Dropping of passengers or equipment, or stopping between designated parking areas is prohibited.

B. Upland Game Hunting. Hunting of pheasants is permitted on designated areas of the refuge subject to the following conditions:

1. Hunters shall possess and use, while in the field, only nontoxic shotshells (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

2. Hunters may not possess more than 25 shotshells while in the field.

* * * * *

7a. Section 32.25 *Colorado* is amended by revising paragraphs A. and B. of Arapaho National Wildlife Refuge to read as follows:

§ 32.25 Colorado.

* * * * *

Arapaho National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of migratory game birds is allowed on designated areas of the refuge pursuant to State law.

B. Upland Game Hunting. Upland game hunting is allowed on designated areas of the refuge pursuant to State law and subject, also, to the following condition: Hunters shall possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

8. Section 32.27 *Delaware* is amended by adding new paragraph B.4., revising introductory language of paragraph C., and adding new paragraph C.4. to Bombay Hook National Wildlife Refuge; and by adding new paragraph B.4. to Prime Hook National Wildlife Refuge to read as follows:

§ 32.27 Delaware.

* * * * *

Bombay Hook National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

4. Shotgun hunters shall possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

C. Big Game Hunting. Hunting of deer and turkey is permitted on designated areas of the refuge subject to the following conditions: * * *

4. A valid State permit is required for turkey hunting.

* * * * *

Prime Hook National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

4. Shotgun hunters shall possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

9. Section 32.31 *Idaho* is amended by revising paragraph D. of Kootenai National Wildlife Refuge to read as follows:

§ 32.31 Idaho.

* * * * *

Kootenai National Wildlife Refuge

* * * * *

D. Sport Fishing. Fishing is permitted only on Myrtle Creek subject to the following condition: Only bank fishing is permitted. Fishing from boats, float tubes, or other personal flotation devices is prohibited.

* * * ** *

10. Section 32.32 *Illinois* is amended by revising paragraph D.1. and adding new paragraph D.5. to Chautauqua National Wildlife Refuge; by adding new paragraphs A.3., A.4. and B.3. to Crab Orchard National Wildlife Refuge; by adding new paragraph (B.3., and revising paragraph C. of Cypress Creek National Wildlife Refuge; by adding new paragraph B.3. to Mark Twain National Wildlife Refuge; and by adding new paragraph B.4. to Upper Mississippi River National Wildlife Refuge to read as follows:

§ 32.32 Illinois.

* * * * *

Chautauqua National Wildlife Refuge

* * * * *

D. Sport Fishing. * * *

1. Sport fishing is allowed on Lake Chautauqua from February 15 through October 15. Sport fishing is not allowed in the Waterfowl Hunting Area during waterfowl hunting season.

* * * * *

5. Weis Lake on the Cameron Unit is closed to all public entry from October 16 through February 14.

Crab Orchard National Wildlife Refuge

A. Hunting of Migratory Game Birds. * * *

* * * * *

3. Waterfowl hunters may not possess more than 20 shells during the combined duck and goose seasons. Goose hunters may not possess more than 10 shells during the goose season.

4. Hunting in the Cambria Neck dove field is closed on Tuesdays and Thursdays. All Cambria Neck dove hunters are required to sign in and out and report their harvest.

B. Upland Game Hunting. * * *

3. Only nontoxic shot may be used or possessed while hunting all permitted birds, except wild turkeys (nontoxic shot regulation to be effective starting with the 1996–97 hunting season). The possession and use of lead shot is still permitted for wild turkey hunting.

* * * * *

Cypress Creek National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

3. Only nontoxic shot may use used or possessed while hunting bobwhite quail (nontoxic shot regulations to be effective starting with the 1996–97 hunting season).

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following conditions:

1. Hunters must check in and out of the refuge each day of hunting.

2. Hunting blinds may not be left overnight on the refuge.

* * * * *

Mark Twain National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

3. Only nontoxic shot may be used or possessed while hunting all permitted birds, except wild turkeys (nontoxic shot regulation to be effective starting with the 1996–97 hunting season). The possession and use of lead shot is still permitted for wild turkey hunting.

* * * * *

Upper Mississippi River National Wildlife and Fish Refuge

* * * * *

B. Upland Game Hunting. * * *

4. Shotgun hunters may only use or possess nontoxic shot when hunting for any permitted birds or other small game, except wild turkey (nontoxic shot regulation to be effective starting with the 1996–97 hunting season). The possession of lead shot is still permitted for wild turkey hunting.

* * * * *

11–12. Section 32.34 *Iowa* is amended by revising paragraph B. of Union Slough National Wildlife Refuge; and by adding new paragraph B.3. to Walnut Creek National Wildlife Refuge to read as follows:

§ 32.34 Iowa.

* * * * *

Union Slough National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of upland game is permitted in designated areas of the refuge subject to the following condition: Only nontoxic shot may be used or possessed while hunting all permitted birds, except wild turkeys (nontoxic shot regulation to be effective starting with the 1996–97 hunting season). The possession and use of lead shot is still permitted for wild turkey hunting.

* * * * *

Walnut Creek National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

3. All hunters must wear one or more of the following articles of visible, external, solid blaze orange clothing: a vest, coat, jacket, sweatshirt, sweater, shirt or coveralls.

* * * * *

13. Section 32.35 *Kansas* is amended by revising paragraphs B. and C. of Flint Hills National Wildlife Refuge; and by revising paragraphs A. and B. of Quivira National Wildlife Refuge to read as follows:

§ 32.35 Kansas.

* * * * *

Flint Hills National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of upland game is permitted on designated areas of the refuge subject to the following conditions:

1. Dogs may not be used for hunting furbearing animals or non-game animals.

2. Hunters shall possess and use, while in the field, only nontoxic shot or rimfire firearms (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

C. Big Game Hunting. Hunting of big game is permitted on designated areas of the refuge subject to the following conditions:

1. Only shotguns, muzzleloading firearms, or bow and arrow are permitted except during controlled hunts.

2. Hunters shall possess and use, while in the field, only nontoxic shot while shotgun hunting for turkey.

* * * * *

Quivira National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of geese, ducks, coots, rails (Virginia and Sora only), mourning doves, and common snipe is permitted on designated areas of the refuge subject to the following condition: Nontoxic shot is required when hunting any game on the refuge. The possession of lead shot in the field is prohibited.

B. Upland Game Hunting. Hunting of pheasant, bobwhite quail, squirrel, and rabbit is permitted on designated areas of the refuge subject to the following conditions:

1. The refuge is closed to all hunting from March 1 through August 31.

2. Squirrels and rabbits may only be hunted during the portion of the Kansas seasons that fall outside the March 1 through August 31 closed period.

* * * * *

14. Section 32.36 *Kentucky* is amended by revising paragraph D.1. of Reelfoot National Wildlife Refuge to read as follows:

§ 32.36 Kentucky.

* * * * *

Reelfoot National Wildlife Refuge

* * * * *

D. Short Fishing. * * *

1. Fishing is permitted on the Long Point Unit (north of Upper Blue Basin) from March 15 through November 15 and on the Grassy Island Unit (south of the Upper Blue Basin) from February 1 through November 15.

* * * * *

15. Section 32.37 *Lousiana* is amended by revising paragraphs A, B, C, and D of Bayou Cocodrie National Wildlife Refuge; revising paragraphs B., D.1., D.4. and removing paragraph D.5. of Catahoula National Wildlife Refuge to read as follows:

§ 32.37 Louisiana.

* * * * *

Bayou Cocodrie National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of woodcock is permitted on designated areas of the refuge subject to the following conditions: Permits are required.

B. Upland Game Hunting. Hunting of squirrel, rabbit, raccoon, opossum and coyote is permitted on designated areas of the refuge subject to the following condition: Permits are required.

C. Big Game Hunting. Hunting of white-tailed deer is permitted on designated areas of the refuge subject to the following conditions: Permits are required.

D. Sport Fishing. [Reserved]

* * * * *

Catahoula National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of raccoon, squirrel, rabbit, and feral hogs is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

D. Sport Fishing. * * *

1. Fishing is permitted from one hour before sunrise until one-half hour after sunset. Only pole and line or rod and reel fishing is permitted. Snagging is prohibited.

* * * * *

4. All other refuge waters, including Duck Lake, Muddy Bayou, ditches, all outlet waters, and all flooded woodlands are open to fishing and boating from March 1 through October 31.

* * * * *

16. Section 32.38 *Maine* is amended by revising paragraph B.2. of Rachel Carson National Wildlife Refuge; and by revising paragraphs A. and B. of Sunkhaze Meadows National Wildlife Refuge to read as follows:

§ 32.38 Maine.

* * * * *

Rachel Carson National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

2. Shotgun hunters will possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

Sunkhaze Meadows National Wildlife Refuge

A. Hunting of Migratory Game Birds. Hunting of migratory game birds is permitted on designated areas of the refuge pursuant to State law.

B. Upland Game Hunting. Hunting of upland game is permitted on designated areas of the refuge subject to the following condition: Shotgun hunters will and possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

17. Section 32.39 *Maryland* is amended by adding new paragraph B.6. to Patuxent Wildlife Research Center to read as follows:

§ 32.39 Maryland.

* * * * *

Patuxent Wildlife Research Center

* * * * *

B. Upland Game Hunting. * * *

6. Shotgun hunters will possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

18. Section 32.40 *Massachusetts* is amended by adding new paragraph B.3. to Oxbow National Wildlife Refuge to read as follows:

§ 32.40 Massachusetts.

* * * * *

Oxbow National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

3. Hunters will possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

19. Section 32.42 *Minnesota* is amended by adding new paragraph B.1. to Big Stone National Wildlife Refuge; by adding new paragraph B.3. to Minnesota Valley National Wildlife Refuge; by revising paragraphs A., B., C., and D. of Morris Wetland Management District; by adding new paragraphs A.1. and B.1. and revising paragraph C.4. of Rice Lake National Wildlife Refuge; by adding new paragraphs A.5. and B.1. to Sherburne National Wildlife Refuge; and by revising introductory language of paragraph A. and revising paragraph B. of Tamarac National Wildlife Refuge to read as follows:

§ 32.42 Minnesota.

* * * * *

Big Stone National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

1. Only nontoxic shot may be used or possessed while hunting for partridge or ring-necked pheasant (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

3. Hunters may not possess more than 25 shells while in the field.

D. Sport Fishing. Fishing is permitted on designated areas of the refuge subject to the following conditions:

1. The refuge is open from 5 a.m. to one and one-half hours after sunset.

2. Fishing is permitted on refuge impoundments and ponds from February 1 through September 30. Other refuge waters (Columbia River and its backwaters) are open in accordance with State regulations.

3. Fishing is permitted only with hook and line.

* * * * *

38. Section 32.68 *West Virginia* is amended by adding new paragraph B.4. to Ohio River Islands National Wildlife Refuge to read as follows:

§ 32.68 West Virginia.

* * * * *

Ohio River Islands National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

4. Hunters will possess and use, while in the field, only nontoxic shot (nontoxic shot regulation to be effective starting with the 1996–97 hunting season).

* * * * *

39. Section 32.69 *Wisconsin* is amended by adding new paragraph B.1. to Horicon National Wildlife Refuge to read as follows:

§ 32.69 Wisconsin.

* * * * *

Horicon National Wildlife Refuge

* * * * *

B. Upland Game Hunting. * * *

1. Shotgun hunters may use or possess only nontoxic shot while hunting upland game species.

* * * * *

40. Section 32.70 *Wyoming* is amended by revising paragraph B. of Pathfinder National Wildlife Refuge; and by revising paragraph B. of Seedskadee National Wildlife Refuge to read as follows:

§ 32.70 Wyoming.

* * * * *

Pathfinder National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of sage grouse and cottontail rabbit is permitted on designated areas of the refuge subject to the following condition: Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

Seedskadee National Wildlife Refuge

* * * * *

B. Upland Game Hunting. Hunting of sage grouse and cottontail rabbit is permitted on designated areas of the refuge subject to the following condition: Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

Dated: October 20, 1995.

George T. Frampton, Jr.,

Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310–55–M

Proposed Rules

Federal Register
Vol. 60, No. 232
Monday, December 4, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RESERVE SYSTEM

12 CFR Part 250

[Docket No. R–0902]

Transactions With Affiliates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Board is proposing to conform the definition of capital stock and surplus for purposes of section 23A of the Federal Reserve Act to the definition of unimpaired capital and unimpaired surplus used in Regulation O and to the definition of capital and surplus used by Office of the Comptroller of the Currency (OCC) in calculating the limit on loans by a national bank to a single borrower. The proposed rule seeks to reduce the burden for member banks and other insured depository institutions monitoring lending to their affiliates.

DATES: Comments must be submitted on or before January 8, 1996.

ADDRESSES: Comments should refer to Docket No. R–0902, and may be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue, N.W., Washington, D.C. 20551. Comments also may be delivered to the Board's mail room in the Eccles Building between 8:45 am and 5:15 pm weekdays, or to the guard station in the Eccles Building courtyard on 20th Street, N.W. (between Constitution Avenue and C Street) at any time. Comments may be inspected in Room MP 500 of the Martin Building between 9 am and 5 pm weekdays, except as provided in 12 CFR 261.8 of the Board's rules regarding availability of information.

FOR FURTHER INFORMATION CONTACT: Pamela G. Nardolilli, Senior Attorney (202/452–3289) Legal Division, or Barbara Bouchard, Supervisory Financial Analyst (202/452–3072), Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System. For users of the Telecommunications Device for the Deaf (TDD) only, please contact Dorothea Thompson (202/452–3544).

SUPPLEMENTARY INFORMATION: Section 23A of the Federal Reserve Act, 12 U.S.C. 371c, regulates certain transactions between insured depository institutions and their affiliates, including transactions between affiliated depository institutions. Section 23A is designed to protect insured depository institutions from abuses that may result from lending and asset purchase transactions with their affiliates. In general, section 23A prohibits an insured depository institution from engaging in covered transactions (which include extensions of credit and purchases of assets) with any single affiliate in excess of 10 percent of the institution's capital stock and surplus. A 20 percent aggregate limit is imposed on the total amount of covered transactions by an insured depository institution with all affiliates. Under section 23A, all extensions of credit between an insured depository institution and its affiliate must meet certain collateral requirements. Section 23A also prohibits an insured depository institution from purchasing any low-quality assets from an affiliate, and requires that all transactions with an affiliate must be conducted on terms that are consistent with safe and sound banking practices. Although section 23A, by its terms, applies only to member banks, the Federal Deposit Insurance Act applies section 23A to all nonmember insured banks (12 U.S.C. 1828 (j)) and the Home Owners' Loan Act applies section 23A to savings associations (12 U.S.C. 1468).

Section 23A does not include an explicit definition of "capital stock and surplus." A 1964 Board interpretation refers to the definition of capital as "the amount of unimpaired common stock plus the amount of preferred stock outstanding and unimpaired" but explicitly excluded debt-like instruments from the definition of capital and surplus. 12 CFR 250.161. In the interpretation, the Board recognized that certain notes and debentures could be considered as capital or capital stock for purposes of membership in the Federal Reserve System, but concluded that for purposes of certain Federal Reserve Act limitations and requirements, such instruments could not be regarded as part of either capital or capital stock. A subsequent Board interpretation issued in 1971 states that capital stock and surplus, as used in provisions of the Federal Reserve Act, includes reserves for loan losses and valuation reserves for securities. 12 CFR 250.162. As a practical matter, this definition of capital and surplus has been implemented as total equity capital and the allowance for loan and lease losses (ALLL) as set forth in the bank's Report of Condition and Income (Call Report).

Revisions to the Definition of Capital and Surplus

In February 1995, the OCC amended its regulation, 60 FR 8526 (February 15, 1995) (to be codified at 12 CFR 32.2(b)), setting forth lending limits on the amount a national bank may lend to a single counterparty and revised the definition of capital and surplus upon which lending limits are based. In June 1995, the Board amended its Regulation O, 60 FR 31053 (June 13, 1995) (to be codified at 12 CFR 215.2), to revise the definition of unimpaired capital and unimpaired surplus used to limit loans to insiders, to a definition that is consistent with that used for purposes of the OCC's single borrower lending limits to eliminate discrepancies in the definitions of capital used for different lending limit purposes and to reduce regulatory burden for banks monitoring lending to their insiders. Under the revised OCC regulation, capital and surplus is defined as Tier 1 and Tier 2 capital as calculated under the risk-based capital guidelines plus the balance of the allowance for loan and lease losses (ALLL) excluded from Tier 2 capital.[1]

The Board is recommending the adoption of a definition of "capital stock and surplus" for purposes of section 23A that is the same as the general capital definitions that are used for Regulation O and the national bank lending limits. Based on June 1995 Call Report data, the revised definition would decrease the limits for

[1] Under the banking agencies' risk-based capital guidelines, Tier 1 capital includes common stock, some noncumulative perpetual preferred stock and related surplus, and minority interest in equity accounts of consolidated subsidiaries. Tier 2 capital includes the ALLL up to 1.25 percent of the bank's weighted risk assets, perpetual preferred stock and related surplus, hybrid capital instruments, and certain subordinated debt.

transactions with affiliates for a majority of banks. Unlike the current capital stock and surplus definition for section 23A, the revised definition would permit banks to include in the calculation of capital stock and surplus, subordinated debt that qualifies for inclusion in Tier 2 capital. On the other hand, unlike equity capital, Tier 1 capital does not include securities revaluation reserves, in particular gains and losses on available-for sale securities, which under Statement of Financial Accounting Standards Number 115 (FAS 115) are considered a component of equity capital. Overall, it is estimated that the revised definition of capital stock and surplus would result in a change for most banks of 5 percent or less from their current limit, although a few community and mid-sized banks would experience substantial changes as a result of their having large gains or losses on available-for-sale securities.

Notwithstanding the decrease for many banks in the amount of capital stock and surplus that would be used to calculate their section 23A limit under the revised definition, the Board believes that, over all, revising the definition would be beneficial for all insured depository institutions for two reasons. First, it would provide consistency in the capital definition used for Regulation O and the national bank lending limits. Second, the revised definition would result in a more stable limit over time than the current definition because it excludes revaluation gains and losses on available-for-sale securities, a component of equity capital that tends to be volatile.

The Board also proposes to amend 12 CFR 250.161 and 12 CFR 250.162 to delete the reference to section 23A to reflect the proposed change.

Initial Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to publish an initial regulatory flexibility analysis with any notice of proposed rulemaking. Two of the requirements of an initial regulatory flexibility analysis (5 U.S.C. 603(b))—a description of the reasons why the action by the agency is being considered and a statement of the objectives of, and legal basis for, the proposed rule—are contained in the supplementary information above.

Another requirement for the initial regulatory flexibility analysis is a description of, and where feasible, an estimate of the number of small entities to which the proposed rule will apply. The proposed rule would apply to all insured depository institutions, regardless of size. The Board has determined that its proposed rule would impose no additional reporting or recordkeeping requirements, and that there are no relevant federal rules that duplicate, overlap, or conflict with the proposed rule. In addition, the proposed rule is not expected to have a significant economic impact on small institutions. Instead, the proposed rule is expected to relieve the regulatory burden on a majority of insured depository institutions.

Paperwork Reduction Act

In accordance with section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.; 5 CFR 1320 Appendix A.1.), the Board reviewed the proposed rule under authority delegated to the Board by the Office of Management and Budget. No collections of information pursuant to the Paperwork Reduction Act are contained in the proposed rule.

List of Subjects in 12 CFR Part 250

Credit, Federal Reserve System.

For the reasons set forth in the preamble, the Board proposes to amend 12 CFR part 250 as set forth below:

PART 250—MISCELLANEOUS INTERPRETATIONS

1. The authority citation for part 250 would continue to read as follows:

Authority: 12 U.S.C. 248(i) and 371c(e).

§ 250.161 [Amended]

2. In § 250.161 paragraph (d) is amended by removing the words "loans to affiliates (12 U.S.C. 371c)," in the first sentence.

§ 250.162 [Amended]

3. In § 250.162, paragraph (a) is amended by removing the words "Loans to affiliates (12 U.S.C. 371c), purchases" in the first sentence and adding "Purchases" in their place.

4. A new § 250.242 is added to read as follows:

§ 250.242 Section 23A of the Federal Reserve Act—definition of capital and surplus.

(a) An insured depository institution's capital stock and surplus for purposes of section 23A of the Federal Reserve Act (12 U.S.C. 371c) is defined as:

(1) An institution's Tier 1 and Tier 2 capital included in the institution's risk-based capital under the capital guidelines of the appropriate Federal banking agency, based on the institution's most recent consolidated report of condition filed under 12 U.S.C. 1817(a)(3); and

(2) The balance of an institution's allowance for loan and lease losses not included in the institution's Tier 2 capital for purposes of the calculation of risk-based capital by the appropriate Federal banking agency, based on the institution's most recent consolidated report of condition filed under 12 U.S.C. 1817(a)(3).

(b) *Definitions.* For purposes of this section, the terms *appropriate Federal banking agency* and *insured depository institution* are defined as those terms are defined in section 3 of the Federal Deposit Insurance Act, 12 U.S.C. 1813.

By order of the Board of Governors of the Federal Reserve System, November 28, 1995.

William W. Wiles,

Secretary of the Board.

[FR Doc. 95–29425 Filed 12–1–95; 8:45 am]

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–NM–58–AD]

Airworthiness Directives; Fokker Model F28 Mark 0100 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Fokker Model F28 Mark 0100 series airplanes. This proposal would require modification of the thrust reverser doors, and replacement of the Collins multifunction display units (MFDU) with new MFDU's. This proposal would also require installation of a placard, for certain airplanes. This proposal is prompted by a report that cracks were found in the flanges of the main hinge fittings of the horizontal stabilizer due to higher than anticipated loads induced during thrust reverser operation. The actions specified by the proposed AD are intended to ensure structural integrity of the horizontal stabilizer by reducing the thrust reverser loads on the horizontal stabilizer.

DATES: Comments must be received by January 16, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–58–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments

may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Fokker Aircraft USA, Inc., 1199 North Fairfax Street, Alexandria, Virginia 22314. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Tim Dulin, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2141; Fax (206) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–NM–58–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 95–NM–58–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

Discussion

The Rijksluchtvaartdienst (RLD), which is the airworthiness authority for the Netherlands, recently notified the FAA that an unsafe condition may exist on certain Fokker Model F28 Mark 0100 series airplanes. The RLD advises that, during full scale fatigue testing of the horizontal and vertical stabilizers, cracks were found in the flanges of the left- and right-hand main hinge fittings of the horizontal stabilizer on a Model F28 Mark 0100 test article. Investigation revealed that such cracking is the result of higher than anticipated loads induced on the tail of the airplane during thrust reverser operation. This condition, if not corrected, could lead to a deteriorated fatigue life of the main hinge fitting structure on the horizontal stabilizer and reduced structural integrity of the horizontal stabilizer.

Fokker has issued Service Bulletin SBF100–78–010, Revision 1, dated April 26, 1994, which describes procedures for modification of the thrust reverser doors. This modification involves installation of extended bumper fittings on the thrust reverser doors. Accomplishment of this modification will reduce the reverse thrust at a given engine pressure ratio by increasing the spillage gap.

Fokker has also issued Service Bulletin SBF100–31–036, dated February 7, 1994, which describes procedures for replacement of the Collins multifunction display units (MFDU) having part number (P/N) 622–8047–412 or 622–8047–422 with new MFDU's having P/N 622–8047–414 or 622–8047–423, respectively. Accomplishment of this replacement will reduce thrust reverser loads on the horizontal stabilizer.

Additionally, Fokker has issued Service Bulletin SBF100–31–038, dated April 26, 1994, which describes procedures for installation of a placard on the main instrument panel, if the replacement of the MFDU is accomplished prior to modification of the thrust reverser door. The placard provides current engine limits for these airplanes.

The RLD classified these service bulletins as mandatory and issued Netherlands airworthiness directive BLA 94–062(A), dated April 29, 1994, in order to assure the continued airworthiness of these airplanes in the Netherlands.

This airplane model is manufactured in the Netherlands and is type certificated for operation in the United States under the provisions of section 21.29 of the Federal Aviation Regulations (14 CFR 21.29) and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the RLD has kept the FAA informed of the situation described above. The FAA has examined the findings of the RLD, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require modification of the thrust reverser doors. The proposed AD would also require replacement of certain Collins multifunction display units (MFDU) with certain new MFDU's, and installation of a placard, if the replacement of the MFDU is accomplished prior to modification of the thrust reverser door. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 102 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 127 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $19,000 per airplane. Based on these figures, the cost impact of the proposed AD on U.S. operators is estimated to be $2,715,240, or $26,620 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket.

A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Fokker: Docket 95–NM–58–AD.

Applicability: Model F28 Mark 0100 series airplanes; serial numbers 11244 through 11460 inclusive, 11463 through 11469 inclusive, 11471, 11474, 11476, 11478, and 11479; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To ensure structural integrity of the horizontal stabilizer by reducing the thrust reverser loads on the horizontal stabilizer, accomplish the following:

(a) Prior to the accumulation of 15,000 total flight cycles, or within 1 year after the effective date of this AD, whichever occurs later, accomplish the requirements of paragraphs (a)(1) and (a)(2) of this AD concurrently, except as provided by paragraph (b) of this AD.

(1) Modify the thrust reverser doors in accordance with Fokker Service Bulletin SBF100–78–010, Revision 1, dated April 26, 1994; and

(2) Replace the Collins multifunction display units (MFDU) having part number (P/N) 622–8047–412 or 622–8047–422 with new MFDU's having P/N 622–8047–414 or 622–8047–423, respectively; as applicable; in accordance with Fokker Service Bulletin SBF100–31–036, dated February 7, 1994.

(b) Paragraph (a)(2) of this AD may be accomplished prior to paragraph (a)(1) of this AD provided that a placard is installed on the main instrument panel in accordance with Fokker Service Bulletin SBF100–31–038, dated April 26, 1994, and removed, prior to further flight, after accomplishment of the requirements of paragraph (a)(1) of this AD.

(c) For airplanes that have been modified in accordance with paragraphs (a)(1) and (a)(2) of this AD: No person may install a Grumman Aerospace aft engine cowling having part number 1159P41440 on any airplane unless it has been previously modified in accordance with Fokker Component Service Bulletin P41440–78–02, dated December 17, 1993, as revised by Fokker Component Service Bulletin Change Notification P41440–78–02/001, dated February 25, 1995.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on November 28, 1995.

S. R. Miller,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 95–ACE–13]

Proposed Amendment to Class E Airspace; Webster City, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Class E airspace area at Webster City Municipal Airport, Webster City, IA. The development of a new Standard Instrument Approach Procedure (SIAP) based on the Global Positioning System (GPS) has made the proposal necessary. The intended effect of this proposal is to provide additional controlled airspace for aircraft executing the SIAP at Webster City Municipal Airport.

DATES: Comments must be received on or before January 8, 1996.

ADDRESSES: Send comments on the proposed in triplicate to: Manager, Air Traffic Operations Branch, ACE–530, Federal Aviation Administration, Docket No. 95–ACE–13, 601 East 12th Street, Kansas City, Missouri 64106.

The official docket may be examined in the Office of the Assistant Chief Counsel for the Central Region at the same address between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

An informal docket may also be examined during normal business hours in the office of the Manager, Air Traffic Operations Branch, Air Traffic Division, at the address listed above.

FOR FURTHER INFORMATION CONTACT: Kathy Randolph, Air Traffic Division, Air Traffic Operations Branch, ACE–530C, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; telephone number: (816)426–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 95–ACE–13." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments

received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–230, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedures.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to provide additional controlled airspace for a new Instrument Flight Rules (IFR) procedure at the Webster City Municipal Airport. The additional airspace would segregate aircraft operating under VFR conditions from aircraft operating under IFR procedures. The area would be depicted on appropriate aeronautical charts thereby enabling pilots to circumnavigate the area or otherwise comply with IFR procedures. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 960

[Docket No. 951031259–5259–01]

Licensing of Private Remote-Sensing Space Systems

AGENCY: National Environmental Satellite, Data, and Information Service (NESDIS), NOAA, Commerce.

ACTION: Notice of inquiry and request for public comment.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) is considering revisions to its regulations for the licensing of private remote sensing space systems under Title II of the Land Remote Sensing Policy Act of 1992, 15 U.S.C. 5601 *et seq.* To promote the process, NOAA is using an informal Task Group, of NOAA and Commerce employees, to compile and consider public comment on the more significant issues involved in the licensing process. NOAA will use these comments to decide the extent to which it needs to revise its regulations and what issues should be addressed. Should NOAA decide that new regulations are necessary a proposed rule would be published to solicit public comment. NOAA will then circulate its final draft of proposed regulations in the informal rulemaking process. NOAA intends that soliciting comments on the issues proposed in this notice prior to the issuance of any proposed rule will ensure that NOAA's regulations include provisions advantageous to industry, as well as to Government. This Notice solicits such comments, particularly from the regulated industry.

DATES: Comments must be received on or before February 2, 1996.

ADDRESSES: Comments should be sent to, Michael Mignogno, NOAA, National Environmental Satellite, Data, and Information Service, Federal Building 4, Room 3301–E, Washington, D.C. 20233.

FOR FURTHER INFORMATION CONTACT: Michael Mignogno at (301) 457–5210 or Catherine Shea, NOAA, Office of General Counsel at (301) 713–0053. Additional Discussion Packages are available from Michael Mignogno at the above address.

SUPPLEMENTARY INFORMATION: In 1987, NOAA published its licensing regulations that set forth procedures for submission and Government review of an application pursuant to the Land Remote Sensing Commercialization Act of 1984. Only one license was issued under this act. When Congress passed the Land Remote Sensing Policy Act of 1992 (the Act), it made several revisions to the licensing process to stimulate commercial interest in operating systems. On March 10, 1994, the President issued his policy to promote U.S. competitiveness in remote sensing space capabilities while protecting U.S. national security and foreign policy interests. Since 1993, NOAA has issued nine licenses.

NOAA is considering updating its 1987 regulations to reflect statutory changes, intervening events, and recent licensing experiences and to ensure that the Government's oversight is simple, transparent, and predictable. Particularly, NOAA seeks to support the President's policy that long term U.S. national security and foreign policy interests are best served by ensuring the U.S. industry continues to lead this emerging market.

In order to foster the policy of transparency in the licensing process, NOAA is seeking public input on whether extensive new regulations are necessary and, if so, what issues should be addressed in such rule. To assist this process, NOAA developed, for the Task Group, a series of Discussion Packages that highlight some of the more significant areas for discussion. NOAA is seeking early public input on these and on other significant aspects of the licensing process. NOAA is especially interested in suggestions for innovative methods to carry out its statutory licensing responsibilities in ways that enhance U.S. competitiveness. The significant issues identified to date and highlighted in the discussion packages can be summarized as follows:

1. Review Procedures for License Applications

A. How can the process be improved and modified to provide greater transparency and predictability and shorter response time?

NOAA seeks to eliminate uncertainty from the licensing process that could potentially threaten commercial practices while preserving essential national security and foreign policy interests. For each new system, these interests are first addressed during the review of the license application. The review must be thorough and careful, but at the same time transparent, predictable, and timely so as not to deter pursuit of and investment in potential systems. The Government must complete its review within the statutory time limit of 120 days or, if possible, within a shorter time limit.

To address these legitimate interests and comply with the intent of the Act and the President's policy, NOAA is considering whether the Government should institute more formal administrative time limits and more detailed record keeping requirements in making determinations on a license application. It is contemplated that under such a system any reviewing agency unable to comply with a time limit would be required to submit a satisfactory explanation and specify the additional time required. The administrative record would be opened as soon as an application is received and would include all comments on that application. *Ex parte* communications would not be permitted and oral input should not influence the process in any way. The applicant would have the right to inspect this record during business hours.

To promote timely and transparent decisions NOAA is considering additional procedures pursuant to its enforcement authority under section 203 of the Act. This section establishes the right to a hearing on the record in the event NOAA takes certain adverse actions such as the denial of a license or imposition of conditions in a license. NOAA is considering defining adverse actions to include the Government's failure to act within the applicable time limit and/or advise the applicant of the reasons for the delay.

In the event of an appeal, the administrative record would stand alone as evidence for all determinations made during the application review. NOAA would have to demonstrate that a preponderance of the evidence in this record establishes, for example, that the system proposed would compromise identified national security or foreign policy interests. As such, the record would have to include information from the appropriate secretary sufficient to identify the interest at risk and describe why the proposed system would not preserve that interest. (This information may be classified where necessary). Should NOAA establish such an appeal process, the record would have to contain this information and the evidence would have to be sufficient to meet the requisite test or the agency determination would not prevail.

B. What are the minimum informational requirements for a complete application?

A related issue in terms of ensuring expeditious review is determining when an application is considered complete. It is important that applicants and the Government agree on what basic information must be provided in order to enable the Government to perform a thorough review and, at the same time, avoid over-burdening the applicant. Such an understanding also will avoid frequent requests for additional information which delay the process. Particularly important is the information that describes the operational aspects of a proposed system which are significant in terms of its national security and foreign policy implications. NOAA is interested in assessing what information is necessary before a review can begin and what level of burden is imposed by gathering the information necessary for a complete application. Any comments received on this issue also will be relevant in terms of compliance with the Paperwork Reduction Act.

The existing informational requirements are found at 15 CFR 960.6. A more complete list, that includes additional items identified as significant by the reviewing agencies during recent license application reviews, is contained in Discussion Package 1. This Discussion Package also sets forth in more detail the type of process that NOAA is considering for reviewing license applications.

2. Restricting Imaging To Preserve National Security/Foreign Policy Interests—What Standard Must Be Applied and What Procedures Must Be Followed?

Once a license is issued and a remote sensing satellite is operational, the most critical issue for the licensee is when the Government might restrict imaging of a particular area and for how long because of national security or foreign policy considerations.

The basic license condition, derived from the President's policy, provides:

The Secretary of Commerce may, after consulting with the Secretary of Defense or State, as appropriate, require the licensee to limit imaging an area and/or limit distributing data from an area during any period when national security or foreign policy interests may be compromised.

To ensure that restrictions will be invoked only where appropriate, this consultation and any decision to implement this condition will be controlled at the Secretarial level and any Secretarial disagreement will be elevated to the Presidential level.

While the above standard and process appears to have achieved considerable consensus, questions have been raised whether such a standard is too vague. For example, representatives of the media addressed this issue in the 1989 Petition for Rulemaking. The media representatives have maintained that imaging could be restricted only if "there is clear evidence that such action is necessary to prevent serious and immediate injury to distinct and

compelling national security and foreign policy interests of the United States." (Petition for Rulemaking filed by Radio Television News Directors Association, April 5, 1988)

In 1989, NOAA responded to this Petition for Rulemaking announcing that it would reopen its regulations and would incorporate the principle that "conditions imposed in a license will be the least burdensome possible." 54 FR 1945. This rulemaking was interrupted by passage of the Act in 1992 and NOAA is now considering a number of provisions to implement the President's policy. These could include ensuring that limitations on imaging would be imposed only over the smallest area and for the shortest period of time possible and would not be imposed at all if comparable data is otherwise available.

Ultimately, any standard and process for making decisions concerning the need for restrictions on imaging must ensure that the Government has the ability to protect its national security and international obligation interests adequately while preserving First Amendment rights and other U.S. interests, including that of protecting industry's position in global competition. NOAA believes that it is now an appropriate time for a full discussion of this issue before systems become operational. Comments from previous rulemaking actions and other relevant material are contained in Discussion Package 2.

3. Review of Foreign Agreements

Section 202(b)(6) of the Act requires that licensees "notify the Secretary [of Commerce] of any agreement the licensee intends to enter with a foreign nation, entity, or consortium involving foreign nations, or entities." To implement this section, NOAA's licenses now require licensees to provide notice of a significant or substantial foreign agreement at least 60 days before conclusion. This requirement reflects interagency consensus that sixty days is needed for meaningful notification but that, consistent with the President's policy, this burden is justified only if agreements are significant or substantial. As required by the President's policy, NOAA anticipates defining such agreements in these regulations and solicits comments on this issue (as well as the appropriateness of the 60 day review period).

This provision of the Act is subject to differing legal opinions. One view of the Act is that it requires that licensees notify the Secretary of *every* agreement. The Department of Commerce disagrees with this interpretation. Legislation has been introduced on this subject; however, to date no subsequent legislative action has occurred.

Should NOAA's legal interpretation not be upheld and no legislation be passed, comments might want to address whether NOAA should consider defining different classes of agreements with corresponding notification requirements. For example, the regulations could retain a 60 day notice requirement for significant or substantial agreements while requiring that notice of other agreements be provided only prior to their effective date.

A. What agreements must be submitted for review?

The threshold question with respect to the notification requirement of section 202(b)(6) of the Act is what agreements are covered. The purpose of such notification is to ensure continued preservation of U.S. national security and foreign policy interests. Existing licenses require notification of those types of agreements that could have particular national security or foreign policy implications such as: those that give a foreign party control over the operation of the system, e.g., the ability to operate the spacecraft, task the sensors, or exercise managerial control; and those that provide for a significant role in distributing the data from the system, e.g., by operating a foreign ground station.

Routine data sales have traditionally been excluded from the definition of significant agreement because an advance notice requirement would put U.S. companies at a competitive disadvantage. Furthermore, scrutinizing all direct sales to foreign customers would not effectively preserve U.S. interests inasmuch as a determined buyer could purchase any scene or scenes desired through a variety of legal channels.

More specifically, existing licenses require notice of the following types of foreign agreements:

(1) cooperation in the launch and/or operation of the spacecraft;

(2) Tasking of the satellite sensors, modifying satellite tasking commands, revising the priority of tasking requests, or otherwise providing an opportunity to exercise managerial control over the system's operation;

(3) Real-time direct access to unenhanced data; or

(4) Distributorship arrangements involving the receipt of high volumes of unenhanced data;

(5) An equity interest in the Licensee. (A license amendment is required if the aggregate equity interest in the Licensee by foreign nations and/or persons exceeds or will exceed 25 percent.)

These licenses exclude agreements that provide only for the sale of data or value added products, or for the establishment of marketing outlets in foreign countries established in the ordinary course of business if described in the plan for sale and distribution contained in the license application.

NOAA seeks comment on whether the above criteria are adequate to define "significant or substantial" agreements. In particular, NOAA is searching for appropriate criteria to determine when review is necessary for agreements providing solely for foreign investment in a licensee. Every sale of stock to a foreign investor cannot be subject to review. On the other hand, a threshold for review is necessary to ensure that the technology remains secure and that the operator remains sufficiently under U.S. ownership or control that it must respond appropriately when necessary to preserve national security. Furthermore, in accordance with the President's policy, aggregate foreign investment in excess of a particular amount would not only be subject to notification but to approval, i.e., by amendment to the license. NOAA is particularly interested in industry views about what criteria should trigger a review of a foreign investment agreement.

B. What process should be in place to inform applicants when the Government has identified a concern with a potential foreign agreement? When the Government raises a concern and issues negative advice, what rights of appeal should be available to an applicant or licensee?

To promote more timely and transparent decisions on the review of significant foreign agreements NOAA is considering a process that would be similar to the review of an initial license application in that the Government would institute more formal administrative time limits and more detailed record keeping requirements. However, this process would recognize that, unlike the case of an initial application, the Secretary does not have the legal authority to approve or disapprove these agreements. Therefore, if the Secretary does not advise a licensee of any conflicts within sixty days of notification, the licensee is free to enter into the agreement.

A possible process to be considered and on which NOAA seeks comments is as follows: If the Secretary does advise a licensee of a conflict, i.e., that the proposed agreement will compromise national security or foreign policy interests, the licensee may at that point request a hearing on the record to determine whether a preponderance of the evidence in the record supports that conclusion. In circumstances where waiting for the normal hearing process could jeopardize relations among parties to the agreement, NOAA would provide an expedited hearing process.

Discussion Package 3 sets forth in more detail the type of process under consideration.

6. Miscellaneous

Comments on the above issues are specifically solicited but all comments on improving and simplifying the regulations are welcome and will be reviewed and considered in the course of the normal agency process of issuing proposed regulations, should such regulations be deemed necessary. NOAA is also interested in comments on whether or not NOAA should sponsor a public meeting on the issues presented in this notice or others related to the regulations.

NOAA intends that all information obtained from the public in connection with this Notice be a matter of public record. Consequently, comments must be in writing to be considered. Oral comments are discouraged. NOAA will not accept submissions made on a confidential basis. The record containing all comments will be maintained with the above listed contacts, NOAA, Federal Building 4, Room 3301, Suitland, MD. From 9 a.m. to 3 p.m., it may be inspected, by appointment, and any comments copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Further information about inspection and copying of records at this facility may be obtained from the above contacts.

Commentors can request copies of the Discussion Packages referenced in this document from the contacts listed above.

Robert S. Winokur,

Assistant Administrator for Satellite and Information Services.

BILLING CODE 3510–12–P

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 202

[Docket No. RM 95–7]

Registration of Claims to Copyright, Group Registration of Photographs

AGENCY: Copyright Office, Library of Congress.

ACTION: Proposed regulations with request for comments.

SUMMARY: The Copyright Office of the Library of Congress is proposing regulations that permit group registration of unpublished or published photographs without the deposit of copies of the works. These proposed regulations would enable photographers and photography businesses to seek the benefits of registration by making it less burdensome for them to register a claim to copyright in a large number of photographs taken by a single photographer or photography business. The Office seeks comment on the proposed regulations.

DATES: Comments on the proposed regulation should be in writing and received on or before January 18, 1996. Reply comments should be received February 2, 1996.

ADDRESSES: If sent BY MAIL, fifteen copies of written comments should be addressed to Marilyn J. Kretsinger, Acting General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Telephone: (202) 707–8380. Telefax: (202) 707–8366. If BY HAND, fifteen copies should be brought to: Office of the General Counsel, Copyright Office, James Madison Memorial Building, Room LM–407, First and Independence Avenue, S.E., Washington, D.C. 20540.

FOR FURTHER INFORMATION CONTACT: Marilyn J. Kretsinger, Acting General Counsel, Telephone: (202) 707–8380 or Telefax (202) 707–8366.

SUPPLEMENTARY INFORMATION: Section 408 of 17 U.S.C. provides that a copyright owner may obtain registration of a copyright claim by delivering to the Copyright Office a deposit, an application and a fee. With respect to the deposit, the nature of the copy to be deposited is set out in general terms, e.g., one complete copy of an unpublished work. However, broad authority is granted to the Register to provide for alternative forms of deposit. Section 408(c)(1) provides that the Register may require or permit the deposit of identifying material in lieu of an actual copy of the work. Congress' intent is reflected in the various legislative reports that accompanied the enactment of the copyright law. Congress instructed the Office to keep the deposit provisions flexible "so that there will be no obligation to make deposit where it serves no purpose, so that only one copy or phonorecord may be deposited where two are not needed, and so that reasonable adjustments can be made to meet practical needs in special cases." H.R. Rep. No. 1476, 94th Cong., 2d Sess. 151 (1976); S. Rep. No. 473, 94th Cong., 1st Sess. 134 (1975). The law also authorizes the Register to require or permit "a single registration of a group of related works."

Registration can be made at any time. Section 412 of 17 U.S.C. prohibits the awarding of statutory damages and attorney's fees where the work has not been registered before an infringement occurs.[1] Although actual damages as well as injunctions are always available remedies, the Copyright Office recognizes the significant benefits of early registration.

Registration Concerns Raised by Photographers

During the congressional hearings on the Copyright Reform Act of 1993, photographers complained that they were unable to take advantage of the benefits of registration because the Copyright Office practices were exceedingly burdensome. Photographers stated that it required a tremendous amount of time and effort to submit a copy of each image included in a collection and was financially burdensome. Prior to 1993, the Office revised its practices in an attempt to make registration easier for photographers. However, a copy of each image continued to be required. These changes did not sufficiently ease the burdens, and few photographers have registered their works. Consequently, photographers urge that they have been given a clear legal right by the copyright law, but no effective remedy; and this reality encourages infringers to continue unlawful conduct. *See*, Copyright Reform Act of 1993: Hearings on H.R. 897 Before the Subcomm. on Intellectual Property and Judicial Administration of the House Comm. on the Judiciary, 103d Cong., 1st Sess. 370 (1993). *See also* Copyright Reform Act of 1993: Hearing on S. 373 Before the Subcomm. on Patents, Copyrights and Trademarks of the Senate Comm. on the Judiciary, 103d Cong., 1st Sess. 169 (1993). (Testimony of Andrew Foster, Executive Director of the Professional Photographers of America, Inc.)

In June 1993, the Librarian of Congress appointed an Advisory Committee on Registration and Deposit (ACCORD). That Committee recommended that the Copyright Office "greatly expand the use of group registration and optional deposit to reduce the present burdens" and "consult more actively and frequently with present and potential registrants to

[1] A three month grace period, measured from the date of first publication, is provided for published works.

hear their problems and to respond to them whenever possible." Library of Congress, Advisory Committee on Copyright Registration and Deposit 31 (1993).

For the past year the Office has met with photographers and their representatives who have urged that the nature of photography, where thousands of images may be created with only a few, if any, being published makes registration difficult. At the time registration may be sought, the photographer does not know which photographs, if any, will be published. The definition of publication was also cited as problematic; in many cases it is unclear whether a photograph has been published. Even when it is clear that a photograph has been published, the photographer may be unaware of the publication. Finally, photographers and their representatives noted that often the film is turned over to the photographer's client for processing and use, thus leaving the photographer with nothing to deposit with the Copyright Office.

Photographs are generally copyrightable; an individual selects a camera, lens, film, and an image to capture taking into consideration choices such as lighting and composition. Since photographs are usually entirely new works, for examination purposes there is no issue with respect to whether or not a photograph is copyrightable. Therefore, it is possible to consider registration without an actual deposit of the work. Moreover, in the past the Library of Congress has not relied on the copyright registration system as a source for its photography collections. This is not the case with works such as music, motion pictures, plays, poems, choreography or novels. If the Library depended on the copyright deposits for its photograph collections, the Copyright Office would not be able to consider registration without a deposit of a copy of the work. In proposing this regulation, the Office is not waiving the Library's rights to receive photographs that are registered. The Library may select from five to ten photographs from each registered group of photographs.

Recognizing the difficulties that photographers face in registering their works and desiring to ameliorate these problems, the Office is seeking a workable solution for photographers which does not cause unforeseen problems for publishers, photofinishers and other users of photographs. To this end, under the authority granted in 17 U.S.C. 408(c)(1), the Office is proposing regulations that permit a single registration for a group of unpublished and published related works and also permit registration with identifying material in place of actual photographs.

We believe that those who use photographs should not be adversely affected. The Office already will register a claim in an unlimited number of photographs as an unpublished collection; that collection would bear only a collective title, and the deposit would consist of contact sheets or a videotape. There would be no individual identifiers for individual images contained in the collection.

Guidelines for Group Registration of Photographs

The proposed regulations permit group registration of unpublished and published photographs on a single application with a fee of $40, and a deposit of identifying material, if certain conditions are met. The conditions are that the photographs must be by a single author, be owned by the same copyright claimant (who need not be the author), be created on or after March 1, 1989, be created during a single calendar year, and bear a title which identifies the group as a whole. Published works whose exact date of publication is known may be included in a collection as long as the dates of publication do not exceed a three month period. For example, in one collection a photographer may include both unpublished photographs created in 1995, and photographs that are known to have been published between March 1, 1995, and May 31, 1995.

The approximate number of photographs in the group must be indicated on the application and in the identifying material; where the collection contains clearly published works, the approximate number of such photographs must be included in the identifying material. Where a group contains both unpublished and published photographs, the Copyright Office will assign a registration number, VAu (for unpublished works) or VA (for published works) based on the preponderant status of the photographs as indicated in the identifying material.

Identifying Material

The identifying material must contain the following information: name of the author; the name and address of the claimant; the title given to the group as a whole; the approximate number of photographs included in the group, and, if the group includes photographs known to be published, an approximate number of the works that have been published. It must also contain the range of dates (month, year) during which the photographs were created (taken)—i.e., the earliest and the latest; the range of dates of first publication (month, day, year) for those photographs that have been published; a general description of the subject matter captured by the photographs; where more than one subject is included, a general description of each, with particular emphasis on newsworthy subjects, e.g., bombing of Federal Building in Oklahoma City, April 1995; ghost towns of Arizona; Million Man March in Washington, D.C., October 1995. The identifying material must include the name of the person to contact about using the work if that information is not already given.

It may also contain any additional identifiers, such as an identification coding that is used to administer rights. Since the deposit will not be a copy of each photograph and a question could arise as to whether or not a particular photograph has been registered, it is in the claimant's best interest to include as much information as possible to describe the photographs covered by the registration.

Other Group Registration Possibilities

The Office already permits or requires a single registration for a number of works. These include the following: contributions to periodicals by the same author who is an individual (not an employee for hire) which are published in a twelve month period. For this, a basic application, for example Form VA for photographs, must be submitted with an adjunct application, Form GR/CP. All component parts of a multipart work that are owned by the same claimant and that are part of the unit of publication should be registered together on a single application. A single registration may be made for all categories of unpublished works as unpublished collections if certain conditions are met. The deposit must contain the entire copyrightable content of each work included in the collection. 37 CFR 202.20

Separate Registration for an Individual Photograph

Individual photographs may be separately registered. To make a separate registration for an individual photograph, an applicant should submit a Form VA, a fee of $20, and a copy of the photograph which complies with the existing deposit requirements found at 37 CFR 202.20.

Selection of Archival Prints for the Collections for the Library of Congress

One of the conditions of this proposed group registration procedure is that the Library of Congress be able to select between five to ten photographs from each registration for its collections. Within six months of registration, the Library of Congress will determine whether it wishes to consider certain photographs for its collections. Generally, the Library is interested in photographs covering newsworthy events by specific photographers, and it does not anticipate making a large number of requests for samples or archival quality prints.

Submission of Sample, if Requested

In order for the Library of Congress to determine whether it wishes to make a selection, it will need to examine a sample of the photographs included in the registration. The Library will first review the application and identifying material which identify the photographs included in the group registration. The Library may then request that the photographer or photography business send a sample of from fifty to one hundred images of the photographs in the format that is the least expensive, but will still facilitate the Library's selection process, *e.g.*, slides, contact prints in black and white or in color, or good quality photocopies in black or white. For registrations of up to five thousand photographs, fifty images may be requested as a sample; for registrations of over five thousand photographs, another ten images may be requested for each additional one thousand photographs covered in the registration. A maximum of one hundred images may be requested for registrations covering over ten thousand photographs.

Deposit of Archival Quality Photographs

After reviewing the sample, the Library of Congress may request from five to ten archival quality photographs, depending on the number of photographs included in the group registration. The Library's guidelines for deposit of photographs are included in the new proposed Copyright Office regulation found at 37 CFR 202.20(c)(2)(xx).

The number of photographs that the Library may select depends on the number of photographs covered in one group registration. For any group registration of up to five thousand photographs, the Library may select five photographs for its collections; for each additional one thousand photographs included in a group registration up to ten thousand, the Library may select another photograph. For any group over ten thousand, the deposit would remain ten, archival quality photographs.

Effective Date

The proposed regulations permitting group registration of photographs will be effective upon publication of an interim or final rule. They may be used to register photographs created on or after March 1, 1989, the effective date of the Berne Convention Implementation Act of 1988. Prior to March 1, 1989, the copyright law required that a copyright notice be placed on all copies of published works; however, for works published after that date, use of the notice is optional. Therefore, these regulations cover only photographs where the use of a copyright notice is not an issue.

Further Public Comment

The Office has met with various parties, and has been made aware both of certain concerns and also the guidelines agreed upon by The Board of Directors of the American Society of Media Photographers, the Professional Photographers of America, Photo Marketing Association International, the Association of Professional Color Laboratories, the Professional School Photographers Association International and the Coalition for Consumers' Picture Rights. One of that group's agreements is to work to eliminate the 17 U.S.C. 412 requirement as a precondition for statutory damages and attorneys fees for photographers. The Office takes no position on this particular proposal but observes that photographers need real relief now; we believe the proposed rule offers that relief.

The Copyright Office seeks comment on these proposed rules. Following review of all comments, the Office will adopt interim or final regulations. The Copyright Office is interested in receiving information based on actual experience, if possible, including answers to the following questions.

1. How have courts dealt with deposits consisting of only identifying material rather than a complete copy of the work?

2. Have such registrations been accorded prima facie evidentiary effect with respect to copyrightability as well as to the facts in the certificate?

3. How would the problems of photographs registered under this regulation differ from those of other registered collections, e.g., in collections where there are no individual identifiers for the works but the Copyright Office has a copy of each work included in the collection?

4. How does this proposed group registration differ from a group registration for a database covering a three month period of time where the deposit consists of only a small sample of the copyrightable authorship from a representative day?

5. What problems would be caused by registrations made under these proposed regulations that include both unpublished and published works?

6. Will inclusion of information about the agent or licensing entity be helpful?

7. What might be the abuses, if any?

8. Is the Office proposing too many photographs to be registered on one application? If yes, what number would be more appropriate?

9. Are there other identifiers that could assist in identifying the registered works?

Conforming Amendments

The Copyright Office also is proposing to amend 37 CFR 202.3(b)(3)(ii) and footnote 6 to 37 CFR 202.3(c)(2) to conform to the addition of new 37 CFR 202.3(b)(9).

List of Subjects in 37 CFR Part 202

Claims, Copyright.

Proposed Rule

In consideration of the foregoing, the Copyright Office proposes to amend 37 CFR part 202 in the manner set forth below:

PART 202—REGISTRATION OF CLAIMS TO COPYRIGHT

1. The authority citation for part 202 is revised to read as follows:

Authority: 17 U.S.C. 408 and 702.

§ 202.3 [Amended]

2. Section 202.3(b)(3)(ii) is amended by removing "(b)(8)" and adding "(b)(9)."

3. In § 202.3, paragraph (b)(9) is redesignated as paragraph (b)(10) and a new paragraph (b)(9) is added to read as follows:

§ 202.3 Registration of copyright.

* * * * *

(b) * * *

(9) Group registration of photographs.

(i) Pursuant to the authority granted by 17 U.S.C. 408(c)(1), and without waiving any rights of the Library of Congress to review and acquire copies of individual photographs, the Register of Copyrights has determined that, on the basis of a single application, and a single filing fee of $40, a single registration may be made for a group of photographs, if the following conditions are met:

(A) The group bears a single title identifying the group as a whole;

(B) All of the photographs were created by the same author;

(C) All of the photographs have the same copyright claimant;

(D) All of the photographs were created on or after March 1, 1989;

(E) All of the photographs were created, and if published, were both created and published during the same year; and

(F) All photographs known to be published were published within a three month span, *e.g.*, from January 1–March 31, from February 1–April 30.

(ii) Identifying material must consist of:

(A) The name of the author;

(B) The name and address of the claimant;

(C) The title given to the group as a whole;

(D) The approximate number of photographs included in the group;

(E) If the group includes published photographs, an approximate number of the works that have been published;

(F) The range of dates (month, year) during which the photographs were created (taken)—*i.e.*, the earliest and the latest;

(G) The range of dates of first publication (month, day, year) for those photographs that have been published;

(H) A general description of the subject matter captured by the photographs; where more than one subject is included, a general description of each, with particular emphasis on newsworthy subjects, for example, "Bombing of Federal Building in Oklahoma City, April, 1995;" "Ghost Towns of Arizona;" "Million Man March in Washington, D.C., October, 1995;" and

(I) The identifying material may also contain any additional identifiers, for example, the identification coding that is used to administer rights in the photographs.

(iii) The application for group registration must include:

(A) At line 1 of the VA form, a title that identifies the group as a whole;

(B) Following the title at line 1, the approximate number of photographs included in the group;

(C) Where all the published works included in the group were published on the same day, the exact date of first publication; alternatively, the span of time during which all the published works were first published, *e.g.*, June 1, 1995 through August 31, 1995; and

(D) If the claimant listed in space 4 is not the agent or licensing entity for all or some of the photographs in the group, the name, addresses, telephone and fax numbers of such person or entity. Space 4 should state "Licensing Information," followed by the name, *etc.*

(iv) If the Library of Congress wishes to review a collection for possible inclusion of photographs in its collection, the claimant of record must supply the appropriate material.

(A) The Library may request a maximum of fifty sample images for the first five thousand photographs covered by one group registration, and ten more sample images for each additional one thousand photographs covered, with a maximum of one hundred images for a group registration covering more than ten thousand or more photographs.

(B) The Library may then select between five and ten specified photographs to be supplied in prints from each group registration. For registrations of fewer than five thousand photographs, no more than five photographs may be selected, and for registrations of ten thousand or more, no more than ten photographs may be selected.

(C) When photographs from a requested sample have been selected, the photographer or photography business must provide archival quality copies of the selected photographs, meeting Library guidelines in accordance with the deposit requirements of § 202.20(c)(2)(xx).

(D) If any photographer or photography business registering photographs under this regulation does not provide the required samples and archival quality copies as requested by the Library, the Copyright Office may rescind that party's privilege of making further group registrations under this section.

(v) The fee is $40.

4. Footnote 6 to § 202.3(c)(2) is revised to read as follows:

[6] In the case of applications for group registration of newspapers, contributions to periodicals, newsletters, and photographs, under paragraphs (b)(6), (b)(7), (b)(8) and (b)(9) of this section, the deposits and fees shall comply with those specified in the respective paragraphs.

5. Section 202.20 is amended by adding a new paragraph (c)(2)(xx) to read as follows:

§ 202.20 Deposit of copies and phonorecords for copyright registration.

* * * * *

(c) * * *

(2) * * *

(xx) *Group registration of photographs.* For group photographs registered under § 202.3(b)(9), works selected for acquisition by the Library of Congress must consist of prints that:

(A) Measure at least 8″×10″ and do not exceed 20″×24″;

(B) Are made on fiber-based paper and archivally processed;

(C) Are not mounted in any way; and

(D) Are marked as follows:

Titles or caption information may be written lightly on the back of photographs with a #1 soft lead pencil or (preferably) supplied on a separate sheet of paper and keyed to the prints. Archival ink, supplied by the Library, may be used on the back of the print, if desired, for copyright stamps and photographer identification. Adhesive labels, pressure-sensitive tapes, and ballpoint ink should never be applied to the backs of the photographs. Photographs should be mailed flat between two sturdy pieces of cardboard.

§ 202.21 [Amended]

6. In § 202.21(a), remove "and (g)" and add ", (g) and (i)."

7. In § 202.21, add a new paragraph (i) to read as follows:

§ 202.21 Deposit of identifying material instead of copies.

* * * * *

(i) For purposes of group registration of photographs under § 202.3(b)(9), identifying material may consist of titles, descriptions, or lists identifying the photographs included in the registration.

Dated: November 22, 1995.

BILLING CODE 1410–30–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 95–171; RM–8724]

Radio Broadcasting Services; Jackson, WY

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition filed by Roy E. Henderson d/b/a Mountain Broadcasting Co., proposing the allotment of Channel 227C at Jackson, Wyoming, as the community's third local commercial FM transmission service. Channel 227C can be allotted to Jackson in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction at center city coordinates. The coordinates for Channel 227C at Jackson are North Latitude 43–28–42 and West Longitude 110–45–42.

DATES: Comments must be filed on or before January 16, 1996 and reply comments on or before January 31, 1996.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Henry E. Crawford, Esq., 1150 Connecticut Ave., NW., Suite 900, Washington, DC 20036 (Counsel for Petitioner).

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's *Notice of Proposed Rule Making*, MM Docket No. 95–171, adopted November 3, 1995, and released November 24, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 95–93; Notice 01]

RIN 2127–AF76

Federal Motor Vehicle Safety Standards; Accelerator Control Systems

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for comments.

SUMMARY: NHTSA is considering issuing a proposal to amend the Federal motor vehicle safety standard on accelerator control systems. The standard was last revised in 1973, when only mechanical systems were common on motor vehicles. In order to determine whether to propose amending the standard to include requirements specifically tailored for electronic accelerator control systems and to clarify possibly ambiguous language, NHTSA poses a series of questions in this document. NHTSA undertakes this action as part of its effort to implement the President's Regulatory Reinvention Initiative to make regulations easier to understand and to apply.

DATES: Comments must be received on or before February 2, 1996.

ADDRESSES: Comments must refer to the docket and notice numbers cited at the beginning of this notice and be submitted to: Docket Section, Room 5109, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590. It is requested, but not required, that 10 copies of the comments be provided. The Docket Section is open on weekdays from 9:30 a.m. to 4 p.m.

FOR FURTHER INFORMATION CONTACT: For non-legal issues: Mr. Patrick Boyd, Office of Vehicle Safety Standards, Office of Safety Performance Standards, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590. Mr. Boyd's telephone number is (202) 366–6346, and his FAX number is (202) 366–4329.

For legal issues: Ms. Dorothy Nakama, Rulemaking Division, Office of Chief

Counsel, NHTSA, 400 Seventh Street SW., Washington, D.C. 20590. Ms. Nakama's telephone number is (202) 366–2992, and her FAX number is (202) 366–3820. Please note that written comments should be sent to the Docket Section rather than faxed to the above contact persons.

SUPPLEMENTARY INFORMATION:

President's Regulatory Reinvention Initiative

Pursuant to the March 4, 1995 directive "Regulatory Reinvention Initiative" from the President to the heads of departments and agencies, NHTSA undertook a review of its regulations and directives. During the course of this review, the agency identified rules that it could propose to eliminate as unnecessary or to amend to improve their comprehensibility, application or appropriateness. As described below, NHTSA has identified Federal Motor Vehicle Safety Standard (FMVSS) No. 124, *Accelerator control systems*, as one rule that may benefit from amendments.

Background of Standard No. 124

Standard No. 124's purpose is to reduce deaths and injuries resulting from loss of control of a moving vehicle's engine, due to malfunctions in the vehicle's accelerator control system. Since 1972, Standard No. 124 has specified requirements for ensuring the return of a vehicle's throttle to the idle position under each of the following two circumstances, (1) when the driver removes the actuating force (typically, the driver's foot or cruise control) from the accelerator control, and (2) when there is a severance or disconnection in the accelerator control system. Standard No. 124 applies to passenger cars, multipurpose passenger vehicles, trucks, and buses.

Paragraph S5.1 of Standard No. 124 requires that, under any load condition, and within the time specified in S5.3, the throttle must return to the idle position from any accelerator position or any speed of which the engine is capable, whenever the driver removes the actuating force. The standard defines the throttle as "the component of the fuel metering device that connects to the driver-operated accelerator control system and that by input from the driver-operated accelerator control system controls the engine speed."

Standard No. 124 has two further requirements to provide safety in the event of accelerator control failure. The first, specified at S5.1, requires "at least two sources of energy," each capable of returning the throttle to idle position within the time limit for normal operation, from any accelerator position or speed whenever the driver removes the opposing actuating force. The second, specified at S5.2, requires that the throttle return to idle "whenever any one component of the accelerator control system is disconnected or severed at a single point" and the driver releases the pedal.

Paragraph S5.3 requires that the throttle return to idle within 1 second for vehicles of 10,000 pounds or less gross vehicle weight rating (GVWR) and within 2 seconds for vehicles with a GVWR greater than 10,000. The maximum allowable time is increased to 3 seconds for any vehicle that is exposed to ambient air at O degrees to −40 degrees F. during the test or for any portion of a 12 hour conditioning period.

Standard No. 124 Applies to Electronic Accelerator Control Systems

When promulgated, the definitions and requirements of Standard No. 124 were easy to understand and apply because their language was strongly influenced by the design of mechanical accelerator control systems and because all control systems were mechanical then. The "throttle" of a gasoline engine was the carburetor shaft that opened and closed the air passages in the base plate. The "throttle" of a diesel engine was the control rod, or rack that controlled fuel flow to the high pressure injectors. The two energy sources were simply two return springs acting on the linkages and/or cables between the accelerator pedal and the throttle. If at least one of those springs was connected directly to the carburetor or to the diesel fuel injection rack, it would cause the throttle to return to idle in the event of a disconnection of the linkage. And, if the single contemplated failure occurred at one spring, the other would permit continued driver control.

Subsequent to the promulgation of Standard No. 124, electronic accelerator controls with on-board computer systems were introduced on motor vehicles. Their use is steadily increasing, especially in heavy trucks.

The introduction of electronic systems led to questions about their status and treatment under the Standard. Stating that some of the language in Standard No. 124 seemed more appropriate for mechanical accelerator control systems than for electronic ones, Isuzu Motors America, Inc., asked the agency a variety of questions concerning electronic systems. Its central question was whether the Standard applies to electronic systems. In an August 8, 1988 interpretation letter to Isuzu, NHTSA stated that the Standard does apply to electronic accelerator control systems. Among its other questions, Isuzu asked whether a severance in electric wires in its electronic accelerator control system is a severance within the meaning of S5.2 of Standard No. 124. Isuzu expressed its belief that because the electric wires were not a "moving part," the answer should be "no." NHTSA disagreed.

It interpreted Standard No. 124's requirement that the throttle return to idle "whenever any one component of the accelerator control system is disconnected or severed at a single point," to include all severances or disconnections of any component of the accelerator control system as within the standard, not just disconnections of moving parts.

Need To Amend Standard No. 124

Most accelerator linkages on the largest classes of trucks (i.e., those over 33,001 lbs. GVWR) are now electronic. A mechanical accelerator linkage controlling a fuel rack (i.e., a device that controls fuel flow to the high pressure injectors) is now rare on the largest classes of trucks. Most of today's heavy diesel trucks have no mechanical connection between the accelerator pedal and the throttle.

Although the agency has been issuing interpretations about the Standard's application to electronic accelerator control systems for the last seven years, the flow of interpretation requests remains unabated. Manufacturers continue to ask the basic question of whether the Standard applies to electronic accelerator control systems. One correspondent presumed that since those systems do not include springs and linkages, as described in Standard No. 124, electronic accelerator controls are not regulated. Another asked for a legal interpretation of "throttle," as applied to electronic accelerator control systems. Other correspondents have understood Standard No. 124 to mean simply that two return springs should be placed on the treadle assembly. In response, the agency has recited in its interpretation letters the requirement that the sources of energy must be capable of returning the throttle to idle in the event of a single severance or disconnection. The correspondents did not submit sufficient information to enable the agency to determine whether the proper mechanical operation of the treadle was sufficient to assure return to idle in the event of an electrical severance.

NHTSA notes that although the use of two springs on the treadle assembly may represent good treadle design, it does not intrinsically overcome a disconnection anywhere within an electronic accelerator control system. Thus, good treadle design does not provide an electronic accelerator control system with the same degree of fail-safe operation provided a mechanical system by redundant return springs on a traditional fuel control rack. Those springs on a traditional rack could overcome an accelerator control disconnection and return the throttle to idle. Further, providing good treadle design does not solve the problem of single point disconnection in electronic systems which now would include connectors, wires, computer components and possibly even software elements. Even parties recognizing the analogy between wire severance and linkage severance have asked whether the standard applies to subsequent short circuits as well as open disconnections.

NHTSA believes that the volume of requests for interpretation might be reduced if, instead of answering these questions by drawing analogies between traditional mechanical components and new electronic systems, it amended the Standard to include provisions and language specifically tailored to electronic systems. There are limitations to the agency's ability to make regulatory language, which reflects the design of mechanical systems, serve the purpose of regulating both mechanical and electronic systems. NHTSA also believes that amending the Standard not only to update it, but also possibly to redefine what constitutes fail safe operation might give manufacturers more flexibility in designing electronic systems and enable the agency to better ensure that electronic systems function safely. In order to do this, the agency must identify the most common predictable failures for electronic systems and ascertain the most appropriate response to those failures.

NHTSA is also concerned that regulating electronic systems by drawing analogies to mechanical systems may have the effect of limiting the permissible responses to failures in electronic systems to the fail-safe modes of mechanical systems. At present, the failure modes (i.e., disconnection and severance) specified in Standard No. 124 are the predictable failure modes of a mechanical system. The agency believes that the regulation of electronic systems in a manner tailored to them can be beneficial to manufacturers, vehicle users, and the public. For example, with electronic systems, there may be failure modes in which it is wiser to either shut down the engine or to provide for a fail-safe mode in which the engine has just enough power to permit the vehicle to be driven to the side of the road, than to require that the engine be returned to idle. Since such choices were not feasible with mechanical controls, they were not included in Standard No. 124.

Through this request for comments, NHTSA wishes to determine whether it can propose amendments which identify the predictable failure modes of electronic systems and specify an acceptable safe response for each mode.

Normal v. Failure Modes

On many trucks, locking hand controls are necessary for the operation of engine-driven vocational equipment, i.e., work-performing equipment such as garbage compactors or cement mixers, when the vehicle is parked. Similar locking hand controls are also provided to facilitate engine warm-up. Obviously, locking hand controls can be thought of as preventing the return to normal idle speed when the accelerator pedal is released (defined in the Standard as a failure). Several requests for interpretation have resulted. However, locking hand controls do not affect highway safety because the locking controls are not meant to be used to drive vehicles. Explicit specification in the standard of what is or is not permissible with respect to the operation of locking hand controls could eliminate a source of ambiguity.

Likewise, the lack of absolute repeatability in the normal operation of some electronic accelerator controls results in the return to a range of idle speeds instead of a single idle speed. While this range is narrow enough to permit safe operation of a vehicle, the return to a range of speeds instead of a single speed nevertheless introduces questions about whether a range is narrow enough to be regarded as complying with the requirements of the standard for return to idle speed. A revision of the standard offers an opportunity to adopt language that distinguishes between normal safe characteristics of accelerator controls and instances of failure.

Questions for Comment

In order to determine whether the agency should propose to amend Standard No. 124 and to obtain a better idea of technology that is presently available, NHTSA asks the following questions to clarify engineering issues. Sections A and B apply to electronic systems only. Sections C, D, E and F are of general applicability.

A. Industry Consensus

The Society of Automotive Engineers (SAE) has developed recommended practices for electronic signal interfaces for heavy diesel vehicle engine control processors and for some aspects of accelerator pedal position sensor performance. The SAE's recommended practice specifies that the accelerator position sensor (APS) assembly shall comply with all appropriate Federal motor vehicle safety standards.

A1. Has the SAE or other industry consensus standards organizations considered fail-safe provisions for electronic accelerator controls? Is there industry agreement (informal or formal) concerning what fail-safe provisions should be adopted for electronic accelerator control systems?

A2. What fail-safe strategies are now being employed by vehicle and component manufacturers?

B. Technical Considerations of a Fail-Safe Electronic Accelerator Control System

NHTSA believes that the potential points of failure of an electronic accelerator control system are:

—the mechanical linkage and return springs between the pedal and the accelerator position sensor (APS);
—the electrical connections between the APS and the engine control processor;
—the electrical connections between the engine control processor and other critical sensors;
—the electrical connections between the engine control processor and fuel or air metering devices which determine engine speed;
—power to the engine control processor, the APS and critical sensors; and
—the integrity of the engine control processor, APS, and other critical sensors.

A single point disconnection would mean the severance of a single wire or the disconnection of all the terminals housed in a single connector. The consequences both of an open circuit or a short circuit would ordinarily be relevant, but NHTSA does not exclude the possibility that some designs could prevent either a short circuit or an open circuit in the event of a disconnection. Critical sensors are those whose malfunction or disconnection could cause a significant uncontrolled engine overspeed. The agency is not aware that sensors other than the APS are critical in a safety sense.

With this background, NHTSA asks the following questions:

B1. Are there other predictable points of failure of an electronic control system?

B2. Are sensors other than the APS critical to safety on either gasoline or diesel engines?

B3. Are engine development trends pushing other sensors toward safety critical operation (i.e., to become a sensor whose malfunction or disconnection could cause a significant uncontrolled engine overspeed)?

B4. Is it practical (from an engineering standpoint) to expect a fail-safe design of a unitary electronic accelerator control system, even in the limited sense of ensuring fail-safe performance in the case of single point failures at predictable locations? Would it be more practical (and still meet the need for safety) to use a redundant, simplified APS and engine controller, active only at the idle position of the pedal? Is the use of redundant systems more practical than a single system to achieve fail-safe performance?

B5. Do any currently produced vehicles with electronic accelerator control systems use redundancy to achieve fail-safe operation?

C. Vehicle Drive Functions v. Vocational Functions

NHTSA legal interpretations regarding hand throttle controls view their operation as setting a new idle speed to which the throttle should return in the prescribed time limits "upon release of the driver-operated accelerator control system." This view is accurate for traditional "fast idle" setting devices for cold engine operation. But, it may also have resulted in interpretations that do not distinguish between accelerator control systems that drive the vehicle, and auxiliary accelerator controls meant to allow the operation of vocational equipment (such as the compactor on a garbage truck) on a parked vehicle.

C1. How is the cold engine fast idle function accomplished with electronic accelerator controls?

C2. How is the engine of a parked vehicle held at the appropriate speed to operate vocational equipment when the vehicle is equipped with an electronic accelerator control system?

C3. Is there a general way to distinguish between accelerator controls affecting the driving of the vehicle and those affecting only the vehicle's operation as a power source for vocational equipment, presumably without effect on highway safety?

D. Initial Idle Speed

Manufacturers have been concerned with the question of how consistently a vehicle's engine must return to exactly the same idle speed to meet Standard No. 124. Apparently, the resolution and hysteresis of the various sensors and the discrete nature of digital systems create idle speed variations that do not in any way indicate failure.

D1. Would it be practical to designate a range about a vehicle's initial idle speed to clarify the difference between normal and abnormal performance of an accelerator control system? Please describe the desirable extent of such a range and provide a rationale for that range.

E. Public Technical Meeting

NHTSA believes that the development of any proposal to amend Standard No. 124 may benefit from a direct, oral exchange of ideas among NHTSA, vehicle manufacturers, and other affected parties. Reliance solely on written public comments may not be the most effective means of assessing the appropriate steps for ensuring the safe operation of electronic accelerator control systems.

E1. Once the agency has analyzed the written comments submitted in response to this document, should it hold a public technical meeting to discuss possible proposals for amending the Standard No. 124? If so, on which issues should such a public technical meeting focus?

F. Other Issues

F1. Should the agency propose to amend Standard No. 124 in any other respect that has not been discussed above? If so, please describe how the agency should propose to amend the Standard, and provide a rationale for the recommended change.

Rulemaking Analyses and Notices

1. Executive Order 12866 and DOT Regulatory Policies and Procedures

This request for comment was not reviewed under Executive Order 12866 (Regulatory Planning and Review). NHTSA has analyzed the impact of this request for comment and determined that it is not "significant" within the meaning of the Department of Transportation's regulatory policies and procedures. The agency anticipates if a proposal and ultimately a final rule should result from this request for comment, new requirements would not be imposed on manufacturers with respect to the currently regulated systems. The request for comment seeks to find cost effective means to make Standard No. 124 more understandable when applied to electronic accelerator control systems. If NHTSA decides to initiate rulemaking, it is NHTSA's intent that the rulemaking not impose any additional costs.

Procedures for Filing Comments

Interested persons are invited to submit comments on this request for comment. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the proposal will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments received after the comment due date will be considered as suggestions for any future rulemaking action. Comments on the request for comment will be available for inspection in the docket. The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the rules docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.50.

Issued on: November 28, 1995.

Barry Felrice,

Associate Administrator for Safety Performance Standards.

DEPARTMENT OF AGRICULTURE

Forest Service

Robinson/Scott Landscape Management Project, Willamette National Forest, Lane and Linn Counties, OR

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) on a proposal to thin and/or regenerate forest stands, construct roads, and use prescribed fire in the Upper McKenzie Watershed. The landscape management project is needed to: (1) Provide landscape-level health and vegetation diversity within the project area to meet issues identified during watershed analysis and public scoping; and (2) provide timber products as directed by the Willamette Forest Plan, as amended. Project is proposed for fiscal years 1997–2002. The Willamette National forest invites written comments on the scope of the analysis. The agency will give full notice of the full environmental analysis and decision making process for the proposal so interested and affected people may participate and contribute to the final decision.

DATES: Comments concerning the scope of the analysis should be received in writing by March 1, 1996.

ADDRESSES: Send written comments to Eugene Skrine, District Silviculturist, McKenzie Ranger District, McKenzie Bridge, Oregon 97413.

FOR FURTHER INFORMATION CONTACT: Eugene Skrine, District Silviculturist, McKenzie Ranger District, McKenzie Bridge, Oregon 97413, Phone (541) 822–3381.

SUPPLEMENTARY INFORMATION: The USDA, Forest Service proposal includes: treatment of approximately 900–1500 acres with various regeneration harvest methods approximating the pattern and scale of relatively frequent stand-replacement fires; treatment of approximately 500–2000 acres with commercial thinning treatments that approximate the pattern of frequent low to moderate intensity fires; provide long term sustainable habitat for big game and other wildlife species; develop a long term vegetation management plan for high quality riparian habitat to benefit bull trout; maintain major components of the landscape-level ecosystem within the range of historic variability; reset some meadows to historic conditions with use of fire; produce "no net increase" in permanent roads.

Preliminary issues have been identified and include: historical disturbance patterns; biological diversity at the stand and landscape levels; recreation experience and scenic byway; threatened, endangered, and sensitive plant and animal species; High Emphasis Elk Area management. A range of alternatives will be developed including a no action alternative.

This draft EIS will tier to the 1990 Final EIS for the Willamette National Forest Land and Resource Management Plan as amended by the Northwest Forest Plan (ROD) (1994). The Forest Service is the lead agency.

Initial scoping will begin in November 1995. A public participation plan is being developed with public meeting and public tour dates to be announced. The public is invited to offer suggestions and comments in writing.

The draft EIS is expected to be completed in September 1996. The comment period on the draft EIS will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register.**

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of a draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978), Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts, *City of Angoon* v. *Hodel,* 803 f. 2d 1016, 1022 (9th Cir, 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft EIS should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft EIS or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.)

The final EIS is scheduled to be completed in December 1996. In the final EIS, the Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the draft EIS and applicable laws, regulations, and policies considered in making the decision regarding the Santiam Forest Health Project. Darrel L. Kenops, Forest Supervisor, is the Responsible Official. As the Responsible Official, he will decide whether to implement the project. The Responsible Official will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to the Forest Service Appeal Regulations (36 CFR Part 215).

Dated: November 21, 1995.

Darrel L. Kenops,

Forest Supervisor.

ASSASSINATION RECORDS REVIEW BOARD

Formal Determinations on Records Release

AGENCY: Assassination Records Review Board.

ACTION: Notice of Formal Determinations.

SUMMARY: The Assassination Records Review Board (Review Board) met in a closed meeting on November 13 and 14, 1995, and made formal determinations on the release of records under the President John F. Kennedy Assassination Records Collection Act of 1992 (JFK Act). By issuing this notice, the Review Board complies with the section of the JFK Act that requires the Review Board to publish the results of its decisions on a document-by-document basis in the **Federal Register** within 14 days of the date of the decision.

FOR FURTHER INFORMATION CONTACT: T. Jeremy Gunn, General Counsel and Associate Director for Research and Analysis, Assassination Records Review Board, Second Floor, 600 E Street, NW., Washington, DC 20530, (202) 724–0088, fax (202) 724–0457.

SUPPLEMENTARY INFORMATION: This notice complies with the requirements of the President John F. Kennedy Assassination Records Collection Act of 1992, 44 U.S.C. 2107.9(c)(4)(A) (1992). On November 13 and 14, 1995, the Review Board made formal determinations on records it reviewed under the JFK Act. These determinations are listed below. The assassination records are identified by the record identification number assigned in the President John F. Kennedy Assassination Records Collection database maintained by the National Archives. For each document, the number of releases of previously redacted information is noted as well as the number of sustained postponements.

On October 24, 1995, the Review Board made the formal determination to release in full FBI document number 124–10020–10093. The FBI subsequently supplied additional information to the Review Board in support of its original redaction. On November 14, 1995, the Review Board voted to reconsider the record at a future date and decided to provide the FBI additional time to supply evidence in support of its proposed redactions.

Dated: November 28, 1995.

David G. Marwell,

Executive Director.

BILLING CODE 6118–01–P

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Sheryl Pinsonnault

In the matter of Sheryl Pinsonnault, 126 S. 293 Place, Federal Way, Washington 98003, Respondent.

Order

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (Department), having notified Sheryl Pinsonnault (Pinsonnault) of its intention to initiate an administrative proceeding against her pursuant to section 13(c) of the Export Administration Act of 1979, as amended (50 U.S.C.A. app. 2401–2420 (1991 and Supp. 1995)) (the Act),[1] and part 788 of the Export Administration Regulations (currently codified at 15 CFR parts 768–799 (1995)) (the Regulations), based on allegations that, on six different occasions between on or about March 6, 1990 and on or about October 3, 1990, Pinsonnault caused, aided, and abetted the export, without the validated license required by Section 772.1(b) of the Regulations, of U.S.-origin aircraft parts from the United States to Belgium for use in repairing a Lockheed L–100 aircraft owned by Libya, in violation of section 787.2 of the Regulations;

[1] The Act expired on August 20, 1994. Executive Order No. 12924 (59 FR 43437, August 23, 1994), extended by Presidential Notice of August 15, 1995 (60 *FR* 42767, August 17, 1995), continued the Regulations in effect under the International Emergency Economic Powers Act (50 U.S.C.A. 1701–1706 (1991)).

The Department and Pinsonnault having entered into a Consent Agreement whereby the Department and Pinsonnault have agreed to settle this matter in accordance with the terms and conditions set forth therein, and the terms of the Consent Agreement having been approved by me;

It Is Therefore Ordered

First, that a civil penalty of $10,000 is assessed against Pinsonnault, $5,000 of which shall be paid to the Department within 30 days from the date of this Order. Payment shall be made in the manner specified in the attached instructions. Payment of the remaining $5,000 shall be suspended for a period of three years from the date from the entry of this Order and shall thereafter be waived, provided that, during the period of suspension, Pinsonnault has committed no violation of the Act, or any regulation, order, or license issued thereunder.

Second, that, Sheryl Pinsonnault, 126 S. 293 Place, Federal Way, Washington 98003, shall, for a period of three years from the date of this Order, be denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, and subject to the Regulations.

A. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

B. After notice and opportunity for comment as provided in Section 788.3(c) of the Regulations, any person, firm, corporation, or business organization related to Pinsonnault by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order.

C. As provided by Section 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Exporter Services, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

D. As authorized by Section 788.17(b) of the Regulations, the last two years of the denial period shall be suspended for a period of two years beginning one year from the date of entry of this Order, and shall thereafter be waived, provided that, during the peric l of suspension, Pinsonnault commits no violation of the Act or any regulation, order or license issued thereunder.

Third, that the proposed Charging Letter, the Consent Agreement and this Order shall be made available to the public.

This Order is effective immediately.

Entered this 27th day of November 1995.

John Despres,

Assistant Secretary for Export Enforcement.

Economic Development Administration

Notice of Petitions by Producing Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration (EDA).

ACTION: To give firms an opportunity to comment.

Petitions have been accepted for filing on the dates indicated from the firms listed below.

LIST OF PETITION ACTION BY TRADE ADJUSTMENT ASSISTANCE FOR PERIOD 10/16/95–11/20/95

Firm name	Address	Date petition accepted	Product
BARRETT TRAILERS, INC	2115 HARDCASTLE BOULEVARD, PURCELL, OK 73080.	10/27/95	LIVESTOCK TRAILERS AND ACCESSORIES.
COLONIAL KNIFE COMPANY, INC	AGNES AT MAGNOLIA ST., PROVIDENCE, RI 02909.	11/02/95	POCKET KNIVES AND HUNTING KNIVES.
FLORENCE SPORTSWEAR, INC	4400 HELTON DRIVE, FLORENCE, AL 35630.	11/03/95	WOMEN'S KNIT TOPS.
GKN WALTERSCHEID, INC	16W030 83RD STREET, BURR RIDGE, IL 60521.	11/09/95	DRIVE SHAFTS, CLUTCHES AND REPAIR PARTS FOR AGRICULTURAL POWER TAKE-OFFS.
LMC OPERATING CORP	2503 N. MAIN STREET, LOGAN, UT 98341.	11/13/95	SNOW GROOMING EQUIPMENT AND INDUSTRIAL ALL TERRAIN UTILITY VEHICLES.
MISSION VALLEY TEXTILE, INC	360 McKENNA AVENUE, NEW BRAUNFELS, TX 78131.	10/23/95	COTTON FABRICS.
NOA MEDICAL INDUSTRIES, INC	205 N. TWO STREET, MARTHASVILLE, MO 63357.	11/14/95	HOSPITAL FURNITURE.

LIST OF PETITION ACTION BY TRADE ADJUSTMENT ASSISTANCE FOR PERIOD 10/16/95–11/20/95—Continued

Firm name	Address	Date petition accepted	Product
PIDIDDLY-LINKS LTD	85 KATRINE LAND, P.O. BOX 700, LAKE KATRINE, NY 12449.	10/18/95	IMITATION JEWELRY OF BASE METAL (BRASS).
PLATOON UNIFORMS & SPORTSWEAR, INC	P.O. BOX 156, COMER, GA 30629	11/06/95	MEN'S TROUSERS.

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Trade Adjustment Assistance Division, Room 7023, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: November 27, 1995.

Lewis R. Podolske,

Director, Trade Adjustment Assistance Division.

BILLING CODE 3510–24–M

Foreign-Trade Zones Board

[Order No. 789]

Approval of Manufacturing Authority Within Foreign-Trade Zone 172; Oneida County, New York, Low Complexity Manufacturing Group, Inc. (Copier/Laser Printer Components)

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, § 400.28(a)(2) of the Board's regulations requires approval of the Board prior to commencement of new manufacturing/ processing activity within existing zone facilities;

Whereas, County of Oneida, New York, grantee of FTZ 172, Oneida County, New York, has requested authority under § 400.32(b)(1) of the Board's regulations on behalf of Low Complexity Manufacturing Group, Inc. (subsidiary of Xerox Corporation), to manufacture copier and laser printer components within FTZ 172 (filed 9/20/95, FTZ Docket A(32b1)–18–95; Docket 73–95, assigned 11/8/95);

Whereas, pursuant to § 400.32(b)(1), the Commerce Department's Assistant Secretary for Import Administration has the authority to act for the Board in making such decisions on new manufacturing/ processing activity under certain circumstances, including situations where the proposed activity is similar to activity recently approved by the Board (§ 400.32(b)(1)(i)); and,

Whereas, the FTZ Staff has reviewed the proposal, taking into account the criteria of § 400.31, and the Executive Secretary has recommended approval;

Now, therefore, the Assistant Secretary for Import Administration, acting for the Board pursuant to § 400.32(b)(1), concurs in the recommendation and hereby approves the request subject to the Act and the Board's regulations, including § 400.28.

Signed at Washington, DC, this 21st day of November 1995.

Susan G. Esserman,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

BILLING CODE 3510–DS–P

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Opportunity To Request Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party, as defined in section 771(9) of the Tariff Act of 1930, as amended, may request, in accordance with section 353.22 or 355.22 of the Department of Commerce (the Department) Regulations (19 CFR 353.22/355.22 (1993)), that the Department conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity To Request a Review

Not later than December 31, 1995, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in December for the following periods:

	Period
Antidumping Duty Proceedings	
Brazil: Certain Carbon Steel Butt-Weld Pipe Fittings (A–351–602)	12/01/94–11/30/95
Brazil: Silicomanganese (A–351–824)	06/17/94–11/30/95
Canada: Elemental Sulphur (A–122–047)	12/01/94–11/30/95
Germany: Animal Glue and Inedible Gelatin (A–428–062)	12/01/94–11/30/95
India: Stainless Steel Wire Rods (A–533–808)	12/01/94–11/30/95
Japan: Certain Small Business Telephone Systems and Subassemblies Thereof (A–588–809)	12/01/94–11/30/95
Japan: Cellular Mobile Telephones and Subassemblies (A–588–405)	12/01/94–11/30/95
Japan: Certain Electric Motors of 150–500 Horsepower (A–588–091)	12/01/94–11/30/95
Japan: Drafting Machines and Parts Thereof (A–588–811)	12/01/94–11/30/95
Japan: Polychloroprene Rubber (A–588–046)	12/01/94–11/30/95
Japan: Steel Wire Strand for Prestressed Concrete (A–588–068)	12/01/94–11/30/95
Korea: Certain Welded Stainless Steel Pipes (A–580–810)	12/01/94–11/30/95
Korea: Photo Albums and Filler Pages (A–580–501)	12/01/94–11/30/95
Mexico: Porcelain-on-Steel Cooking Ware (A–201–504)	12/01/94–11/30/95
New Zealand: Low-Fuming Brazing Cooper Rod and Wire (A–614–502)	12/01/94–11/30/95
Sweden: Welded Stainless Steel Hollow Products (A–401–603)	12/01/94–11/30/95
Taiwan: Certain Carbon Steel Butt-Weld Pipe Fittings (A–583–605)	12/01/94–11/30/95
Taiwan: Certain Small Business Telephone Systems and Subassemblies Thereof (A–583–806)	12/01/94–11/30/95
Taiwan: Certain Welded Stainless Steel Pipe (A–583–815)	12/01/94–11/30/95
Taiwan: Porcelain-on-Steel Cooking Ware (A–583–508)	12/21/94–11/30/95
The People's Republic of China: Certain Cased Pencils (A–570–827)	12/01/94–11/30/95
The People's Republic of China: Porcelain-on-Steel Cooking Ware (A–570–506)	06/17/94–11/30/95
The People's Republic of China: Silicomanganese (A–570–824)	
Countervailing Duty Proceedings	
Mexico: Porcelain-on-Steel Cooking Ware (C–201–505)	12/01/94–11/30/95

In accordance with sections 353.22(a) and 355.22(a) of the regulations, an interested party as defined by section 353.2(k) may request in writing that the Secretary conduct an administrative review. The Department has changed its requirements for requesting reviews for countervailing duty orders. Pursuant to 19 CFR 355.22(a) of the Department's Interim Regulations (60 FR 25137 (May 11, 1995)), an interested party must specify the individual producers or exporters covered by the order for which they are requesting a review. Therefore, for both antidumping and countervailing duty reviews, the interested party must specify for which individual producers or exporters covered by an antidumping finding or an antidumping or countervailing duty order it is requesting a review, and the requesting party must state why it desires the Secretary to review those particular producers or exporters. If the interested party intends for the Secretary to review sales of merchandise by an exporter (or a producer if that producer also exports merchandise from other suppliers) which were produced in more than one country of origin, and each country of origin is subject to a separate order, then the interested party must state specifically, on an order-by-order basis, which exporter(s) the request is intended to cover.

Seven copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room B–099, U.S., Department of Commerce, Washington, D.C. 20230. The Department also asks parties to serve a copy of their requests to the Office of Antidumping Compliance, Attention: Pamela Woods, in room 3065 of the main Commerce Building. Further, in accordance with section 353.31(g) or 355.31(g) of the regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review," for requests received by December 31, 1995. If the Department does not receive, by December 31, 1995, a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Dated: November 28, 1995.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510–DS–M

Intent To Revoke Antidumping Duty Orders and Findings and To Terminate Suspended Investigations

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Intent To Revoke Antidumping Duty Orders and Findings and To Terminate Suspended Investigations.

SUMMARY: The Department of Commerce (the Department) is notifying the public of its intent to revoke the antidumping duty orders and findings and to terminate the suspended investigations listed below. Domestic interested parties who object to these revocations and terminations must submit their comments in writing no later than the last day of December 1995.

EFFECTIVE DATE: December 4, 1995.

FOR FURTHER INFORMATION CONTACT: Michael Panfeld or the analyst listed under Antidumping Proceeding at: Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, N.W., Washington, D.C. 20230, telephone (202) 482–4737.

SUPPLEMENTARY INFORMATION:

Background

The Department may revoke an antidumping duty order or finding or terminate a suspended investigation if the Secretary of Commerce concludes that it is no longer of interest to interested parties. Accordingly, as required by § 353.25(d)(4) of the Department's regulations, we are

notifying the public of our intent to revoke the following antidumping duty orders and findings and to terminate the suspended investigations for which the Department has not received a request to conduct an administrative review for the most recent four consecutive annual anniversary months:

If no interested party requests an administrative review in accordance with the Department's notice of opportunity to request administrative review, and no domestic interested party objects to the Department's intent to revoke or terminate pursuant to this notice, we shall conclude that the antidumping duty orders, findings, and suspended investigations are no longer of interest to interested parties and shall proceed with the revocation or termination.

Opportunity To Object

Domestic interested parties, as defined in § 353.2(k)(3), (4), (5), and (6) of the Department's regulations, may object to the Department's intent to revoke these antidumping duty orders and findings or to terminate the suspended investigations by the last day of December 1995. Any submission to the Department must contain the name and case number of the proceeding and a statement that explains how the objecting party qualifies as a domestic interested party under § 353.2(k)(3), (4), (5), and (6) of the Department's regulations.

Seven copies of such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room B–099, U.S. Department of Commerce, Washington, D.C. 20230. You must also include the pertinent certification(s) in accordance with § 353.31(g) and § 353.31(i) of the Department's regulations. In addition, the Department requests that a copy of the objection be sent to Michael F. Panfeld in Room 4203. This notice is in accordance with 19 CFR 353.25(d)(4)(i).

Dated: November 22, 1995.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

Carnegie Mellon University, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Docket Number: 95–062. *Applicant:* Carnegie Mellon University, Pittsburgh, PA 15213. *Instrument:* Electron Microscope, Model H-7100. *Manufacturer:* Nissei Sangyo, Japan. *Intended Use:* See notice at 60 FR 40823, August 10, 1995. *Order Date:* March 28, 1995.

Docket Number: 95–065. *Applicant:* University of Utah, Salt Lake City, UT 84112. *Instrument:* Electron Microscope, Model H-7100. *Manufacturer:* Hitachi Ltd., Japan. *Intended Use:* See notice at 60 FR 42847, August 17, 1995. *Order Date:* March 30, 1995.

Docket Number: 95–069. *Applicant:* Saint Barnabas Medical Center, Livingston, NJ 07039. *Instrument:* Electron Microscope, Model JEM-1210. *Manufacturer:* JEOL, Japan. *Intended Use:* See notice at 60 FR 48505, September 19, 1995. *Order Date:* December 27, 1994.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered. *Reasons:* Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–F

Miami University, et al.; Notice of Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 94–145R. *Applicant:* Miami University, Oxford, OH 45056. *Instrument:* Cryostage. *Manufacturer:* Linkham Scientific Instruments, Ltd., United Kingdom. *Intended Use:* See notice at 60 FR 442, January 4, 1995. *Reasons:* The foreign instrument provides: (1) an on-line video image analysis system with ability to perform calibrations, line measurements, angle measurements and circle area measurements, (2) minimum cooling/warming rate of 0.01°C/min and (3) a nitrogen purge chamber surrounding the cryostage and sample. *Advice Received From:* National Institutes of Health, September 21, 1995.

Docket Number: 95–012. *Applicant:* University of California, Berkeley, CA 94720-4767. *Instrument:* Electron Microprobe, Model SX50, *Manufacturer:* Cameca, France. *Intended Use:* See notice at 60 FR 16618, March 31, 1995. *Reasons:* The foreign instrument provides: (1) a co-axial high resolution light optical microscope, (2) multiple vertically mounted wave length dispersive spectrometers with Rowland circle radius of 160mm and (3) an automated optical encoded precision stage for sample relocation to <0.5 microns. *Advice Received From:* National Institutes of Health, April 28, 1995.

Docket Number: 95–055. *Applicant:* Dartmouth College, Hanover, NH 03755-3571. *Instrument:* Thermal Ionization Mass Spectrometer, Model MAT 262/RPQ. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* See notice at 60 FR 39711, August 3, 1995. *Reasons:* The foreign instrument provides magnetic sector performance with an inductively-coupled plasma ion source for an isotope ratio sensitivity of 0.005%. *Advice Received From:* National Institutes of Health, September 22, 1995.

The National Institutes of Health advises that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

BILLING CODE 3510–DS–F

Minority Business Development Agency

Business Development Center Applications: West Palm Beach, Florida

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625 and 15 U.S.C. 1512, the Minority Business Development Agency (MBDA) is soliciting competitive applications from organizations to operate the West Palm Beach Minority Business Development Center (MBDC).

The purpose of the MBDC Program is to provide business development services to the minority business community to help establish and maintain viable minority businesses. To this end, MBDA funds organizations to identify and coordinate public and private sector resources on behalf of minority individuals and firms; to offer a full range of client services to minority entrepreneurs; and to serve as a conduit of information and assistance regarding minority business. The MBDC will provide service in the West Palm Beach, Florida Metropolitan Area. The award number of the MBDC will be 04–10–96003–01.

DATES: The closing date for applications is January 3, 1996. Applications must be received in the MBDA Headquarters' Executive Secretariat on or before January 3, 1996. A pre-application conference will be held on December 20, 1995, at 9 a.m., at the Atlanta Regional Office, 401 W. Peachtree Street, N.W., Suite 1715, Atlanta, Georgia 30308–3516, (404) 730–3300. Proper identification is required for entrance into any Federal building.

ADDRESSES: Completed application packages should be submitted to the U.S. Department of Commerce, Minority Business Development Agency, Executive Secretariat, 14th and Constitution Avenue, N.W., Room 5073, Washington, D.C. 20230.

FOR FURTHER INFORMATION AND AN APPLICATION PACKAGE, CONTACT: Robert Henderson at (404) 730–3300.

SUPPLEMENTARY INFORMATION: Contingent upon the availability of Federal funds, the cost of performance for the first budget period (13 months) from April 1, 1996 to April 30, 1997, is estimated at $198,971. The total Federal amount is $169,125 and is composed of $165,000 plus the Audit Fee amount of $4,125. The application must include a minimum cost share of 15%, $29,846 in non-federal (cost-sharing) contributions for a total project cost of $198,971. Cost-sharing contributions may be in the form of cash, client fees, third party in-kind contributions, non-cash applicant contributions or combinations thereof.

The funding instrument for this project will be a cooperative agreement. If the recommended applicant is the current incumbent organization, the award will be for 12 months. For those applicants who are not incumbent organizations or who are incumbents that have experienced closure due to a break in service, a 30-day start-up period will be added to their first budget period, making it a 13-month award. Competition is open to individuals, non-profit and for-profit organizations, state and local governments, American Indian tribes and educational institutions.

Applications will be evaluated on the following criteria: the knowledge, background and/or capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of

minority businesses, individuals and organizations (45 points), the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (25 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to each evaluation criteria category to be considered programmatically acceptable and responsive. Those applications determined to be acceptable and responsive will then be evaluated by the Director of MBDA. Final award selections shall be based on the number of points received, the demonstrated responsibility of the applicant, and the determination of those most likely to further the purpose of the MBDA program. Negative audit findings and recommendations and unsatisfactory performance under prior Federal awards may result in an application not being considered for award. The applicant with the highest point score will not necessarily receive the award. Periodic reviews culminating in year-to-date evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the total discretion of MBDA based on such factors as the MBDC's performance, the availability of funds and Agency priorities.

The MBDC shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist in this effort, the MBDC may charge client fees for services rendered. Fees may range from $10 to $60 per hour based on the gross receipts of the client's business.

Anticipated processing time of this award is 120 days. Executive order 12372, "Intergovernmental Review of Federal Programs," is not applicable to this program. Federal funds for this project include audit funds for non-CPA recipients. In event that a CPA firm wins the competition, the funds allocated for audits are not applicable. Questions concerning the preceding information can be answered by the contact person indicated above, and copies of application kits and applicable regulations can be obtained at the above address. The collection of information requirements for this project have been approved by the Office of Management and Budget (OMB) and assigned OMB control number 0640–0006.

Awards under this program shall be subject to all Federal laws, and Federal and Departmental regulations, policies, and procedures applicable to Federal financial assistance awards.

Pre-Award Costs—Applicants are hereby notified that if they incur any costs prior to an award being made, they do so solely at their own risk of not being reimbursed by the Government. Notwithstanding any verbal assurance that an applicant may have received, there is no obligation on the part of the Department of Commerce to cover pre-award costs.

Outstanding Account Receivable—No award of Federal funds shall be made to an applicant who has an outstanding delinquent Federal debt until either the delinquent account is paid in full, repayment schedule is established and at least one payment is received, or other arrangements satisfactory to the Department of Commerce are made.

Name Check Policy—All non-profit and for-profit applicants are subject to a name check review process. Name checks are intended to reveal if any key individuals associated with the applicant have been convicted of or are presently facing criminal charges such as fraud, theft, perjury or other matters which significantly reflect on the applicant's management honesty or financial integrity.

Award Termination—The Departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any time before the date of completion whenever it is determined that the award recipient has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of the MBDC work requirements; and reporting inaccurate or inflated claims of client assistance. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

False Statements—A false statement on an application for Federal financial assistance is grounds for denial or termination of funds, and grounds for possible punishment by a fine or imprisonment as provided in 18 U.S.C. 1001.

Primary Applicant Certifications—All primary applicants must submit a completed Form CD–511, "Certifications Regarding Debarment, Suspension and Other Responsibility Matters; Drug-Free Workplace Requirements and Lobbying."

Nonprocurement Debarment and Suspension—Prospective participants (as defined at 15 CFR Part 26, Section 26.105) are subject to 15 CFR Part 26, "Nonprocurement Debarment and Suspension" and the related section of the certification form prescribed above applies.

Drug Free Workplace—Grantees (as defined at 15 CFR Part 26, Section 26.605) are subject to 15 CFR Part 26, Subpart F, "Governmentwide Requirements for Drug-Free Workplace (Grants)" and the related section of the certification form prescribed above applies.

Anti-Lobbying—Persons (as defined at 15 CFR Part 28, Section 28.105) are subject to the lobbying provisions of 31 U.S.C. 1352, "Limitation on use of appropriated funds to influence certain Federal contracting and financial transactions," and the lobbying section of the certification form prescribed above applies to applications/bids for grants, cooperative agreements, and contracts for more than $100,000, and loans and loan guarantees for more than $150,000 or the single family maximum mortgage limit for affected programs, whichever is greater.

Anti-Lobbying Disclosures—Any applicant that has paid or will pay for lobbying using any funds must submit an SF-LLL, "Disclosure of Lobbying Activities," as required under 15 CFR Part 28, Appendix B.

Lower Tier Certifications—Recipients shall require applications/bidders for subgrants, contracts, subcontracts, or other lower tier covered transactions at any tier under the award to submit, if applicable, a completed Form CD–512, "Certifications Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transactions and Lobbying" and disclosure form, SF-LLL, "Disclosure of Lobbying Activities." Form CD–512 is intended for the use of recipients and should not be transmitted to DOC. SF-LLL submitted by any tier recipient or subrecipient should be submitted to DOC in accordance with the instructions contained in the award document.

Buy American-made Equipment or Products—Applicants are hereby notified that they are encouraged, to the extent feasible, to purchase American-made equipment and products with funding provided under this program in accordance with Congressional intent as set forth in the resolution contained in Public Law 103–121, Sections 606 (a) and (b).

11.800 Minority Business Development Center (Catalog of Federal Domestic Assistance)

Dated: November 27, 1995.

Donald L. Powers,

Federal Register Liaison Officer, Minority Business Development Agency.

[FR Doc. 95–29365 Filed 12–1–95; 8:45 am]

BILLING CODE 3510–21–P

National Oceanic and Atmospheric Administration

[I.D. 112295A]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of modification 1 to permit 924.

SUMMARY: Notice is hereby given that on November 16, 1995, NMFS issued Modification 1 to Permit Number 924 to the National Marine Fisheries Service Southwest Region (P772#66) to take listed sea turtles for the purpose of scientific research, subject to certain conditions set forth therein.

ADDRESSES: The application, permit, and related documents are available for review by appointment in the following offices:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Hwy., Room 13307, Silver Spring, MD 20910–3226 (301–713–1401); and

Director, Southwest Region, NMFS, NOAA, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213 (310–980–4016).

SUPPLEMENTARY INFORMATION: On November 6, 1995, a request was received from the National Marine Fisheries Service Southwest Region (P772#66), to modify the due date of annual reporting on the take of listed sea turtles under Permit 924.

As required by the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531–1543) and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217–222), issuance of this modification was based on a finding that such modification: (1) Was applied for in good faith, (2) will not operate to the disadvantage of the listed species that are the subject of this modification, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: November 27, 1995.

Russell J. Bellmer,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 95–29445 Filed 12–1–95; 8:45 am]

BILLING CODE 3510–22–F

[I.D. 112295B]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of application for a scientific research permit (P423B).

SUMMARY: Notice is hereby given that Drs. Mary Moser and Steve W. Ross have applied in due form for a permit to take listed shortnose sturgeon for the purpose of scientific research.

DATES: Written comments or requests for a public hearing on this application must be received on or before January 3, 1996.

ADDRESSES: The application and related documents are available for review by appointment in the following offices:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Hwy., Room 13307, Silver Spring, MD 20910–3226 (301–713–1401); and

Director, Southeast Region, NMFS, 9721 Executive Center Drive, St. Petersburg, FL 33702–2432 (813–893–3141).

Written comments, or requests for a public hearing on this application should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

SUPPLEMENTARY INFORMATION: Application (P423B) requests a permit under the authority of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217–227). The applicant requests a 2-year permit to collect shortnose sturgeon in North Carolina to determine the distribution and habitat use.

Those individuals requesting a hearing should set out the specific reasons why a hearing on this particular application would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: November 27, 1995.

Russell J. Bellmer,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

RIN 0651–XX04

Request for Comments on Interim Guidelines for Examination of Design Patent Applications for Computer-Generated Icons; Comment Period Extension

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of extension of comment period.

SUMMARY: A request for comments on interim guidelines for the examination of design patent applications for computer-generated icons was published at 60 FR 52170, October 5, 1995. This notice extends the deadline for accepting comments. The deadline for accepting comments is being extended to accommodate members of the public who requested an extension.

DATES: Written comments on the interim guidelines must now be received on or before December 6, 1995.

ADDRESSES: Written comments should be addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231, marked to the attention of John Kittle, Director, Group 1100/2900, Crystal Plaza 3, 8D19. Comments may also be submitted by telefax at (703) 305–3600 or by electronic mail through the INTERNET to "icon-pat@uspto.gov."

FOR FURTHER INFORMATION: Contact John Kittle by telephone at (703) 308–1495 or by mail to his attention addressed to the Assistant Commissioner for Patents, Group 1100/2900, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: Written comments should include the following information:

—Name and affiliation of the individual responding;

—An indication of whether the comments offered represent views of the respondent's organization's or are the respondent's personal views; and

—If applicable, information on the respondent's organization, including the type of organization and general areas of interest.

Parties presenting written comments are requested, where possible, to provide their comments in machine-readable format. Such submissions may be provided by electronic mail messages sent over the Internet, or on a 3.5" floppy disk formatted for use in either a Macintosh or MS–DOS based computer. Machine-readable submissions should be provided as unformatted text (e.g., ASCII or plain text).

Dated: November 22, 1995.

Lawrence J. Gaffney, Jr.,

Acting Deputy Assistant Secretary of Commerce and Deputy Commissioner of Patents and Trademarks.

BILLING CODE 3510–16–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment of a New Export Visa Arrangement for Certain Cotton, Wool, Man-Made Fiber, Silk-Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Mauritius

November 28, 1995.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing export visa requirements.

EFFECTIVE DATE: December 1, 1995.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Governments of the United States and Mauritius agreed to establish a new Export Visa Arrangement for certain cotton, wool, man-made fiber, silk-blend and other vegetable fiber textiles and textile products, produced or manufactured in Mauritius and exported from Mauritius on and after December 1, 1995. Goods exported during the period December 1, 1995 through December 31, 1995 shall not be denied entry for lack of a visa. All goods exported after January 1, 1996 must be accompanied by an appropriate export visa.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to prohibit entry of certain textile products, produced or manufactured in Mauritius and exported from Mauritius on and after December 1, 1995 for which the Government of the Mauritius has not issued an appropriate export visa.

A facsimile of export visa stamp is on file at the U.S. Department of Commerce in Room 3100.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 59 FR 65531, published on December 20, 1994). Information regarding the 1996 CORRELATION will be published in the **Federal Register** at a later date.

Interested persons are advised to take all necessary steps to ensure that textile products that are entered into the United States for consumption, or withdrawn from warehouse for consumption, will meet the visa and certification requirements set forth in the letter published below to the Commissioner of Customs.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

November 28, 1995.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Export Visa Arrangement of September 12, 1995 between the Governments of the United States and Mauritius; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on December 1, 1995, entry into the Customs territory of the United States (i.e., the 50 states, the District of Columbia and the Commonwealth of Puerto Rico) for consumption and withdrawal from warehouse for consumption of cotton, wool, man-made fiber, silk-blend, and other vegetable fiber textiles and textile products in Categories 200–239, 300–369, 400–469, 600–670, and 800–899, including merged and part categories, produced or manufactured in Mauritius and exported from Mauritius on and after December 1, 1995 for which the Government of the Mauritius has not issued an appropriate export visa fully described below. Should additional categories, merged categories or part categories become subject to import quota the entire category(s) or part category(s) shall be included in the coverage of this arrangement. Goods exported during the period December 1, 1995 through December 31, 1995 shall not be denied entry for lack of an export visa.

A visa must accompany each commercial shipment of the aforementioned textile products. A circular stamped marking in blue ink will appear on the front of the original commercial invoice. The original visa shall not be stamped on duplicate copies of the invoice. The original invoice with the original visa stamp will be required to enter the shipment into the United States. Duplicates of the invoice and/or visa may not be used for this purpose.

Each visa stamp shall include the following information:

1. The visa number. The visa number shall be in the standard nine digit letter format, beginning with one numerical digit for the last digit of the year of export, followed by the two character alpha country code specified by the International Organization for Standardization (ISO) (the code for Mauritius is "MU"), and a six digit numerical serial number identifying the shipment; e.g., 5MU123456.

2. The date of issuance. The date of issuance shall be the day, month and year on which the visa was issued.

3. The original signature of the issuing official and the printed name of the issuing official of the Government of Mauritius.

4. The correct category(s), merged category(s), part category(s), quantity(s) and unit(s) of quantity in the shipment as set forth in the U.S. Department of Commerce Correlation and in the Harmonized Tariff Schedule of the United States, annotated or successor documents shall be reported in the spaces provided within the visa stamp (e.g., "Cat. 434–210 DZ").

Quantities must be stated in whole numbers. Decimals or fractions will not be accepted. Merged category quota merchandise may be accompanied by either the appropriate merged category visa or the correct category visa corresponding to the actual shipment (e.g., Categories 347/348 may be visaed as 347/348 or if the shipment consists solely of 347 merchandise, the shipment may be visaed as "Cat. 347," but not as "Cat. 348"). If, however, a merged quota category such as 340/640 has a quota sublimit on Category 340, then there must be a "Category 340" visa for the shipment if it includes Category 340 merchandise.

U.S. Customs shall not permit entry if the shipment does not have a visa, or if the visa number, date of issuance, signature, category, quantity or units of quantity are missing, incorrect or illegible, or have been crossed out or altered in any way. If the quantity indicated on the visa is less than that of the shipment, entry shall not be permitted. If the quantity indicated on the visa is more than that of the shipment, entry shall be permitted and only the amount entered shall be charged to any applicable quota.

The complete name and address of a company actually involved in the manufacturing process of the textile product covered by the visa shall be provided on the front of the textile document.

If the visa is not acceptable then a new correct visa or a visa waiver must be presented to the U.S. Customs Service before any portion of the shipment will be released. A visa waiver may be issued by the U.S. Department of Commerce at the request of the Government of Mauritius. The waiver, if used, only waives the requirement to present a visa with the shipment. It does not waive the quota requirement.

If the visaed invoice is deficient, the U.S. Customs Service will not return the original document after entry, but will provide a certified copy of that visaed invoice for use in obtaining a new correct original visaed invoice, or a visa waiver.

If import quotas are in force, U.S. Customs Service shall charge only the actual quantity in the shipment to the correct category limit. If a shipment from Mauritius has been allowed entry into the commerce of the United States with either an incorrect visa or no visa, and redelivery is requested but cannot be made, the shipment will be charged to the correct category limit whether or not a replacement visa or waiver is provided.

Merchandise imported for the personal use of the importer and not for resale, regardless of value, and properly marked or commercial sample shipments valued at U.S.$250 or less, do not require an export visa for entry and shall not be charged to existing quota levels.

A facsimile of the visa stamp is enclosed.

The actions taken concerning the Government of Mauritius with respect to imports of textiles and textile products in the foregoing categories have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1). This letter will be published in the **Federal Register.**

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

CONSUMER PRODUCT SAFETY COMMISSION

Request for Comments Concerning Proposed Extension of Approval of a Collection of Information—Electrically Operated Toys and Children's Articles

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act (44 U.S.C. Chapter 35), the Consumer Product Safety Commission requests comments on a proposed extension of approval of a collection of information from manufacturers and importers of certain electrically operated toys and children's articles. The collection of information consists of testing and recordkeeping requirements in regulations entitled "Requirements for Electrically Operated Toys or Other Electrically Operated Articles Intended for Use by Children," codified at 16 CFR part 1505.

The Commission will consider all comments received in response to this notice before requesting an extension of this collection of information from the Office of Management and Budget.

DATES: Written comments must be received by the Office of the Secretary not later than February 2, 1996.

ADDRESSES: Written comments should be captioned "Electrically Operated Toys" and mailed to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, or delivered to that office, room 502, 4330 East West Highway, Bethesda, Maryland.

FOR FURTHER INFORMATION CONTACT: For information about the proposed extension of the collection of information, or to obtain a copy of 16 CFR part 1505, call or write Nicholas V. Marchica, Director, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504–0416, extension 2243.

SUPPLEMENTARY INFORMATION: In 1973, the Commission issued safety requirements for electrically operated toys and children's articles to protect children from unreasonable risks of injury from electric shock, electrical burns, and thermal burns. These regulations are codified at 16 CFR part 1505 and were issued under the authority of sections 2 and 3 of the Federal Hazardous Substances Act (15 U.S.C. 1261, 1262).

A. Requirements for Electrically Operated Toys

These regulations are applicable to toys, games, and other articles intended for use by children which are powered by electrical current from a 120 volt circuit. Video games and articles designed primarily for use by adults which may be incidentally used by children are not subject to these regulations.

The regulations prescribe design, construction, performance, and labeling requirements for electrically operated toys and children's articles. The regulations also require manufacturers and importers of those products to develop and maintain a quality assurance program. Additionally, section 1505.4(a)(3) of the regulations requires those firms to maintain records for three years containing information about: (1) Material and production specifications; (2) the quality assurance program used; (3) results of all tests and inspections conducted; and (4) sales and distribution of electrically operated toys and children's articles.

The Office of Management and Budget (OMB) approved the collection of information requirements in the regulations under control number 3041–0035. OMB's most recent extension of approval expired on February 28, 1995. The Commission now proposes to request a reinstatement of approval without change for the information collection requirements in the regulations.

The safety need for this collection of information remains. Specifically, if a manufacturer or importer distributes products that violate the requirements of the regulations, the records required by section 1505.4(a)(3) can be used by the firm and the Commission (i) to identify specific lots or production lines of products which fail to comply with applicable requirements, and (ii) to notify distributors and retailers in the event the products are subject to recall.

B. Estimated Burden

The Commission staff estimates that about 40 firms are subject to the testing and recordkeeping requirements of the regulations. The Commission staff estimates further that the burden imposed by the regulations on each of these firms is approximately 160 hours per year for testing, and about 40 hours a year for recordkeeping. Thus, the total annual burden imposed by the regulations on all manufacturers and importers is about 8,000 hours.

The Commission staff estimates that the hourly wage for the time required to perform the required testing and to maintain the required records is about $13, and that the annual total cost to the industry is approximately $104,000.

During a typical year, the Commission will expend approximately one week of professional staff time reviewing records required to be maintained by the regulations for electrically operated toys. The annual cost to the Federal government of the collection of information collection in these regulations is estimated to be $1,400.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed extension of approval of the collection of information in the regulations for electrically operated toys and children's articles. The Commission specifically solicits information about the hourly burden and monetary costs imposed by the collection of information on firms subject to this collection of information. The Commission also seeks information relevant to the following topics:

- Whether the collection of information is necessary for the proper performance of the Commission's functions;
- Whether the information will have practical utility for the Commission;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological

collection techniques, or other form of information technology.

Dated: November 28, 1995.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Revision of the National Senior Service Corps' Project Profile and Volunteer Activity (PPVA) Information Collection Instruments

AGENCY: Corporation for National and Community Service.

ACTION: Notice of 60-Day Review and Comment Period on Draft 1996 PPVA Information Collection Instruments.

SUMMARY: The National Senior Service Corps announces a 60-day review and comment period during which project sponsors and the public are encouraged to submit comments on revised draft PPVA information collection instruments to be used during the September 1996 annual information collection: PPVA instruments are used to annually collect project and aggregate volunteer demographic and activity information from project sponsors funded under the Retired and Senior Volunteer Program (RSVP), Foster Grandparent Program (FGP), and Senior Companion Program (SCP).

Comments are invited on (1) whether the proposed instruments collect information appropriate and sufficient to meet operational management, planning and reporting needs of the Senior Corps programs; (2) ways to enhance the quality, utility and clarity of the information to be collected; (3) accuracy of agency estimates of reporting burden; and (4) ways to further reduce burden on respondents while meeting program needs.

DATES: The National Senior Service Corps will consider written comments on the proposed instruments and record-keeping requirements received within 60 days from the date of publication.

ADDRESS TO SEND COMMENTS: Janice Forney Fisher, National Senior Service Corps (NSSC), Corporation for National Service, 1201 New York Avenue, N.W., Washington, D.C. 20525.

ESTIMATED ANNUAL REPORTING OR DISCLOSURE BURDEN: 8,267 hours.

Program	No. of respondents	Annual responses per respondent	Average burden per respondent (hours)	Total annual burden on all respondents

Office of the Secretary of Defense

Privacy Act of 1974; Notice to Amend a Record System

AGENCY: Office of the Secretary of Defense, DOD.

ACTION: Notice to Amend a Record System.

SUMMARY: The Office of the Secretary of Defense proposes to amend a system of records notice in its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended.

DATES: The amendment will be effective on January 3, 1996 unless comments are received that would result in a contrary determination.

ADDRESSES: Send comments to Chief, Records Management and Privacy Act Branch, Washington Headquarter Services, Correspondence and Directives, Directives and Records Division, 1155 Defense Pentagon, Washington, DC 20301–1155.

FOR FURTHER INFORMATION CONTACT: Mr. Dan Cragg at (703) 695–0970 or DSN 225–0970.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense notices for systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address above.

The proposed amendments are not within the purview of subsection (r) of the Privacy Act (5 U.S.C. 552a), as amended, which would require the submission of a new or altered system report for each system. The specific changes to the record system being amended are set forth below followed by the notice, as amended, published in its entirety.

Dated: November 24, 1995.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Persian Gulf Veterans Illnesses Files.

SYSTEM LOCATION:

Department of Defense Persian Gulf Veterans Illnesses Investigative Team, 5205 Leesburg Pike, Falls Church, VA 22041–3881; and Assistant Secretary of Defense (Health Affairs), 1200 Defense Pentagon, Washington, DC 20301–1200.

Comprehensive Clinical Evaluation Program, 5205 Leesburg Pike, Skyline 1, Suite 1135, Falls Church, VA 22041–3802.

Commander, U.S. Army Center for Health Promotion and Preventive Medicine, ATTN: MCHB-DE-HR, Aberdeen Proving Ground, MD 21010–5422.

U.S. Army Joint Services Support Group, 7798 Cissna Road, Suite 101, Springfield, VA 22150–3197.

Naval Health Research Center, Division of Clinical Epidemiology, 271 Catalina Boulevard, Barracks Building 322, San Diego, CA 92152–5302.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who served in Operation Desert Storm and/or Operation Desert Shield who feel they may have been exposed to biological, chemical, disease, or environmental agents. Those individuals may contact the Persian Gulf Veterans Illnesses Investigative Team by dialing 1–800–472–6719 to report experiences of unusual illness or health conditions following service during the Persian Gulf conflict.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records consist of individual's name, Social Security Number or service number, last known or current address, occupational information, date and extent of involvement in Persian Gulf military operations, perceived exposure information, medical treatment information, medical history of subject, and other documentation of reports of possible exposure to biological, chemical, disease, or environmental agents.

The system contains information from unit and historical records and information provided to the Department of Defense by individuals with first-hand knowledge of reports of possible biological, chemical, disease, or environmental incidents.

Information from health care providers who have evaluated patients with illnesses possibly related to service in the Persian Gulf is also included. Records include those documents, files, and other matter in the medical, operational, and intelligence communities that could relate to possible causes of Persian Gulf War Veterans illnesses.

Records of diagnostic and treatment methods pursued on subjects following reports of possible incidental exposure are also included in this system.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 131, 10 U.S.C. 136, and E.O. 9397.

PURPOSE(S):

Records are collected and assembled to permit investigative examination and analysis of reports of possible exposure to biological, chemical, disease, or environmental agents incident to service in the Persian Gulf War and to conduct scientific or related studies or medical follow-up programs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, these records or information contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

To the Department of Veterans Affairs and the Social Security Administration for appropriate consideration of individual claims for benefits for which that agency is responsible.

The 'Blanket Routine Uses' set forth at the beginning of OSD's compilation of systems of records notices apply to this system.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records are maintained in file folders; electronic records are stored on magnetic media; microfilm/microfiche are maintained in appropriate storage containers.

RETRIEVABILITY:

Records are retrieved by case number, name, Social Security Number or service number.

SAFEGUARDS:

Access to areas where records maintained is limited to authorized personnel. Areas are protected by access control devices during working hours and intrusion alarm devices during non-duty hours.

RETENTION AND DISPOSAL:

Files will be retained permanently. They will be maintained in the custody of the Persian Gulf Veterans Illnesses Investigative Team under the oversight of the Assistant Secretary of Defense (Health Affairs) until completion of the Team's investigative mission. Upon disbanding of the Team, custody of the records will be transferred to OASD(HA) where they will be held for five years, and then transferred to the National Archives and Records Administration.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Secretary of Defense (Health Affairs), 1200 Defense Pentagon, Washington, DC 20301–1200.

NOTIFICATION PROCEDURE:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Director, Persian Gulf War Veterans Illnesses Investigative Team, Suite 810, 5205 Leesburg Pike, Falls Church, VA 22041–3881, or to the Assistant Secretary of Defense (Health Affairs), 1200 Defense Pentagon, Washington, DC 20301–1200.

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about themselves contained in this system of records should address written inquiries to the Director, Persian Gulf War Veterans Illnesses Investigative Team, Suite 810, 5205 Leesburg Pike, Falls Church, VA 22041–

3881, or to the Assistant Secretary of Defense (Health Affairs), 1200 Defense Pentagon, Washington, DC 20301–1200.

CONTESTING RECORDS PROCEDURES:

The OSD's rules for accessing records, for contesting contents and appealing initial agency determinations are published in OSD Administrative Instruction 81; 32 CFR part 311; or may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information is from the individuals themselves, witnesses to a possible agent event, health care providers who have evaluated patients with illnesses possibly related to service in the Persian Gulf, as well as extracts from historical records to include: personnel files and lists, unit histories, medical records, and related sources.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

BILLING CODE 5000–04–F

Proposed Information Collection Available for Public Comment; Notice

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Under Secretary of Defense (Personnel and Readiness) announces the following proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information collection; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. Written comments and recommendations on the proposed information collection should be sent to the Office of the Under Secretary of Defense (Personnel and Readiness) (Requirements and Resources), ATTN: Reports Clearance Officer, Room 3C980, 4000 Defense Pentagon, Washington, DC 20301–4000. Consideration will be given to all comments received within 60 days of the date of publication of this notice.

Title: Department of Defense Domestic Dependent Elementary and Secondary Schools (DDESS): 1996 Impact Aid Funding Surveys.

Summary: This information collection consists of telephone interviews with both state education officials and local school district officials regarding the levels and sources of funding for local education agencies (LEAs) that have over 30 percent of students as military dependents. The proposed information collection will use a computer-assisted telephone interview (CATI) technique, in which telephone interviewers enter responses into a computerized data file. The primary purpose of this survey effort is to determine the feasibility of transferring the Domestic Dependent Elementary and Secondary Schools (DDESS) to local education agencies.

Needs and Uses: The Department of Defense (DoD) currently funds the operation of 58 Domestic Dependent Elementary and Secondary Schools (DDESS) on 15 military installations within the United States (excluding Puerto Rico). These schools were originally funded because the local communities could not provide a suitable education for military dependents living on these installations. In recent years, changes in local conditions and in federal funding priorities have led Congress to reconsider federal funding for the DDESS schools. In 1985, Congress required that the DoD submit a plan for the transfer of the DDESS schools to local education agencies. Although DoD conducted case studies of each DDESS, no action was taken regarding transfer. However, continuing efforts to reduce the federal deficit led the 103rd Congress to request a new study of the transfer issue. House of Representatives Conference Report 103–701 (pp. 963–964) requires that the Department of Defense collect information concerning the possibility of transferring the remaining 15 DDESS schools to neighboring local education agencies. Since a transfer to LEAs would require some mechanism to ensure adequate funding, the appropriate means and sources of funds for LEAs that enroll high proportions of military students is a critical determinant of the feasibility and success of any transfer effort. The House Conference Report, therefore, directs the DoD to conduct a survey of school districts operated by local education agencies in which over 30 percent of enrolled students are military dependents, in order to determine the level of funding for such schools and the sources of that funding. The legislation further specifies that the survey collect information on (1) the previous level of financial support provided by DoD and other federal agencies, and the timing of fiscal decisions concerning the education of military-connected students; (2) the positions of the LEAs and their corresponding state education officials regarding the responsibility of LEAs to educate military-connected students who reside on military installations; and (3) how funding of these school districts compares with other districts within the state that do not have a large percentage of military-dependent students. Findings from the data collection (along with findings from required surveys of military parents regarding the quality of education at the DDESS schools and at the highly impacted LEAs) will be submitted in a report to Congress. Congress will use this information in its consideration of the feasibility of transferring the DDESS schools to local education agencies.

Affected Public: State and local governments.

Annual Burden Hours (Including Recordkeeping): 65.5 hours.

Number of Respondents: 131.

Responses per Respondent: One.

Average Burden per Response: 30 minutes.

Frequency: One time.

To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address or call the Office of the Under Secretary of Defense (Personnel and Readiness) Reports Clearance Officer at (703) 614–4989.

Dated: November 29, 1995.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5000–04–M

Proposed Information Collection Available for Public Comment; Notice

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Under Secretary of Defense (Personnel and Readiness) announces the following proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the

burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

Written comments and recommendations on the proposed information collection should be sent to the Office of the Under Secretary of Defense (Personnel and Readiness) (Requirements and Resources), ATTN: Reports Clearance Officer, Room 3C980, 4000 Defense Pentagon, Washington, DC 20301–4000. Consideration will be given to all comments received within 60 days of the date of publication of this notice.

Title: Record of Military Processing—Armed Forces of the United States; DD Form 1966; OMB Control Number 0704–0173.

Summary: This information collection is used by all Military Services for obtaining data to determine eligibility of applicants for enlistment into the Armed Forces and for establishing enlistment records. The DD Form 1966, "Record of Military Processing—Armed Forces of United States," used in this collection, requests information about name, age, education, previous military service, family, and citizenship. it requires validation that a recruiter has reviewed the information and requires witnesses for verification of the applicants' signature.

Needs and Uses: In accordance with Title 10 USC Sections 504, 505, 508, 510, and 520a; Title 14 USC Sections 351 and 632; and Title 50 USC Appendix, Section 451, applicants must meet minimum standards for enlistment into the Armed Forces. This information collection, which is used by the Military Services and the Coast Guard, gathers the necessary data for determining eligibility in the Armed Forces and for establishing personnel records on those enlisted.

Affected Public: Individuals or households.

Annual Burden Hours: 423,300 hours.

Number of Respondents: 510,000.

Responses per Respondent: 1.

Average Burden per Response: .83 hours.

Frequency: One-time.

To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address or call the Office of the Under Secretary of Defense (Personnel and Readiness) Reports Clearance Officer at (703) 614–8989.

Dated: November 29, 1995.

Department of the Army

Proposed Information Collection Available for Public Comment; Record of Preparation and Disposition of Remains

AGENCY: Director of Information Systems for Command, Control, Communications, and Computers (DISC4), U.S. Army.

ACTION: Notice.

SUMMARY: In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Department of the Army announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. Title 10, USC Sections 1481 & 1482 authorize disposition of remains and payments of necessary expenses incident to the death of active duty military personnel.

Title, Applicable Forms, and OMB Control Number

Record of Preparation and Disposition of Remains (Within CONUS), DD FORM 2063, OMB CONTROL NUMBER (0702–0014)

Needs and Uses: DD FORM 2063 provides technical information regarding preparation and condition of remains. Information is used to substantiate claims and provide information for inquiries into death cases.

Affected Public: Individuals or households.

Annual Burden Hours: 403.

Number of Respondents: 1,613.

Responses per Respondents: 1.

Average Burden per Response: 15 minutes.

Frequency: On occasion.

FOR FURTHER INFORMATION CONTACT: Written comments and recommendations on the proposed information collection should be sent to Department of the Army, Deputy Chief of Staff for Personnel, 300 Army Pentagon, DAPE–ZXI–IC (ATTN: Phyllis Miller) Washington, DC 20310–0300. Consideration will be given to all comments received within 60 days of the date of publication of this notice.

SUPPLEMENTARY INFORMATION: To request more information on this proposed information collection or to obtain a copy of the proposed association collection instruments, please write to the above address or call the Department of the Army Reports Clearance Officer at (703) 614–0454.

BILLING CODE 3710–08–M

Proposed Information Collection Available for Public Comment; Request for Payment of Funeral

AGENCY: Director of Information Systems for Command, Control, Communications, and Computers (DISC4), U.S. Army.

ACTION: Notice.

SUMMARY: In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Department of the Army announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology. Title 10, USC Sections 1485 & 1486 provides the next-of-kin of deceased military personnel a monetary reimbursement of certain costs incurred by the next-of-kin in the interment of the deceased.

Title, Applicable Forms, and OMB Control Number

Disposition of Remains—Reimbursable Basis, Request for Payment of Funeral and/or Interment Expenses, DD FORMS 2065 AND DD

FORM 1375, OMB CONTROL NUMBER (0704–0030).

Needs and Uses: DD FORM 2065 records disposition instructions and costs for preparation and final disposition of remains. DD FORM 1375 provides next-of-kin an instrument to apply for reimbursement of funeral/interment expenses. This information is used to adjudicate claims for reimbursement of these expenses.

Affected Public: Individuals or households.

Annual Burden Hours: 208.

Number of Respondents: 1,140.

Responses per Respondents: 1.

Average Burden per Response: 30 minutes.

Frequency: On occasion.

FOR FURTHER INFORMATION CONTACT: Written comments and recommendations on the proposed information collection should be sent to Department of the Army, Deputy Chief of Staff for Personnel, 300 Army Pentagon, DAPE–ZXI–IC (ATTN: Phyllis Miller) Washington, DC 20310–0300. Scientific Conference on Frozen Platelets and Platelet Substitutes in Transfusion Medicine

AGENCY: Walter Reed Army Institute of Research, Washington, DC.

ACTION: Notice of open meeting.

SUMMARY: This conference is sponsored by the Medical Research Combat Casualty Care Program of the United States Army and Navy, with the participation of the Center for Biologics Evaluation and Research, Food and Drug Administration, and the Blood Resources Program of the National Heart, Lung and Blood Institute, NIH.

The purpose of the two-day meeting will be to review frozen platelet preparations as well as platelet substitutes that are in development for hospital and field use. Topics to be discussed include appropriate in vitro studies to assess activity as well as preclinical and clinical trails to validate efficacy. Poster preparations are welcome.

All individuals wishing to present posters must register and provide a 250 word abstract no later than January 20, 1996. All others should register by February 1, 1996. The registration fee is $100 payable to SAIC. Registration forms and initial agenda are available from SAIC, ATTN: Ms. Lea Ann Lehmann, 5340 Spectrum Drive, Suite N, Frederick, Maryland 21701 (FAX 301–698–6188).

Date of Meeting: March 7, 1996 to March 8, 1996.

Place: Uniformed Services University of the Health Sciences (main auditorium), 4301 Jones Bridge Road, Bethesda, MD.

Time: 8 a.m. to 9 p.m., March 7 and 8:30 a.m. to 11:30 a.m., March 8.

FOR FURTHER INFORMATION CONTACT: Barbara Alving, M.D., Colonel Chief, Department of Hematology and Vascular Biology, Walter Reed Army Institute of Research, Washington, DC 20307–5100 (TEL 301–782–3385, FAX 202–782–0703).

BILLING CODE 3710–08–M

Army Science Board; Notice of Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: 27 & 28 November 1995.

Time of Meeting: 1400–1800, 27 November 1995, 0800–1700, 28 November 1995.

Place: Ft. Leavenworth, Kansas.

Agenda

The Army Science Board (ASB) TRADOC Panel on "Operational Architecture" will meet for briefings provided by Army representatives from the TRADOC Program Integration Office—Army Battle Command Systems (TPIO-ABCS). This meeting will be closed to the public in accordance with Section 552b(c) of title 5, U.S.C., specifically subparagraph (4) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The proprietary matters to be discussed are so inextricably intertwined so as to preclude opening any portion of this meeting.

For further information, please contact Michelle Diaz at (703) 695–0781.

Jacqueline Y. Ladd,

Database Manager, Acting Administrative Officer, Army Science Board.

Army Science Board; Notice of Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: 28, 29 & 30 November 1995.

Time of Meeting: 0830–1730, 28 November 1995, 0815–1630, 29 November 1995, 0815–1130, 30 November 1995.

Place: WRAIR/NMRI, 29 November 1995, USUHS, 29 & 30 November 1995.

Agenda

The Army Science Board (ASB) Personnel and Medical Issue Group will meet for continuing discussions on the design and staffing required to support the medical research, development, test and evaluation (RDTE) programs of the proposed Army and Navy consolidated laboratory management organization currently proposed to be called the Armed Forces Medical Research Development Agency (AFMRDA). These meetings will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. For further information, please call Michelle Diaz at (703) 695–0781.

BILLING CODE 3710–08–M

Army Science Board; Notice of Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Date of Meeting: November 29, 1995.

Time of Meeting: 0900–1200.

Place: BDM HQ-McLean, VA.

Agenda

The Army Science Board's Acquisition sub-panel to "Reengineering the Acquisition and Modernization Processes of the Institutional Army" will meet to discuss the current status of Army Modernization and to discuss plans to reengineer the Acquisition and Modernization processes. Discussion will include the current shortfalls in modernization and the attendant vulnerabilities to the U.S. Army. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of this morning. For further information, please contact Michelle Diaz at (703) 695–0781.

BILLING CODE 3710–08–M

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Application Concerning a Bacterial Delivery System

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability of U.S. Patent Application Serial No. 08/523,855 entitled "Bacterial Delivery System" and filed September 6, 1995. This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Staff Judge Advocate, Fort Detrick, Frederick, Maryland 21702–5012.

FOR FURTHER INFORMATION CONTACT: Mr. John F. Moran, Patent Attorney, (301) 619–2065 or telefax (301) 619–7714.

SUPPLEMENTARY INFORMATION: This invention describes a bacterial delivery system for the delivery of DNA and antigens to cells. Said system consists of an attenuated bacterial vector which enters mammalian cells and ruptures, thus delivering functional plasmid DNA and antigens into the cell cytoplasm. This *Shigella* vector was designed to deliver DNA to colonic surfaces, thus opening the possibility of oral and other mucosal DNA immunization and gene therapy strategies. The attentuated *Shigella* is also useful as a vaccine for reducing disease symptoms caused by *Shigella.*

Gregory D. Showalter,

Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Application Concerning Encapsulated High-Concentration Lipid A Composition as Immunogenic Agents

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability of U.S. Patent Application Serial No. 07/601,090 filed October 22, 1990 and entitled "Encapsulated High-Concentration Lipid A Compositions as Immunogenic Agents to Produce Human Antibodies to Prevent or Treat Gram-Negative Bacterial Infections". This Notice also announces the withdrawal of the intent to grant exclusive patent license to Univax Biologics, Inc. as indicated in the **Federal Register**, Volume 57, Number 99, page 21648 (May 21, 1992). This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Staff Judge Advocate, Fort Detrick, Frederick, Maryland 21702–5012.

FOR FURTHER INFORMATION CONTACT: Mr. John F. Moran, Patent Attorney, (301) 619–2065 or telefax (301) 619–7714.

SUPPLEMENTARY INFORMATION: This invention is directed to the production of antibodies against lipid A by using encapsulating slow-releasing delivery materials or devices containing concentrations of lipid A that are greater than could be given safely to humans in the absence of said materials or devices. The antibodies to lipid A can be used for binding the antibodies to the lipid A that is present in the lipopolysaccharide that coats the surface of the Gram-negative bacteria.

Corps of Engineers

Notice of Availability of Surplus Land and Buildings in Accordance With Public Law 103–421 Located at Defense Personnel Support Center, Philadelphia, PA

AGENCY: Corps of Engineers, DOD.

ACTION: Public notice of availability.

SUMMARY: The Department of the Army, in accordance with the Base Closure Community Redevelopment and Homeless Assistance Act of 1994, announces that approximately 77.5 acres containing the buildings listed below, at the Defense Personnel Support Center have been determined surplus. The Center is located in south Philadelphia in the block bordered by Oregon Avenue on the North, 20th Street on the East, and Schuylkill Expressway on the South and West. The property is scheduled for closure by July 2, 1999. State and local governments, representatives of the homeless, and other interested parties should be aware that the outreach screening process whereby McKinney Homeless providers and state and local governmental agencies express their interest in the property will be conducted by Lori Flynn of the Philadelphia Industrial Development Corporation, Office of Defense Conversion, 2600 Centre Square West, 1500 Market Street, Philadelphia, PA 19102, telephone: 215–496–8167. The screening process will commence upon the publishing of notices in local newspapers, currently scheduled for early 1996.

BILLING CODE 3710–41–M

Intent To Prepare A Draft Environmental Impact Statement (DEIS) for A Multiuser Disposal Site Program for Contaminated Sediments in Puget Sound, WA

ACTION: Notice of intent to prepare a draft EIS.

SUMMARY: The following are joint lead agencies for the combined Federal and State Programmatic Environmental Impact Statement (EIS): Federal (NEPA): Seattle District, U.S. Army Corps of Engineers, Department of Defense; State (SEPA): Washington Department of Ecology and Washington Department of Natural Resources.

The U.S. Army Corps of Engineers, the Washington Department of Ecology, and the Washington Department of Natural Resources, intend to prepare a joint federal-state Programmatic Environmental Impact Statement under the National Environmental Policy Act (NEPA) and the Washington State Environmental Policy Act (SEPA). The EIS will evaluate disposal alternatives for contaminated sediments from Puget Sound. Disposal alternatives that will be evaluated include: (1) Level bottom capping and confined aquatic disposal, (2) nearshore confined disposal, (3) upland disposal, (4) disposal in solid waste landfills, and (5) multiuser access to larger fill projects.

The need for disposal of contaminated sediments comes from (1) dredging of federal and non-federal navigation channels, (2) waterfront development projects, (3) environmental cleanup projects directed through federal or state enforcement actions, and (4) projects with restoration of aquatic habitat as their primary purpose. Preliminary investigations estimate there are currently about 20–30 million cubic yards of contaminated sediment in Puget Sound, primarily in the urbanized bays.

The current practice of resolving contaminated dredged material issues is on a project-by-project basis, resulting in a greater number of smaller confined disposal sites that must be monitored and accounted for, rather than a few large sites. Because of difficulties with disposal, the discovery of contaminated sediments often forces project proponents to redesign or abandon a project to avoid dredging. This avoidance does not resolve the ongoing adverse effects of the contaminated sediments remaining in the environment, and it limits the potential economic development of the contaminated waterfront site.

Development of an effective solution for the safe disposal and containment of contaminated sediments from multiple sources in Puget Sound is needed. A process to establish, implement, and operate a system of multiuser confined disposal sites, and criteria to site the facilities, will be developed as part of the EIS. Siting criteria will include biological and physical factors, as well as proximity to existing sources of contamination. Using siting criteria and the evaluation of feasible disposal alternatives, zones of siting feasibility in Puget Sound, where multiuser confined disposal sites could be located, will be identified in the EIS. Once zones of feasible sites are determined, site-specific NEPA/SEPA compliance evaluations for all potential sites will be tiered from the completed programmatic EIS.

DATES: The lead and cooperating agencies invite and encourage agencies and the public to provide written comments on the proposed programmatic EIS throughout the scoping process to ensure that all relevant environmental issues are considered. Persons or organizations wishing to submit scoping comments should do so no later than January 21, 1996.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be answered by: Mr. Steve Babcock, Seattle District, U.S. Army Corps of Engineers, Planning Branch, 4735 E. Marginal Way S., Seattle, Washington 98124–3755, Telephone (206) 764–3651 or Mr. Keith Phillips, Washington Department of Ecology, Environmental Investigation and Lab Service Program, P.O. Box 47710, Olympia, Washington 98504–7710 Telephone (360) 407–6699 or Mr. Timothy Goodman, Aquatic Resources Division, Washington Department of Natural Resources, P.O. Box 47000, Olympia, Washington 98504, Telephone (360) 902–1057.

SUPPLEMENTARY INFORMATION:

1. Proposed Action

The proposed action is to evaluate alternatives for siting one or more contaminated sediment disposal facilities in Puget Sound, Washington. This evaluation will be part of an effort to develop a federal/state program to establish one or more multiuser disposal siting processes.

Puget Sound is an estuary of 2,500 square miles. There are 34 public port districts along Puget Sound, 54 miles of federal navigation channels, 10 miles of port terminal ship berths along these channels, and more than 200 small boat harbors that require periodic dredging. There is currently a lack of capacity for disposal of contaminated sediments derived from (1) dredging of federal and non-federal navigation channels, (2) waterfront development projects, (3) environmental cleanup projects directed through federal or state enforcement actions, and (4) projects with restoration of aquatic habitat as their primary purpose. The lack of suitable disposal alternatives is a major obstacle to effective improvement and maintenance of navigation and the most substantial impediment to the progress of

environmental cleanup and habitat restoration programs. The lack of predictable and cost-effective disposal options for contaminated sediments leads to cancellation or delay of waterfront development projects, resulting in adverse economic effects.

Based on preliminary investigations of 20 percent of Puget Sound, Ecology estimates that the areal extent of known sediment contamination is nearly 88 million square feet. Assuming all of the material is dredged to a depth of four feet, this area represents roughly 20–30 million cubic yards of contaminated dredged material. Over the next 20 years, an estimated 35 million cubic yards will be dredged for navigation purposes by the Corps and Navy, port districts and the private sector, of which as much as 10 million cubic yards may require confined disposal. In addition to navigation dredging projects, a large volume of contaminated sediment may be generated by future cleanup actions under the federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and state Model Toxics Control Act (MTCA). A preliminary estimate of future contaminated sediment volumes from these cleanup actions in Puget Sound is in the range of 20 to 30 million cubic yards.

2. Alternatives

The alternatives which will be evaluated in the EIS are:

a. No action;
b. Level bottom capping and confined aquatic disposal;
c. Nearshore confined disposal;
d. Upland disposal;
e. Disposal in solid waste landfills; and
f. Multiuser access to larger fill projects.

These are preliminary alternatives; during the scoping process, the public may provide additional alternatives to be considered.

No action—This alternative would continue the practice of resolving contaminated dredged material issues on a project-by-project basis. This practice is time-consuming, unpredictable, and expensive for the regulated community, the regulatory agencies, and the public. It also results in a greater number of smaller confined disposal sites that must be monitored and accounted for rather than a few large sites. Because of difficulties with disposal, the discovery of contaminated sediments will often force project proponents to redesign or abandon a project to avoid dredging. This avoidance does not resolve the ongoing adverse effects of the contaminated sediments on the environment, and it limits the potential economic development of the contaminated waterfront site.

Level bottom capping and confined aquatic disposal—Both of these disposal options involve consolidating contaminated sediments from numerous dredging projects at one location and then covering them with a cap layer of clean material. The clean cap layer isolates the marine environment from the chemicals of concern in the contaminated sediment. Level bottom capping is the placement of contaminated sediment in a mounded configuration with the clean cap layer on top. Confined aquatic disposal uses natural or excavated depressions for placement of the contaminated material, or places the material behind constructed submerged dikes for containment. In both cases, the contaminated material is covered with a clean cap layer.

Nearshre confined disposal—A nearshore confined disposal facility is a diked disposal site adjacent to land in the intertidal and/or subtidal zone. The confinement dikes enclose the disposal site from adjacent water surfaces and isolate dredged material from adjacent waters during placement. Contaminated material would be added to a diked cell to a specific elevation and then capped with clean material. The site would likely be developed in phases, and cells would be filled and capped in stages over the life of the facility. Nearshore sites are either finished to grade to allow beneficial use of the site after completion, or the finished grade of the clean cap layer is located in the intertidal zone to allow planting of aquatic vegetation and habitat restoration.

Upland disposal—This alternative includes the placement of contaminated material in an area not influenced by tidal waters. The upland site would be diked to confine the dredged material and capped with a layer of clean material at completion of the fill. The site would be developed in stages and would be filled and closed serially over the life of the facility. Design standards for an upland site would include liners, monitoring of leachate seeping into soils, groundwater monitoring, and a leachate collection and treatment system.

Disposal in solid waste landfills—Potential disposal of contaminated sediments in solid waste landfills would be evaluated under this alternative. Municipal landfills are short on capacity and subject to water content restrictions. Demolition debris landfills have been used in the past for disposal of contaminated sediments, but this practice is ending as these sites are closed or subject to additional environmental controls. An initial State survey of landfill agencies concluded that use of contaminated material as landfill cover would not address the needed capacity, and the facilities were not planned to accommodate the volume or substantial regulatory, technical, or cost issues associated with managing contaminated sediments.

Multiuser access to larger fill projects—This alternative examines the option of providing multiuser access to large fill sites constructed and/or maintained by proponents of waterfront activities. Proponents of larger fill projects have been reluctant to provide multiuser access to their sites because of lost capacity for their own projects, extended timeframes for site development and closure, and inherited liability.

3. Scoping and Public Involvement

Public involvement will be sought during the scoping process and throughout the course of the project in accordance with NEPA/SEPA procedures. A public involvement plan will be developed in early 1996. As part of the scoping process, all affected Federal, state, and local agencies, Indian Tribes, general public, and other interested private organizations, including environmental interest groups, are invited to comment on the scope of the EIS.

To date, the following areas have been identified for analysis in the programmatic EIS:

1. Water quality.
2. Sediment quality.
3. Fish and wildlife habitat.
4. Shoreline and land use.
5. Recreation.
6. Transportation.
7. Human Health.

Two scoping meetings are scheduled: December 13, 1995, at the World Trade Center in Tacoma from 7 to 9 p.m.; and December 14, 1995, at the Port of Everett Commissioner Hearing Room 7 to 9 p.m. Public workshops are tentatively scheduled to precede these scoping meetings from 6 to 7 p.m. Ongoing communication with agencies, Native American tribes, public interest groups, and interested citizens will take place throughout the project through the use of public workshops, newsletters, and mailings.

4. Schedule

The scoping summary document is scheduled to be available in June 1996, and the Draft Programmatic Environmental Impact Statement is

tentatively scheduled to be available for review in 1997.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. TM96–2–20–001]

Algonquin Gas Transmission company; Notice of Proposed Changes in FERC Gas Tariff

November 28, 1995.

Take notice that on November 21, 1995, Algonquin Gas Transmission Company (Algonquin) tendered the instant filing in compliance with the Commission's letter order issued in Docket No. TM96–2–20–000 on November 9, 1995.

Algonquin states that the purpose of this filing is to provide an explanation and workpaper to support the estimated throughput figures shown in Appendix C of Algonquin's October 12, 1995, filing in Docket No. TM96–2–20–000. The October 12, 1995, filing revised Algonquin's fuel reimbursement percentages and the annual calculation of the fuel reimbursement quantity deferral allocation.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with 18 CFR Section 385.211 of the Commission's Rules of Practice and Procedure. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 95–29397 Filed 12–1–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP96–5–001]

Carnegie Interstate Pipeline Company; Notice of Proposed Change in FERC Gas Tariff

November 28, 1995.

Take notice that on November 17, 1995, Carnegie Interstate Pipeline Company (CIPCO) tendered for filing to become part of its FERC Gas Tariff, Original Volume No. 1, the following revised tariff sheet, to become effective on November 1, 1995:

Fourth Revised Sheet No. 7

CIPCO states that this filing revises its Annual Transportation Cost Rate (TCR) filing made on October 2, 1995, which the Commission accepted and suspended, effective November 1, 1995, in a letter order issued October 26, 1995. In this filing, CIPCO has recalculated its TCR to reflect its recent settlement of litigation with its customer, New Jersey Natural Gas Company. As a result of that settlement the unrecovered TCR costs attributable to New Jersey Natural Gas Company are restored to CIPCO's Unrecovered Transportation Cost subaccount. In addition CIPCO has recalculated its TCR to utilize the actual billing determinants in effect as of November 1, 1995, as required by its tariff. The filing reflects a TCR of $1.1162, compared to the TCR of $1.5249 set forth in the October 2, 1995 filing.

CIPCO states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before November 29, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP95–173–007]

Koch Gateway Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

November 28, 1995.

Take notice that on November 21, 1995, Koch Gateway Pipeline Company (Koch Gateway) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets effective September 1, 1995:

2nd Sub First Revised Sheet No. 1901

Koch Gateway states that the above referenced tariff sheet is submitted in compliance with the November 9, 1995, Commission's order in this proceeding. Pursuant to the Commission's order, Koch Gateway's revised tariff language states that, if Koch Gateway has received prior authorization from a shipper, the shipper signature is not required for Predetermined Allocation Agreements submitted after gas flow.

Koch Gateway also states that the tariff sheets are being mailed to all parties on the official service list created by the Secretary in this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 1A, Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–29403 Filed 12–1–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP94–301–004]

Stingray Pipeline Company; Notice of Compliance Filing

November 28, 1995.

Take notice that on November 22, 1995, Stingray Pipeline Company (Stingray) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1 (Tariff), revised tariff sheets to be effective December 1, 1995.

Stingray states that the purpose of the filing is to comply with Article VII of the Stipulation and Agreement (Settlement) approved by Federal Energy Regulatory Commission (Commission) letter order issued October 11, 1995 in Docket Nos. RP94–301–000 and RP94–301–003. The filed tariff sheets reflect the rates as set out on Appendix A of the Settlement to be effective December 1, 1995, and revisions to Sections 10 and 11 of the General Terms and Conditions of Stingray's Tariff as set forth in Article V of the Settlement. Stingray has also made conforming changes to its Tariff to reflect a thermal billing basis consistent with the thermal content which underlies the settlement rates.

Stingray requested waiver of the Commission's Regulations to the extent necessary to permit the tariff sheets to become effective December 1, 1995.

Stingray states that copies of its filing were served on all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. MG88–47–008]

Texas Gas Transmission Corporation; Notice of Filing

November 28, 1995.

Take notice that on November 15, 1995, Texas Gas Transmission Corporation (Texas Gas) submitted revised standards of conduct under Order Nos. 497 *et seq.*[1] and Order Nos. 566 *et seq.*[2] Texas Gas states that it is revising its standards to incorporate the changes required by the Commission's October 31, 1995, Order on Standards of Conduct.[3]

Texas Gas states that copies of this filing have been mailed to all parties on the official service list compiled by the Secretary in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions to intervene or protest should be filed on or before December 13, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 95–29408 Filed 12–1–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. RP94–375–003 and RP95–215–002]

Texas Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

November 28, 1995.

Take notice that on November 21, 1995, Texas Gas Transmission Corporation (Texas Gas) tendered for filing to become part of its FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets, with an effective date of November 21, 1995:

First Revised Sheet No. 222
Second Revised Sheet No. 223
Second Revised Sheet No. 224
Second Revised Sheet No. 225
Second Revised Sheet No. 226
First Revised Sheet No. 226A
First Revised Sheet No. 226B
First Revised Sheet No. 226C
First Revised Sheet No. 226D

Texas Gas states that the revised tariff sheets are being filed to institute conditions under Article IV of a Stipulation and Agreement of Settlement (Settlement) filed on August 21, 1995, and approved by the Commission by letter order dated October 11, 1995. The Settlement resolves all issues related to the termination of Texas Gas's purchased gas adjustment (PGA) clause and the allocation, direct billing and recovery of Texas Gas's Account No. 191 balances arising out of the above captioned proceeding.

Texas Gas states that copies of the revised tariff sheets are being mailed to Texas Gas's affected customers, interested state commissions, and those who are parties on the official service lists of the referenced dockets listed above.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. RP95–454–001]

Transwestern Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

November 28 1995.

Take notice that on November 16, 1995, Transwestern Pipeline Company (Transwestern) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective November 14, 1995

15th Revised Sheet No. 90A
6th Revised Sheet No. 91

On September 29, 1995, Transwestern made a filing pursuant to Section 25.6, Interest Rate Adjustment Filings, of the General Terms and Conditions of Transwestern's FERC Gas Tariff, and in accordance with the Stipulation and Agreements in Docket Nos. RP93–56 (TCR–11), RP93–86 (TCR–12), RP93–139 (TCR–13) and RP94–60 (TCR–14) (TCR Settlements). In the filing Transwestern proposed to adjust TCR Surcharge C (Nos. 11–13) and TCR Surcharging C (No. 14) to: (1) True-up for the actual quarterly interest rates published by the Commission for the

[1] Order No. 497, 53 FR 22139 (June 14, 1988), FERC Stats. & Regs. 1986–1990 ¶ 30,820 (1988); Order No. 497–A, *order on rehearing*, 54 FR 52781 (December 22, 1989), FERC Stats. & Regs. 1986–1990 ¶ 30,868 (1989); Order No. 497–B, *order extending sunset date*, 55 FR 53291 (December 28, 1990), FERC Stats. & Regs. 1986–1990 ¶ 30,908 (1990); Order No. 497–C, *order extending sunset date*, 57 FR 9 (January 2, 1992), III FERC Stats. & Regs. ¶ 30,934 (1991), rehearing denied, 57 FR 5815 (February 18, 1992), 58 FERC ¶ 61,139 (1992); Tenneco Gas v. FERC (affirmed in part and remanded in part), 969 F.2d 1187 (D.C. Cir. 1992); Order No. 497–D, *order on remand and extending sunset date*, III FERC Stats. & Regs. ¶ 30,958 (December 4, 1992), 57 FR 58978 (December 14, 1992); Order No. 497–E, *order on rehearing and extending sunset date*, 59 FR 243 (January 4, 1994), 65 FERC ¶ 61,361 (December 23, 1993); Order No. 497–F, *order denying rehearing and granting clarification*, 59 FR 15336 (April 1, 1994), 66 FERC ¶ 61,347 (March 24, 1994); and Order No. 497–G, *order extending sunset date*, 59 FR 32884 (June 27, 1994), III FERC Stats. & Regs. ¶ 30,996 (June 17, 1994).

[2] Standards of Conduct and Reporting Requirements for Transportation and Affiliate Transactions, Order No. 566, 59 FR 32885 (June 27, 1994), III FERC Stats. & Regs. ¶ 30,997 (June 17, 1994); Order No. 566–A, *order on rehearing*, 59 FR 52896 (October 20, 1994), 69 FERC ¶ 61,044 (October 14, 1994); Order No. 566–B, *order on rehearing*, 59 FR 65707 (December 21, 1994); 69 FERC ¶ 61,334 (December 14, 1994); *appeal docketed sub nom. Conoco, Inc. v. FERC*, D.C. Cir. No. 94–1745 (December 14, 1994).

[3] 73 FERC ¶ 61,144 (1995).

period October 1, 1994 through September 30, 1995; and (2) estimate the interest expense for the upcoming period of October 1, 1995 through October 31, 1996.

Transwestern states that the Public Utilities Commission of the State of California (CPUC) and Pacific Gas and Electric Company (PG&E) both filed timely motions to intervene and requests for clarification. CPUC stated that it believed Transwestern calculated the interest adjustment correctly but that Section 25.6 of Transwestern's tariff references an earlier period of Transwestern's TCR filings, beginning November 1, 1989, and limits such adjustments to three filings. CPUC acknowledged that the TCR Surcharge C interest rate filing is consistent with Transwestern's previous TCR Settlements but was not clear whether Tranwestern's tariff needs to be revised for clarification purposes. In that regard, the CPUC recommended that Section 25.6 of Transwestern's tariff be revised to delete the word "three." PG&E also sought clarification of the same tariff provisions.

On October 30, 1995, FERC issued a letter order (Order) in this docket, accepting Transwestern's filing and directing Transwestern to file tariff language to revise Section 25.6, consistent with its underlying TCR Settlements.

Transwestern states that in compliance with such Order, rather than simply deleting the word "three" from Section 25.6 it has separated Section 25.6 into two sections. First, the existing language in Section 25.6 has been modified to indicate that such language refers only to TCR B. Second, a new subsection (b) has been added that applies the interest rate adjustment mechanism to TCR Surcharge C, using language consistent with TCR Surcharge B. Transwestern believes these changes will eliminate any confusion the previous tariff language may have caused.

Transwestern states that due to an inadvertent administrative oversight, it is making this filing two days after the due date specified in the Order. Transwestern apologizes for any inconveniences this late filing may have caused the Commission or to the parties in this proceeding.

Transwestern states that copies of the filing were served on its gas utility customers, interested state commissions, and all parties to this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Room 1A, Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure. Under Section 154.209, all such protests should be filed on or before November 28, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–148–001]

Trunkline Gas Company; Notice of Compliance Filing

November 28, 1995.

Take notice that on November 22, 1995, Trunkline Gas Company (Trunkline) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets proposed to be effective October 29, 1995:

Sub First Revised Sheet No. 154
Sub First Revised Sheet No. 170

Trunkline states that this filing is being made in compliance with the Commission's Order Rejecting Tariff Sheets and Accepting and Suspending Tariff Sheets Subject to Refund and Conditions and Establishing a Technical Conference issued October 25, 1995 and the November 8, 1995 Errata Notice in Docket No. RP95–449–000.

Trunkline states that copies of this filing are being mailed to all parties to this proceeding and interested state regulatory agencies.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

Williams Natural Gas Company; Notice of Proposed Change in FERC Gas Tariff

November 28, 1995.

Take notice that on November 22, 1995, Williams Natural Gas Company (WNG) made a filing in compliance with Commission order dated October 25, 1995 in Docket No. RP95–447 and RP89–183.

WNG states that this filing contains a response to the Missouri Public Service Commission's assertion that the filing should reflect the effect of deferred tax reserves and a breakdown of cumulative balances on which interest is calculated showing whether it offsets the balance for the deferred tax reserves. Attached to the filing are schedules showing the calculation of interest on the amounts WNG proposes to direct bill in this docket. WNG did not reduce the principal amounts by deferred income taxes for purposes of calculating interest.

WNG states that a copy of its filing was served on all participants listed on the service list maintained by the Commission in the dockets referenced above and on interested state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before December 4, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TM96–1–121–002]

WestGas Interstate, Inc.; Notice of Filing of Refund Report

November 28, 1995.

Take notice that on November 17, 1995, WestGas Interstate, Inc. (WGI) filed a refund report in Docket No. TM96–1–121–000. WGI states that the filing and refunds were made in compliance with the Letter Order issued October 6, 1995, in the above referenced proceeding.

WGI stats that the report summarizes WGI's refund of Annual Charge Adjustment (ACA) surcharges over-collected from its customers, as required by the October 6, 1995 Letter Order. WGI further states that such refunds were issued on October 31, 1995.

WGI states that a copy of its filing was served on each of its jurisdictional customers and affected state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with 18 CFR 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before November 29, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP94–296–009]

Williams Natural Gas Company; Notice of Revised Refund Report

November 28, 1995.

Take notice that on November 15, 1995, Williams Natural Gas Company (WNG) tendered for filing a revised refund report in compliance with Commission order issued October 16, 1995 in Docket No. RP94–296–004, et al.

WNG states that the refund report reflects refunds as they would have been made if the "CIG T&E adjustment" of $5,144,697 had been included in WNG's unrecovered purchased gas cost, as permitted by the October 16 order.

WNG states that a copy of its filing was served on all participants listed on the service lists maintained by the Commission in the dockets referenced above and on all interested state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before November 27, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

[Docket No. RP94–296–008]

Williams Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

November 28, 1995.

Take notice that on November 15, 1995, Williams Natural Gas Company (WNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1 the following tariff sheets:

To Be Effective September 19, 1994

Second Substitute Third Revised Sheet No. 9
Second Substitute Second Revised Sheet No. 10

To Be Effective March 31, 1995

Third Substitute Fourth Revised Sheet No. 9
Third Substitute Third Revised Sheet No. 10

WNG states that this filing is being made in compliance with Commission order issued October 16, 1995 in Docket No. RP94–296–004, et al. WNG was directed to file revisions to conform with the order within 30 days of the issuance of the order. The tendered tariff sheets reflect an increase in the amount of unrecovered purchased gas costs of approximately $5.1 million.

WNG states that a copy of its filing was served on all participants listed on the service lists maintained by the Commission in the dockets referenced above and on all jurisdictional customers and interested state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. Under Section 154.209, all such protests should be filed on or before November 27, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5338–2]

Clean Air Scientific Advisory Committee Science Advisory Board; Emergency Notification of Public Advisory Committee Meeting

December 14–15, 1995.

This is an Emergency Notification of a Federal Advisory Committee Meeting. This notice is being published less than fifteen calendar days prior to the date of the announced meeting due to delays caused by Federal budgetary exigencies.

Pursuant to the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the Clean Air Scientific Advisory Committee (CASAC) of the Science Advisory Board (SAB) will meet on December 14 and 15, 1995 at the Omni Europa Hotel, One Europa Drive, Chapel Hill, North Carolina 27514. The hotel phone number is 919–968–4900. The meeting will begin at 8:30 a.m. and end no later than 5 p.m. on both days (times noted are Eastern Time). The meeting is open to the public. Due to limited space, seating at the meeting will be on a first-come first-serve basis. *Important Notice:* Documents that are the subject of SAB reviews are normally available from the originating EPA office and are *not* available from the SAB Office—information concerning document availability from the relevant Program area is included below.

PURPOSE OF THE MEETING: At this meeting, the Committee will review and provide advice to EPA on the draft criteria document for particulate matter (*Air Quality Criteria for Particulate Matter*) and the draft staff paper for particulate matter (*Review of National Ambient Air Quality Standards for Particulate Matter: Policy Assessment of Scientific and Technical Information*). The purpose of the staff paper is to evaluate and interpret the most relevant scientific and technical information reviewed in the air quality criteria document in order to better specify the critical elements which the EPA staff believes should be considered in any possible revisions to the national ambient air quality standards (NAAQS) for particulate matter. This document is intended to bridge the gap between the

scientific review contained in the criteria document and the judgments required of the Administrator in setting a NAAQS. The Committee will consider presentations from Agency staff and the interested public prior to making recommendations to the Administrator.

AVAILABILITY OF REVIEW MATERIALS: (a) Air Quality Criteria for Particulate Matter (The Draft Criteria Document)—For the benefit of interested parties, an electronic version of the revised draft Particulate Matter Criteria materials (EPA 600/BP–95/001 a–c) will be available on the Agency's TTN Bulletin Board (reachable via modem on (919) 541–5742). To access the TTN Bulletin Board, a modem and communications software will be necessary. The terminal emulation needs to be VT100, VT102 or ANSI. The following parameters on the communications software are required: Data bits—8; Parity—N; and Stop Bits—1. The document will be located under the Clean Air Act Amendments BBS under Title I, Policy and Guidance. For INTERNET access—go to Telenet Site and enter TTNBBS.RTPNC.EPA.GOV or IP Number 134.67.234.17. For INTERNET, we do not have FTP to download documents. Requester must have Kermit Protocol Program or pay a fee for SLIP account for downloading capabilities. Once in the TTN Bulletin Board, you must register (there is no charge for this). At the prompt for name, you should enter your name; at the prompt for password, make up a password (8 characters); select registration and enter registration information including company name. Then follow instructions.

For assistance in assessing the draft materials, please contact the Help Desk at (919) 541–5384 in Research Triangle Park, NC. Copies of figures for some chapters (e.g., Chapter 6) may not be available by this electronic bulletin board, but can be obtained by contacting Ms. Diane Ray at the numbers given below. Hard copies of the revised materials will be available in the Air Docket at EPA Headquarters, 401 M Street, Washington, DC, and in each of the EPA Regional Office Libraries. To arrange for copies of specific figures/graphs, not adequately reproduced with the TTN Bulletin Board, contact Ms. Diane Ray (phone (919) 541–3637; fax (919) 541–1818). For information regarding locations and office hours for the EPA Air Docket or Regional Office Libraries, please consult 60 FR 20085, April 24, 1995. Full copies of all PM Criteria Document draft chapters will also be available for public inspection at the December 14–15, 1995 CASAC meeting. The Office of Research and Development (ORD) will accept written comments from the public on the revised draft PM Criteria Document through December 22, 1995. Any public comments on the revised draft PM Criteria Document should be submitted in writing to: Diane Ray, NCEA/RTP (MD–52), U.S. EPA, 3200 Highway 5400, Research Triangle Park, NC 27711.

(b) Review of National Ambient Air Quality Standards for Particulate Matter: Policy Assessment of Scientific and Technical Information (The Draft Staff Paper)—Single copies of the draft particulate matter staff paper may be obtained from Ms. Tricia Crabtree, Office of Air Quality Planning and Standards (MD–15), U.S. EPA, Research Triangle Park, NC 27711. Ms. Crabtree can also be reached by telephone at (919) 541–5655 or by fax at (919) 541–0237. The Office of Air Quality Planning and Standards (OAQPS) will accept written comments from the public on all aspects of their revised external review draft particulate matter staff paper through December 22, 1995. Written comments should be sent to Ms. Trish Koman at the previously stated address.

FOR FURTHER INFORMATION CONTACT: Members of the public desiring additional information about the meeting should contact Mr. Robert Flaak, Designated Federal Official, Clean Air Scientific Advisory Committee, Science Advisory Board (1400F), U.S. EPA, 401 M Street, SW., Washington, DC 20460; telephone/voice mail at (202) 260–5133; fax at (202) 260–7118; or via the INTERNET at FLAAK.ROBERT@EPAMAIL.EPA.GOV. Those individuals requiring a copy of the draft Agenda should contact Ms. Connie Valentine at (202) 260–6552 or by FAX at (202) 260–7118 or via the INTERNET at VALENTINE.CONNIE@EPAMAIL.EPA.GOV. Additional information concerning the Science Advisory Board, its structure, function, and composition, may be found in The Annual Report of the Staff Director which is available by contacting Ms. Lori Gross at (202) 260–8414.

Members of the public who wish to make a brief oral presentation to the Committee must contact Mr. Flaak in writing (by letter or by fax—see previously stated information) no later than 12 noon Eastern Time, Friday, December 8, 1995 in order to be included on the Agenda. Public comments will be limited to five minutes per speaker or organization. The request should identify the name of the individual who will make the presentation, the organization (if any) they will represent, any requirements for audio visual equipment (e.g., overhead projector, 35mm projector, chalkboard, etc), and at least 35 copies of an outline of the issues to be addressed or the presentation itself.

PROVIDING ORAL OR WRITTEN COMMENTS AT SAB MEETINGS: The Science Advisory Board expects that public statements presented at its meetings will not be repetitive of previously submitted oral or written statements. In general, each individual or group making an oral presentation will be limited to a total time of five minutes. For conference call meetings, opportunities for oral comment are limited to no more than five minutes per speaker and no more than fifteen minutes total. Written comments of any length (at least 35 copies) received in the SAB Staff Office sufficiently prior to a meeting date, may be mailed to the relevant SAB committee or subcommittee prior to its meeting; comments received too close to the meeting date will normally be provided to the committee at its meeting. Written comments may be provided to the relevant committee or subcommittee up until the time of its meeting, unless other publicly announced arrangements have been made.

Dated: November 28, 1995.

A. Robert Flaak,

Acting Staff Director, Science Advisory Board.

State FIFRA Issues Research and Evaluation Group (SFIREG); Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The State FIFRA Issues Research and Evaluation Group (SFIREG) will hold a 2–day meeting, beginning on Monday, December 4, 1995, and ending on Tuesday, December 5, 1995. This notice announces the location and times for the meeting and sets forth tentative agenda topics. The meeting is open to the public.

DATES: The SFIREG will meet on Monday, December 4, 1995, from 8:30 a.m. to 5 p.m., and Tuesday, December 5, 1995, from 8:30 a.m. to 12:00 p.m.

ADDRESSES: The meeting will be held at: The DoubleTree Hotel, National Airport—Crystal City, 300 Army-Navy Drive, Arlington, Virginia 22202, 703-892-4100.

FOR FURTHER INFORMATION CONTACT: By mail: Shirley M. Howard, Office of Pesticide Programs (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: Rm. 1101, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, 703-305-5306, e-mail: howard.shirley@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: The tentative agenda of the SFIREG includes the following:

1. Regional and SFIREG committee reports.
2. Discussion of old and new issue papers.
3. Update on acetochlor registration partnership.
4. Update on genetically-engineered plant pesticides registration issues.
5. Update on bulk repackaging.
6. Office of Enforcement and Compliance Assurance Status Report.
7. Discussion of State involvement with pesticide labeling.
8. Other topics as appropriate.

List of Subjects

Environmental protection.

Dated: November 28, 1995.

William L. Jordan,

Director, Field Operations Division, Office of Pesticide Programs.

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collections Being Reviewed by the Federal Communications Commission, Comments Requested

November 22, 1995.

SUMMARY: The Federal Communications, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commissions burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before February 2, 1996. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESS: Direct all comments to Dorothy Conway, Federal Communications, Room 234, 1919 M St. NW., Washington, DC 20554 or via internet to dconway@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collections contact Dorothy Conway at 202–418–0217 or via internet at dconway@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval Number: 3060–0444.

Title: Station Construction/ Operational Status Inquiry.

Form No.: FCC 800A.

Type of Review: Revision of a currently approved collection.

Respondents: Businesses or other for-profit; Small businesses or organizations; Individuals or households.

Number of Respondents: 11,500.

Estimated Time Per Response: 1 hour.

Total Annual Burden: 11,500 hours.

Needs and Uses: The Commission requests this collection of information as a method for licensees to provide information to verify a station has been placed into operation and to notify the Commission of the actual number of mobile units placed in operation after license grant. From this data, the Commission is able to determine full capacity channel loading, making frequencies available for assignment and modifying or cancelling licenses. The data collected ensures licensees are not authorized for more mobiles than they are actually using. The data collected is required by the Communications Act and FCC Rules 90.155, 90.313, 90.495, 90.496, 90.631, 90.633, 90.651, 90.725 and 90.737. The entities identified in the current 800A letter , such as trunked, conventional, etc., have been re-named as CMRS and PMRS. The current 800A letter requests a breakdown in the types of mobiles and control stations, while the proposed 800A letter asks for a total number of mobiles and the number of parties affiliated with, controlled by, or related to the provider. The number of responses and estimated burden remains unchanged.

Federal Communications Commission.

LaVera F. Marshall,

Acting Secretary.

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. Office of the Federal Maritime Commission, 800 North Capitol Street, N.W., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons

should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011479–001.
Title: SERPAC Service Agreement.
Parties:
Compania Sudamericana de Vapores, S.A.
Flota Mercante Grancolombiana, S.A.
Hamburg Sudamerikanische Dampschifffahrts Gesellschaft Eggert & Amsinck d/b/a Columbus Line

Synopsis: The proposed amendment provides that the Agreement shall not terminate before December 31, 1996.

Dated: November 29, 1995.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Caisse Nationale de Credit Agricole, S.A.; Notice of Proposal to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has given notice under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether commencement of the activity can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 18, 1995.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Caisse Nationale de Credit Agricole S.A., Paris, France; to engage *de novo* through its subsidiaries Credit Agricole Lazard Financial Products Bank, London, England, and CAL FP (US), Inc., New York, New York, in providing investment advisory services, pursuant to §§ 225.25(b)(4), 225.25(b)(15)(i), and (ii) of the Board's Regulation Y; acting as an agent in the private placement of all types of securities, including providing related advisory services, pursuant to *Bankers Trust New York Corporation*, 75 Fed. Res. Bull. 829 (1989); providing riskless principal brokerage services, pursuant to *Bankers Trust New York Corporation*, 75 Fed. Res. Bull. 829 (1989); acting as broker or agent with respect to interest rate and currency swaps and swap derivative products relating thereto, pursuant to *Swiss Bank Corporation*, 81 Fed. Res. Bull. 185 (1995); acting as broker or agent with respect to swaps and swap derivative products, and over-the-counter option transactions, linked to certain commodities, stock, bond, or commodity indices, or a hybrid of interest rates and such commodities or indices, a specially tailored basket of securities selected by the parties, or single equity securities, pursuant to *Swiss Bank Corporation*, 81 Fed. Res. Bull. 185 (1995); providing financial and transactional advice regarding the structuring and arranging of swaps, swap derivative products, and similar transactions relating to interest rates, currency exchange rates or prices, and economic and financial indices, and similar transactions, pursuant to § 225.25(b)(4) of the Board's Regulation Y, and regarding commodity and index swap transactions, pursuant to *Swiss Bank Corporation*, 81 Fed. Res. Bull. 185 (1995); providing investment advice, including counsel, publication, written analyses and reports, with respect to the purchase and sale of futures contracts and options on futures contracts, pursuant to *Security Pacific Corp.*, 74 Fed. Res. Bull. 820 (1988); *J.P. Morgan & Company Incorporated*, 80 Fed. Res. Bull. 151 (1994); and *Swiss Bank Corporation*, 81 Fed. Res. Bull. 185 (1995); providing foreign exchange advisory and transactional services, including providing general information and statistical forecasting with respect to foreign exchange markets; advisory services designed to assist customers in monitoring, evaluating, and managing their foreign exchange exposures; and transactional execution of foreign exchange by arranging for the execution of foreign exchange transactions, pursuant to § 225.25(b)(17) of the Board's Regulation Y; providing portfolio investment advice to customers; furnishing economic information and advice, general economic statistical forecasting services and industry studies; and providing advice, including rendering fairness opinions and providing evaluation services, in connection with mergers, acquisitions, divestitures, joint ventures, leverage buyouts, recapitalizations, capital structurings, and financing transactions (including private and public financing and loan syndications), and conducting feasibility studies, pursuant to § 225.25(b)(4) of the Board's Regulation Y. These activities will be conducted worldwide.

Board of Governors of the Federal Reserve System, November 28, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 95–29390 Filed 12–1–95; 8:45 am]

BILLING CODE 6210–01–F

Compagnie Financiere de Paribas; Application to Engage in Nonbanking Activities

Compagnie Financire de Paribas, Paris, France (Applicant), has given notice pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) (BHC Act) and 225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)) to engage *de novo* through its indirect subsidiary, Sema Group, London, England (Company),[1] in providing software to mobile telephone network operators (client networks). The software would enroll new subscribers; identify subscribers and control access by subscribers to client networks; generate subscriber billing statements for and monitor subscriber payments to client networks; calculate and reconcile fund transfers between client networks; and monitor subscriber usage patterns. Company currently provides these services to client networks outside the United States. Applicant proposes that Company would expand its operations to offer these services to client networks on a nationwide basis inside the United States.

[1] Applicant owns 50.1 percent of Financiere Sema, and France Telecom owns the remaining 49.9 percent. Financiere Sema in turns owns approximately 40 percent of the voting shares of Company.

Section 4(c)(8) of the BHC Act provides that a bank holding company may engage in any activity that the Board, after due notice and opportunity for hearing, has determined by order or regulation to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. This statutory test requires that two separate tests be met for an activity to be permissible for a bank holding company. First, the Board must determine that the activity is, as a general matter, closely related to banking. Second, the Board must find in a particular case that the performance of the activity by the applicant bank holding company may reasonably be expected to produce public benefits that outweigh possible adverse effects.

A particular activity may be found to meet the "closely related to banking" test if it is demonstrated that banks have generally provided the proposed services, that banks generally provide services that are operationally or functionally similar to the proposed services so as to equip them particularly well to provide the proposed services, or that banks generally provide services that are so integrally related to the proposed services as to require their provision in a specialized form. *National Courier Ass'n v. Board of Governors*, 516 F.2d 1229, 1237 (D.C. Cir. 1975). In addition, the Board may consider any other basis that may demonstrate that the activity has a reasonable or close relationship to banking or managing or controlling banks. Board Statement Regarding Regulation Y, 49 FR 806 (January 5, 1984); *Securities Industry Ass'n v. Board of Governors*, 468 U.S. 207, 210-11, n.5 (1984).

Applicant states that the Board previously has determined by regulation that providing certain data processing and data transmission services and facilities (including software) and providing access to such services and facilities by any technological means are closely related to banking for purposes of section 4(c)(8) of the BHC Act. In order to be found to be closely related to banking, the data to be handled must be "financial, banking, or economic" in nature, and such activities must be conducted within certain additional limitations established by the Board. *See* 12 CFR 225.25(b)(7). Applicant maintains that Company's proposed activities would relate primarily to financial, banking, or economic data, and would otherwise conform to Regulation Y.

Applicant also contends that, to the extent the proposed activities involve processing nonfinancial data, a bank holding company may engage in these activities as part of its offering of a larger package of data processing services, when processing nonfinancial data is an "essential component" of such package. *See Banc One Corporation*, 80 Fed. Res. Bull. 139 (1994). Applicant represents that Company's proposed activities with respect to nonfinancial data satisfy these criteria.

In order to approve the proposal, the Board also must determine that the proposed activities to be engaged in by Company are a proper incident to banking that "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. 1843(c)(8). Applicant contends that its proposal would produce public benefits that outweigh any potential adverse effects.

In publishing the proposal for comment, the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely to seek the views of interested persons on the issues presented by the notice and does not represent a determination by the Board that the proposal meets, or is likely to meet, the standards of the BHC Act.

Any comments or requests for hearing should be submitted in writing to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington DC 20551, not later than December 18, 1995. Any request for a hearing on this notice must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, November 28, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

Dakotah Bankshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than December 29, 1995.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Dakotah Bankshares, Inc., Fairmount, North Dakota; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples State Bank, Fairmount, North Dakota.

Board of Governors of the Federal Reserve System, November 28, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

Dresdner Bank AG; Notice to Engage in Certain Nonbanking Activities

Dresdner Bank AG, Frankfurt, Germany (Dresdner), has provided notice, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) (BHC Act) and section

225.23(a)(3) of the Board's Regulation Y (12 CFR 225.23(a)(3)), to retain its interest in the United States operations of the Kleinwort Benson Group, plc, London, England. These operations include engaging in leasing activities, pursuant to 12 CFR 225.25(b)(5) through Parc Tec, Inc, and engaging in investment advisory activities, pursuant to 12 CFR 225.25(b)(4) through Kleinwort Benson Investment Management Americas, Inc., KB-LPL Holdings, Inc., and Kleinwort Benson U.S. Asset Managers, LLC, all of New York, New York. Dresdner also proposes to retain Kleinwort Benson (USA), Inc. (KB USA) and Kleinwort Benson North America, Inc. (KB NA), both of New York, New York, and to establish a section 20 subsidiary, Dresdner Kleinwort Benson, New York, New York (DKB), through the combination of KB NA, KB USA, and Dresdner Securities (USA), Inc., New York, New York (DSI), a wholly owned subsidiary of Dresdner that currently operates, pursuant to section 8(c) of the International Banking Act of 1978 (IBA). DKB would engage in the following activities:

1. Underwriting and dealing in debt and equity securities, other than interests in open-end investment companies;

2. Acting as agent in the private placement of all types of securities;

3. Acting as riskless principal in the purchase and sale of all types of securities on behalf of customers;

4. Providing full service securities brokerage services; and

5. Providing investment advisory services.

Dresdner proposes to engage in these activities throughout the world.

Dresdner - NY, Incorporated, New York, New York (DNY), a subsidiary of DSI that engages in certain securities dealing activities, would continue to operate as a subsidiary of Dresdner, pursuant to section 8(c) of the IBA. Dresdner has stated that DNY and the U.S. operations of Dresdner engaged in pursuant to section 4 of the BHC Act will remain completely separate and will not engage in any business with, or on behalf of, each other in the United States.

Section 4(c)(8) of the BHC Act provides that a bank holding company may, with Board approval, engage in any activity which the Board, after due notice and opportunity for hearing, has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto. This statutory test requires that two separate tests be met for an activity to be permissible for a bank holding company. First, the Board must determine that the activity is, as a general matter, closely related to banking. Second, the Board must find in a particular case that the performance of the activity by the applicant bank holding company may reasonably be expected to produce public benefits that outweigh possible adverse effects.

A particular activity may be found to meet the "closely related to banking" test if it is demonstrated that banks generally have provided the proposed activity, that banks generally provide services that are operationally or functionally similar to the proposed activity so as to equip them particularly well to provide the proposed activity, or that banks generally provide services that are so integrally related to the proposed activity as to require their provision in a specialized form. *National Courier Ass'n v. Board of Governors*, 516 F.2d 1229, 1237 (D.C. Cir. 1975). In addition, the Board may consider any other basis that may demonstrate that the activity has a reasonable or close relationship to banking or managing or controlling banks. Board Statement Regarding Regulation Y, 49 FR 794, 806 (January 5, 1984).

Dresdner maintains that the Board previously has determined by regulation that several of the proposed activities are closely related to banking. See 12 CFR 225.25(b)(4), (b)(5), and (b)(15); and *PNC Financial Corp.*, 75 Fed. Res. Bull. 396 (1989) (PNC). Dresdner has stated that it would engage in these activities in accordance with the limitations and conditions established by the Board, except that Dresdner has proposed that DKB not be subject to one of the disclosure requirements relied on by the Board in PNC in authorizing a section 20 subsidiary to engage in full service brokerage activities. In particular, Dresdner proposes that DKB not be required to disclose at the time any brokerage order is taken whether DKB is acting as agent or principal with respect to the security.

Dresdner also states that the other proposed activities have been approved by Board order. See *Bankers Trust New York Corporation*, 75 Fed. Res. Bull. 829 (1989) (acting as agent in the private placement of securities and purchasing and selling securities on the order of investors as a riskless principal); *Canadian Imperial Bank of Commerce*, 76 Fed. Res. Bull. 158 (1990) (CIBC); *J.P. Morgan & Co. Incorporated, et al.*, 75 Fed. Res. Bull. 192 (1989), aff'd sub nom. *Securities Industries Ass'n v. Board of Governors of the Federal Reserve System*, 900 F.2d 360 (D.C. Cir. 1990); and *Citicorp, et al.*, 73 Fed. Res. Bull. 473 (1987), aff'd sub nom. *Securities Industry Ass'n v. Board of Governors of the Federal Reserve System*, 839 F.2d 47 (2d Cir.), cert. denied, 486 U.S. 1059 (1988).

In light of the fact that it has acquired a going concern, Dresdner has requested authority to calculate DKB's compliance with the revenue limitation imposed on section 20 companies on an annualized basis during the first year after consummation of the acquisition and thereafter on a rolling quarterly basis. See *Dauphin Deposit Corporation*, 77 Fed. Res. Bull. 672 (1991). Dresdner has stated that DKB would engage in the proposed activities in accordance with the limitations and prudential guidelines established by the Board in previous orders.

In order to approve the proposal, the Board must determine that the proposed activities to be conducted by Dresdner "can reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." 12 U.S.C. 1843(c)(8). Dresdner believes that the proposal would produce public benefits that outweigh any potential adverse effects. In particular, Dresdner maintains that the proposal would not materially reduce competition in the relevant markets and would enable Dresdner to offer its customers a broader range of products.

In publishing the proposal for comment, the Board does not take a position on issues raised by the proposal. Notice of the proposal is published solely to seek the views of interested persons on the issues presented by the application and does not represent a determination by the Board that the proposal meets, or is likely to meet, the standards of the BHC Act. Any comments or requests for hearing should be submitted in writing and received by William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 29, 1995. Any request for a hearing on this application must, as required by § 262.3(e) of the Board's Rules of Procedure (12 CFR 262.3(e)), be accompanied by a statement of the reasons why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York.

Board of Governors of the Federal Reserve System, November 28, 1995.

Jennifer J. Johnson,

Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

Federal Accounting Standards Advisory Board

AGENCY: General Accounting Office.

ACTION: Notice of monthly meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that the regular monthly meeting of the Federal Accounting Standards Advisory Board will be held on Thursday, December 14 from 9 a.m. to 4 p.m. in room 7C13 of the General Accounting Office, 441 G St., NW., Washington, DC.

The purpose of the meeting is to discuss issues arising from the December 5 public hearing on Supplementary Stewardship Reporting exposure draft and also to discuss issues related to the Accounting for Revenue and Other Financing Sources exposure draft.

Any interested person may attend the meeting as an observer. Board discussions and reviews are open to the public.

FOR FURTHER INFORMATION CONTACT: Ronald S. Young, Executive Staff Director, 750 First St., NE., Room 1001, Washington, DC 20002, or call (202) 5–7350.

Authority: Federal Advisory Committee Act. Pub. L. 92–463, Section 10(a)(2), 86 Stat. 770, 774 (1972) (current version at 5 U.S.C. app. section 10(a)(2) (1988); 41 CFR 101–6.1015 (1990).

Dated: November 28, 1995.

Ronald S. Young,

Executive Director.

GENERAL SERVICES ADMINISTRATION

Performance Review Board; Membership; Senior Executive Service

AGENCY: General Services Administration.

ACTION: Notice.

SUMMARY: Notice is hereby given of the names of the members of the Performance Review Board.

FOR FURTHER INFORMATION CONTACT: Gail T. Lovelace, Director of Personnel, General Services Administration, 18th & F Streets NW., Washington, DC 20405, (202) 501–0398.

SUPPLEMENTARY INFORMATION: Section 4313(c) (1) through (5) of Title 5 U.S.C. requires each agency to establish in accordance with regulations prescribed by the Office of Personnel Management, one or more Performance Review Board(s). The Board(s) shall review the performance rating of each senior executive's performance by the supervisor, along with any recommendations to the appointing authority relative to the performance of the senior executive.

Members of the Review Board are:

1. Thurman M. Davis (Chairperson), Deputy Administrator.
2. Karen R. Adler, Regional Administrator, Northeast and Caribbean Region (New York).
3. Marcella F. Banks, Acting Associate Administrator for Management Services and Human Resources.
4. Paul E. Chistolini, Regional Administrator, Mid-Atlantic Region (Philadelphia).
5. Dennis J. Fischer, Chief Financial Officer.
6. Glen W. Overton, Acting Commissioner, Public Buildings Service.
7. Frank P. Pugliese, Commissioner, Federal Supply Service.
8. Barbara O. Silby, Chief of Staff, Office of the Administrator.
9. Joe M. Thompson, Commissioner, Information Technology Service.
10. Robert J. Woods, Commissioner, Federal Telecommunications Service.

Dated: November 22, 1995.

Gail T. Lovelace,

Director of Personnel.

Centers for Disease Control and Prevention

Board of Scientific Counselors, National Institute for Occupational Safety and Health Meeting: Date Change

Federal Register Citation of Previous Announcement: 60 FR 55845—dated November 3, 1995.

SUMMARY: Notice is given that the meeting and dates for the Board of Scientific Counselors, National Institute for Occupational Safety and Health (BSC, NIOSH), of the Centers for Disease Control and Prevention (CDC) has changed. The meeting times, place, status, purpose, and matters to be discussed announced in the original notice remain unchanged.

Original Dates: November 20–21, 1995.

New Date: December 19, 1995.

Contact Person for More Information: Richard A. Lemen, Ph.D., Executive Secretary, BSC, NIOSH, and Deputy Director, NIOSH, CDC, 1600 Clifton Road, NE, Mailstop D–35, Atlanta, Georgia 30333, telephone 404/639–3773.

Dated: November 28, 1995.

Nancy C. Hirsch,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention (CDC).

[FR Doc. 95–29442 Filed 12–1–95; 8:45 am]

BILLING CODE 4163–19–M

National Institute for Occupational Safety and Health (NIOSH); Meeting

Name: Setting a National Occupational Research Agenda: Researchers Working Group Meeting.

Time and Date: 10 a.m.–4 p.m., December 12, 1995.

Place: The Latham Hotel, Presidential Ballroom, 3000 M Street, NW, Washington, DC 20007.

Status: Open to the public, limited only by the space available. The room accommodates approximately 80 people. Public comments will be taken at the end of the meeting.

Purpose: NIOSH will sponsor three meetings of groups with different expertise to assist in the development of a national agenda for occupational safety and health research for the next decade. At each meeting, invited participants will discuss and contribute their perspectives in work sessions open to the public. Three work groups comprising researchers, health professionals, and others in the occupational health and safety community, will meet in public sessions to discuss research needs and provide recommendations from individual members of the work groups. A limited amount of time will be reserved to provide members of the public attending these work group meetings the opportunity to comment.

The tentative agenda of the meetings will include: Discussion and enumeration of items for potential inclusion into the national research agenda. Research priorities for consideration include health effects, hazardous exposures, work environments, industries, occupations, and populations associated with significant occupational disease, injury, disability, fatalities, or topics of growing importance in the future.

Matters To Be Discussed

As the lead federal health agency for research into the causes and prevention of work injuries and diseases, NIOSH has a responsibility to continually assess the state of existing knowledge and define future research needs and priorities. The development of a national research agenda will assist NIOSH and the occupational safety and health research community in establishing priorities and targeting some of the scientific needs of the next decade that offer the greatest potential for advancing the safety and health of workers. Establishing these priorities is especially important in light of increasing fiscal constraints on occupational safety and health research in both the public and private sectors. The agenda is intended to serve decision-makers and scientists working throughout the field, employed in government, corporate, labor, university, and private research programs.

NIOSH has developed a discussion list of possible items for the national research agenda. A small group of scientists reviewed a wide array of information ranging from the scope of occupational safety and health problems to future employment projections. Other scientific agenda-setting processes were also considered. In addition, the group agreed on the scope of agenda items it would propose. For example, it decided that a category such as "occupational lung diseases" would be too inclusive to serve as a research priority, that items of this breadth would encompass the field rather than provide decision-makers and scientists with focussed direction to meet some of the greatest needs and opportunities for prevention. The group ultimately listed approximately 50 items:

Health response	Exposure
Traumatic Injury: —Eye Injury —Electrocutions —Falls Neck, Shoulder & Other Upper Extremity Disorders Low Back Disorders Fertility and Pregnancy Outcomes Occupational Asthma Pneumoconioses Inhalation Injury Hypersensitivity Lung Disease Occupational Chronic Diseases (Selected): —Chronic Obstructive Lung Disease —Chronic Renal Disease —Ischemic Heart Disease —Neurodegenerative Disease (Cognitive & Movement Disorders) Occupational Infectious Diseases Depression and Anxiety Immune Dysfunction Neuroimmune Function Hearing Loss Contact Dermatitis	Chemical Mixtures (Including Hazardous Waste). Pesticides. Solvents. Oils and related derivatives. (e.g., Cutting Fluids, Diesel). Indoor Environment. Thermal stresses. Mineral and Synthetic Fibers. Metals and Related Compounds. Hormonally Active Substances. Violence/Assaults. Motor Vehicles. Heavy Machinery. Hand Tools. Mechanical Stressors Noise. Electric and Magnetic Fields. Behavioral Risk Factors.

Sector—work environment—workforce	Research process
Construction Agriculture Small Businesses Work Organization (Changing Economy and Workforce) Emerging Technologies Vulnerable Populations Service Workers	Intervention and Prevention Effectiveness Research Engineering and Technologic Solutions Exposure Assessment Methods Development Hazard Surveillance Disease Surveillance Injury Surveillance Risk Assessment Methodology Identification of Molecular Correlates of Cancer and other Chronic Diseases Occupational Health Services Research (e.g., Manpower Needs; Clinical Outcomes Research)

From this list and additional items that are recommended, NIOSH anticipates producing a final agenda of 15–25 of the highest scientific priorities for advancing safety and health. The following criteria were used in developing this initial discussion list and are proposed for the development of the research agenda: (1) The seriousness of the hazard in terms of death, injury, disease, disability, and economic impact; (2) the number of workers exposed or the magnitude of the risk; (3) the potential for risk reduction; (4) the expected trend in the importance of the subject; and, (5) the likelihood that the results of targeted research over the next decade will improve disease and injury prevention to protect worker health.

NIOSH is seeking input over the next five months to assure that the final agenda includes input from the broadest base of occupational safety and health expertise. In addition to the three meetings described in this announcement, the process for public input includes the following elements: (1) Corporate and worker liaison committees and a broader-based stakeholders outreach committee will assist NIOSH in obtaining involvement and input from employers, employees, health officials, health professionals, scientists, and public health, advocacy, scientific, industry and labor organizations; (2) A public meeting was held on November 30, 1995, to obtain early input on the research priorities, criteria for selection of priorities, and the process for developing the agenda; (3) Regional public meetings will be held in increase the opportunities for input from employers, employees, scientists, and other public stakeholders across the United States; (4) A final public meeting will be held in March 1996 to present a preliminary research agenda and provide the opportunity for public review and comment; and, (5) Public input throughout the process; the public is encouraged to provide oral comments at the public meetings and written comments through March 6, 1996.

The final agenda will be presented at a scientific symposium commemorating the 25th anniversary of the Occupational Safety and Health Act on April 29, 1996.

NIOSH encourages the public to provide recommendations on research priorities, criteria for determining priorities, and the process of developing the research agenda throughout the process. To attend, any or all of these three meetings, or to receive additional information, please contact Mr. Chris Olenec as indicated below. On-site registration will be available; however, to assist in planning for the meeting, advance registration is requested.

ADDRESSES: Written public comments on the National Occupational Research Agenda should be mailed to Ms. Diane Manning, NIOSH, CDC, Robert A. Taft Laboratories, M/S C34, 4676 Columbia Parkway, Cincinnati, Ohio 45226.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Mr. Chris Olenec, NIOSH, CDC, 200 Independence Avenue, Room 317B, Washington, DC 20201, telephone 202/205–2640 or by FAX (202) 260–1898.

Dated: November 28, 1995.

Nancy C. Hirsch,

Acting Director, Management Analysis and Services Office, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–19–M

Health Resources and Services Administration

Program Announcement for Grant and Cooperative Agreement Programs Administered by the Division of Disadvantaged Assistance, Bureau of Health Professions for Fiscal Year 1996

The Health Resources and Services Administration (HRSA) announces that applications will be accepted for three grant programs for fiscal year (FY) 1996 under the authority of title VII of the Public Health Service (PHS) Act, as amended by the Health Professions Education Extension Amendments of 1992, Pub. L. 102–408, dated October 13, 1992. These programs include:

Grants for Centers of Excellence (COE) in Minority Health Professions Education (section 739, PHS Act)

Grants for Health Careers Opportunity Program (HCOP) (section 740, PHS Act)

Grants for the Minority Faculty Fellowship Program (MFFP) (section 738(b), PHS Act)

This program announcement is subject to reauthorization of the legislative authority and to the appropriation of funds. Applicants are advised that this program announcement is a contingency action being taken to assure that should authority and funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. At this time, given a continuing resolution and the absence of FY 1996 appropriations for title VII programs, the amount of available funding for these specific grant programs cannot be estimated.

Funding factors will be applied in determining funding of approved applications for some of these programs. A funding preference is defined as the funding of a specific category or group of approved applications ahead of other categories or groups of approved applications. A funding priority is defined as the favorable adjustment of aggregate review scores of individual approved applications when applications meet specified criteria. It is not required that applicants request consideration for a funding factor. Applications which do not request consideration for funding factors will be reviewed and given full consideration for funding.

Definitions

The following definitions were established after public comment at 56 FR 22440, dated May 15, 1991.

"A significant number of minority individuals enrolled in the school" means that to be eligible to apply for a Hispanic COE, a medical, osteopathic medicine, or dental school must have at least 25 enrolled Hispanic students. Schools of pharmacy must have at least 20 enrolled Hispanic students. To apply as a Native American COE, an eligible medical or dental school must have at least eight enrolled Native American students and a school of pharmacy or osteopathic medicine must have at least five enrolled Native American students. To be eligible to apply for an "Other" Minority Health Professions Education COE, an eligible school must have above the national average of underrepresented minorities (medicine 13%, osteopathic medicine 8%, dentistry 15%, pharmacy 11%) enrolled in the school. Applicants must evidence that any particular subgroup of Asian individuals is underrepresented in a specific discipline. These numbers represent the critical mass necessary for a viable program. A viable program is one in which there is a sufficient number of students to warrant a Center of Excellence level educational program. Stated numerical levels are just above the median for schools reporting a critical mass necessary for a viable program. The requirement that schools applying for Other Minority Health Professions Education Centers have an enrollment of underrepresented students that is above the national average for that discipline is statutory.

"Effectiveness in Providing Financial Assistance" will be evaluated by examining the data on scholarships and other financial aid provided to the targeted group in relation to the scholarships and financial aid provided to the total school population.

"Effectiveness in Recruitment" will be evaluated by examining the first-year and total enrollments of targeted students in relation to the first-year and total enrollments for the entire school.

"Effectiveness in Retaining Students" will be determined by retention rates for the targeted group and academic and non-academic support systems operative for the target group of students at the school.

"Minority" means an individual whose race/ethnicity is classified as American Indian or Alaskan Native, Asian or Pacific Islander, Black, or Hispanic.

"Underrepresented Minority" means, with respect to a health profession,

racial and ethnic populations that are underrepresented in the health profession relative to the number of individuals who are members of the population involved. This definition encompasses Blacks, Hispanics, Native Americans, and, potentially, various subpopulations of Asian individuals. Applicants must evidence that any particular subgroup of Asian individuals is underrepresented in a specific discipline.

The following definitions were established in OMB Directive No. 15.

"American Indian or Alaskan Native" means a person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition. This definition applies to the Health Careers Opportunity Program.

"Asian or Pacific Islander" means a person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

"Black" means a person having origins in any of the black racial groups of Africa.

"Hispanic" means a person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

Following are additional definitions.

As defined in section 799, "accredited," when applied to a school of medicine, optometry, podiatry, pharmacy, public health or chiropractic, or a graduate program in health administration, clinical psychology, clinical social work, or marriage and family therapy, means a school or program that is accredited by a recognized body or bodies approved for such purpose by the Secretary of Education, except that a new school or program that, by reason of an insufficient period of operation, is not, at the time of application for a grant or contract under this title, eligible for accreditation by such a recognized body or bodies, shall be deemed accredited for purposes of this title, if the Secretary of Education finds, after consultation with the appropriate accreditation body or bodies, that there is reasonable assurance that the school or program will meet the accreditation standards of such body or bodies prior to the beginning of the academic year following the normal graduation date of the first entering class in such school or program.

"Community-based Program" means a program with organizational headquarters located in and which primarily serves: a Metropolitan Statistical Area, as designated by the Office of Management and Budget; a Bureau of Economic Analysis, U.S. Department of Commerce designated nonmetropolitan economic area or a county; or Indian tribe(s) as defined in 42 CFR 36.102(c), i.e., an Indian tribe, band, nation, rancheria, Pueblo, colony or community, including an Alaska Native Village or regional or village corporation.

As defined in section 799, "graduate program in health administration" and "graduate program in clinical psychology" mean an accredited graduate program in a public or nonprofit private institution in a State that provides training leading, respectively, to a graduate degree in health administration or an equivalent degree and a doctoral degree in clinical psychology or an equivalent degree.

For the Health Careers Opportunity Program, "health professions schools" means schools of allopathic medicine, dentistry, osteopathic medicine, pharmacy, optometry, podiatric medicine, veterinary medicine, public health, chiropractic, or graduate programs in clinical psychology and health administration, as defined in sections 799 (l)(A) and (l)(B) of the Public Health Service Act and as accredited in section 799(l)(E) of the Act.

For the Centers of Excellence Program, "health professions schools" means schools of medicine, osteopathic medicine, dentistry and pharmacy, as defined in section 739(h), which are accredited as defined in section 799(l)(E) of the Act. For purposes of the Historically Black Colleges and Universities (HBCUs), this definition means those schools described in section 799(l)(A) of the Act and which have received a contract under section 788B of the Act (Advanced Financial Distress Assistance) for fiscal year 1987.

As defined in 42 CFR 57.1804(b)(2), an "individual from a disadvantaged background" means an individual who: (a) Comes from an environment that has inhibited the individual from obtaining the knowledge, skills and abilities required to enroll in and graduate from a health professions school or from a program providing education or training in an allied health profession or; (b) comes from a family with an annual income below a level based on low-income thresholds according to family size, published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index and adjusted by the Secretary for use in all health professions programs.

The following income figures determine what constitutes a low-income family for purposes of these Health Careers Opportunity Program grants for fiscal year 1996:

Size of parents' family[1]	Income level[2]
1	$10,000
2	12,900
3	15,400
4	19,700
5	23,200
6 or more	26,100

[1] includes only dependents listed on Federal income tax forms.

[2] adjusted gross income for calendar year 1994, rounded to nearest $100.

As defined in section 739, the term "Native Americans" means American Indians, Alaskan Native, Aleuts, and Native Hawaiians. This definition applies to the Centers of Excellence Program.

For the Minority Faculty Fellowship Program, "minority" means an individual from a racial or ethnic group that is underrepresented in the health professions, as defined in section 738.

"Program of Excellence" means any programs carried out by a health professions school with funding under section 739 Grants for Centers of Excellence in Minority Health Professions Education.

As defined in section 799, the term "school of allied health" means a public or nonprofit private college, junior college, or university or hospital-based educational entity that: a) provides, or can provide, programs of education to enable individuals to become allied health professionals or to provide additional training for allied health professionals; b) provides training for not less than a total of 20 persons in the allied health curricula (except that this subparagraph shall not apply to any hospital-based educational entity); c) includes or is affiliated with a teaching hospital; and d) is accredited by a recognized body or bodies approved for such purposes by the Secretary of Education or which provides to the Secretary satisfactory assurance by such accrediting body or bodies that reasonable progress is being made toward accreditation.

As defined in section 799, "school of medicine," "school of dentistry," "school of osteopathic medicine," "school of pharmacy," "school of optometry," "school of podiatric medicine," "school of veterinary medicine," "school of public health," and "school of chiropractic" mean an accredited public or nonprofit private school in a State that provides training leading, respectively, to a degree of doctor of medicine, a degree of doctor of dentistry or an equivalent degree, a degree of doctor of osteopathy, a degree of bachelor of science in pharmacy or an equivalent degree or a degree of doctor of pharmacy or an equivalent degree, a degree of doctor of optometry or an equivalent degree, a degree of doctor of podiatric medicine or an equivalent degree, a degree of doctor of veterinary medicine or an equivalent degree, a graduate degree in public health or an equivalent degree, and a degree of doctor of chiropractic or an equivalent degree, and including advanced training related to such training provided by any such school.

As defined in section 799, "State" includes the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Republic of Palau, the Republic of the Marshall Islands, the Federated States of Micronesia, Virgin Islands, Guam and American Samoa.

Centers of Excellence (COE) in Minority Health Professions Education

Purposes: Grants for eligible Historically Black Colleges and Universities (HBCUs), Hispanic, Native American and Other Centers of Excellence must be used by the schools for the following purposes:

1. To establish, strengthen, or expand programs to enhance the academic performance of minority students attending the school;

2. To establish, strengthen, or expand programs to increase the number and quality of minority applicants to the school;

3. To improve the capacity of such schools to train, recruit, and retain minority faculty;

4. With respect to minority health issues, to carry out activities to improve the information resources and curricula of the school and clinical education at the school; and

5. To facilitate faculty and student research on minority health issues.

Applicants must address all five legislative purposes. In addition, grants for eligible HBCUs as described in section 799(l)(A) and which have received a contract under section 788B of the Act (Advanced Financial Distress Assistance) for FY 1987 may also be used to develop a plan to achieve institutional improvements, including financial independence, to enable the school to support programs of excellence in health professions education for minority individuals, and to provide improved access to the library and informational resources of the school.

Other Requirements: For Hispanic Centers of Excellence, the health professions schools must agree to give priority to carrying out the duties with respect to Hispanic individuals.

Regarding Native American Centers of Excellence, the health professions school must agree to:

1. Give priority to carrying out the duties with respect to Native Americans;

2. Establish a linkage with one or more public or nonprofit private institutions of higher education whose enrollment of students has traditionally included a significant number of Native Americans for purposes of identifying potential Native American health professions students of the institution who are interested in a health professions career and facilitating their educational preparation for entry into the health professions school; and

3. Make efforts to recruit Native American students, including those who have participated in the undergraduate program of the linkage school, and assist them in completing the educational requirements for a degree from the health professions school.

With respect to meeting these requirements, a grant for a Native American Center of Excellence may be made not only to a school of medicine, osteopathic medicine, dentistry, or pharmacy that individually meets eligibility conditions but also to such school that has formed a *consortium* of schools that collectively meet conditions, without regard to whether the schools of the consortium individually meet the conditions. The consortium would be required to consist of the school seeking the grant and one or more schools of medicine, osteopathic medicine, dentistry, pharmacy, nursing, allied health, or public health. The schools of the consortium must have entered into an agreement for the allocation of the grant among the schools. Each of the schools must have agreed to expend the grant in accordance with requirements of this program. Each of the schools of the consortium must be part of the same parent institution of higher education as the school seeking the grant or be located not more than 50 miles from the school (the applicant).

To qualify as an "Other" Minority Health Professions Education Center of Excellence, a health professions school (*i.e.*, a school of medicine, osteopathic medicine, dentistry, or pharmacy) must have an enrollment of underrepresented minorities above the national average for such enrollments of health professions schools. (See definition for "A significant number of minority individuals enrolled in the school.")

Eligibility: Section 739 authorizes the Secretary to make grants to schools of medicine, osteopathic medicine, dentistry and pharmacy for the purpose of assisting the schools in supporting programs of excellence in health professions education for Black, Hispanic and Native American individuals, as well as for HBCUs as described in section 799(l)(A) and which have received a contract under section 788B of the Act (Advanced Financial Distress Assistance) for FY 1987.

To qualify as a COE, a school is required to:

1. Have a significant number of minority individuals enrolled in the school, including individuals accepted for enrollment in the school (see definition for "A significant number of minority individuals enrolled in the school");

2. Demonstrate that it has been effective in assisting minority students of the school to complete the program of education and receive the degree involved;

3. Show that it has been effective in recruiting minority individuals to attend the school, including providing scholarships and other financial assistance to such individuals, and encouraging minority students of secondary educational institutions to attend the health professions school; and

4. Demonstrate that it has made significant recruitment efforts to increase the number of minority individuals serving in faculty or administrative positions at the school.

These entities must be located in a State.

Payments under grants for Centers of Excellence may not exceed 3 years, subject to annual approval by the Secretary, the availability of appropriations, and acceptable progress toward meeting originally stated objectives.

Review Criteria: The review of applications will take into consideration the following criteria:

1. The degree to which the applicant can arrange to continue the proposed project beyond the Federally-funded project period;

2. The degree to which the proposed project meets the purposes described in the legislation;

3. The relationship of the objectives of the proposed project to the goals of the plan that will be developed;

4. The administrative and managerial ability of the applicant to carry out the project in a cost effective manner;

5. The adequacy of the staff and faculty to carry out the program;

6. The soundness of the budget for assuring effective utilization of grant funds, and the proportion of total program funds which come from non-Federal sources and the degree to which they are projected to increase over the grant period;

7. The number of individuals who can be expected to benefit from the project; and

8. The overall impact the project will have on strengthening the school's capacity to train the targeted minority health professionals and increase the supply of minority health professionals available to serve minority populations in underserved areas.

Established Funding Preference: A funding preference will be given to competing continuation (renewal) applications for Centers of Excellence programs whose current project periods end in fiscal year 1996 and which score at or above the 50th percentile of all applications which are recommended for approval. The purpose of this preference is to maximize Federal and non-Federal investments in accomplishing the nature and scope of the legislative purposes of the Centers of Excellence Program. To realize the intended impact of the COE program more than one grant period is required. This funding preference is intended to direct assistance to quality COE programs that have documented sustained or increased accomplishments under this program.

This funding preference was established in FY 1995, following public comment (60 FR 6719, dated February 3, 1995) and is continued in FY 1996 with the addition of the requirement to score at or above the 50th percentile.

Maintenance of Effort: A health professions school receiving a grant will be required to maintain expenditures of non-Federal amounts for such activities at a level that is not less than the level of such expenditures maintained by the school for the fiscal year preceding the fiscal year for which the school receives such a grant. In addition, the school agrees that before expending grant funds, the school will expend amounts obtained from sources other than the grant.

Funding: The statute requires that, of the amount appropriated for any fiscal year, the first $12 million will be allocated to certain Historically Black Colleges and Universities (HBCUs) described in section 799(1)(A) of the Act and which received a contract under section 788B of the Act (Advanced Financial Distress Assistance) for the fiscal year 1987. Of the remaining balance, sixty (60) percent must be allocated to Hispanic and Native American Centers of Excellence, and forty (40) percent must be allocated to the "Other" Centers of Excellence. A grant made for a fiscal year may not be made in an amount that is less than $500,000 for each Center.

Health Careers Opportunity Program (HCOP)

Purpose and Eligibility: Section 740 authorizes the Secretary to make grants to and enter into contracts with schools of allopathic medicine, osteopathic medicine, public health, dentistry, veterinary medicine, optometry, pharmacy, allied health, chiropractic and podiatric medicine and public and nonprofit private schools which offer graduate programs in clinical psychology and other public or private nonprofit health or educational entities to carry out programs which assist individuals from disadvantaged backgrounds to enter and graduate from such schools. The assistance authorized by this section may be used to: (1) Identify, recruit, and select individuals from disadvantaged backgrounds for education and training in a health profession; (2) provide for a period prior to the entry of such individuals into the regular course of education of such a school, preliminary education designed to assist them to complete successfully such regular course of education at such a school or referring such individuals to institutions providing such preliminary education; (3) facilitate the entry and retention of such individuals in health and allied health professions schools; and (4) provide counseling and advice on financial aid to assist such individuals to complete successfully their education at such schools. Applicants must address at least 2 purposes. The period of Federal support will not exceed 3 years.

Project Requirements for Postbaccalaureate Programs: The following project requirements for postbaccalaureate programs were established as a preference after public comment at 55 FR 11264, dated March 27, 1990. Postbaccalaureate programs may also combine the following requirements with other HCOP activities as defined in the statutory purposes described above.

A. A health professions school will meet the requirements for a postbaccalaureate program if:

1. Either the applicant health professions school or an undergraduate school with which it has a formal arrangement:

a. Identifies and selects a cohort of seven or more disadvantaged students that have completed an undergraduate prehealth professions program and applied but were not accepted into a health professions school, or made a late decision to enter a new health professions school for participation in the program; and

b. Provides the selected student cohort with one calendar year (including the initial 6 to 8 week summer program) of rigorous postbaccalaureate (undergraduate and/or professional) level science and other appropriate educational experiences to prepare the students for entry into the applicant health professions school; and

2. The applicant health professions school:

a. Accepts for enrollment in the first year of its health professions school class, upon entry into the post-baccalaureate program, members of the cohort who successfully complete the program; or assures enrollment, at the election of the student at another health professions school; and

b. Provides members of the cohort and other disadvantaged enrollees retention services including a 6 to 8 week prematriculation summer program to ease their transition into the health professions school curriculum.

Stipends would be available through the grant for the targeted students during their summer programs and undergraduate academic year participation.

B. A school of allied health will meet the requirements for a postbaccalaureate program if:

1. Either the applicant allied health school or an undergraduate school offering pre-allied health preparation with which the school has a formal arrangement:

a. Identifies and selects a cohort of five or more disadvantaged students for participation in the program who have completed an undergraduate degree with a significant science focus and made a late decision to enter an allied health professions school and are in pursuit of a baccalaureate level degree in physical therapy, physician assistant, respiratory therapy, medical technology, or occupational therapy; and

b. Provides the selected student cohort with one calendar year (including an initial 6 to 8 week summer program) of rigorous science and other education experiences (e.g., allied health basic science, and quantitative and reading skills), to prepare them for entry at the end of that year into one of the above-named baccalaureate level training programs of the applicant allied health school; and

2. The applicant allied health school:

a. Accepts for enrollment in the first-year class of one of the specified baccalaureate level training programs of the applicant allied health school under entry into the preprofessional phase, members of the cohort who complete the program, or assures enrollment, at the election of the student at another health professions school; and

b. Provides members of the cohort and other disadvantaged enrollees with retention services including a 6 to 8 week prematriculation summer program to ease the transition into the specified allied health professions school curriculum.

Review Criteria: The review of applications will take into consideration the following:

(a) The degree to which the proposed project adequately provides for the requirements in the program regulations;

(b) The number and types of individuals who can be expected to benefit from the project;

(c) The administrative and management ability of the applicant to carry out the proposed project in a cost effective manner;

(d) The adequacy of the staff and faculty;

(e) The soundness of the budget;

(f) The potential of the project to continue without further support under this program.

Statutory Funding Priority: Public Law 102–408 requires the Secretary to give priority in funding to the following schools:

1. A school which previously received an HCOP grant and increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in the base year 1987 (for which the applicant must supply data) by the end of 3 years from the date of the award of the HCOP grant; and

2. A school which had not previously received an HCOP grant that increased its first-year enrollment of individuals from disadvantaged backgrounds by at least 20 percent over that enrollment in the base year 1987 (for which the applicant must supply data) over any period of time (3 consecutive years).

Established Funding Priority: The following funding priority was established in fiscal year 1990 after public comment at 55 FR 11264, dated March 27, 1990, and is being continued in FY 1996, with the exception that wording related to alternative means of documenting enrollment in terms of increases and retention rates for disadvantaged students has been deleted. Progress in these areas is considered as a part of the merit review process for this program and applicants will be informed of relevant benchmarks in application materials.

A funding priority will be given to HCOP applications from health professions schools that have a disadvantaged student enrollment of 35 percent or more. Traditionally, disadvantaged students have been disproportionally underrepresented in the health profession schools and the health professions. A funding priority will also be given to schools of allied health offering baccalaureate or higher level programs in physical therapy, physician assistant, respiratory therapy, medical technology or occupational therapy that have a disadvantaged student enrollment of 35 percent or more among those programs.

Funding Preference: The following preference was established following public comment at 57 FR 61914, dated December 29, 1992 and will be applied in FY 1996. Preference be given to competing continuation applications (renewals) for postbaccalaureate programs funded under the fiscal year 1990 HCOP Funding Preference (as defined in the **Federal Register** notice of March 27, 1990, 55 FR 11264) which score at or above the 50th percentile of all applications which are recommended for approval, and which can evidence the following: (1) disadvantaged students were recruited into the postbaccalaureate program at a level at least equal to the number of students originally projected in FY 1990, and (2) the cohort of first year disadvantaged students entering the health or allied health professions school in September 1996 exceeds the number of disadvantaged students enrolled in the first year class in September 1995 by a number equal to 50 percent of the postbaccalaureate participants projected for enrollment in 1996.

In addition, consideration will be given to an equitable geographic distribution of projects, and the assurance that a combination of all funded projects represents a reasonable proportion of the health professions specified in the legislation.

Funding: The statute requires that, of the amount appropriated for any fiscal year, 20 percent must be obligated for stipends to disadvantaged individuals of exceptional financial need who are students at schools of allopathic medicine, osteopathic medicine, or dentistry.

Grants for the Minority Faculty Fellowship Program (MFFP)

Purpose: The purpose of the MFFP is to increase the number of underrepresented minority faculty members in health professions schools, i.e., schools of medicine, osteopathic medicine, dentistry, veterinary medicine, optometry, podiatric medicine, pharmacy, public health, health administration, clinical psychology, and other public or private nonprofit health or educational entities.

Specifically, these grant awards are intended to allow institutions an opportunity to provide a fellowship to individuals who have the potential for teaching, administering programs, or conducting research as faculty members. Institutions must demonstrate a commitment and ability to identify, recruit, and select underrepresented minorities in health professions. The institutions' training programs provide the fellows with the techniques and skills needed to secure an academic career including competence in: pedagogical skills, research methodology, development of research grant proposals, writing and publication skills, and the ability to work with minority populations and provide health services to medically underserved communities. In addition, the fellows must work under the direct supervision of a senior level faculty member engaged in the disciplines mentioned above, and upon successful completion of the program would be assured a teaching position at the institution.

Section 738(b) authorizes the Secretary to provide a one-year fellowship award to an eligible health professions school which includes a stipend in an amount not exceeding 50 percent of the regular salary of a similar faculty member, or $30,000, whichever is less. Grant funds are available to support fellow costs *only* and are limited to stipend, tuition and fees, and travel. Stipends must be paid by the grantee institution in accordance with its usual institutional payment policy, schedule and procedures. Stipend funds may be supplemented through other resources. Direct financial assistance to fellows may not be received concurrently with any other Federal education award (fellowship, traineeship, etc.), except for educational assistance under the Veterans Readjustment Benefits Act ("GI Bill"). Loans from Federal funds are not considered Federal awards. Any fellow who continues to receive full institutional salary is not eligible for stipend support from these grant funds.

Period of Support: The period of Federal support will not exceed one year for each fellowship award to an applicant institution. However, a fellowship award to an individual recipient must be for a minimum of two years. The program *does not* contribute to the support of the fellow in the second year. The applicant institution (school) will be required to support the fellow for the second year at a level not less than the total of Federal and institutional funds awarded for the first year.

Eligibility Requirements for the Applicant Institution: Eligible applicants for this program are schools of allopathic medicine, osteopathic medicine, dentistry, veterinary medicine, optometry, podiatric medicine, pharmacy, public health, health administration, clinical psychology, and other public or private nonprofit health or educational entities.

In addition, to receive a fellowship award, an applicant institution must demonstrate to the Secretary that it has the commitment and ability to:

- Identify, recruit and select individuals from underrepresented minorities in health professions who have the potential for teaching, administering programs, or conducting research at a health professions institution;
- Provide such individuals with the skills necessary to enable them to secure an academic career. Training may include: pedagogical skills, program administration, the design and conduct of research, grant writing, and the preparation of articles suitable for publication in peer reviewed journals;
- Provide services designed to assist such individuals in their preparation for an academic career, including the provision of mentors; and
- Provide health services to rural or medically underserved populations.

In Addition, the Applicant Institution Shall Agree to the Following Assurances:

- Provide an assurance that the applicant institution will make available (directly through cash donations) $1 for every $1 of Federal funds received under the fellowship (each fellowship must include a stipend in an amount not exceeding 50 percent of the regular salary of a similar faculty member, or $30,000, whichever is less);
- Provide an assurance that institutional support will be provided for the individual for a second year at a level not less than the total amount of Federal and institutional funds provided in the year in which the grant was awarded;
- Provide an assurance that the fellowship recipient is from a minority group underrepresented in the health professions; has at a minimum, appropriate advanced preparation (such as a master's or doctoral degree in a health profession) and special skills necessary to enable that individual to teach and practice;
- Provide an assurance that the recipient of the fellowship will be a member of the faculty of the applicant institution; and
- Provide an assurance that the recipient of the fellowship has not been a member of the faculty of any school at any time during the 18-month period preceding the date on which the individual submits a request for the fellowship.

Eligibility Requirements for the Fellows: Fellowship awards must be for two years, and are provided for an individual who meets the following criteria:

- Individual must be from a minority group underrepresented in the health professions;
- Individual must have appropriate advanced preparation (such as a master's or doctoral degree in a health profession) and special skills necessary to enable that individual to teach and practice;
- Individual must not have been a member of the faculty of any school at any time during the 18-month period preceding the date on which the individual submits a request for the fellowship;
- Individual must have completely satisfied any other obligation for health professional service which is owed under an agreement with the Federal Government, State Government, or other entity prior to beginning the period of service under this program;
- Individual must be a U.S. citizen, noncitizen national, or foreign national who possesses a visa permitting permanent residence in the United States.

Breach of Fellowship Funds: The school will be required to return fellowship funds received if it fails to honor the terms of the fellowship award. Such sums must be paid within 1 year from the day the Secretary determines that the breach occurred. If payment is not received by the payment date, additional interest, penalties, and administrative charges will be assessed in accordance with Federal Law (45 CFR 30.13).

Review Criteria: The review of applications will take into consideration the following review criteria:

1. The extent to which the institution demonstrates that it has the commitment and ability to identify, recruit, and select underrepresented minority faculty, and its ability to provide health services to rural or medically underserved populations;
2. The extent to which the institution's training program will provide the fellow with the preparation, training, and skills needed to secure an academic career. Training may include: pedagogical skills, program administration, grant writing and publication skills, research methodology and development of research grant proposals, and community service abilities;
3. The degree to which the institution's senior faculty are involved in the training and preparation of fellows pursuing an academic career, and the potential of the institution to continue the program without Federal support beyond the approved project period; and
4. The extent to which the institution meets the eligibility requirements set forth in section 738(b) of the Public Health Service Act.

In determining awards, the Secretary will also take into consideration equitable distribution among health disciplines and geographic areas.

National Health Objectives for the Year 2000

The Public Health Service urges applicants to submit work plans that address specific objectives of Healthy People 2000. Potential applicants may obtain a copy of *Healthy People 2000* (Full Report; Stock No. 017–001–00474–0) or *Healthy People 2000* (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402–9325 (telephone 202–783–3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthen linkages between U.S. Public Health Service education programs and programs which provide comprehensive primary care services to the underserved.

Smoke-Free Workplace

The Public Health Service strongly encourages all grant recipients to provide a smoke-free workplace and to promote the non-use of all tobacco products and Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities that receive Federal funds in which education, library, day care, heath care, and early childhood development services are provided to children.

Application Availability

Application materials are available on the World Wide Web at address: http://www.os.dhhs.gov/hrsa/. Click on the file name you want to download to your computer. It will be saved as a self-extracting WordPerfect 5.1 file. Once the file is downloaded to the applicant's PC, it will still be in a compressed state. To decompress the file, go to the directory where the file has been downloaded and type in the file name followed by a <return>. The file will expand into a WordPerfect 5.1 file. Applicants are strongly encouraged to obtain application materials from the World Wide Web via the Internet.

Questions regarding grants policy and business management issues should be directed to Ms. Wilma Johnson, Acting Chief, Centers and Formula Grants Section (wjohnson@hrsa.ssw.dhhs.gov), Grants Management Branch, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C–26, 5600 Fishers Lane, Rockville, Maryland 20857. Completed applications should be returned to the Grants Management Branch at the above address.

If additional programmatic information is needed, please contact Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8A–17, 5600 Fishers Lane, Rockville, Maryland 20857. The table below provides specific names, phone numbers and deadline dates for each program. If you are unable to obtain the application materials electronically, you may obtain application materials in the mail by sending a written request to the Division of Disadvantaged Assistance at the address above. Written requests may also be sent via FAX (301) 443–5242 or via the Internet (e-mail address: bbrooks@hrsa.ssw.dhhs.gov).

Paperwork Reduction Act

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, and General Instructions have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB Clearance Number is 0915–0060.

The deadline dates for receipt of applications for each of these programs are shown in Table 1. Applications will be considered to be "on time" if they are either:

(1) *Received on or before* the established deadline date, or

(2) *Sent on or before* the established deadline date and received in time for orderly processing. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

Late applications not accepted for processing will be returned to the applicant. In addition, applications which exceed the page limitation and/or do not follow format instructions will not be accepted for processing and will be returned to the applicant.

These programs are not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100). These programs are also not subject to the Public Health System Reporting Requirements.

Dated: November 28, 1995.

John D. Mahoney,

Acting Administrator.

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting:

Name of Committee: National Institute on Deafness and other Communication Disorders Special Emphasis Panel.

Date: December 12, 1995.

Time: 9 am to 12 noon.

Place: 6120 Executive Boulevard, Room 400C, Rockville, MD 20852.

Contact Person: Mary Nekola, Ph.D., Scientific Review Administrator, NIH, NIDCD, EPS Room 400C, 6120 Executive Boulevard, MSC 7180, Bethesda, MD 20892–7180, 301/496–8683.

Purpose/Agenda: To review and evaluate Training Grant applications (T32).

The meeting, which will be conducted as a telephone conference call, will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the meeting due to the urgent need to meet timing limitations imposed by the grant review cycle.

(Catalog of Federal Domestic Assistance Program No. 93.173 Biological Research Related to Deafness and Communication Disorders)

Dated: November 28, 1995.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

Substance Abuse and Mental Health Services Administration

Current List of Laboratories Which Meet Minimum Standards To Engage in Urine Drug Testing for Federal Agencies and Laboratories that Have Withdrawn from the Program

AGENCY: Substance Abuse and Mental Health Services Administration, HHS (Formerly: National Institute on Drug Abuse, ADAMHA, HHS).

ACTION: Notice.

SUMMARY: The Department of Health and Human Services notifies Federal agencies of the laboratories currently certified to meet standards of Subpart C of Mandatory Guidelines for Federal Workplace Drug Testing Programs (59 FR 29916, 29925). A similar notice listing all currently certified laboratories will be published during the first week of each month, and updated to include laboratories which subsequently apply for and complete the certification process. If any listed laboratory's certification is totally suspended or revoked, the laboratory will be omitted from updated lists until such time as it is restored to full certification under the Guidelines.

If any laboratory has withdrawn from the National Laboratory Certification Program during the past month, it will be identified as such at the end of the current list of certified laboratories, and will be omitted from the monthly listing thereafter.

FOR FURTHER INFORMATION CONTACT: Mrs. Giselle Hersh, Division of Workplace Programs, Room 13A–54, 5600 Fishers Lane, Rockville, Maryland 20857; Tel.: (301) 443–6014.

SUPPLEMENTARY INFORMATION:

Mandatory Guidelines for Federal Workplace Drug Testing were developed in accordance with Executive Order 12564 and section 503 of Pub. L. 100–71. Subpart C of the Guidelines, "Certification of Laboratories Engaged in Urine Drug Testing for Federal Agencies," sets strict standards which laboratories must meet in order to conduct urine drug testing for Federal agencies. To become certified an applicant laboratory must undergo three rounds of performance testing plus an on-site inspection. To maintain that certification a laboratory must participate in a quarterly performance testing program plus periodic, on-site inspections.

Laboratories which claim to be in the applicant stage of certification are *not* to be considered as meeting the minimum requirements expressed in the HHS Guidelines. A laboratory must have its letter of certification from SAMHSA, HHS (formerly: HHS/NIDA) which attests that it has met minimum standards.

In accordance with Subpart C of the Guidelines, the following laboratories meet the minimum standards set forth in the Guidelines:

Aegis Analytical Laboratories, Inc., 624 Grassmere Park Rd., Suite 21, Nashville, TN 37211, 615–331–5300

Alabama Reference Laboratories, Inc., 543 South Hull St., Montgomery, AL 36103, 800–541–4931/205–263–5745

American Medical Laboratories, Inc., 14225 Newbrook Dr., Chantilly, VA 22021, 703–802–8900

Associated Pathologists Laboratories, Inc., 4230 South Burnham Ave., Suite 250, Las Vegas, NV 89119–5412, 702–733–7866

Associated Regional and University Pathologists, Inc. (ARUP), 500 Chipeta Way, Salt Lake City, UT 84108, 801–583–2787

Baptist Medical Center—Toxicology Laboratory, 9601 I–630, Exit 7, Little Rock, AR 72205–7299, 501–227–2783 (formerly: Forensic Toxicology Laboratory Baptist Medical Center)

Bayshore Clinical Laboratory, 4555 W. Schroeder Dr., Brown Deer, WI 53223, 414–355–4444/800–877–7016

Cedars Medical Center, Department of Pathology, 1400 Northwest 12th Ave., Miami, FL 33136, 305–325–5810

Centinela Hospital Airport Toxicology Laboratory, 9601 S. Sepulveda Blvd., Los Angeles, CA 90045, 310–215–6020

Clinical Reference Lab, 11850 West 85th St., Lenexa, KS 66214, 800–445–6917

CompuChem Laboratories, Inc., 3308 Chapel Hill/Nelson Hwy., Research Triangle Park, NC 27709, 919–549–8263/800–833–3984 (formerly: CompuChem Laboratories, Inc., A Subsidiary of Roche Biomedical Laboratory, Roche CompuChem Laboratories, Inc., A Member of the Roche Group)

CompuChem Laboratories, Inc., Special Division, 3308 Chapel Hill/Nelson Hwy., Research Triangle Park, NC 27709, 919–549–8263 (formerly: Roche CompuChem Laboratories, Inc., Special Division, A Member of the Roche Group, CompuChem Laboratories, Inc.— Special Division)

BILLING CODE 4160–20–U

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Advisory Committee Establishment

AGENCY: Office of the Secretary, Interior.

ACTION: Notice, establishment of Advisory Committee.

SUMMARY: This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act (FACA), 5 U.S.C. App. 2 (1988) and 41 CFR part 101–6, section 101–6, 1015(a). Following consultation with the General Services Administration and the Office of Management and Budget, notice is hereby given that the Secretary of the Interior is administratively establishing an advisory committee known as the Alaska Land Managers Forum. The purpose of the committee is to advise the Secretary of the Interior, the Governor of Alaska, and others on Alaska land and resources issues.

EFFECTIVE DATE: This decision is effective December 4, 1995.

FOR FURTHER INFORMATION CONTACT: Deborah Williams, Special Assistant to the Secretary of the Interior for Alaska, Office of the Secretary, Department of the Interior, 1689 C Street, Suite 100, Anchorage, Alaska 99501–5151, (907) 271–5485.

SUPPLEMENTARY INFORMATION: In the 36 years since Statehood, land ownership and management in Alaska has undergone a massive change. In 1959, nearly all of Alaska (99.8 percent) was owned by the Federal Government, and most of this land (332 million acres) was public domain under the jurisdiction of the Bureau of Land Management. Today, the State has received title to 85 million acres of a 104 million acre entitlement. Alaskan Natives, through village and regional corporations established under the Alaska Native Claims Settlement Act of 1971, have become major land holders (35 million acres interim conveyed or patented) with the eventual ownership of 45.5 million acres. Finally, over 150 million acres in Federal ownership are in national forests, parks, and wildlife refuges. These changes in land status have, in turn, generated changes in the roles and relationships of the State and Federal agencies in Alaska. Also, Native corporations, as owners of 12 percent of the State's land area, have become major participants in the complexities of land and resource management.

Since Statehood there have been several different types of cooperative planning entities charged with making an overview of Alaska issues and developing comprehensive recommendations to the State and Federal Governments. None of these planning entities exist today. The Secretary of the Interior is establishing the Alaska Land Managers Forum advisory committee, with concurrence of the Governor of Alaska, in accordance with the provisions of the Federal Advisory Committee Act (FACA) (5 U.S.C. app.), for the purpose of advising him and others on land and resource issues in Alaska.

Membership on the Forum will consist of individuals appointed by the Secretary of the Interior. To be appointed as cochairs will be the Special Assistant to the Secretary of the Interior for Alaska as the Federal

Cochair and the Lt. Governor of the State of Alaska as the State Cochair. In addition, the charter provides for appointing the commissioners or directors of specified State agencies, the State directors of specified Federal land management agencies, and the heads of two Alaska Native organizations.

Administrative establishment of the Alaska Land Managers Forum is necessary and in the public interest.

Dated: November 28, 1995.

Bruce Babbitt,

Secretary of the Interior.

BILLING CODE 4310–10–M

Bureau of Land Management

[NM–932–4120–06; OKNM 96155]

Notice of 5-year Extension of Current Qualification of the Designated Nine (9) County "Area" of Oklahoma Federal Coal for "Category 5" Royalty Rate Reductions

AGENCY: Bureau of Land Management, Interior.

ACTION: Notices.

SUMMARY: This announcement gives notice that since the lands within the nine (9) Oklahoma Counties of Atoka, Coal, Haskell, Latimer, LeFlore, McIntosh, Muskogee, Pittsburg, and Sequoyah were designated in 1990 by the New Mexico State Office of the Bureau of Land Management as a Federal Coal "Area", and that said Area was determined to be "Qualified" as eligible for "Category 5" royalty rate reductions in order to establish fair and competitive royalties, and since no basic changes in the Area coal market have occurred, the State Director of the New Mexico State Office of the Bureau of Land Management has extended the Qualification of the Designated Area for "Category 5" Royalty Rate Reductions from December 17, 1995 to, and inclusive of, December 17, 2000.

FOR FURTHER INFORMATION CONTACT: Mr. Darwyn F. Pogue, Geologist/Minerals Review Appraiser, Minerals Support Team, Division of Planning, Use and Protection, New Mexico State Office, Bureau of Land Management, P.O. Box 27115, Mail Stop 93000, Santa Fe, New Mexico 87502–0115, Phone (505) 438–7466.

SUPPLEMENTARY INFORMATION: According to data contained in the latest available Annual Report to the Governor of Oklahoma by the Oklahoma Mining Commission, Department of Mines, the nine (9) Oklahoma Counties of Atoka, Coal, Haskell, Latimer, LeFlore, McIntosh, Muskogee, Pittsburg, and Sequoyah contain approximately 80% of the known coal resources of Oklahoma, as determined by the latest studies of the Oklahoma Geological Survey. These same nine (9) counties also contain 100% of the known Federally owned and economically recoverable coal resources in Oklahoma. The Federally owned coal resources are "acquired minerals" contained within coal deposits that were purchased from the Choctaw and Chickasaw Native American Tribes in the late 1940's. Therefore, the New Mexico Bureau of Land Management State Director in 1990 designated the aforementioned nine (9) counties as a Federal Coal area, hereinafter referred to as the "Area", for the purposes of Federal coal management under the guidelines set forth in Bureau of Land Management (BLM) Manual 3485—Reports, Royalties, and Records; in 43 CFR Part 3400—Coal Management: General; and in Subpart 3485—Reports, Royalties, and Records. BLM Manual 3485 sets forth five (5) Categories by which the holder and/or operator of a Federal Coal Lease may apply for a royalty that is less than the base royalty stated in the lease. Categories 1 through 4 refer to royalty reductions based mainly upon mining and financial criteria, or combinations thereof, that are specific to the mining operation requesting relief. Category 5, however, refers to royalty reductions granted within a designated State or Area that the BLM has concluded to have met all of the following criteria:

1. The Federal Government is not market dominant.
2. Federal royalty rates are above the current market royalty rates for non-Federal coal in the Area.
3. Federal coal would be bypassed or remain undeveloped due to royalty rate differentials.
4. The above conditions exist throughout the Area.
5. A royalty rate reduction under this Category is not likely to result in undue competitive advantages over neighboring areas.

Studies supplementary to those completed in 1990 that resulted in the present Area and subsequent "Category 5" reduced royalties, and continuous Area coal economic studies since 1990, have shown, and continue to show, that there have not been any basic changes in the Area coal markets that would substantiate the discontinuation of the present policy. As a result, the State Director has determined that the Qualification of the nine (9) county Area should be extended for another five (5) years, as provided by the Guidelines in BLM Manual 3485—Reports, Royalties, and Records. This will allow operators and/or holders of Federal Coal leases within the Area the continued opportunity to obtain fair and competitive Federal royalty rates; i.e., 2% for Federal coal mined by accepted underground methods, and 4% for Federal coal mined by accepted surface methods. It will further allow for the continued economic viability of the Area.

All Oklahoma coal operators that currently hold Federal coal leases within the Area have been mailed a copy of the above notice.

Dated: November 22, 1995.

Rich Whitley,

Deputy State Director, Division of Planning, Use and Protection, Bureau of Land Management, New Mexico State Office.

Proposed Expansion of the Continental Mine in Grant County, New Mexico

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Rescheduled public scoping meeting and extension of public comment period.

SUMMARY: Due to the Federal Government shutdown, the public scoping meeting scheduled by BLM on Wednesday, November 15, 1995 in Silver City, New Mexico (**Federal Register**, Vol. 60, No. 205, October 24, 1995, pages 54508–54509) to discuss Cobre Mining Company's proposed Continental Mine Expansion Project was postponed. The meeting is rescheduled at the following time and location:

Time/date	Location
7 p.m., December 19, 1995.	Grant County Courthouse Building, 2nd Floor Courtroom, 201 North Cooper Street, Silver City, New Mexico.

DATES: The public comment period has been extended through January 2, 1996. Written comments should be sent to the address listed below.

ADDRESSES: Comments should be sent to BLM, Las Cruces District, 1800 Marquess, Las Cruces, New Mexico 88005.

FOR FURTHER INFORMATION CONTACT: Chuck O'Donnell, BLM, Las Cruces District Office at (505)525–4373.

Dated: November 29, 1995.

Linda S.C. Rundell,

District Manager.

Powder River Regional Coal Team Activities: Announcement of Public Meeting

AGENCY: BLM, Interior.

ACTION: Notice of public meeting.

SUMMARY: The Powder River Regional Coal Team (RCT) announces that it will hold a public meeting on January 10, 1996 for the following purposes: (1) Review current and past activities in the Powder River Coal Region, (2) review pending coal lease applications (LBA), and (3) make recommendations on pending applications.

DATES: The RCT meeting will begin at 9 a.m. MST on January 10, 1996, at the Hitching Post Inn, in the Cheyenne Club Room, 1700 W. Lincolnway, Cheyenne, Wyoming. The meeting is open to the public.

ADDRESSES: The meeting will be held at the Hitching Post Inn, Cheyenne Club Room, 1700 W. Lincolnway, Cheyenne, WY 82001, telephone (307) 638–3301. Attendees may wish to make their personal room reservations from a block of rooms which has been set aside until December 27, 1995. For room reservations call 1–800–221–0125.

FOR FURTHER INFORMATION CONTACT: Pam Hernandez or Eugene Jonart, Wyoming State Office, Attn. (MLA), P.O. Box 1828, Cheyenne, Wyoming 82003: telephone (307) 775–6270 or 775–6257.

SUPPLEMENTARY INFORMATION: Primary purpose of the meeting is to discuss the following new coal lease applications (LBA): Spring Creek Coal Comp., Kennecott, (MTM83859), filed March 22, 1995; Powder River Coal Company (PRCC), Peabody, (WYW136142), filed March 23, 1995; and Jacob's Ranch, Kerr-McGee, (WYW136458), filed April 14, 1995. This is the initial public notification of the pending applications listed above, in accordance with the Powder River Operational Guidelines. The pending applications are to sustain existing coal mining operations. Generally, a coal lease application filed under the LBA portion of the regulations (43 CFR 3425) takes two to four years to be processed to the competitive lease sale stage, depending on informational and environmental study requirements. The RCT may generate recommendation(s) for any or all of the pending LBAs.

The meeting will serve as a forum for public discussion on Federal coal management issues of regional concern. Any party interested in providing comments or data related to the above pending applications may either do so in writing to the State Director (925), Wyoming State Office, Bureau of Land Management, P.O. Box 1828, Cheyenne, WY 82003 no later than January 3, 1996, or by addressing the RCT with his/her concern at the meeting on January 10, 1996.

A copy of the new RCT Charter can be obtained from either of the following offices: Wyoming State Office; ATTN: Eugene Jonart 925; P.O. Box 1828; Cheyenne, WY 82003; Montana State Office; ATTN: Ed Hughes (921); P.O. Box 36800; Billings, MT 59107.

The proposed agenda for the meeting follows:

1. Introduction of RCT Members and guests.
2. Approval of the Minutes of the June 16, 1993 Regional Coal Team Meeting held in Billings, Montana.
3. Organizational Changes within BLM.
4. New Powder River RCT Charter.
5. Regional Coal Activity Status:
   a. Current Production and trends
   b. Activity Since Last RCT Meeting: Competitive Sales: Wyoming—Eagle Butte LBA, April 5, 1995; Montana—Spring Creek LBA, August 9, 1995.
   c. Pending LBAs previously reviewed by RCT:
   —Antelope LBA; (Antelope Coal Comp.) filed 12/29/92; 60 million tons; est. sale date is June 1996. EA review to be completed December 1995.
   —North Roundup LBA; (Zeigler), filed 7/22/92; 140 million tons; est. sale date is December 1996. EIS will be started December 1995.
   d. Status of Coal Exchanges—Texaco/Lake DeSmet; Belco/Hay Creek
   e. Coal Lease Modifications Pending (if any): Montana/Wyoming
   f. Pending coal lease applications (LBAs):
   —Spring Creek Coal Comp.—MTM83859; (Montana); Kennecott Energy; est. 37.8 million tons, 285 acres; no schedule yet.
   —PRCC—WYW136142; (Wyoming), Peabody, est. 550 million tons, 4,020 acres, no schedule yet.
   —Jacob's Ranch—WYW136458; (Wyoming), Kerr-McGee; est 432 million tons, 4,000 acres, no schedule yet.
6. Executive Summary/Comparison of Previous Leasing Activities.
7. Review of Regional Market Conditions—Demand.
8. Industry Presentations:
   —Kennecott Energy.
   —PRCC.
   —Kerr-McGee.
9. Other Regional Issues:
   —Status of Buffalo Resource Area's Management Plan, (Wyoming).
10. RCT Activity Planning Recommendations:
   —Review and recommendation(s) on pending lease Application(s).
11. Discussion of next meeting date and location.
12. Adjourn.

Public discussion opportunities will be provided on all agenda items.

Alan R. Pierson,

State Director, Wyoming.

BILLING CODE 4310–22–M

Sport Fishing and Boating Partnership Council Workshop; Meeting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: As provided in Section 10(a)(2) of the Federal Advisory Committee Act, the Service announces a meeting designed to foster partnerships to enhance recreational fishing and boating in the United States. This meeting sponsored by the Sport Fishing and Boating Partnership Council, is open to the public, and interested persons may make oral statements to the Council or may file written statements for consideration. Summary minutes of the conference will be maintained by the Coordinator for the Sport Fishing and Boating Partnership Council at 4040 North Fairfax Drive, Arlington, VA 22203, and will be available for public inspection during regular business hours within 30 days following the meeting. Personal copies may be purchased for the cost of duplication.

DATES: December 20, 1995, beginning at 2 p.m.

ADDRESSES: The meeting will be held at the Stouffer Renaissance Crystal City Hotel located at 2399 Jefferson Davis Highway, Arlington, Virginia, telephone (703) 418–6800.

Agenda

The Council will hear reports from its Initiatives Committee on the draft strategic plan for the U.S. Fish and Wildlife Service's Recreational Fisheries Program. The Council will also consider recommendations from the Initiatives Committee on cost savings measures to reduce the Service's Fisheries Program

expenditures in Fiscal Year 1996 by approximately $2.1 million. The Council will hear a report from its Boating Committee and a status report on Executive Order 12963 for Recreational Fisheries. Public input will be received at approximately 4:40 p.m.

FOR FURTHER INFORMATION CONTACT: Doug Alcorn, Council Coordinator, at 703/358–1777.

Dated: November 24, 1995.

Bruce Blanchard,

Acting Director.

BILLING CODE 4310–55–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 C.F.R. § 50.7 and 42 U.S.C. 9622(d)(2), notice is hereby given that a proposed consent decree in *United States* v. *Brandywine Chemical Company*, Civil Action No. 95–699, was lodged on November 9, 1995, with the United States District Court for the District of Delaware. A complaint was filed simultaneously with the lodging of the consent decree.

The consent decree pertains to the Halby Chemical Site ("Site"), located in New Castle County, Delaware. Based on EPA's assessment of the present inability of Brandywine Chemical Company ("BCC"), the current Site owner/operator, to pay a substantial portion of response costs, the proposed consent decree requires BCC to: (1) Make a $10,000 payment to the United States within 120 days after entry of the consent decree; (2) pay 75% of the Fair Market Value ("FMV") of the BCC property to the United States between 5 and 10 years from the date EPA certifies that the response actions are complete; (3) pay to the United States 50% of its cash as reported in its Federal Income Tax Return for the year its property is sold or a FMV payment is made; (4) pay the expenses necessary to retain title to the BCC property until the obligations of the consent decree are satisfied; (5) remove and dispose of all bulk chemicals stored in tanks at the Site within 90 days of the signing of the consent decree; and (6) cease its operations at the Site.

The consent decree includes a covenant not to sue by the United States under Sections 106 and 107 of the Comprehensive Environmental Response, Compensation and Liability Act, 42 U.S.C. 9601 *et seq.* ("CERCLA), and under Section 7003 of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. § 6973.

The Department of justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Brandywine Chemical Company*, DOJ Ref. #90–11–2–719A. Commentors may request an opportunity for a public meeting in the affected area, in accordance with Section 7003(d) of RCRA.

The proposed consent decree may be examined at the Office of the United States Attorney, District of Delaware, Chemical Bank Building, Suite 1100, 1201 Market Street, Wilmington, Delaware, 198909–2046; the Region III Office of the Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania, 19107; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy of the body of the proposed decree, please refer to the referenced case and enclose a check in the amount of $8.75 (25 cents per page reproduction costs), for each copy. The check should be made payable to the Consent Decree Library.

Bruce S. Gelber,

Acting Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 95–29435 Filed 12–1–95; 8:45 am]

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

Notice is hereby given that a proposed consent decree in *United States* v. *Dec-Tam Corporation*, Civil Action No. 93–10438–RCL, was lodged on November 13, 1995 with the United States District Court for the District of Massachusetts.

The complaint in this action was filed in March 1993 against Dec-Tam Corporation, pursuant to section 113(b) of the Clean Air Act ("Act"), 42 U.S.C. 7413(b). The complaint sought penalties and injunctive relief for violations of Section 112 of the Act, 42 U.S.C. 7412, and of the National Emission Standard for Hazardous Air Pollutants for asbestos, 40 C.F.R. part 61, Subpart M ("Asbestos NESHAP"). The action is based on violations of the Asbestos NESHAP associated with renovation operations at the following locations: Stowe Village Housing Project, Hartford, Connecticut; St. Mark's School, Southborough, Massachusetts; New England Baptist Hospital, Boston, Massachusetts; Remsen Building, Hanover, New Hampshire; Greenwich Hospital, Greenwich, Connecticut; Boiler Plant at Dartmouth College, Hanover, New Hampshire; Southbury Training School, Southbury Connecticut; Norwalk Harbor Facilities, Norwalk, Connecticut; and Cabot Paint & Stains Co., Chelsea, Massachusetts.

The proposed consent decree embodies an agreement by Dec-Tam to pay a civil penalty in the amount of $19,450. In addition, Dec-Tam has agreed to implement certain measures to reduce the likelihood of future violations of the Asbestos NESHAP.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Dec-Tam Corporation*, DOJ Ref. # 90–5–2–1–1674.

The proposed Consent Decree may be examined at the Region I Office of the Environmental Protection Agency, J.F.K. Federal Building, Boston, Massachusetts at the United States Attorney's Office located at 1107 J.W. McCormack POCH, Boston, Massachusetts, and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, DC 20005. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $3.75 payable to the Consent Decree Library.

Joel M. Gross,

Acting Section Chief, Environmental Enforcement Section.

BILLING CODE 4410–01–M

Antitrust Division

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Joint Research and Development Venture Agreement for Developing Plasma Source Ion Implantation

Notice is given that, on September 18, 1995, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), Robert L. Henry, Jr., Corporate Counsel for Environmental Research Institute of Michigan, has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the venture agreement. The notifications were filed for the purpose of involving the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties are ABB High Power Semiconductors, Pittsburgh, PA, AO Smith Corp., Milwaukee, WI, Diversified Technologies Inc., Bedford, MA, Empire Hard Chrome, Inc., Chicago, IL, Environmental Research Institute of Michigan, Ann Arbor, MI, General Motors, Warren, MI, Harley-Davidson, Inc., Milwaukee, WI, IONEX, Bellaire, MI, Kwikset Corp., Anaheim, CA, Litton Electron Devices, San Carlos, CA, Los Alamos National Laboratory, Los Alamos, NM, NANO Instruments Inc., Oak Ridge, TN, PVI, Oxnard, CA, and the University of Wisconsin-Madison, Madison, WI, and the general areas of their planned activity are to develop plasma-source ion implantation for the processing of lightweight materials to provide enhanced performance of tooling, dies and manufactures parts for motor vehicle components and for other manufacturing applications; an award by the National Institute of Standards and Technology, U.S. Department of Commerce will partially fund this joint venture.

Constance K. Robinson,

Director of Operations, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993 Casting Aluminum Components Consortium

Notice is hereby given that, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Casting Aluminum Components Consortium ("the Consortium"), has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the Consortium and (2) the nature and objectives of the Consortium. The notification was filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties to the Consortium and its general areas of planned activity are given below.

The parties to the Consortium are: AlliedSignal Inc., 101 Columbia Road, Morristown, NJ 07962; Stahl Specialty Company, 111 E. Pacific Street, Kingsville, MO 64061; and The Top Die Casting Company, Inc., 13910 Dearborn Ave., South Beloit, IL 61080.

The purpose of the Consortium is cooperative research and production to develop and demonstrate the technology for casting aluminum components with low porosity.

Constance K. Robinson,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993; Perceptual-Based Video Encoding and Quality Measurement

Notice is hereby given that, on September 1, 1995, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), David Sarnoff Research Center has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties and (2) the nature and objectives of the project. The notifications were filed for the purpose of invoking the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Pursuant to Section 6(b) of the Act, the identities of the parties are: LSI Logic Corporation, Milpitas, CA; Sun Microsystems Computer Corp., Menlo Park, CA; Bell Atlantic Network Services, Arlington, VA; and David Sarnoff Research Center, Princeton, NJ. The nature and objectives of the research program is to develop and demonstrate "Perceptual-Based Video Encoding and Quality Measurement". The activities of the joint venture project will be partially funded by an award from the Advanced Technology Program, National Institute of Standards and Technology, Department of Commerce.

Membership in the project remains open, and the parties intend to file additional written notifications disclosing all changes in the membership or planned activities.

Constance K. Robinson,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Portland Cement Association

Notice is hereby given that, on September 20, 1995, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the Portland Cement Association ("PCA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, ABB Raymond (headquartered in Lisle, IL) has resigned as an associate member of PCA, and Allis Mineral Systems has changed its name to Svedala Industries, Inc. (headquarters in York, PA).

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and PCA intends to file additional written notification disclosing all changes in membership.

On January 7, 1985, PCA filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on February 5, 1985, 50 FR 5015. The last notification was filed with the Department on July 18, 1995. A notice has not yet been published in the **Federal Register.**

BILLING CODE 4410–01–M

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Notice of Pending Submittal to The Office of Management and Budget (OMB) for Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: U.S. Nuclear Regulatory Commission Acquisition Regulation (NRCAR).

2. Current OMB approval number: 3150–0169.

3. How often the collection is required: On occasion; one time.

4. Who is required to asked to report: Offerors responding to NRC solicitations and contractors receiving contract awards from NRC.

5. The number of annual respondents: 750.

6. The number of hours needed annually to complete the requirement or request: 11,372 (10.7 hours per response).

7. Abstract: The mandatory requirements of the NRCAR implement and supplement the government-wide Federal Acquisition Regulation, and ensure that the regulations governing the procurement of goods and services within the NRC satisfy the needs of the agency.

Submit by February 2, 1996, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street, NW, (lower level), Washington DC. Members of the public who are in the Washington, DC, area can access this document via modem on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library), NRC subsystem at FedWorld at 703–321–3339. Members of the public who are located outside the Washington, DC, area can dial FedWorld, 1–800–303–9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The document will be available on the bulletin board for 30 days after the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703–487–4608.

Comments and questions should be directed to the NRC Clearance Officer, Brenda Jo Shelton, U.S. Nuclear Regulatory Commission, T–6 F33, Washington, D.C., 20555–0001, (301) 415–7233, or by Internet electronic mail at BJS@NRC.GOV.

Dated at Rockville, Maryland, this 28th day of November, 1995.

For the Nuclear Regulatory Commission.

Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

[FR Doc. 95–29424 Filed 12–1–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket Nos. 50–344 and 50–412]

Duquesne Light Company, Ohio Edison Company, Pennsylvania Power Company, The Cleveland Electric Illuminating Company, The Toledo Edison Company, Beaver Valley Power Station, Units 1 and 2; Notice of Partial Withdrawal of Application for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request by Duquesne Light Company (the licensee) to withdraw a portion of its September 13, 1995, application for a proposed amendment to Facility Operating License Nos. DPR–66 and NPF–73 for Beaver Valley Power Station, Units 1 and 2 (BVPS–1 and BVPS–2), located in Beaver County, Pennsylvania.

The proposed amendment involved revision of the Administrative Controls section (Technical Specifications (TS) 6.8.6.a.2), 6.8.6.a.7), and 6.14.a.2)) and the Bases section for TS 3/4.11.1.4 of the BVPS–1 and BVPS–2 TSs to be consistent with the requirements of the Offsite Dose Calculation Manual (ODCM). The ODCM was recently updated to reflect the radioactive liquid and gaseous effluent release limits and the liquid holdup tank activity limit of BVPS–1 License Amendment No. 188 and BVPS–2 License Amendment No. 70 which were issued June 12, 1995.

On October 16, 1995, the licensee submitted a letter to the NRC requesting withdrawal of the proposed changes to TS 6.14.a.2) and to the Bases for TS 3/4.11.1.4 because these changes incorrectly referenced superseded sections of 10 CFR Part 20.

The Commission has previously issued a Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing, which was published in the **Federal Register** on September 22, 1995 (60 FR 49292).

For further details with respect to this action, see the application for amendment dated September 13, 1995, and the licensee's letter of October 16, 1995, which withdrew the portion of the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC 20555 and at the B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Rockville, Maryland, 21st day of 1995.

For the Nuclear Regulatory Commission.

Donald S. Brinkman,

Senior Project Manager, Project Directorate I–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 95–29423 Filed 12–1–95; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–245]

Northeast Nuclear Energy Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–21 issued to Northeast Nuclear Energy Company (NNECO) for operation of the Millstone Nuclear Power Station, Unit 1, located in Waterford, Connecticut.

The proposed amendment would remove the Limiting Condition for Operation (LCO) and Surveillance Requirements for the loss-of-normal power (LNP) trip function from Tables 3.2.2 and 4.2.1 and insert new LCO 3.2.F and Surveillance Requirement 4.2.F. In addition, the proposed amendment will add a new table to specify the required LNP instrumentation for each bus, will update the Table of Contents, will make some editorial changes, and will revise the associated Bases section.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

NNECO has reviewed the proposed change against the criteria set forth in 10 CFR 50.92 and has concluded that the change does not involve a Significant Hazards Consideration (SHC). The bases for this conclusion are that the three criteria of 10 CFR 50.92(c), discussed separately below, are not compromised. The proposed change does not involve an SHC because the change would not:

1. Involve a significant increase in the probability or consequences of an accident previously analyzed:

These changes do not increase the probability of a loss of offsite power event or the occurrence of any accidents which assume loss of offsite power. This is ensured by the LNP instrumentation system design which uses multiple sensing relays and qualified Class 1E components, as well as conservative operability and surveillance requirements.

The LNP instrumentation for a safety division consists of discrete voltage sensing, time delay, initiation, and auxiliary logic relaying. The LNP instrumentation for a safety division is a single trip system (initiation channel) controlled by two instrument channels. Each instrument channel consists of a loss of voltage trip function and a degraded voltage trip function. The two instrument channels each provide a trip signal. The LNP trip signal is comprised of two instrument channels made up of a loss of voltage relay and its timer, and a degraded voltage relay and its timer. The signals from the two instrument channels feed into a delay timer, producing the LNP initiation system for the safety division. The S1 LNP instrumentation is powered from the

S1 125V dc bus, and the S2 LNP instrumentation is powered from the S2 125V dc bus. The loss of voltage, and degraded voltage, sensing relays can be placed in the tripped condition by removing the relay from the case. To minimize the likelihood of an inadvertent safety division initiation, the loss of voltage trip requires 3/3 relays and the degraded voltage trip requires 2/3 relays.

If the LNP instrumentation senses that the preferred offsite power source has been lost for that safety division, the safety related buses for that safety division are disconnected from the offsite source and connected to their emergency power source. If the LNP instrumentation determines that the preferred offsite power source is in a degraded condition for that safety division, and that an ECCS [emergency core cooling system] signal is present, then the safety related buses for that safety division are disconnected from the offsite source and connected to their emergency power source. For a degraded voltage condition on either safety division, without ECCS actuation, the operators are alerted to this condition by an annunciator and will initiate the appropriate corrective actions. This design fulfills the safety functions assumed in the accident analyses relating to loss of normal power/loss of offsite power.

If one instrument channel for a safety division were to fail in the non-conservative state, the safety division's other instrument channel would provide the loss of voltage trip and the degraded voltage trip for that safety division. The ability of the safety division to detect an undervoltage condition and respond is maintained. Each instrument channel has a separate feed, from separate breakers, from the 125 V dc power supply associated with that safety division. The seven day LCO of section 3.2.F.2 is justified based on continued operability of the safety division's redundant trip channel. Seven days allows reasonable time to perform repairs.

The time delays and voltage setpoints specified in Table 3.2.4 ensure that the emergency power source starting and loading times continue to meet the current technical specification requirements. Also, these time delays are long enough to precluded false trips due to voltage transients (e.g., during motor starts). The relay calibration surveillance procedure will establish acceptance criteria for each relay to ensure that the total times specified in Table 3.2.4 are not exceeded. The proposed surveillance testing and calibration frequency of every refueling outage is consistent with the requirements in the current technical specification.

Some of the redundancy in the existing LNP logic will be lost as a result of separating the two divisions of LNP logic, yielding a small increase in the probability of failure of certain portions of LNP logic. However, this impact is not significant, and is outweighed by the beneficial automatic repowering of a deenergized division following an LNP.

Based on the above, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously evaluated:

Following the proposed changes, plant response to an LNP on one division would be improved, since a deenergized division would be automatically repowered by its emergency power source while the other division remains aligned to offsite power. There are no malfunctions which would adversely impact both safety divisions while in this alignment.

There are no new failure modes associated with these changes which will prevent the LNP instrumentation from performing its intended safety function. Each individual voltage sensing relay, when removed from its case, provides the tripped contact configuration. The proposed technical specifications would allow relays to be placed in the tripped condition as long as this would not inhibit the LNP function or cause an inadvertent initiation. Additionally, since the design function to ensure that adequate power is available to operate the emergency safeguards equipment has not changed, no new accident or accident of a different kind is created.

The test switches provided for load shed logic testing are similar to the existing test switches on the secondary side of the Potential Transformers. Moreover, they require preplanned removal of a switch box cover, and require the switch to be in its original position before the switch box cover can be replaced. These switches help to avoid operator error in the present practice of sleeving contacts, installing jumpers, and pulling fuses. Administrative controls and personnel training ensure that there are no new failure modes or new or different accident scenarios than those previously evaluated.

A keylock bypass switch when placed in the "Bypass" position will block LNP actuation, thus, preventing the starting and loading of the emergency generator for the associated division, if an LNP were to occur. This is not a new failure mode since similar blocking mechanisms currently exist for each of the emergency generators. Currently, the EDG [emergency diesel generator] and GTG [gas turbine generator] can be prevented from starting on an ECCS signal by placement of an existing keylock switch in the "Off-Normal" position. To minimize the impact of inadvertent use of the bypass switch, an annunciation is provided. Also, these switches would be strictly administratively controlled to prevent their use during power operation. This restriction on the use of the keylock bypass switches during non-power operation is discussed in the Bases section of these proposed technical specifications. Operation of a keylock switch will result in the emergency power source being declared inoperable per proposed Technical Specification 3.2.F.3. The current logic will not actuate the LNP logic if power is removed from bus 14E or bus 14F individually. These switches will help avoid inadvertent actuation of equipment during surveillance testing by eliminating the need for sleeving of relay contacts, installing jumpers and pulling fuses to perform testing. Administrative controls and personnel training ensure that there are no new failure modes. Careful isolation of a bus for preplanned maintenance is part of the existing maintenance and surveillance activities, and the provision of the keylock switches does not change the infrequent need for these activities. Administrative controls and personnel training ensure that there are no new failure modes or new or different accident scenarios than those previously evaluated.

Although the proposed design does not provide an LNP signal if the 14C/E tie breaker is inadvertently opened, the loss of voltage on bus 14E (which would result from the failure or the inadvertent opening of the tie breaker) is enveloped by the single failure of one safety division. This would be mitigated by the redundant safety division. For a division S1 loss of normal power, plus LOCA [loss of coolant accident], the S2 division is available to power the A and C LPCI [low pressure coolant injection] trains and the A train of core spray. This scenario is no different than the existing design.

Based on the above, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously analyzed.

3. Involve a significant reduction in the margin of safety.

The protective boundaries (i.e., fuel cladding, reactor coolant system, containment building) are not affected because the consequences of a design basis accident are not changed. Since the protective boundaries are not affected, any margin of safety is also unaffected. The proposed changes ensure that adequate electrical power is available to operate the emergency safeguards equipment. By maximizing the operability of the LNP Instrumentation without requiring high risk testing, the proposed changes will improve the margin of safety as related to availability of electric power to safety related loads.

Based on the above, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed NNECO's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Rules Review and Directives Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 03, 1996, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last 10 days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 248–5100 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number N1023 and the following message addressed to Phillip F. McKee: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Lillian M. Cuoco, Esq., Senior Nuclear Counsel, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141–0270, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated October 3, 1995,

which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Learning Resources Center, Three Rivers Community-Technical College, 574 New London Turnpike, Norwich, CT 06360.

Dated at Rockville, Maryland, this 28th day of November 1995.

For the Nuclear Regulatory Commission.

James W. Andersen,

Project Manager, Project Directorate I–3, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Notice of Meeting of the Industry Policy Advisory Committee

AGENCY: Office of the United States Trade Representative.

ACTION: Notice that the December 8, 1995 meeting of the Industry Policy Advisory Committee will be held from 10 a.m. to 2 p.m. The meeting will be closed to the public from 10 a.m. to 2 p.m.

SUMMARY: The Industry Policy Advisory Committee will hold a meeting on December 8, 1995 from 10 a.m. to 2 p.m. The meeting will be closed to the public. The meeting will include a review and discussion of current issues which influence U.S. trade policy. Pursuant to Section 2155(f)(2) of Title 19 of the United States Code, I have determined that this portion of the meeting will be concerned with matters the disclosure of which would seriously compromise the development by the United States Government of trade policy, priorities, negotiating objectives or bargaining positions with respect to the operation of any trade agreement and other matters arising in connection with the development, implementation and administration of the trade policy of the United States.

DATES: The meeting is scheduled for December 8, 1995, unless otherwise notified.

ADDRESSES: The meeting will be held at the White House Conference Center, located at 726 Jackson Place, N.W., Washington, D.C., unless otherwise notified.

FOR FURTHER INFORMATION CONTACT: Michaelle Burstin, Director of Public Liaison, Office of the United States Trade Representative, (202) 395–6120.

Michael Kantor,

United States Trade Representative.

BILLING CODE 3190–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–36516; File No. SR–CBOE–95–16]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Multi-Market Orders

November 27, 1995.

I. Introduction

On June 1, 1995, the Chicago Board Options Exchange, Incorporated ("CBOE" or "Exchange") filed a proposed rule change with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] to amend CBOE Rule 6.48 to specify certain duties of CBOE members in effecting an options transaction on the CBOE that is part of a stock-option or stock-option combination order. The Exchange filed Amendment No. 1 to the propsoal on June 22, 1995.[3]

Notice of the proposal, as amended, was published for comment and appeared in the **Federal Register** on August 16, 1995.[4] No comment letters were received on the proposed rule change. This order approves the Exchange's proposal, as amended.

II. Description of the Proposal

The purpose of this proposal is to set forth in existing CBOE Rule 6.48 the duties of CBOE members executing an options order that is a component of a "package" stock-option order, as defined by CBOE Rule 1.1(ii)(a) ("stock-option order") or stock-option combination order, as defined by CBOE Rule 1.1(ii)(b) ("stock-option combination order"),[5] the execution of which involves transactions in CBOE's options market and in another market (a "multi-market" order), and to specify the sole basis on which an options trade that is a component of a multi-market order may be cancelled by the members that are parties thereto. The proposed rule change would also make it inconsistent with just and equitable principles of trade, and consequently a violation of Exchange Rule 4.1, for a member to fail to fulfill the new requirements.

CBOE Rule 6.48 currently provides that bids or offers made and accepted in accordance with Exchange rules constitute binding contracts, but that Rule does not address the execution and cancellation of complex multi-market orders. Because such orders have become more prevalent at the CBOE as trading strategies have become more intricate, and because such orders involve concurrent executions at the CBOE and in markets other than the CBOE, the Exchange proposes to adopt new paragraph (b) to Rule 6.48. The Exchange believes that this amendment should establish well-defined conditions and requirements in its Rules that members must observe in executing and cancelling such transactions.

Proposed CBOE Rule 6.48(b) would apply to stock-option and stock-option combination orders, other than orders respecting index options,[6] and would impose two requirements on CBOE members who are parties to such multi-market orders. First, a member announcing such an order to a trading crowd must disclose all legs of the order and must identify the specific markets and prices at which the non-option leg(s) are to be filled. Second, concurrent with the execution of the option leg of any multi-market order, the initiating member and each member that is a counterparty to the trade must take steps immediately to execute the non-option leg(s) in the identified market(s).[7] Because both of these requirements are essential to fair and efficient order execution, proposed new paragraph (c) of Rule 6.48 would provide that any failure to observe either requirement will constitute a violation of CBOE's Rule 4.1, which prohibits conduct inconsistent with just and equitable principles of trade. The Exchange believes that these new provisions will clarify members' expectations about the execution of multi-market orders covered by the proposed rule and will promote prompt execution of each non-option component of such orders.

In addition to establishing requirements incident to execution, the proposed rule change sets forth one exclusive basis on which members may cancel an executed options transaction that is part of a multi-market order. Proposed Rule 6.48(b)(ii) indicates that any member that is a party to an options transaction that is part of a multi-market order may have the options transaction cancelled only in the event that market conditions in any of the identified non-CBOE markets prevent the execution of one or more of the non-option legs of the order. The Exchange believes that cancellation under this exclusive circumstance is fair and appropriate.

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of change, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] In Amendment No. 1, the Exchange proposes to amend subparagraph (b)(ii) of CBOE Rule 6.48 to clarify that the existence of market conditions that prevent the execution of the non-option leg(s) at the agreed upon price(s) would be the only basis for any one party to a trade representing the options leg of a multi-market order to cancel such trade. *See* Letter from Michael Meyer, Attorney, Schiff Hardin & Waite, to John Ayanian, Attorney, Office of Market Supervision, Division of Market Regulation, Commission, dated June 22, 1995 ("Amendment No. 1").

The types of "market conditions" arising in a no-CBOE market that would be sufficient under proposed Rule 6.48(b)(ii) to justify cancellation of the CBOE leg(s) of a multi-market order, include, but are not limited to, a sudden change in the price of the underlying Securities prior to execution of the stock trade, and a trading halt or systems failure that precludes immediate execution of the stock trade at the agreed upon price. *See* Letter from Dan Schneider, Attorney, Schiff Hardin & Waite, to John Ayanian, Attorney, OMS, Market Regulation, Commission, dated June 30, 1995 ("June 30 Letter").

[4] *See* Securities Exchange Act Release No. 36082 (August 10, 1995), 60 FR 42636.

[5] A stock-option order is an order to buy or sell a stated number of units of an underlying or a related security coupled with either (a) the purchase or sale of option contract(s) of the same series on the opposition side of the market representing the same number of units of the underlying or related security or (b) the purchase and sale of an equal number of put and call option and numbers of units of the underlying or related Securities, on the opposite aside of the market representing in the aggregate twice the number of units of the underlying related security. *See* CBOE Rule 1.1.(ii).

[6] The CBOE believes that paragraph (iii) of proposed Rule 6.48(b) makes it clear that the proposed rule change will not apply to bids or offers included in combination orders that entail the purchase or sale of index options.

[7] The CBOE represents that it expects the order for the non-option leg(s) of the multi-market order will be enacted concurrently with the execution of the option leg of the order. Additionally, the CBOE represents that it will advise members of this expectation in a Regulatory Circular. *See* Letter from Barbara J. Casey, Vice President, Department of Market Regulation, CBOE, to John Ayanian, Attorney, OMS, Market Regulation, Commission, dated November 7, 1995 ("November 7 Letter").

III. Commission Finding and Conclusions

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5) of the Act.[8] Specifically, the Commission finds that the Exchange's proposal to specify certain duties of CBOE members in effecting an options transaction on the CBOE that is part of a stock-option or stock-option combination order strikes a reasonable balance between the Commission's mandate under Section 6(b)(5) to remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest.

The Commission believes that it is appropriate for the Exchange to clarify the conditions and requirements that CBOE members must observe when executing and cancelling multi-market orders. The Commission understands that complex multi-market orders have become more prevalent, and believes that the proposed rule change addresses the special considerations that apply when executing and cancelling such transactions. The Commission believes that it is reasonable to require a member announcing a multi-market order to a trading crowd to disclose all legs of the order and identify the specific markets and prices at which the non-option leg(s) are to be filled.

Moreover, the Commission believes that it is reasonable to require the parties to the transaction to take steps immediately to transmit the non-option leg(s) to the identified markets for execution. The Commission understands that if a party to the transaction does not take steps immediately to execute the non-option leg(s) of a multi-market order, that party is subject to CBOE Rule 4.1, which prohibits conduct inconsistent with just an equitable principles of trade. Accordingly, the Commission believes that by clarifying the duties and obligations regarding the execution of multi-market orders, this proposal will help to ensure that the non-option leg(s) of a multi-market order are sent immediately to the identified markets for execution.[9]

The Commission also believes that members executing multi-market orders should only be allowed to cancel the option leg(s) of the stock-option transaction under limited circumstances. The Exchange proposes that a trade may be cancelled at the request of any member that is a party to that trade only if market conditions in any non-Exchange market prevent the execution of the non-option leg(s) at the price(s) agreed upon.[10] The types of "market conditions" arising in a non-CBOE market that would be sufficient under proposed Rule 6.48(b)(ii) to justify cancellation of the CBOE leg(s) of a multi-market order, include a sudden change in the price of the underlying securities prior to execution of the stock trade, and a trading halt or systems failure that precludes immediate execution of the stock trade at the agreed upon price.[11]

The Commission also notes that the priority principles regarding stock-option, and stock-option combination orders, apply to transactions covered by this proposed rule change.[12] In light of the priorities afforded to such transactions, the Commission believes that the option leg(s) of a multi-market order should be allowed to be cancelled only under the limited circumstances described above. The Commission believes that the Exchange's proposed rule change appropriately addresses this concern.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[13] that the proposed rule change (File No. SR–CBOE–95–16), as amended, is approved.

For the Commission, by the Division of Market Regulation, prusuant to delegated authority.[14]

Margaret H. McFarland,

Deputy Secretary.

[11] *See* June 30 Letter, *supra* note 3.

[12] Under CBOE Rule 6.45, stock-option orders, as defined in CBOE Rule 1.1(ii)(a), may attain priority over the trading crowd (but never over the limit order book) when the option leg trades at a price that is at least equivalent to quotes in the crowd. Additionally, stock-option combinations will take priority over orders in the crowd when all legs of the combination trade at a price that is at least equivalent to quotes in the crowd. Stock-option combinations will also attain priority over the limit order book, when one leg of the transaction trades at a price that is better than the corresponding bid or offer in the book and the remaining legs of the transaction trades at a price that is at least equivalent to the established bids or offers in the crowd or book. *See* Securities Exchange Act Release No. 34764 (September 30, 1994), 59 FR 51223 (October 7, 1994).

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Rearranging of Rules and New Rule Numbering System

November 27, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 3, 1995 the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is herewith filing a proposed rule change to its Rules and various interpretations thereto. This and other material now contained in the NASD Manual is proposed to be rearranged, so that the complete contents of the Manual will be replaced. A binder containing the complete text of the revised Rules of the Association as well as a chart converting the old manual into its revised format is available for inspection at the Commission's Public Reference Room. A summary of the order of material filed with the Commission is reprinted below:

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The proposed rule change is part of a multi-phase program in which the NASD is reorganizing the NASD Manual to make it more usable by members and other users of the Manual. The present rule change is a non-substantive reordering of the existing Rules, interpretations, and other provisions of the Manual to establish a more logical progression of Rules within the Manual. All Rules in the NASD Manual, including not only the current Rules of Fair Practice but also such specialized Rules as the PORTAL Rules, Nasdaq Rules, Code of Arbitration Procedure, and so forth, have been numbered consecutively throughout the Manual and considered together as "Rules." In addition, a common numbering and naming scheme for subdivisions within a Rule has been used. Discussion of specific changes is set forth below.

(1) Rules Terminology. The change in terminology from "Rules of Fair Practice" to "Rules" has been made in all Rules in which such terminology appears. As described above, the Rules now include not only the former Rules of Fair Practice, but also all other Rules and Codes of the NASD, by whatever name they have been known. Rules and other material that did not previously have titles have been given descriptive titles as part of the revision.

(2) Categories. The Rules are no longer divided into Articles, but are numbered from beginning to end. Major categories, numbered in the thousands, include Membership and Registration Rules, Conduct Rules, Marketplace Rules, and Procedural Rules. Subcategories of Rules are numbered in the hundreds or tens, as appropriate, with individual Rules at the tens or unit level. Where individual Rules that would normally be numbered at the tens level exceed the numbers available, they have been numbered at the unit level instead, to allow adequate numbers for each Rule.

(3) Paragraph Numbering. A uniform method of numbering the various paragraph levels within Rules have been used throughout. Thus, subdivisions within a Rule have been renumbered as follows:

(a)
(1)
(A)
(i)
a.
1.
A.
i.

Where there were unnumbered subparagraphs within a Rule, they have generally been given numbers to facilitate reference to them.

(4) Names of Rule Subdivisions. The terms used to refer to parts of Rules have been made uniform as follows:

Rule 1001
paragraph (a)
subparagraph (1)
subparagraph (A)
subparagraph (i)
etc.

In referring to a provision that has multiple levels, the name of the largest level has been used wherever possible, such as Rule 1000(a)(1), or paragraph (a)(1)(A). In this method, the term "subparagraph" is normally used only when referring to lower levels within the same Rule, as in "subparagraph (i) of this Rule," or to multiple subparagraphs, as in "subparagraphs (2)(A) and (B) of paragraph (a)."

(5) Interpretive Material. Some Interpretations have been converted to Rule form as part of this rule change. Interpretative material that has not been converted to Rule form, including Interpretations, Resolutions, Explanations, Policies, and Guidelines, has been given the designation "IM," for "Interpretative Material." This was done to provide uniformity to the various designations in the current Manual. All Interpretive Material in the Rules of the Association is numbered with "IM–" followed by the number(s) of the Rule or Rules it interprets. Interpretive Material in the By-Laws and Schedules A and B has been left as it is currently, since those sections are not part of the Rules numbering scheme.

(6) Terms and Abbreviations. The terms "Association," "Corporation" and "NASD" are presently used alternately in some of the Association's existing Rules when referring to the NASD. To establish uniformity, the term "Association" has been used throughout the Rules when referring to the NASD. The By-laws will continue to use the term "Corporation." When reference is made in the Rules or Interpretative Material to the "Securities and Exchange Commission," it has been shortened to "SEC" or "Commission." In the same way, other terms that are adequately defined in the By-Laws or the definitional portion of the Rules (Rule 0120) have not been redefined in individual Rules. Therefore, such terms as "the Act" have been used without further description unless such usage would be confusing in the particular context. References to SEC Rules are preceded by the designation "SEC," such as in "SEC Rule 11Aa3–2," in order to avoid confusion with the Rules of the Association. Code of Federal Regulations (CFR) citations to well-known SEC rules have been deleted. They were infrequently used in the Manual and are not thought to be helpful for most users of the Manual; therefore, only the SEC Rule number has been used in most instances.

(7) Indentation. A common system of indentation and paragraph structure has been used within the Rules, whereby each succeeding subdivision level is indented about five spaces further than the next higher level. This system, together with the new paragraph numbering system, should make it easier for Manual users to determine which provisions are subsidiary to others.

(8) Technical Corrections. In several instances, a careful review of the Rules for this rule change revealed typographical, grammatical, or cross-referencing errors, which were corrected when it was obvious to NASD staff that an error had occurred. Many such corrections have been footnoted in the rule change. Minor changes to punctuation and capitalization have also been made for consistency.

The NASD plans to train key staff members in the above style and numbering conventions, so that future rule changes will conform to the new style and keep the Manual clear and consistent.

(b) The NASD believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[1] in that the proposed rule change does not alter the substance of the NASD's By-Laws or Rules; rather, the proposed rule change simplifies the layout of the NASD Manual and makes it easier to use. Making the NASD Manual easier to use enhances the protection of investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Association does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statements on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No comments were solicited or received by the NASD.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

[1] 15 U.S.C. 78o–3.

available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by December 26, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the New York Stock Exchange, Inc. Relating to the Specifications and Content Outline for the Japan Module of the General Securities Registered Representative Examination (Series 47)

November 27, 1995.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on October 25, 1995, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange has filed with the Commission specifications and a content outline for the Japan module (Series 47) of the General Securities Registered Representative Examination (Series 7).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Presently, registered representatives in Japan who wish to sell securities in the United States must qualify as registered representatives in the U.S. by successfully completing the Series 7. In Japan, U.S. and other foreign securities professionals may qualify as securities sales representatives by passing a qualification exam [2] or by meeting experiential requirements. In order to reduce duplication of qualification requirements, the Exchange has developed the Series 47 as a subset of the Series 7 to test the Japanese registered representatives' knowledge of U.S. securities laws, markets, investment products, and sales practices. Qualified Japanese securities professionals can satisfy the Exchange's examination requirements by obtaining a passing score on the Series 47 module.

Since 1991, the Exchange has provided a similar, 90-question qualification vehicle for United Kingdom approved registered representatives wishing to sell securities in the U.S., the Limited Registered Representative Examination (Series 17).[3] The Exchange also has filed for Commission approval examination specifications and a content outline for a Canadian module of the General Securities Registered Representatives Examination (Series 37 & Series 38).[4] The Series 47 module has been developed following procedures like those used for the Series 17 and 37 modules.

To determine the applicable Series 7 content areas not covered in the qualification examinations for Japanese registered representatives, the Exchange's staff conducted a thorough review of the content covered by the Securities Sales Representative Qualification Examination and supporting materials, including translations of Japan's securities laws and regulations. in addition, the Exchange's staff exchanged detailed correspondence and had discussions with the staff of the Japan Securities Dealers Association.[5] Through this review, the Exchange's staff identified for inclusion in the Series 47 those topics that are included in the Series 7 but are not covered, or covered in sufficient detail, in the Japanese qualification materials. As a result, the Series 47 consists of 160 questions covering subject matter that is unique to the U.S. The topics are weighted in the module to correspond to the relative emphasis given these topics in the Series 7.

The Exchange understands that the National Association of Securities Dealers, Inc. ("NASD") will submit a proposal to the Commission that would amend the NASD's rules such that the Series 47 would satisfy the NASD's qualification requirements. The Series 47, however, will not qualify Japanese securities professionals to transact business in municipal securities. Any individuals wishing to do so will be required to pass the Series 52 (Municipal Securities Representative Examination).

2. Statutory Basis

The statutory basis for the Series 47 is in Section 6(c)(3)(B)[6] of the Act. Under this section, it is the Exchange's responsibility to prescribe standards of training, experience, and competence for persons associated with Exchange members and member organizations. Pursuant to this statutory obligation, the Exchange has developed examinations that are administered to establish that persons associated with Exchange members and member organizations have attained specified levels of competence and knowledge.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change will impose no burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this notice in the **Federal Register** or within such other period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the New York Stock Exchange. All submissions should refer to File No. SR–NYSE–95–36 and should be submitted by December 26, 1995.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[1]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to Trader Registration and the Use of the Series 7A Examination

November 27, 1995.

On September 22, 1995, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, a proposed rule change to require registration of persons who solicit or handle business in securities and are compensated by a member or participant organization for which the Phlx is the Designated Examining Authority ("DEA"). On October 6, 1995, the Exchange submitted to the Commission Amendment No. 1 to the proposed rule change amending paragraph (c)(ii) of Rule 604, which names the Series 7A as the appropriate examination for Limited Registration/Floor Members,[1] to clarify that this is the appropriate examination for such members only, not all members who conduct a public business from the equity trading floor.[2]

The proposed rule change and Amendment No. 1 were published for comment in Securities Exchange Act Release No. 36395 (October 20, 1995), 60 FR 54904 (October 26, 1995). No comments were received on the proposal.

Currently, the Exchange requires Series 7 Registered Representatives to register with the Exchange on Form U–4 pursuant to Rule 604(a) and Limited Registration/Floor Members to register pursuant to Rule 604(c). However, there is no requirement for proprietary "upstairs" traders (*i.e.*, those who trade for the firm's own account) to register with the Exchange. This proposal adopts such a requirement as Rule 604(d). Similar to Rules 604 (a) and (c), the proposal would require registration on Form U–4. This form is currently used in the Exchange's membership application process for prospective members or participants, as well as the officers, shareholders and directors of such organizations. In order to prevent duplicative registration, the proposal would not apply to persons who are otherwise registered with the Exchange.

The proposed rule change also seeks to amend paragraph (c)(ii) of Rule 604. Although the organization of Rule 604, as well as the intent behind its adoption, indicates that paragraph (c) and subparagraph (ii) thereunder apply only to Limited Registration/Floor Members,[3] on its face the text of 604(c)(ii) can be construed to apply to all members conducting a public business. The amendment adds limiting language to Rule 604(c)(ii) to clarify that the Series 7A is the appropriate examination for Limited Registration/Floor Members, not all members conducting a public business from the equity trading floor.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b).[4] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to promote just and equitable principles of trade, to prevent fraudulent and manipulative acts, and, in general, to protect investors and the public.

The Commission believes that requiring a firm's proprietary traders to register with the Exchange will aid in the prevention of fraudulent and manipulative acts by allowing the Exchange to maintain a complete record of those trading for a member or participant organization, not just persons handling customer accounts. The Form U–4 will provide background information on such traders, as well as a basis for further Exchange research if needed, thereby enhancing the Exchange's examination program.

The Commission also believes that the amendment to Rule 604(c)(ii) will enhance member compliance with this rule. By specifically naming floor members as the parties for whom the

[1] A Limited Registration/Floor Member is a member who conducts a public business that is limited to accepting orders from professional customers for execution on the trading floor. The Series 7A examination is a module of the Series 7 (the General Securities Registered Representative Examination) developed to test the knowledge of relevant securities laws and Exchange rules required of such members. *See* Securities Exchange Act Release No. 32698 (July 29, 1993), 58 FR 41539 (August 4, 1993) (File No. SR–NYSE–93–10).

[2] *See* letter from Gerald O'Connell, First Vice President Market Regulation and Trading Operations, Phlx, to Glen Barrentine, Senior Counsel, SEC, dated October 3, 1995. In Amendment No. 1 the Exchange explained the purpose of its proposed amendment to Rule 604(c)(ii).

[3] *See* Securities Exchange Act Release No. 35258 (January 20, 1995), 60 FR 5449 (January 27, 1995) (File No. SR–Phlx–94–15) (order approving the Phlx's adoption of the Limited Registration/Floor Member status and its use of the Series 7A for such members).

[4] 15 U.S.C. 78f(b).

Series 7A is the appropriate examination, members will be able to readily discern whether the Series 7A requirement is applicable to them.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[5] that the proposed rule change (SR–Phlx–95–58) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[6]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Investment Company Act Rel. No. 21543; 812–8972]

Allied Capital Corporation; Notice of Application

November 27, 1995.

AGENCY: Securities and Exchange Commission (the "SEC").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "Act").

APPLICANT: Allied Capital Corporation (the "Company").

RELEVANT ACT SECTIONS: Order requested under section 61(a)(3)(B)(i)(II) of the Act.

SUMMARY OF APPLICATION: The Company requests an order approving a proposal to issue stock options to directors who are not officers or employees of the Company.

FILING DATE: The application was filed on May 5, 1994 and amended on June 24, 1994, July 31, 1995, and November 22, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 22, 1995, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reasons for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicant, 1666 K Street, N.W., Ninth Floor, Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Marilyn Mann, Special Counsel, at (202) 942–0582, or Robert A. Robertson, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. The Company is a closed-end management investment company that has elected to be regulated as a business development company under the Act. It has two active wholly-owned subsidiaries: Allied Investment Corporation ("Allied Investment") and Allied Capital Financial Corporation ("Allied Financial"), which are registered under the Act as closed-end investment companies. Allied Investment is licensed by the U.S. Small Business Administration (the "SBA") as a small business investment company, and Allied Financial is licensed by the SBA as a specialized small business investment company.

2. The Company invests in and lends to privately-owned small businesses directly and through its wholly-owned subsidiaries. It provides debt, mezzanine and equity financing for small growth companies, for leveraged buyouts of such companies, for note purchases and loan restructurings and for special situations, such as acquisitions, buyouts, recapitalizations and bridge financings of such companies. The Company also provides financing to private and small public companies through its purchase of convertible debentures. The Company's investments generally take the form of loans with equity features, such as warrants or conversion privileges. The typical maturity of such a loan made by the Company is seven years, although loan maturities vary. The Company also makes senior loans without equity features. The Company's emphasis is on low- to medium-technology businesses, such as broadcasting, packaging manufacturers, franchise operations, speciality manufacturing, environmental concerns, wholesale distribution and commodities storage and retail operations. The Company makes available significant managerial assistance to its portfolio companies, as do the Company's subsidiaries.

3. The Company and its investment adviser have entered into an investment advisory agreement that provides that the fees paid and payable to the investment adviser are based on the value of the Company's assets, and do not depend in any respect upon any capital gains of the Company or the capital appreciation of any of its funds. The Company does not have a profit-sharing plan described in section 57(n) of the Act.

4. The Company's stock option plan (the "Option Plan") was adopted and approved in 1983, and has been amended on several occasions. In February 1994, the Company's board of directors adopted further amendments to the Option Plan, which were approved by the Company's stockholders in May 1994. Those amendments increased the number of shares reserved for issuance under the Option Plan and provided for the automatic, one-time grant to each person who serves as a director of the Company and is not an officer or employee of the Company or an employee of its investment adviser (each, a "non-officer director") of an option to purchase 10,000 shares of the Company's common stock.

5. The Option Plan provides for an automatic, one-time option grant to each person serving as a non-officer director on the date on which the issuance of options to non-officer directors is (i) authorized by the stockholders of the Company or (ii) approved by SEC order, whichever is later. The Option Plan also provides for an automatic, one-time option grant to each person who thereafter is elected initially as a non-officer director. Any automatic, one-time grant to a non-officer director will entitle the recipient to acquire 10,000 shares of the Company's common stock at an exercise price that is not less than the fair market value[1] of a share of the Company's common stock at the date of issuance of the option. Each option vests in three annual installments, with the first installment vesting on the date of issuance of the option and the other two installments vesting on the first and second anniversaries of the date of issuance of the option. Each option expires on the earliest of (a) the tenth anniversary of its date of issuance, (b) 60 days after the optionee ceases to serve as a director of the Company for any reason other than death or permanent and total disability, (c) one year after the date on which the optionee dies or becomes permanently and totally disabled, or (d) the date on which the option is fully exercised. The Option Plan provides that all such options are non-transferable, except for disposition by will or intestacy, and are exercisable during the life of the optionee only by him or her.

6. The Company currently has five non-officer directors. Upon the SEC's issuance of an order approving the option grants, those persons will receive options covering an aggregate of 50,000 shares. The 10,000 shares covered by each grant to a non-officer director would represent 0.16%, and the 50,000 shares covered by the grants to the five current non-officer directors would represent 0.81%, of the 6,174,047 shares of the Company's common stock outstanding as of June 30, 1995. As of June 30, 1995, there was an aggregate of 866,572 shares subject to then-outstanding options granted to officers of the Company under the Option Plan, and 84,951 shares available for future grants under the Option Plan (not including the 50,000 shares underlying the options proposed to be issued to the current non-officer directors). The shares subject to such then-outstanding options represent 14.03% of the Company's common stock outstanding on June 30, 1995; if those shares are increased by the 50,000 shares underlying the options proposed to be grated to current non-officer directors, they represent 14.85% of the Company's shares then outstanding. The Company has no other outstanding options, warrants or rights.

7. Non-officer directors are actively involved in managing the Company and monitoring the operation of its portfolio companies. Each non-officer director serves on at least one committee of the Company's board, and serves as a director of at least one of the Company's subsidiaries. In addition, many of the non-officer directors have experience in the industries in which the Company regularly invests, and provide analysis and advice to the Company regarding prospective investments and in managing the portfolio companies in which the Company has invested.

8. Every investment transaction by the Company requires prior express approval by its board of directors. Each director is provided, well in advance of each board meeting, a detailed narrative outlining the format of each proposed investment, restructuring and follow-on financing transaction under consideration. Whether in the context of a new investment or restructuring, follow-on financing, or disposition of an existing investment, the Company's directors analyze the reports and materials provided, discuss questions and issues with the responsible investment officer and with each other and make and approve recommendations with respect to each such investment decision.

9. The Company also relies upon its directors to review and consider the best use of the Company's resources. The directors review and evaluate reports of outstanding commitments, required reserves for follow-on financing and funds available for future investment for the purpose of evaluating and making these resource allocations. At least once each calendar quarter, directors of the Company review portfolio investments that are non-performing or performing inadequately and evaluate the best course of action for the Company to take under the circumstances. In addition, on a calendar quarter basis, the directors of the Company undertake a good faith valuation of the Company's investments for which no independent market valuations are available, which constitute substantially all of the Company's investments.

10. Non-officer directors frequently advise the investment officers serving the Company in the due diligence process regarding any proposed investment in companies operating in industries of which they have knowledge and expertise. Non-officer directors with industry or other relevant expertise also participate in the analysis of portfolio companies that are performing below expectations or are in a work-out situation.

11. Non-officer directors participate in the analysis of portfolio companies that are performing at or above expectations, and advise the investment officers serving the Company in efforts to monitor or improve performance by such portfolio companies, improve banking or other commercial relationships and consider or prepare for public offerings, acquisitions or the like.

12. For these services, the Company pays its non-officer directors (as well as its officer-directors) $1,000 for each meeting of its Board or any committee thereof[2] attended. Allied Investment and Allied Financial each also pays its directors $1,000 for each meeting of its board of directors that the director attends, although a director is not paid for attending such meetings of the Allied Investment or Allied Financial Boards on the same day as a meeting of the Company's Board.

Applicant's Legal Analysis

1. Section 61(a)(3)(B)(i)(II) of the Act permits a business development company to issue options to purchase its voting securities to its non-officer, non-employee directors pursuant to an executive compensation plan subject to certain requirements, which include the proposal to issue such options being authorized by the stockholders of the company and approved by the SEC on the basis that the terms of the proposal are fair and reasonable and do not involve overreaching of such company or its stockholders.

2. The Company believes that its proposal to issue options to its non-officer directors satisfies all of such statutory requirements other than SEC approval (including the requirement that if the amount of voting securities that would result from the exercise of outstanding options issued to the Company's directors, officers, and employees would exceed 15% of the Company's outstanding voting securities, then the total amount of voting securities that would result from the exercise of all outstanding options at the time of issuance may not exceed 20% of the outstanding voting securities of the Company) and that granting each non-officer director an option under the Option Plan is fair and reasonable. Non-officer directors provide to the Company skills and experience necessary for management and oversight of the Company's investments and operations, and often have specific experience with respect to industries in which the Company makes a significant number of investments. The Company believes that its ability to make an automatic option grant under the Option Plan to non-officer directors provides a means of retaining the services of its current non-officer directors and of attracting qualified persons to serve as non-officer directors in the future. The Company also believes that such options are a necessary adjunct to its directors' fees to provide fair and reasonable compensation for the services and attention devoted by the non-officer directors. Each current non-officer director makes a significant contribution to the management of the Company's business and to analysis and supervision of its portfolio investments. The Company believes that any non-officer directors who are elected initially after issuance of the SEC's order will provide similar services and devote similar time and attention to serving the Company.

3. The projected compensatory value of an automatic, one-time grant to the Company's non-officer directors of a

---

[5] 15 U.S.C. 78s(b)(2).

[6] 17 CFR 200.30–3(a)(12).

[1] For purposes of the Option Plan, the fair market value of the shares is defined as the closing sale price as quoted on the National Association of Securities Dealers Automated Quotation System for the date of issuance of the option.

[2] Non-officer directors are paid $500 for participation in any committee meeting held on the same day as a meeting of the Company's Board.

stock option to purchase 10,000 shares at fair market value is well within the range of reasonable director compensation in consideration of the time commitment described above, especially given that realization of such compensation is contingent upon the Company's market performance. Automatic, one-time option grants to current and future non-officer directors permit the Company to devote its cash resources to additional investments and not to increases in directors' fees to retain qualified non-officer directors or to attract replacements. Most importantly, as a method of compensation which is contingent on the Company's stock performance, such stock option awards serve the best interest of the stockholders of the Company by reinforcing the alignment of the interests of non-officer directors and stockholders of the Company.

4. For all of these reasons, the Company believes that providing for the automatic, one-time grant of stock options to purchase 10,000 shares at fair market value to each of the Company's current and future non-officer directors is fair and reasonable and does not involve overreaching of the Company or its stockholders.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "Act").

APPLICANT: Allied Capital Corporation II (the "Company").

RELEVANT ACT SECTIONS: Order requested under section 61(a)(3)(B)(i)(II) of the Act.

SUMMARY OF APPLICATION: The Company requests an order approving a proposal to issue stock options to directors who are not officers or employees of the Company.

FILING DATE: The application was filed on May 12, 1994 and amended on June 24, 1994, July 31, 1995, and November 22, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 22, 1995, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reasons for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicant, 1666 K Street, N.W., Ninth Floor, Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Marilyn Mann, Special Counsel, at (202) 942–0582, or Robert A. Robertson, Branch Chief, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. The Company is a closed-end management investment company that has elected to be regulated as a business development company under the 1940 Act. It has two wholly-owned subsidiaries: Allied Investment Corporation II ("Allied Investment II") and Allied Financial Corporation II ("Allied Financial II"), which are registered under the Act as closed-end investment companies. Allied Investment II is licensed by the U.S. Small Business Administration (the "SBA") as a small business investment company ("SBIC"). Allied Financial II has applied to the SBA to be licensed as a specialized small business investment company ("SSBIC"), and makes certain investments pending issuance of its license as a SSBIC.

2. The Company invests in and lends to privately-owned small businesses directly and through its subsidiaries. It provides debt, mezzanine and equity financing for small growth companies, for leveraged buyouts of such companies, for note purchases and loan restructurings and for special situations, such as acquisitions, buyouts, recapitalizations and bridge financings of such companies. The Company also provides financing to private and small public companies through its purchase of convertible debentures. The Company's investments generally take the form of loans with equity features, such as warrants or conversion privileges. The Company also makes senior loans without equity features. The Company's emphasis is on low- to medium-technology businesses, such as broadcasting, manufacturing, wholesale distribution and commodities storage, software and service providers and wholesale and retail operations. The Company makes available significant managerial assistance to its portfolio companies, as do the Company's subsidiaries.

3. The Company and its investment adviser have entered into an investment advisory agreement that provides that the fees paid and payable to the investment adviser are based on the value of the Company's assets and do not depend in any respect upon any capital gains of the Company or the capital appreciation of any of its funds. The Company does not have a profit-sharing plan described in Section 57(n) of the Act.

4. The Company's stock option plan (the "Option Plan") was adopted and approved in 1990, and has been amended on several occasions. In February 1994, the Company's Board of Directors adopted further amendments to the Option Plan, which were approved by the Company's stockholders in May 1994. Those amendments increased the number of shares reserved for issuance under the Option Plan and provided for the automatic, one-time grant to each person who serves as a director of the Company and is not an officer or employee of the Company or an employee of its investment adviser (each, a "non-officer director") of an option to purchase 10,000 shares of the Company's common stock.

5. The Option Plan provides for an automatic, one-time option grant to each person serving as a non-officer director on the date on which the issuance of options to non-officer directors is (i) authorized by the stockholders of the Company or (ii) approved by SEC order, whichever is later. The Option Plan also provides for an automatic, one-time option grant to each person who thereafter is elected initially as a non-officer director. Any automatic, one-time grant to a non-officer director will entitle the recipient to acquire 10,000 shares of the Company's common stock at an exercise price that is not less than the fair market value of a share of the Company's common stock at the date of issuance of the option. Each option vests in three annual installments, with the first installment vesting on the date of issuance of the option and the other two installments vesting on the first and second anniversaries of the date of the issuance of the option. Each option expires on the earliest of (a) the tenth anniversary of its date of issuance, (b) 60 days after the optionee ceases to serve as a director of the Company for any reason other than death or permanent and total disability, (c) one year after the date on which the optionee dies or becomes permanently and totally disabled, or (d) the date on which the option is fully exercised. The Option Plan provides that all such options are non-transferable, except for disposition by will or intestacy, and are exercisable during the life of the optionee only by him or her.

6. The Company currently has five non-officer directors. Upon the Commission's issuance of an order approving the option grants under the Option Plan to non-officer directors, those persons will receive options covering an aggregate of 50,000 shares. The 10,000 shares covered by each grant to a non-officer director would represent 0.14%, and the 50,000 shares covered by the grants to the five current non-officer directors would represent 0.72%, of the 6,938,191 shares of the Company's common stock outstanding as of June 30, 1995. As of June 30, 1995, there was an aggregate of 719,600 shares subject to then-outstanding options granted to officers of the Company under the Option Plan, and 317,744 shares available for future grants under the Option Plan (not including the 50,000 shares underlying the options proposed to be issued to the current non-officer directors). The shares subject to such then-outstanding options represent 10.37% of the Company's common stock outstanding on June 30, 1995; if those shares are increased by the 50,000 shares underlying the options proposed to be granted to current non-officer directors, they represent 11.09% of the Company's shares then outstanding. The Company has no other outstanding options, warrants or rights.

7. Non-officer directors are actively involved in managing the Company and in monitoring of the operation of its portfolio companies. Each non-officer director serves on at least one committee of the Company's Board, and serves as a director of at least one of the Company's subsidiaries. In addition, many of the non-officer directors have experience in the industries in which the Company regularly invests, and provide analysis and advice to the Company regarding prospective investments and in managing the portfolio companies in which the Company has invested.

8. Every investment transaction by the Company requires prior express approval by its board of directors. Each director is provided, well in advance of each board meeting, a detailed narrative outlining the format of each proposed investment, restructuring and follow-on financing transaction under consideration. Whether in the context of a new investment or restructuring, follow-on financing, or disposition of an existing investment, the Company's directors analyze the reports and materials provided, discuss questions and issues with the responsible investment officer and with each other and make and approve recommendations with respect to each such investment decision.

9. The Company also relies upon its directors to review and consider the best use of the Company's resources. The directors review and evaluate reports of outstanding commitments, required reserves for follow-on financing and funds available for future investment for the purpose of evaluating and making these resource allocations. At least once each calendar quarter, directors of the Company review portfolio investments that are non-performing or performing inadequately and evaluate the best course of action for the Company to take under the circumstances. In addition, on a calendar quarter basis, the directors of the Company undertake a good faith valuation of the Company's investments for which no independent market valuations are available, which constitute substantially all of the Company's investments.

10. Non-officer directors frequently advise the investment officers serving the Company in the due diligence process regarding any proposed investment in companies operating in industries of which they have knowledge and expertise. Non-officer directors with industry or other relevant expertise also participate in the analysis or portfolio companies that are performing below expectations or are in a work-out situation.

11. Non-officer directors participate in the analysis of portfolio companies that are performing at or above expectations, and advise the investment officers serving the Company in efforts to monitor performance of such portfolio companies, improve banking or other commercial relationships and consider or prepare for public offerings, acquisitions or the like.

12. For these services, the Company pays its non-officer directors (as well as its officer-directors) $1,000 for each meeting of its Board or any committee thereof[1] attended. Allied Investment II and Allied Financial II each also pays its directors $1,000 for each meeting of its board of directors that the director attends, although a director is not paid for attending such meetings of the Allied Investment II or Allied Financial II Boards on the same day as a meeting of the Company's Board.

Applicant's Legal Analysis

1. Section 61(a)(3)(B)(i)(II) of the Act permits a business development company to issue options to purchase its voting securities to its non-officer, non-employee directors pursuant to an executive compensation plan subject to certain conditions, which include the proposal to issue such options being authorized by the stockholders of the company and approved by the SEC on the basis that the terms of the proposal are fair and reasonable and do not involve overreaching of such company or its stockholders.

2. The Company believes that its proposal to issue options to its non-officer directors satisfies all of such statutory conditions other than SEC approval (including the requirement that if the amount of voting securities that would result from the exercise of outstanding options issued to the Company's directors, officers, and employees would exceed 15% of the Company's outstanding voting securities, then the total amount of voting securities that would result from the exercise of all outstanding options at the time of issuance may not exceed 20% of the outstanding voting securities of the Company) and that granting each non-officer director an option under the Option Plan is fair and reasonable. Non-officer directors provide to the Company skills and experience necessary for management and oversight of the Company's investments and operations, and often have specific experience with respect to industries in which the Company makes a significant number of investments. The Company believes that its ability to make an automatic option grant under the Option Plan to non-officer directors provides a means of retaining the services of its current non-officer directors and of attracting qualified persons to serve as non-officer directors in the future. The Company also believes that such options are a necessary adjunct to its directors' fees to provide fair and reasonable compensation for the services and attention devoted by the non-officer

[1] Non-officer directors are paid $500 for participation in any committee meeting held on the same day as a meeting of the Company's Board.

directors. Each current non-officer director makes a significant contribution to the management of the Company's business and to analysis and supervision of its portfolio investments. The Company believes that any non-officer directors who are elected initially after issuance of the SEC's order will provide similar services and devote similar time and attention to serving the Company.

3. The projected compensatory value of an automatic, one-time grant to the Company's non-officer directors of a stock option to purchase 10,000 shares at fair market value is well within the range of reasonable director compensation in consideration of the time commitment described above, especially given that realization of such compensation is contingent upon the Company's market performance. Automatic, one-time option grants to current and future non-officer directors permit the Company to devote its cash resources to additional investments and not to increases in directors' fees to retain qualified non-officer directors or to attract replacements. Most importantly, as a method of compensation which is contingent on the Company's stock performance, such stock option awards serve the best interest of the stockholders of the Company by reinforcing the alignment of the interests of non-officer directors and stockholders of the Company.

4. For all of these reasons, the Company submits that providing for the automatic, one-time grant of stock options to purchase 10,000 shares at fair market value to each of the Company's current and future non-officer directors is fair and reasonable and does not involve overreaching of the Company or its stockholders.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 21542; 812-9010]

Allied Capital Lending Corporation; Notice of Application

November 27, 1995.

AGENCY: Securities and Exchange Commission (the "SEC").

ACTION: Notice of application for an order under the Investment Company Act of 1940 (the "Act").

APPLICANT: Allied Capital Corporation (the "Company").

RELEVANT ACT SECTIONS: Order requested under section 61(a)(3)(B)(i)(II) of the Act.

SUMMARY OF APPLICATION: The Company requests an order approving a proposal to issue stock options to its directors who are not officers or employees of the Company.

FILING DATE: The application was filed on May 20, 1994 and amended on June 24, 1994, July 31, 1995, and November 22, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 22, 1995, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reasons for the request, and the issues contested. Persons who wish to be notified of a hearing may request such notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicant, 1666 K Street, N.W., Ninth Floor, Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Marilyn Mann, Special Counsel, at (202) 942-0582, or Robert A. Robertson, Branch Chief, at (202) 942-0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

Applicant's Representations

1. The Company is a closed-end management investment company that has elected to be regulated as a business development company under the Act. The Company is a small business lending company ("SBLC") approved by the U.S. Small Business Administration (the "SBA"). The Company participates in the SBA's section 7(a) guaranteed loan program, under which the SBA will guarantee up to 90% of certain qualifying loans to small business concerns. The Company, through a subsidiary, also provides first mortgage commercial loans in conjunction with the SBA 504 loan program and as companion loans to section 7(a) guaranteed loans.

2. The Company lends to privately-owned small businesses directly. It provides loans to qualifying small businesses to acquire or refinance real estate, machinery or equipment, or to provide working capital. Loans made by the Company are secured by a mortgage or other lien on the assets of the borrower and, frequently, of its principals. The Company's loans are diversified in different industries and geographic regions of the United States. At December 31, 1994, the Company had in its portfolio or was servicing loans to, among others, hotels and motels, restaurants, manufacturers, retail shops, food stores, professional service providers, laundries and cleaners, home furnishings concerns, gasoline stations, business services firms, recreational services providers, automobile exhaust repair shops, personal services providers and automotive repair concerns. The Company makes available significant managerial assistance to companies in its portfolio.

3. As permitted by SBA regulations, the Company systematically sells to investors, without recourse, the guaranteed portions of its loans. Such loan sales generally take place approximately three months after the closing of the loan. The Company continues to service those loans for a servicing fee. At December 31, 1994, the Company was servicing over $116 million aggregate principal amount of loans, of which approximately 72% had been sold to investors.

4. The Company and its investment adviser have entered into an investment advisory agreement that provides that the fees paid and payable to the investment adviser are based on the value of the Company's assets, as determined from time to time, and do not depend in any respect upon any capital gains of the Company or the capital appreciation of any of its funds. The Company does not have a profit-sharing plan described in section 57(n) of the Act.

5. The Company's stock option plan (the "Option Plan") was adopted and approved in 1993. In February 1994, the Company's board of directors adopted amendments to the Option Plan, which were approved by the Company's stockholders in May 1994. Those amendments increased the number of shares reserved for issuance under the Option Plan and provided for the automatic, one-time grant to each person who serves as a director and is not an officer or employee of the Company or an employee of its

investment adviser (each, a "non-officer director"). The grant will consist of giving each non-officer director an option to purchase 10,000 shares of the Company's common stock.

6. The Option Plan provides for an automatic, one-time option grant to each non-officer director on the date on which the issuance of options is (i) authorized by the stockholders of the Company of (ii) approved by SEC order, whichever is later. The Option Plan also provides for an automatic, one-time option grant to each person who thereafter is elected initially as a non-officer director. Any automatic, one-time grant to a non-officer director will entitle the recipient to acquire 10,000 shares of the Company's common stock at an exercise price that is not less than the fair market value of a share of the Company's common stock at the date of issuance of the option or $15.00 per share (the Company's initial public offering price), whichever is greater. Each option vests in three annual installments, with the first installment vesting on the date of issuance of the option and the other two installments vesting on the first and second anniversaries of the date of issuance of the option. Each option expires on the earliest of (a) the tenth anniversary of its date of issuance, (b) 69 days after the optionee ceases to serve as a director of the company for any other reason other than death or permanent and total disability, (c) one year after the date on which the optionee dies or becomes permanently and totally disabled, or (d) the date on which the option is fully exercised. The Option Plan provides that all such options are non-transferable, except for disposition by will or intestacy, and are exercisable during the life of the optionee only by him or her.

7. The Company currently has six non-officer directors. Upon the SEC's issuance of an order approving the option grants, those persons will receive options covering an aggregate of 60,000 shares. The 10,000 shares covered by each grant to a non-officer director would represent 0.23%, and the 60,000 shares covered by the grants to the six current non-officer directors would represent 1.37%, of the Company's 4,377,334 shares outstanding as of June 30, 1995. As of June 30, 1995, there was an aggregate of 433,290 shares subject to then-outstanding options granted to officers of the Company under the Option Plan, and 11,570 shares available for future grants under the Option Plan (not including such 60,000 shares underlying the options proposed to be issued to the current non-officer directors). The shares subject to such then-outstanding options represent 9.90% of the Company's common stock outstanding on June 30, 1995; if those shares are increased by the 60,000 shares underlying the options proposed to be granted to current non-officer directors, they represent 11.27% of the company's shares outstanding on that date; if those shares are increased by the shares remaining available for future grants under the Option Plan, they represent 11.53% of the Company's shares outstanding on that date. The Company has no other outstanding options, warrants or rights.

8. Non-officer directors are actively involved in managing the Company and in reviewing the operation of its portfolio companies. Non-officer directors also generally serve on at least one committee of the Company's Board. Due to their experience and expertise, the non-officer directors make material, substantive contributions in managing the business of the company and the operation of its portfolio companies.

9. The Company recruits persons to serve as non-officer directors who possess specialized knowledge and expertise in business development, small business financing techniques or the industries in which the company focuses its investments. Their experience and expertise permits the Company's non-officer directors to provide unique analysis and advice to the Company regarding prospective loans and management of portfolio companies.

10. The Company's directors establish, review and revise, when necessary, a strict set of criteria for many of the loans that are made by the Company. The Company's directors also review those proposed lending transactions that do not fit within that set of criteria. Each director is provided, well in advance of each Board meeting, a detailed underwriting or credit report regarding each lending transaction under consideration. The Company's directors analyze the reports and materials provided, discuss questions and issues with the Company's management, its responsible officer, and with each other and make and approve recommendations with respect to each such lending decision.

11. The Company also relies upon its directors to review and consider the best use of the Company's resources. The directors review and evaluate reports of outstanding commitments and funds available for future lending for the purpose of evaluating and making these resource allocations. At least once each calendar quarter, directors of the Company review portfolio loans that are non-performing or performing inadequately and evaluate the best course of action for the Company to take under the circumstances. On a calendar quarter basis, the directors of the Company also undertake a good faith valuation of the Company's loans in privately-held portfolio companies, which constitute substantially all of the Company's investments, as independent market valuations rarely are available.

12. For these services, the Company pays its non-officer directors (as well as its officer-directors) $1,000 for each meeting of its Board or any committee thereof [1] attended.

Applicant's Legal Analysis

1. Section 61(a)(3)(B)(i)(II) of the Act permits a business development company to issue options to purchase its voting securities to its non-officer, non-employee directors pursuant to an executive compensation plan subject to certain conditions, which include the proposal to issue such options being authorized by the company's stockholders and approved by the SEC on the basis that the terms of the proposal are fair and reasonable and do not involve overreaching of such company or its stockholders.

2. The Company believes that its proposal to issue options to its non-officer directors satisfies all of such statutory conditions other than SEC approval (including the requirement that if the amount of voting securities that would result from the exercise of outstanding options issued to the Company's directors, officers, and employees would exceed 15% of the Company's outstanding voting securities, then the total amount of voting securities that would result from the exercise of all outstanding options at the time of issuance may not exceed 20% of the outstanding voting securities of the Company) and that granting each non-officer director an option under the Option Plan is fair and reasonable. Non-officer directors provide to the Company skills and experience necessary for management and oversight of the Company's loan portfolio and operations, and often have specific experience with commercial lending or with respect to industries in which the Company makes a significant number of loans. The Company believes that its ability to make an automatic option grant under the Option Plan to non-officer directors provides a means of retaining the services of its current non-officer directors and of attracting qualified persons to serve as non-officer

[1] Non-officer directors are paid $500 for participation in any committee meeting held on the same day as a meeting of the Company's board.

directors in the future. The Company also believes that such options are a necessary adjunct to its directors' fees to provide fair and reasonable compensation for the services and attention devoted by the non-officer directors. Each current non-officer director makes a significant contribution to the management of the Company's business and to analysis and supervision of its loan portfolio. The Company believes that any non-officer directors who are elected initially after issuance of the SEC's order will provide similar services and devote similar time and attention to serving the Company.

3. The projected compensatory value of an automatic, one-time grant to the Company's non-officer directors of a stock option to purchase 10,000 shares at fair market value is well within the range of reasonable director compensation in consideration of the time commitment described above, especially given that realization of such compensation is contingent upon the Company's market performance. Automatic, one-time option grants to current and future non-officer directors permit the Company to devote its cash resources to additional investments and not to increases in directors' fees to retain qualified non-officer directors or to attract replacements. Most importantly, as a method of compensation which is contingent on the Company's stock performance, such stock option awards serve the best interest of the Company's stockholders by reinforcing the alignment of the interests of non-officer directors and stockholders of the Company.

4. For all of these reasons, the Company believes that providing for the automatic, one-time grant of stock options to purchase 10,000 shares to each of the Company's current and future non-officer directors is fair and reasonable and does not involve overreaching of the Company or its stockholders.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–21545; No. 812–9668]

National Life Insurance Company, et al.

November 27, 1995.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of Application for an Exemption pursuant to the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: National Life Insurance Company (the "Company"), National Variable Life Insurance Account (the "Account"), any other separate account established in the future by the Company (the "Future Accounts", collectively, with the Account, the "Accounts") to support flexible premium variable life insurance policies (the "Future Contracts," collectively, with the Existing Contracts, the "Contracts") and Equity Securities, Inc. (the "Underwriter").

RELEVANT 1940 ACT SECTIONS: Order requested pursuant to Section 6(c) of the 1940 Act seeking exemptions from the provisions of Section 27(c)(2) thereof and from Rule 6e–3(T)(c)(4)(v) thereunder.

SUMMARY OF APPLICATION: Applicants seek an order permitting them to deduct from premiums received under the Contracts issued by the Company and the Accounts a charge in an amount that is reasonable in relation to the Company's increased federal income tax burden related to the receipt of such premium payments and that results from the application of Section 848 of the Internal Revenue Code of 1986, as amended (the "Code").

FILING DATE: The application was filed on July 14, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the Commission by 5:30 p.m. on December 22, 1995, and must be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, DC 20549. Applicants, c/o D. Russell Morgan, Counsel, National Life Insurance Company, One National Life Drive, Montpelier, Vermont 05604.

FOR FURTHER INFORMATION CONTACT: Kevin M. Kirchoff, Senior Counsel, or Wendy Friedlander, Deputy Chief, Office of Insurance Products (Division of Investment Management), at (202) 942–0670.

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from the Public Reference Branch of the Commission.

Applicant's Representations

1. The Company, a mutual life insurance company chartered pursuant to the law of the State of Vermont in 1848, is authorized to transact life insurance and annuity business in Vermont and in 50 other jurisdictions. The Company is depositor and sponsor of the Account.

2. The Company established the Account pursuant to Vermont law to support variable life insurance contracts. The Account is registered with the Commission as a unit investment trust and is a "separate account" as defined by Rule 0–1(e) under the 1940 Act. The Company anticipates that any Future Account would be registered under the 1940 Act as a unit investment trust and would meet the definition of a separate account in Rule 0–1(e) thereunder.

3. The Account currently has nine sub-accounts, each of which invests in a corresponding portfolio of one of two series-type mutual funds registered with the Commission as open-end, diversified management investment companies: the Market Street Fund and Variable Insurance Products Fund.

4. The Underwriter, an indirect, wholly-owned subsidiary of the Company, is registered as a broker-dealer pursuant to the Securities Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc.

5. The Existing Contracts are flexible premium variable life insurance contracts.

6. In the Omnibus Budget Reconciliation Act of 1990, Congress amended the Code by, among other things, enacting Section 848 thereof. Section 848 changed the federal income taxation of life insurance companies by requiring them to capitalize and amortize over a period of ten years part of their general expenses for the current year. Under prior law, these expenses were deductible in full from the current year's gross income.

7. The amount of expenses that must be capitalized and amortized under Section 848 is generally determined with reference to premium payments for certain categories of life insurance and other contracts ("Specified Contracts"). Thus, for each Specified Contract, an amount of expenses must be capitalized and amortized equal to a percentage of the current year's net premium payments (*i.e.*, gross premium payments minus return premium payments and reinsurance premium payments) for that contract. The percentage varies, depending on the type of Specified Contract in question, according to a schedule set forth in Section 848(c)(1).

8. Although framed in terms of requiring a portion of a life insurance company's general expenses to be capitalized an amortized, Section 848 in effect accelerates the realization of income from Specified Contracts for federal income tax purposes, and therefore, the payment of taxes on the income generated by those contracts. When the time value of money is taken into account, this has the economic consequence of increasing the tax burden borne by the Company that is attributable to such contracts. Because the amount of general deductions that must be capitalized and amortized is measured by premium payments paid for Specified Contracts, an increased tax burden results from the receipt of those premium payments.

9. The Contracts to which Applicants wish to apply the tax burden charge are among the Specified Contracts. They fall into the category of life insurance contracts for which the percentage of net premium payments that determines the amount of otherwise currently deductible general expenses to be capitalized and amortized with respect to such contracts is 7.7%.

10. The increased tax burden resulting from the applicability of Section 848 to every $10,000 of net premium payments received may be quantified as follows. In the year when the premium payments are received, the Company's general deductions are reduced by $731.50—*i.e.*, an amount equal to (a) 7.7% of $10,000, or $770, minus (b) one-half year's portion of the ten-year amortization, or $38.50. Using a 35% corporate tax rate, this results in an increase in tax for the current year of $256.03. This reduction will be partially offset by increased deductions that will be allowed during the next ten years as a result of amortizing the remainder of the $770—$77 in each of the following nine years and $38.50 in the tenth year.

11. In the Company's business judgment, a discount rate of at least 8% is appropriate for use in calculating the present value of its future tax deductions resulting from the amortization described above. For business relating to participating insurance policies, the Company seeks an after tax rate of return on the investment of its surplus of at least 8%. To the extent that surplus must be used by the Company to satisfy its increased federal tax burden under Section 848 resulting from the receipt of premium payments, such surplus is not available to the Company for investment. Thus, the cost to the Company of "capital" used to satisfy its increased federal tax burden under Section 848 is, in essence, the Company's after tax rate of return on surplus, and accordingly, the rate of return on surplus is appropriate for use in this present value calculation.[1]

12. Again using a corporate tax rate of 35% and assuming a discount rate of 8%, the present value of the tax effect of the increased deductions allowable in the following ten years, which (as noted above) partially offsets the increased tax burden, comes to $174.59. The effect of Section 848 on the Company in connection with the Existing Contracts is therefore an increased tax burden with a present value of $81.44 for each $10,000 of net premium payments received, (*i.e.*, $256.03 minus $174.59).

13. State premium taxes are deductible in computing federal income taxes. Thus, the Company does not incur incremental income tax when it passes on state premium taxes to contract owners. In contrast, federal income taxes are *not* tax-deductible in computing the Company's federal income taxes. Therefore, in order to compensate fully for the impact of Section 848, the Company must impose an additional charge that would make it whole not only for the $81.44 additional tax burden attributable to Section 848, but for the tax on the additional $81.44 itself. This additional charge can be determined by dividing $81.44 by the complement of the 35% federal corporate income tax rate (*i.e.*, 65%), resulting in an additional charge of $125.29 for each $10,000 of net premium payments, or approximately 1.25% of net premium payments.

14. Tax deductions are of value to the Company only to the extent that it has sufficient gross income to fully use the deductions. However, based on its prior experience, the Company believes that it can reasonably expect to use virtually all future deductions available. That is, the Company believes that it can reasonably expect to have sufficient taxable income in future years to use all deferred acquisition cost deduction.

15. The Company also represents that the 1.25% charge is reasonably related to the Company's increased tax burden under Section 848 of the Code, taking into account the benefit to the Company of the amortization permitted by Section 848, and the use by the Company of a 8% discount rate in computing the future deductions resulting from such amortization, such rate being the equivalent of the Company's cost of capital.

16. The Company believes that a charge of 1.25% of premium payments would reimburse it for the impact of Section 848 (as currently written) on its federal tax liabilities. The Company believes, however, that it would have to increase this charge if future changes in, or interpretations of, Section 848 or any successor provision result in a further increased tax burden due to the receipt of premium payments. Such an increase could result from a change in the corporate tax rate, a change in the 7.7% figure, or a change in the amortization period. The Contracts will or may reserve the right to increase or decrease the 1.25% charge in response to future changes in, or interpretations of, Section 848 or any successor provision that increase or decrease the Company's tax burden. The Company understands, however, that it would need additional exemptions before increasing the charge above 1.25%.

Applicants' Legal Analysis

1. Section 6(c) of the 1940 Act provides, in relevant part, that the Commission, by order upon application, may exempt any person, security or transaction (or any class or classes of persons, securities or transactions) from provisions of the 1940 Act or any rules thereunder, if and to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Applicants request an order of the Commission pursuant to Section 6(c) of the 1940 Act, exempting them from the provisions of Section 27(c)(2) of the 1940 Act and Rule 6e–3(T)(c)(4)(v) thereunder to the extent necessary to permit Applicants to deduct from premium payments received in connection with the Contracts an amount that is reasonable in relation to the Company's increased federal tax burden related to the receipt of such premium payments and that results from the application of Section 848 of

[1] In determining the cost of capital, the Company considered a number of factors. First, the Company considered its anticipated long-term growth rate. The Company seeks an after-tax rate of return earned on investments that is at least equal to its long-term growth rate. The cost of capital should also represent a fair after-tax rate of return to the Company for investing surplus. This rate can be thought of as consisting of a "risk-free" rate of return plus a "risk premium" for engaging in this type of business. Other factors taken into consideration were market interest rates and information about the rates of return obtained by other insurance companies. The Company represents that these are appropriate factors to consider in determining its cost of capital.

the Code. The deduction would not be treated as sales load.

Relief From Provisions of Section 27(c)(2) and Rule 6e–3(T)(c)(4)(v)

3. Section 2(a)(35) of the 1940 Act defines "sales load" as the difference between the price of a security offered to the public and that portion of the proceeds from its sale which is received and invested or held for investment by the issuer (or in the case of a unit investment trust, by the depositor or trustee), less any portion of such difference deducted for trustee's or custodian's fees, insurance premiums, issue taxes, or administrative expenses or fees which are not properly chargeable to sales or promotional activities.

4. Section 27(c)(2) of the 1940 Act prohibits a registered investment company or a depositor or underwriter for such company from making any deduction from purchase payments made under periodic payment plan certificates other than a deduction for sales load. Sections 27(a)(1) and 27(h)(1) of the 1940 Act, in effect, limit sales loads on periodic payment plan certificates to 9 percent of total payments.

5. Paragraph (a) of Rule 6e–3(T) requires that a separate account (such as the Accounts) that issues flexible premium variable life insurance contracts, its principal underwriter and its depositor, comply with all provisions of the 1940 Act and rules thereunder applicable to a registered investment company issuing periodic payment plan certificates.

6. Paragraph (b) of Rule 6e–3(T) provides numerous limited conditional exemptions from most such provisions and rules in connection with the offer, sale and administration of flexible premium variable life insurance contracts. For example, Rule 6e–3(T)(b)(13)(iii)(E) provides relief from Section 27(c)(2) of the 1940 Act to the extent necessary to permit the deduction of certain charges other than sales load, including "[t]he deduction of premium or other taxes imposed by any state or other governmental entity." Applicants request the relief from Section 27(c)(2) sought in this application only to preclude the possibility that a charge related to the increased burden resulting from Section 848 of the Code is not covered by the exemption provided by Rule 6e–3(T)(b)(13)(iii)(E). Applicants submit that the public policy reasons underlying Rule 6e–3(T)(b)(13)(iii)(E) provide support for the exemption from Section 27(c)(2) requested herein.

7. Paragraph (c)(4) of Rule 63–3(T) defines "sales load" (for purposes of the rule) as the excess of any purchase payments over certain itemized charges and adjustments. A tax burden charge, such as the one the Company proposes to deduct, may not fall squarely into any of the itemized categories of charges or adjustments. Consequently, a literal reading of paragraph (c)(4) arguably does not exclude such a charge from sales load. Applicants maintain, however, that there is no public policy reason why a tax burden charge designed to cover the expense of federal taxes should be treated as sales load or otherwise subject to the sales load limits of Rule 6e–3(T). Applicants assert that nothing in the administrative history of the Rule (or in the administrative history of Rule 6e–2, its predecessor) suggests that the Commission intended to treat tax charges as sales load.

8. The exemption requested by Applicants is necessary in order for them and any Future Account to rely on certain provision of Rule 6e–3(T)(b)(13), including sub-paragraph (b)(13)(i) thereof, which provides critical exemptions from Sections 27(a)(1) and 27(h)(1) of the 1940 Act. Issuers and their affiliates only may rely, however, on sub-paragraph (b)(13)(i) if they meet its alternate limits that apply to sales load as defined in paragraph (c)(4). Applicants and Future Accounts generally could not meet these limits if the tax burden charge is included in sales load.

9. The public policy that underlies sub-paragraph (b)(13)(i), like that which underlies Sections 27(a)(1) and 27(h)(1), is to prevent excessive sales loads from being charged in connection with the sale of periodic payment plan certificates. Applicants assert that the treatment of a tax burden charge attributable to the receipt of purchase payments as sales load would not in any way further this legislative purpose because such a deduction has no relation to the payment of sales commissions or other distribution expenses.

10. Applicants assert that the genesis of Rule 6e–3(T)(c)(4) supports this analysis, and suggest that Section 2(a)(35) provides a scale against which the percentage limits of Sections 27(a)(1) and 27(h)(1) may be measured. Applicants submit that Rule 6e–3(T)(c)(4), is simply a more specific articulation of the requirements of Section 2(a)(35) as applied to flexible premium variable life insurance policies. Section 2(a)(35), like Rule 6e–3(T)(c)(4), defines sales load derivatively, treating as sales load the: difference between the price of a security to the public and that portion of the proceeds from its sale which is invested or held for investment [illegible] less any portion of such difference deducted for trustee's or custodian's fees, insurance premiums, *issue taxes, or administrative expenses or fees which are not properly chargeable to sales or promotional activities.* (Emphases added.)

Applicants maintain that the Commission's intent in adopting paragraph (c)(4) of Rule 6e–3(T) was to tailor the general terms of Section 2(a)(35) to flexible premium variable life insurance policies in order, among other things, to facilitate verification by the Commission of compliance with the sales load limits set forth in sub-paragraph (b)(13)(i). According to their analysis, paragraph (c)(4) does not depart, in principal, from Section 2(a)(35).

11. Section 2(a)(35) excludes deductions from purchases payments for "issue taxes" from the definition of sales load under the 1940 Act. Applicants suggest that this indicates that it is consistent with the protection of investors and the purposes intended by the policies and provisions of the 1940 Act to exclude charges for expenses attributable to federal taxes from sales load. Applicants argue that, by extension, it is equally consistent to exclude such charges, including the tax burden charge described above, from the Rule 6e–3(T)(c)(4) definition of sales load.

12. Applicants argue that the Section 2(a)(35) reference to administrative expenses or fees that are "not properly chargeable to sales or promotional activities" (quoted and emphasized above) suggests that the only charges or deductions intended to fall within the definition of sales load are those that *are* properly chargeable to such activities. Because the proposed tax burden charge will be used to pay costs attributable to the Company's federal tax liabilities, which are not properly chargeable to sales or promotional activities, Applicants assert that language is another indication that not treating such deductions as sales load is consistent with the purposes intended by the policies and provisions of the 1940 Act.

13. Applicants note that the Rule 6e–3(T)(c)(4)(v) limitation of the premium tax exclusion from the definition of "sales load" to state premium taxes is probably a historical accident, related to the fact that, when Rule 6e–3(T) was initially adopted in 1984 and when it was amended in 1987, the additional Section 848 tax burden attributable to the receipt of premiums did not exist.

14. Applicants represent that, for the reasons summarized above, deducting a charge from variable life insurance policy premium payments for an insurer's tax burdens attributable to its receipt of such payments, and excluding the charge from sales load, is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. This is because such a charge is, Applicants represent, for a legitimate expense of the insurer and is not designed to cover sales and distribution expenses. Applicants assert that, in adopting Rule 6e–3(T), the Commission considered similar deductions for tax burdens in respect of premium taxes and permitted deductions for such taxes to be made and to be treated as other than sales load. Applicants assert that the propriety of a charge for an insurer's tax burden attributable to premium payments received is the same whether such burden arises under state or federal law.

Request for "Class Relief"

15. Applicants also request exemptions for any Future Account that the Company may establish to support flexible premium variable life insurance contracts as defined in Rule 6e–3(T)(c)(1). Applicants believe that the terms of any exemption sought for Future Accounts to permit the deduction of a tax burden charge would be substantially identical to those they describe in the application. Applicants assert that any additional requests for exemptive relief for such Future Accounts would present no issues under the 1940 Act that have not already been addressed in the application. Nevertheless, the Company would have to obtain exemptions for each Future Account it establishes unless class relief is granted in response to the application.

16. The requested exemptions are appropriate in the public interest because they would promote competitiveness in the variable life insurance market by eliminating the need for the Company to file redundant exemptive applications, thereby reducing its administrative expenses and maximizing the efficient use of its resources. The delay and expense involved in having repeatedly to seek the same exemptions would impair the Company's ability to effectively take advantage of business opportunities as they arise. Likewise, the requested exemptions are consistent with the protection of investors and the purposes intended by the policy and provisions of the 1940 Act for the same reasons. Investors would receive no benefit or additional protection if the Company were required repeatedly to seek Commission orders with respect to the same issues addressed in the application. Indeed, they might be disadvantaged as a result of the Company's increased expenses.

Applicants' Conditions

1. The Company will monitor the reasonableness of the 1.25% charge.

2. The registration statement for the Existing Contracts and any Future Contracts under which the 1.25% charge is deducted will include:

(a) disclosure of the charge;

(b) disclosure explaining the purpose of the charge; and

(c) a statement that the charge is reasonable in relation to the Company's increased tax burden as a result of Section 848 of the Code.

3. The Company also will include as an exhibit to the registration statement for the Existing Contracts and any Future Contracts under which the 1.25% charge is deducted an actuarial opinion as to:

(a) the reasonableness of the charge in relation to the Company's increased tax burden as a result of Section 848 of the Code;

(b) the reasonableness of the after tax rate of return used in calculating the charge; and

(c) the appropriateness of the factors taken into account by the Company in determining the after tax rate of return.

Conclusion

For the reasons summarized above, Applicants represent that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SOCIAL SECURITY ADMINISTRATION

1994–95 Advisory Council on Social Security; Meeting

AGENCY: Social Security Administration.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces a meeting of the 1994–95 Advisory Council on Social Security (the Council).

DATES: Thursday, December 14, 1995, 9 a.m. to 5 p.m.

ADDRESSES: Sheraton City Centre, 1143 New Hampshire Avenue, NW, Washington D.C., 20037, (202) 775–0800.

FOR FURTHER INFORMATION CONTACT: By mail—Nick Curabba, 1994–95 Advisory Council on Social Security, Suite 705, 1825 Connecticut Avenue, NW, Washington, DC 20009; By telephone—(202) 482–7119; By telefax—(202) 482–7123.

SUPPLEMENTARY INFORMATION:

I. Purpose

Under section 706 of the Social Security Act (the Act), the Secretary of Health and Human Services (the Secretary) appoints the Council every 4 years. The Council examines issues affecting the Social Security Old-Age, Survivors, and Disability Insurance (OASDI) programs, as well as the Medicare program and impacts on the Medicaid program, which were created under the Act.

In addition, the Secretary has asked the Council specifically to address the following:

- Social Security financing issues, including developing recommendations for improving the long-range financial status of the OASDI programs;
- General program issues such as the relative equity and adequacy of Social Security benefits for persons at various income levels, in various family situations, and various age cohorts, taking into account such factors as the increased labor force participation of women, lower marriage rates, increased likelihood of divorce, and higher poverty rates of aged women.

In addressing these topics, the Secretary suggested that the Council may wish to analyze the relative roles of the public and private sectors in providing retirement income, how policies in both sectors affect retirement decisions and the economic status of the elderly, and how the disability insurance program provisions and the availability of health insurance and health care costs affect such matters.

The Council is composed of 12 members in addition to the chairman: Robert Ball, Joan Bok, Ann Combs, Edith Fierst, Gloria Johnson, Thomas Jones, George Kourpias, Sylvester Schieber, Gerald Shea, Marc Twinney, Fidel Vargas, and Carolyn Weaver. The chairman is Edward Gramlich.

The Council met previously on June 24–25, 1994 (59 FR 30367), July 29, (59 FR 35942), September 29–30 (59 FR 47146), October 21–22 (59 FR 51451), November 18–19 (59 FR 55272), January

27, 1995 (60 FR 3416), February 10–11 (60 FR 5433), March 8–9 (60 FR 10091), March 10–11 (60 FR 10090), April 21–22 (60 FR 18419), May 19–20 (60 FR 24961), June 2–3 (60 FR 27372) July 27–28 (60 FR 35097), August 31–September 1 (60 FR 41142), October 12–13 (60 FR 50234).

II. Agenda

The following topics will be presented and discussed:

* Previously developed plans that would revise the OASDI program along different lines;
* The preliminary findings and recommendations of the Advisory Council;
* Other issues before the Advisory Council.

The meeting is open to the public to the extent that space is available. Interpreter services for persons with hearing impairments will be provided. A transcript of the meeting will be available to the public on an at-cost-of duplication basis. The transcript can be ordered from the Executive Director of the Council.

(Catalog of Federal Domestic Assistance Program Nos. 93.802, Social Security-Disability Insurance; 93.803, Social Security-Retirement Insurance; 93.805, Social Security-Survivors Insurance.)

Dated: November 29, 1995.

Daniel Wartonick,

Acting Executive Director, 1994–95 Advisory Council on Social Security.

[FR Doc. 95–29563 Filed 11–30–95; 1:16 pm]

BILLING CODE 4190–29–P

Privacy Act of 1974; Computer Matching Program (SSA/Internal Revenue Service (IRS))

AGENCY: Social Security Administration (SSA).

ACTION: Notice of Computer Matching Program.

SUMMARY: In accordance with the provisions of the Privacy Act, this notice announces a computer matching program that SSA plans to conduct.

DATES: SSA will file a report of the subject matching program with the Committee on Governmental Affairs of the Senate, the Committee on Government Reform and Oversight of the House of Representatives and the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). The matching program will be effective as indicated below.

ADDRESSES: Interested parties may comment on this notice by either telefax to (410) 966–5138 or writing to the Associate Commissioner for Program and Integrity Reviews, 860 Altmeyer Building, 6401 Security Boulevard, Baltimore, MD 21235. All comments received will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: The Associate Commissioner for Program and Integrity Reviews at the above address.

SUPPLEMENTARY INFORMATION:

A. General

The Computer Matching and Privacy Protection Act of 1988 (Public Law (Pub. L.) 100–503), amended the Privacy Act (5 U.S.C. 552a) by establishing the conditions under which computer matching involving the Federal government could be performed and adding certain protections for individuals applying for and receiving Federal benefits. Section 7201 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101–508) further amended the Privacy Act regarding protections for such individuals. The Privacy Act, as amended, regulates the use of computer matching by Federal agencies when records in a system of records are matched with other Federal, State, or local government records. Among other things, it requires Federal agencies involved in computer matching programs to:

(1) Negotiate written agreements with the other agency or agencies participating in the matching programs;

(2) Obtain the Data Integrity Boards' approval of the match agreements;

(3) Furnish detailed reports about matching programs to Congress and OMB;

(4) Notify applicants and beneficiaries that their records are subject to matching; and

(5) Verify match findings before reducing, suspending, terminating or denying an individual's benefits or payments.

B. SSA Computer Matches Subject to the Privacy Act

We have taken action to ensure that all of SSA's computer matching programs comply with the requirements of the Privacy Act, as amended.

Dated: November 21, 1995.

Shirley S. Chater,

Commissioner of Social Security.

Notice of Computer Matching Program, Social Security Administration (SSA) With the Internal Revenue Service (IRS)

A. Participating Agencies

SSA and IRS.

B. Purpose of the Matching Program

The purpose of this matching program is to establish conditions under which IRS agrees to the disclosure of tax return information relating to unearned income. SSA will use the match results to verify the eligibility for, and the correct amount of benefits payable to, individuals under the Supplemental Security Income (SSI) program, which provides payments under title XVI of the Social Security Act (the Act) to aged, blind and disabled recipients with income below levels established by law and regulations, and federally-administered supplementary payments under section 1616 of the Act including payments under section 212 of Pub.L. 93–66, 87 Stat. 152.

C. Authority for Conducting the Matching Program

Section 1631(e)(1)(b) of the Act and Section 6103(l)(7) of the Internal Revenue Code.

D. Categories of Records and Individuals Covered by the Match

IRS will provide SSA with an electronic or magnetic tape file extracted from the Wage and Information Returns Processing File. The extracted file will contain tax return information about unearned income. Each record on the IRS file will be matched to SSA's Supplemental Security Income Record, HHS/SSA/OSR 90–60–0103, to identify individuals potentially subject to benefit reductions or termination of payment eligibility under the statutory provisions listed above.

E. Inclusive Dates of the Match

The matching agreement for this program shall become effective no sooner than 40 days after a copy of the agreement, as approved by the Data Integrity Boards of both agencies, is sent to Congress and the Office of Management and Budget (OMB) (or later if OMB objects to some or all of the agreement) or 30 days after publication of this notice in the **Federal Register**, whichever is later. The matching program will continue for 18 months from the effective date and may be extended for an additional 12 months thereafter, if certain conditions are met.

BILLING CODE 4910–62–P

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ending November 24, 1995

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for Answers, Conforming Applications, or Motions to modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: OST–95–851
Date Filed: November 20, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 18, 1995
Description: Application of Alaska Airlines, Inc., pursuant to 49 U.S.C. 41101, and Subpart Q of the Regulations, requests a permanent certificate of public convenience and necessity authorizing Alaska to engage in the scheduled foreign air transportation of persons, property and mail between San Francisco, California, on the one hand, and Mazatlan and Puerto Vallarta, Mexico, on the other hand, and between Los Angeles, California, on the one hand, and Los Cabos, Mexico, on the other hand.

Docket Number: OST–95–855
Date Filed: November 21, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 19, 1995
Description: Application of Scandinavian Airlines System (SAS), pursuant to 49 U.S.C. Section 41302 and Subpart Q of the Regulations, applies for amendment of its foreign air carrier permit, last issued by the Department pursuant to Order 87–8–55 in Docket 44249 adopted on August 14, 1987, to engage in foreign air transportation of persons, property and mail between a point or points in Denmark, Norway and Sweden, via intermediate points, to a point or points in the United States, and beyond.

Docket Number: OST–95–856
Date Filed: November 21, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 19, 1995
Description: Application of American Airlines, Inc., pursuant to 49 U.S.C. Section 41108 and Subpart Q of the Regulations, applies for renewal of its certificate of public convenience and necessity for Route 605, authorizing foreign air transportation of persons, property, and mail between New York, New York and Manchester, England.

Docket Number: OST–95–861
Date Filed: November 22, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 20, 1995
Description: Application of Reno Air, Inc., pursuant to 49 U.S.C. Section 41108 and Subpart Q of the Regulations, requests a Certificate of Public Convenience and Necessity authorizing Reno Air to engage in foreign air transportation of persons, property and mail between any point in the United States and any point in Canada.

Docket Number: OST–95–862
Date Filed: November 22, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 20, 1995
Description: Application of United Parcel Service Co., pursuant to 49 U.S.C. Section 4110 and Subpart Q of the Regulations, requests a certificate of public convenience and necessity authorizing it to engage in scheduled foreign air transportation of cargo (property and mail) between Anchorage, Alaska, on the one hand, and Manila, The Philippines, on the other hand, via the intermediate points Seoul, Korea; Taipei, Taiwan; and to the beyond points Singapore; Kuala Lampur, Malaysia; Taipei, Taiwan and Seoul, Korea.

Docket Number: OST–95–866
Date Filed: November 22, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 20, 1995
Description: Application of Delta Air Lines, Inc., pursuant to 49 U.S.C. Sections 41102 and 41108 and Subpart Q of the Regulations, applies for renewal of its Certificate of Public Convenience and Necessity for Route 606, as issued by Order 91–4–45 (served April 24, 1991), authorizing Delta to engage in foreign air transportation of persons, property and mail between the terminal points Atlanta, Georgia and Manchester, England. Delta's certificate for Route 606 expires on May 23, 1996. Delta requests renewal of its certificate for a period of five years.

Docket Number: OST–95–869
Date Filed: November 24, 1995
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: December 22, 1995
Description: Application of Continental Micronesia, Inc., pursuant to 49 U.S.C. Section 41102 and Subpart Q of the Regulations, applies for a five-year renewal of its Route 171 certificate authority to provide scheduled foreign air transportation of persons, property and mail between Guam and Tokyo, Japan.

Myrna F. Adams,

Acting Chief, Documentary Services Division.

Office of the Secretary

43 CFR Part 10

Native American Graves Protection and Repatriation Act Regulations; Final Rule

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 10

RIN 1024–AC07

Native American Graves Protection and Repatriation Act Regulations

AGENCY: Department of the Interior.

ACTION: Final rule.

SUMMARY: This final rule establishes definitions and procedures for lineal descendants, Indian tribes, Native Hawaiian organizations, museums, and Federal agencies to carry out the Native American Graves Protection and Repatriation Act of 1990. These regulations develop a systematic process for determining the rights of lineal descendants, Indian tribes, and Native Hawaiian organizations to certain Native American human remains, funerary objects, sacred objects, or objects of cultural patrimony with which they are affiliated.

EFFECTIVE DATE: This final rule will take effect on January 3, 1996.

FOR FURTHER INFORMATION CONTACT: Dr. Francis P. McManamon, Departmental Consulting Archeologist, Archeological Assistance Division, National Park Service, Box 37127, Washington DC 20013–7127. Telephone: (202) 343–4101. Fax: (202) 523–1547.

SUPPLEMENTARY INFORMATION:

Background

On November 16, 1990, President George Bush signed into law the Native American Graves Protection and Repatriation Act, hereafter referred to as the Act. The Act addresses the rights of lineal descendants, Indian tribes, and Native Hawaiian organizations to certain Native American human remains, funerary objects, sacred objects, or objects of cultural patrimony with which they are affiliated. Section 13 of the Act requires the Secretary of the Interior to publish regulations to carry out provisions of the Act.

Preparation of the Rulemaking

The proposed rule (43 CFR Part 10) for carrying out the Act was published in the **Federal Register** on May 28, 1993 (58 FR 31122). Public comment was invited for a 60-day period, ending on July 27, 1993. Copies of the proposed rule were sent to the chairs or chief executive officers of all Indian tribes, Alaska Native villages and corporations, Native Hawaiian organizations, national Indian organizations and advocacy groups, national scientific and museum organizations, and State and Federal agency Historic Preservation Officers and chief archeologists.

Eighty-two written comments were received representing 89 specific organizations and individuals. These included thirteen Indian tribes, ten Native American organizations, nine museums, seven universities, three national scientific and museum organizations, eleven state agencies, nineteen Federal agencies, nine other organizations, and eight individuals. Several letters represent more than one organization. Comments addressed nearly all sections and appendices of the proposed rule. All comments were fully considered when revising the proposed rule for publication as a final rulemaking.

Given the volume of comments, it is impractical to respond in detail in the preamble to every question raised or suggestion offered. Some commenters pointed out errors in spelling, syntax, and minor technical matters. Those errors were corrected and are not mentioned further in the preamble. In addition, many commenters made similar suggestions or criticisms, or repeated the same suggestion for different sections of the proposed rule. In the interest of reducing the length of the text, comments that are similar in nature are grouped and discussed in the most relevant section in the preamble. Some comments pointed out vague and unclear language. Clarifying and explanatory language was added to the rule and preamble.

Changes in Response to Public Comment

Section 10.1

This section outlines the purpose and applicability of the regulations. Three commenters recommended including specific reference to the applicability of the rule to provisions of the United States Code regarding illegal trafficking. Section 4 of the Act, which deals with illegal trafficking in "Native American Human Remains and Cultural Items," is incorporated directly into Chapter 53 of title 18, United States Code, and does not require implementing regulations. For that reason, a section regarding section 4 of the Act has not been included in these regulations.

One commenter recommended including language to guarantee "that these collections will remain intact and always be available to qualified researchers..." Another commenter recommended amending the regulations to preclude the removal of prehistoric skeletal and cultural materials from the nation's museums. The drafters consider the proposed changes contrary to the intent of the Act as reflected in statutory language and legislative history.

One commenter recommended additional language addressing Federal trust responsibilities and tribal sovereignty. These regulations are consistent with the United States' trust responsibilities to Indian tribes.

Three commenters recommended amending the rule to apply to territories of the United States. The rule of statutory construction stipulates that Federal law applies to United States territories only when specifically indicated. No such reference is indicated in either the statute or its legislative history. It is inappropriate to use regulations to extend applicability to areas not defined in the Act.

Section 10.2

This section defines terms used throughout the regulations. One commenter recommended listing the definitions alphabetically instead of thematically under the present categories of "participants," "human remains and cultural items," "cultural affiliation," "location," and "procedures." A thematic organization has been retained. However, the subsections have been retitled and reorganized. The new subsections are (a) who must comply with these regulations?; (b) who has standing to make a claim under these regulations?; (c) who is responsible for carrying out these regulations?; (d) what objects are covered by these regulations?; (e) what is cultural affiliation?; (f) what types of lands do the excavation and discovery provisions of these regulations apply to?; and (g) what procedures are required by these regulations?

Subsection 10.2 (a) includes definitions of those persons or organizations who must comply with these regulations.

One commenter asked for clarification as to whether all Federal agencies as defined in § 10.2 (a)(4) (renumbered as § 10.2 (a)(1)) must comply with provisions of the Act. All Federal agencies, except the Smithsonian Institution, are responsible for completing summaries and inventories of collections in their control and with ensuring compliance regarding inadvertent discoveries and intentional excavations conducted as part of activities on Federal or tribal lands. Three commenters and the Review Committee authorized under section 8 of the Act requested clarification of the exclusion of the Smithsonian Institution as a Federal agency. Sections 2 (4) and 2 (8) of the Act specifically exclude the

Smithsonian Institution from having to comply with the provisions of the Act. The legislative history of the Act is silent as to the reason for this exclusion. The exclusion is likely to have been based on prior passage of the National Museum of the American Indian Act in 1989 that included provisions requiring the repatriation of human remains from all of the Smithsonian Institution's constituent museums.

Seven commenters requested clarification of the definition of Federal agency official in § 10.2 (a)(5) (renumbered as § 10.2 (a)(2)). One commenter recommended changing the term to Federal land manager. The definition included in the proposed rule applies to both individuals with authority for the management of Federal lands and individuals with responsibility for the management of Federal collections that may contain human remains, funerary objects, sacred objects, or objects of cultural patrimony. Since responsibility for the latter task may fall to Federal agency officials who do not manage land, the recommended change has not been made. Four commenters recommended changes in the definition of Federal agency official to reflect that a Federal agency may have more than one delegated authority. The definition was rewritten to reflect this concern. One commenter recommended stipulation of a specific date by which each agency must delegate individuals to perform the duties relating to these regulations. Such a deadline is unnecessary as all Federal agencies have already named their contacts. A listing of Federal agency officials for each agency is available from the Departmental Consulting Archeologist.

Seven commenters requested clarification of the definition of museum in § 10.2 (a)(6) (renumbered § 10.2 (a)(3)). One commenter recommended replacing the term "human remains or cultural items" with "Native American artifacts" to reflect the expanded reporting of "collections that may contain unassociated funerary objects, sacred objects, or objects of cultural patrimony" in the summaries required in § 10.8. The specific focus of the Act and the rule remains limited to Native American human remains, funerary objects, sacred objects, and objects of cultural patrimony, and not the broader category of Native American artifacts.

One commenter recommended providing a definition of the term "possession of, or control over" in the first sentence of the definition. One commenter recommended requiring museums take responsibility for all human remains, funerary objects, sacred objects, or objects of cultural patrimony in their possession that were originally excavated intentionally or discovered inadvertently by Federal agencies on non-Federal lands. All museums or Federal agencies with Native American collections should consider carefully whether they have possession or control of human remains, funerary objects, sacred objects, or objects of cultural patrimony as defined in § 10.2 (a)(3)(i) and (a)(3)(ii).

Eleven commenters recommended changes to the definitions of possession in § 10.2 (e)(5) (renumbered § 10.2 (a)(3)(i)) and control in § 10.2 (e)(6) (renumbered § 10.2 (a)(3)(ii)). One commenter recommended giving both terms their ordinary and customary meaning in the regulations. Two commenters objected to use of "legal interest" in both definitions on the grounds that under common law, museums and Federal agencies do not have sufficient legal interest in human remains to do anything with them. Two commenters questioned including items on loan to a museum in a summary or inventory since the items are not the property of the museum. One commenter recommended deleting the definition of control as it would require Federal bureaucrats and museum officials to make complicated legal determinations. Examples designed to clarify the uses of possession and control have been added to these sections to address the concerns reflected in these comments. Two commenters questioned whether "control" applied to museum collections or to Federal lands. The term applies to human remains, funerary objects, sacred objects, or objects of cultural patrimony in museum or Federal agency collections or excavated intentionally or discovered inadvertently on Federal or tribal lands. One commenter recommended that the definition specifically address Federal agency responsibilities for collections from Federal lands being held by non-governmental repositories. Federal agencies are responsible for the appropriate treatment and care of such collections.

One commenter requested clarification of the exclusion of procurement contracts from "Federal funds" in § 10.2 (a)(6) (renumbered § 10.2 (a)(3)(iii)). Procurement contracts are not considered a form of Federal-based aid but are provided to a contractor in exchange for a specific service or product. One commenter requested deletion of the last two sentences of the definition that clarify the applicability of the rule to museums that are part of a larger entity that receives Federal funds, questioning if the legislative history supports such an interpretation. One commenter supported the present definition of institutions receiving Federal funds. Application of Federal laws to institutions that receive Federal funds is common, being used with such recent legislation as the Americans with Disabilities Act. These laws typically are interpreted to apply to organizations that are part of larger entities that receive Federal funds. Two commenters recommended specifying the applicability of the rule to museums affiliated with certified local governments and Indian tribal museums. The rule applies to museums that are part of certified local governments. A tribal museum is covered by the Act if the Indian tribe of which it is part receives Federal funds through any grant, loan, or contract (other than a procurement contract).

Subsection 10.2(b) includes definitions of those persons or organizations that have standing to make a claim under these regulations.

Eight commenters recommended changes in the definition of lineal descendant in § 10.2 (a)(14) (renumbered § 10.2 (b)(1)). Two commenters identified the definition as too restrictive. The drafters realize that claims of lineal descent require a high standard but feel that this standard is consistent with the preference for repatriation to lineal descendants required by the Act. Another commenter presented a statistical argument to indicate that all members of Indian tribes might be recognized as lineal descendants of human remains over 1,000 year old. Regardless of the statistical possibilities that someone might be related to another, the definition of lineal descent requires that the human remains, funerary objects, or sacred objects under consideration be from a known individual. It is highly unlikely that the identity of an individual that lived 1,000 years ago is known, or that it is possible to trace descent directly and without interruption from that known individual to a living individual. One commenter recommended replacing the "known Native American individual" from which lineal descent is traced with "known individual of a tribe." The term Indian tribe as used in these regulations refers only to those contemporary tribes, bands, nations, or other organized Indian groups or communities that are recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians. Requiring the known individual to have been a member of the

same Federally recognized Indian tribe as their lineal descendant would limit repatriation to only the most recent human remains, funerary objects, or sacred objects and is not supported by the statutory language or legislative history. One commenter recommended deleting reference to use of the "traditional kinship system." Reference to traditional kinship systems is designed to accommodate the different systems that individual Indian tribes use to reckon kinship. One commenter recommended that the definition should also allow more conventional means of reckoning kinship. The definition has been amended to include the common law system of descendance as well as the traditional kinship system of the appropriate Indian tribe or Native Hawaiian organization. One commenter recommended defining an additional class of "lineage members" or "kindred"—individuals that are not lineal descendants in the biological sense of the term but are related by the traditional kinship system—and then giving these individuals a secondary priority for making a claim after lineal descendants but before culturally affiliated Indian tribes. Determinations of priority between blood descendants and descendants by some other traditional kinship system are more properly resolved in specific situations rather than through general regulations.

One commenter recommended clarifying the definition of Indian tribe in § 10.2 (a)(9) (renumbered § 10.2 (b)(2)) to ensure timely notification. Seventeen commenters recommended expanding the definition to include a broader spectrum of Indian groups than those recognized by the Bureau of Indian Affairs (BIA). Several commenters identified specific groups they felt should have standing, including: various bands or tribes in California, Washington, and Ohio; Native American organizations such as the American Indian Movement; Native American groups that "would be eligible for recognition by the BIA if they so chose to be"; and "bands recognized by other Federal agencies." Section 12 of the Act makes it clear that Congress based the Act upon the unique relationship between the United States government and Indian tribes. That section goes on to state that the Act should not be construed to establish a precedent with respect to any other individual or organization. The statutory definition of Indian tribe, which specifies that such tribes must be "recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians," precludes extending applicability of the Act to Indian tribes that have been terminated, that are current applicants for recognition, or have only State or local jurisdiction legal status.

As was explained in the preamble of the proposed regulations, the definition of Indian tribe used in the Act was drawn explicitly from an earlier version of the bill (H.R. 5237, 101th Congress, 2nd Sess. sec. 2 (7), (July 10, 1990)) using a specific statutory reference. The final language of the Act is verbatim from the American Indian Self Determination and Education Act (25 U.S.C. 450b). The earlier statute has been carried out since 1976 by the BIA to apply to a specific list of eligible Indian tribes which has been published in the **Federal Register**.

Four commenters found this interpretation unduly narrow and recommended interpreting the statutory definition to apply to Indian tribes that are recognized as eligible for benefits for the special programs and services provided by "any" agency of the United States to Indians because of their status as Indians. The Review Committee concurred with this recommendation. Based on the above recommendations, the definition of Indian tribe included in the regulations was amended by deleting all text describing the process for obtaining recognition from the BIA. In place of this text, the final regulations include a statement identifying the Secretary as responsible for creating and distributing a list of Indian tribes for the purpose of carrying out the Act. This list is currently available from the Departmental Consulting Archeologist and will be updated periodically.

One commenter recommended deleting the reference to Alaska Native corporations in the definition of Indian tribe. The American Indian Self Determination and Education Act, the source for the definition of Indian tribe in the Act, explicitly applies to Alaska Native corporations and, as such, supports their inclusion under the Act. Alaska Native corporations are generally considered to have standing under these regulations if they are recognized as eligible for a self-determination contract under 25 U.S.C. 450b.

Two commenters recommended deleting the final line of the definition of Indian tribe in which Native Hawaiian organizations are subsumed for purposes of the regulations. The Review Committee concurred with this recommendation. The final sentence has been deleted and the applicability of the regulations to Native Hawaiian organizations has been specified where appropriate throughout the text. The term Indian tribe official defined in § 10.2 (b)(4) has not been changed, though the drafters wish to stress the term's applicability to the representatives of both Indian tribes and Native Hawaiian organizations.

Two commenters recommended changes to the definition of Native Hawaiian organization in § 10.2 (a)(11) (renumbered § 10.2 (b)(3)). One commenter recommended specifying that such organizations should have a primary and stated purpose of the "preservation of Hawaiian history," and have expertise in Native Hawaiian "cultural" affairs. Two commenters recommended requiring a Native Hawaiian organization verify that more than 50% of its membership is Native Hawaiian. The statutory definition of Native Hawaiian organization in section 2 (11) of the Act precludes expansion of the criteria for identifying Native Hawaiian organizations. An earlier version of the bill (S. 1980, 101st Cong. 2nd sess. section 3 (6)(c), (September 10, 1990)) that eventually became the Act included a provision requiring Native Hawaiian organization to have "a membership of which a majority are Native Hawaiian." This provision was not included in the Act. The legislative history confirms that Congress considered the additional criterion and decided not to include it in the Act.

One commenter recommended rewriting the definition of Native Hawaiian in § 10.2 (a)(10) (renumbered § 10.2 (b)(3)) to include Pacific Islanders. The statutory definition of Native Hawaiian in section 2 (10) of the Act precludes expansion of this definition to include Pacific Islanders who are not descendants of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii.

Three commenters recommended changes to the definition of Indian tribe official in § 10.2 (a)(12) (renumbered § 10.2 (b)(4)). One commenter recommended specifying that Indian tribe official means the tribal chair or officially designated individual. One commenter recommended allowing designation by the governing body of an Indian tribe "or as otherwise provided by tribal code, policy, or procedure." One commenter recommended that the designated person need not be a member of that Indian tribe. The definition of Indian tribe official was amended to identify the principal leader or the individual officially designated or otherwise provided by tribal code, policy or established procedure. This person need not necessarily be a member of the particular Indian tribe.

Subsection 10.2 (c) includes definitions of those persons or organizations that are responsible for carrying out these regulations.

One commenter requested clarification of the role of the Departmental Consulting Archeologist defined in Section 10.2 (a)(3) (renumbered § 10.2 (c)(3)). The Departmental Consulting Archeologist was delegated by the Secretary of the Interior with responsibilities for drafting regulations, providing staff support to the Review Committee, administering grants, and providing technical aid under the Act.

Subsection 10.2 (d) includes definitions of the objects covered by these regulations.

One commenter recommended that the definition of Native American in § 10.2 (a)(8) (renumbered § 10.2 (d)) specifically include Native Hawaiians. The definition already includes Native Hawaiians. To clarify the applicability of the rule, the definition of Native American was rewritten to specifically include tribes, people, or cultures indigenous to the United States, "including Alaska and Hawaii." The drafters point out that "Native American" is used in the Act and in these rules only to refer to particular human remains, funerary objects, sacred objects, or objects of cultural patrimony and not to any living individual or group of individuals.

Thirteen commenters recommended changes to the definition of human remains in § 10.2 (b)(1) (renumbered § 10.2 (d)(1)). One commenter recommended expanding the definition to include all human remains, not just those of Native Americans. The Act is designed specifically to address the disposition or repatriation of Native American human remains, funerary objects, sacred objects, or objects of cultural patrimony and not to cover all human remains. Three commenters recommended excluding disarticulated and unassociated human remains, such as isolated teeth and finger bones, from repatriation. Two commenters recommended amending the definition to include only those human remains "associated with the body at the time of death," to eliminate such things as extracted or lost teeth, cut finger nails, coprolites, blood residues, and tissue samples taken by coroners. One commenter recommending deleting the exemplary clause—"including but not limited to bones, teeth, hair, ashes, or mummified or otherwise soft tissue"—as being overly limiting. The Act makes no distinction between fully-articulated burials and isolated bones and teeth. Additional text has been added excluding "naturally shed" human remains from consideration under the Act. This exclusion does not include any human remains for which there is evidence of purposeful disposal or deposition. The exemplary clause has been deleted. One commenter requested clarification as to whether the regulations would apply to blood sold or given to a blood bank by an individual of Native American ancestry. The blood bank would not be subject to repatriation having been freely given. One commenter supported considering human remains that had been incorporated into a sacred object or object of cultural patrimony be considered as part of that cultural item for the purpose of determining cultural affiliation. Two commenters recommended excluding human remains incorporated into cultural items from repatriation since, as one said, they were "objectified by their original makers and owners, not the institutions that might house them now." One commenter requested clarification regarding the status of human remains that were not freely given but that have been incorporated into objects that are not cultural items as defined in these regulations. The legislative history is silent on this issue. Determination of the proper disposition of such human remains must necessarily be made on a case-by-case basis. One commenter recommended deleting reference to human remains that have been incorporated into a funerary object, sacred object, or object of cultural patrimony, in that any change in the character of the human remains, including the definition, would only further their dishonor. Three commenters asked for clarification in how to determine whether human remains incorporated into a funerary object, sacred object, or object of cultural patrimony were freely given. The provision regarding determination of the cultural affiliation of human remains that had been incorporated into a funerary object, sacred object, or object of cultural patrimony was recommended by the Review Committee to preclude the destruction of items that might be culturally affiliated with one Indian tribe that incorporate human remains culturally affiliated with another Indian tribe.

Two commenters recommended changing the definition of cultural items in § 10.2 (b)(2). One commenter recommended broadening the definition to include any and all objects deemed to have cultural significance by an Indian tribe. Cultural items are defined in the Act to include human remains, funerary objects, sacred objects, and objects of cultural patrimony. The term was redefined in the proposed regulations to include funerary objects, sacred objects, and objects of cultural patrimony, and not human remains to address the objections some individuals had expressed over referring to human remains as "cultural items." Two commenters recommended retaining the statutory definition. The term has been changed to read "human remains, funerary object, sacred object, or object of cultural patrimony" throughout the rule to ensure clarity. The definition of "cultural item" has been deleted throughout the text.

One commenter recommended combining the definitions of associated funerary object in § 10.2 (b)(3) and unassociated funerary object in § 10.2 (b)(4) into a single definition of funerary object. The two definitions have been combined in § 10.2 (d)(2).

Ten commenters recommended changes to the definition of associated funerary object in § 10.2 (b)(3) and unassociated funerary object in § 10.2 (b)(4) (combined and renumbered § 10.2 (d)(2)). One commenter recommended rewriting both definitions to make a distinction between objects associated with individual human remains and objects for which a funerary context is suspected, but association with individual human remains is not possible. Another commenter objected to what he considered an overly rigorous standard of proof. The statutory language makes it clear that only those objects that are associated with individual human remains are considered funerary objects. The distinction between associated and unassociated funerary objects is based on whether the individual human remains are in the possession or control of a museum or Federal agency. One commenter recommended deleting the word "intentionally" in § 10.2 (b)(3)(i) and § 10.2 (b)(4) since the term does not occur in the statutory language. The term is included to emphasize the intentional nature of death rites or ceremonies. Items that inadvertently came into proximity or contact with human remains are not considered funerary objects. One commenter questioned whether any objects excavated intentionally or discovered inadvertently on Federal or tribal land after November 16, 1990, would fit these definitions, since it requires the objects be in the possession or control of a Federal agency, and section 3 of the Act seems to preclude Federal ownership of such objects. Possession of funerary objects excavated intentionally or discovered inadvertently on Federal or

tribal land is sufficient to apply the provisions of the statute to such intentional excavations or inadvertent discoveries.

Two commenters recommended deletion of the clause "or near" from § 10.2 (b)(3) (renumbered § 10.2 (d)(2)), indicating that it would require museums to enter into debates about the proximity of objects to human remains. The clause was included to accommodate variations in Native American death rites or ceremonies. Some Indian tribes, particularly those from the northern plains, have ceremonies in which objects are placed near, but not with, the human remains at the time of death or later. The drafters consider these funerary objects.

One commenter recommended clarifying § 10.2 (b)(3)(i) (renumbered § 10.2 (d)(2)(i)) by specifying that funerary objects are "associated" even when another institution has possession or control of the human remains. The drafters consider the statutory definition, which is repeated in the rule, to support this interpretation without any additional modification. One commenter recommended clarifying § 10.2 (a)(3)(ii) [renumbered § 10.2 (d)(2)(i)] by specifying that items made exclusively for burial purposes are considered as associated funerary objects even if there are no associated human remains. Items made exclusively for burial purposes are considered associated funerary objects even if there are no associated human remains. Four commenters recommended deleting the final sentence of the definition of unassociated funerary object in § 10.2 (b)(4) [renumbered § 10.2 (d)(2)], objecting to the requirement that such human remains were removed from a "specific" burial site. Another commenter recommended deleting reference to the "preponderance of the evidence" in the same sentence, because it implies an adversarial context which is inappropriate for the process of identifying unassociated funerary objects. In both of these instances, the text of the regulations reflects exactly the statutory text and has not been modified. The final sentence of this section was drawn from an explanation of the definition in House Report 101–877 (1990: page 2) and is taken to represent Congressional intent. Another commenter recommended deleting "reasonably believed to have been" from § 10.2 (b)(2)(ii). The phrase has been deleted.

One commentor recommended clarifying the definition of unassociated funerary objects in § 10.2 (b)(4) to exempt items exhibited intentionally with individual human remains but subsequently returned or distributed to living descendants or other individuals. The recommended language has been added to § 10.2 (d)(2)(ii).

Ten commenters recommended changes to the definition of sacred objects in § 10.2 (b)(5) (renumbered § 10.2 (d)(3)). One commenter recommended broadening the definition to include any and all objects deemed to have sacred significance by Indian tribes and not just those objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present-day adherents. Another commenter recommended broadening the definition to include specific objects or geological features identified by traditional Native American practitioners as endowed with sacredness due to the object's past role in traditional Native American religious ceremony or on the basis of similar objects having contemporaneous religious significance or function in the continued observance or renewal or a ceremony. The statutory language and legislative history indicate that this definition was written carefully and precisely. Expanding the definition to include the types of items identified above in the comments runs counter to Congressional intent.

Four commenters recommended changes in the definition of traditional religious leader in § 10.2 (a)(13) (renumbered § 10.2 (d)(3)). Two commenters recommended replacing the phrase allowing such leaders to be recognized "by members of that Indian tribe" with "that Indian tribe." The drafters realize that allowing members of an Indian tribe or Native Hawaiian organization to recognize traditional religious leaders may result in conflicting claims. However, such issues are best resolved by the members of the Indian tribe or Native Hawaiian organization themselves. One commenter recommended replacing the word "or" at the end of § 10.2(a)(13)(i) with "and." The two criteria listed are intended as alternative methods for identifying traditional religious leaders and not as cumulative criteria. Another commenter recommended specifying that an individual's leadership role must be based on "traditional" religious practices. The drafters consider whether or not an individual's leadership in a religion is based upon traditional practice an inappropriate concern for Federal regulations.

Two commenters recommended deleting the word "current" from the first line of the definition of sacred object since the term was not included in the statutory text. The term was deleted. One commenter objected to "use" being the measure to decide whether an object should be repatriated, suggesting instead right of possession as the relevant standard. The necessity of an object for use by present day adherents of a traditional Native American religion is critical in identifying a sacred object, while determination of right of possession is necessary to determine whether the sacred object must be repatriated to the Indian tribe or Native Hawaiian organization or may be retained by the museum or Federal agency.

One commenter recommended deleting the second sentence of the definition of sacred object which he considers to depart in major ways from the statutory definition. The second sentence of the definition was drawn from the Senate Select Committee Report (S.R. 101–473: p. 7) and helps clarify the precise, limited use of this category intended by Congress.

One commenter recommended including clarification in the definition that: 1) sacred objects can not be associated with human remains, as they would then be funerary objects, and 2) only in rare circumstances can prehistoric items be sacred objects. While this usually may be so, blanket exclusion of any funerary object from also being a sacred object is not considered appropriate in that the categories are not mutually exclusive. Similarly, identification of sacred objects from prehistoric contexts must be made on a case-by-case basis.

One commenter agreed with the inclusion of sacred objects that have religious significance or function in the continued observance or renewal of a traditional Native American religious ceremony or ritual. Another commenter recommended deleting reference to "renewal" in the second sentence, stating that the issue was debated during the legislative process and final statutory language does not include reference to renewal of a traditional Native American religious ceremony. Language specifying the inclusion of objects that function in the continued observance or renewal of a traditional Native American religious ceremony as sacred objects was drawn from the Senate Select Committee Report (S.R. 101–473: p. 7) and is thought to reflect Congressional intent.

Three commenters requested clarification as to who is responsible for making the determination that a particular item fits the definition of sacred object. In all cases, the museum or Federal agency official has the initial responsibility for deciding whether an object in its possession or control fits the definition of sacred object. However, if an Indian tribe or Native Hawaiian organization does not agree with this decision, it has recourse to challenge directly the decision of the museum or Federal agency. The Indian tribe or Native Hawaiian organization may seek the involvement of the Review Committee if it is unsuccessful in its direct appeal to the museum or Federal agency.

Six commenters recommended changes to the definition of objects of cultural patrimony in § 10.2 (b)(6) (renumbered § 10.2 (d)(4)]) One commenter recommended deleting the word "cultural" from the term "cultural items" in the first sentence, in that the current phrasing is circular. The word has been deleted. One commenter cautioned that the definition does not recognize that internal disagreements may occur within an Indian tribe or Native Hawaiian organization about the importance of an object of cultural patrimony. Another commenter recommended broadening the definition to include those objects of ongoing historical, traditional, or cultural importance central to any sub-group of an Indian tribe, such as a band, clan, lineage, ceremonial society, or other subdivisions. Claims for human remains, funerary objects, sacred objects, or objects of cultural patrimony by such sub-groups must be made through an Indian tribe or Native Hawaiian organization.

One commenter requested clarification of the example of the Zuni War Gods that appear to be both objects of cultural patrimony and sacred objects. An object can fit both categories depending upon the nature of the traditional religion and the system of property rights used by a particular Indian tribe or Native Hawaiian organization. Zuni War Gods present such a case. In other cases, sacred objects may have been owned privately and, thus, are not considered objects of cultural patrimony. One commenter requested clarification as to who is responsible for making the determination that a particular item fits the definition of object of cultural patrimony. In all cases, the museum or Federal agency official has the initial responsibility for deciding whether an object in its possession or control fits the definition of object of cultural patrimony. However, if an Indian tribe or Native Hawaiian organization does not agree with this decision, it has recourse to challenge directly the decision with the museum or Federal agency.

Section 10.2 (e) includes the definition of cultural affiliation. One commenter recommended deleting reference to Native Hawaiian organizations as they are included under the definition of Indian tribe in § 10.2 (b)(2). The text has been changed to read "Indian tribe or Native Hawaiian organization" throughout the regulations. One commenter requested inclusion of a short characterization of the threshold criteria applicable to determining cultural affiliation. A second sentence clarifying this threshold has been added to the definition. Three commenters requested additional clarification of the definition of cultural affiliation. Procedures for determining cultural affiliation are included in § 10.14 (c).

Section 10.2 (f) includes definitions of the types of lands that the excavation and discovery provisions of these regulations apply.

Six commenters asked for clarification regarding the applicability of statutory provisions for intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony to private lands. Unlike provisions of the National Historic Preservation Act (NHPA) that are applicable to Federal undertakings regardless of who owns the land on which the project is being conducted, the intentional excavation and inadvertent discovery provisions of these regulations apply only to Federal and tribal lands.

Five commenters recommended changes to the definition of Federal lands in § 10.2 (d)(1) (renumbered § 10.2 (f)(1)). One commenter recommended deleting the definition of "control" as it will require Federal bureaucrats to make complicated legal determinations as to what is "a sufficient legal interest to permit it to apply these regulations without abrogating the rights of a person." Another commenter recognized the need for a definition of Federal "control," but suggested that the present definition fails to clarify the issue. Another commenter requested clarification whether Federal control, and thus the intentional excavation and inadvertent discovery provisions of these regulations, extends to the Wetlands Reserve Program or to the Forest Legacy Program. One commenter requested clarification of the applicability of Federal control to real property instruments such as easements, rights-of-way, and rights-of-entry for performance of specific activities. One commenter requested clarification of the applicability of Federal control to private lands through issuance of a Federal permit, license, or funding. One commenter recommended including the existence of a long term lease by a Federal agency or an interest under which the land owner has authorized the United States to undertake intentional excavation or other land disturbance as under Federal control. As indicated above, the intentional excavation and inadvertent discovery provisions of the Act apply only to Federal and tribal lands. Whether Federal control of programs such as those mentioned above is sufficient to apply these regulations to the lands covered by the program depends on the circumstances of the Federal agency authority and on the nature of state and local jurisdiction. Such determinations must necessarily be made on a case-by-case basis. Generally, however, a Federal agency will only have sufficient legal interest to "control" lands it does not own when it has some other form of property interest in the land such as a lease or easement. The fact that a Federal permit is required to undertake and activity on non-Federal land generally is not sufficient legal interest in and of itself to "control" the land within the meaning of these regulations and the Act. In situations when two or more Federal agencies share regulatory or management jurisdiction over Federal land, the Federal agency with primary management authority will generally have control for purposes of implementing the Act.

Nineteen commenters recommended changes to the definition of tribal lands in § 10.2 (c)(2) (renumbered § 10.2 (f)(2)). One commenter recommended broadening the exclusion of privately owned lands within the exterior boundaries of an Indian reservation to encompass state and Federal land holdings. Thirteen commenters objected to the exclusion of privately owned lands within the exterior boundaries of an Indian reservation and recommended returning to the statutory language. The proposed exclusion was intended to rectify a contradiction between the statutory definition of tribal lands in section 2 (15) of the Act and the guarantee in section 2 (13) of the Act that no taking of property without compensation within the meaning of the Fifth Amendment of the United States Constitution is intended. The drafters concur with the majority of commenters that the blanket exclusion of private lands within the exterior boundaries of an Indian reservation from the intentional excavation and inadvertent discovery provisions of the regulations is overly broad. The exclusion was deleted and a new subsection added at § 10.2 (f)(2)(iv) stating that the regulations will not apply to tribal lands to the extent that any particular action

authorized or required will result in a taking of property without just compensation within the meaning of the Fifth Amendment to the United States Constitution.

Three commenters recommended broadening the definition of tribal lands to apply to allotments held in trust for Indian tribes or individuals, regardless of whether the allotments are inside or outside the boundaries of an Indian reservation. This suggestion is inconsistent with the Act's definition of tribal lands. One commenter stated that the reference to 18 U.S.C. 1151 in § 10.2 (d)(2)(ii) (renumbered § 10.2 (f)(2)(ii)) does not clarify the nature of dependent Indian community. Dependent Indian communities, as defined in 18 U.S.C. 1151 (b), include those Indian communities under Federal protection that were neither "reserved" formally, nor designated specifically as a reservation. Cohen, in *The Field of Indian Law* (1982:38) concludes that "it is apparent that Indian reservations and dependent Indian communities are not two distinct definitions of place but rather definitions which largely overlap. All Indian reservations are also dependent Indian communities unless they are uninhabited." In addition to Indian reservations, dependent Indian communities also include patented parcels of land and rights-of-way within residential Indian communities under Federal protection. One commenter recommend joining § 10.2 (d)(2)(i), (ii), and (iii) (renumbered § 10.2 (f)(2)(i), (ii), and (iii)) with "or" at the end of the first two lines. This change has been made.

Nine commenters recommended changes to the definition of aboriginal lands in § 10.2 (c)(3). Four commenters challenged use of Indian Claims Commission judgements to determine aboriginal territories. One commenter recommended using Native American origin stories and anthropological evidence instead. A second commenter recommended that the limits of aboriginal territory must come directly from the Indian tribe itself. A third commenter recommended expanding the definition to include all ceded lands and all lands traditionally used by an Indian tribe, regardless of whether there may have been overlapping usage by neighboring Indian tribes. The Indian Claims Commission was established in 1949 specifically to adjudicate tribal land claims against the United States. Over 200 cases were settled between 1949 and 1978 when the Commission was terminated. Since 1978, Indian land claims have been adjudicated by the United States Court of Claims. The Commission and the Court have considered a wide range of information, including oral history and anthropological evidence, in reaching their decisions. Section 3 (a)(1)(C) of the Act specifically gives Indian tribes the right to claim human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal land that is recognized by a final judgement of the Indian Claims Commission or United States Court of Claims as part of their aboriginal land. The drafters consider the final judgements of the Indian Claims Commission a valuable tool for identifying area occupied aboriginally by a present-day Indian tribe. Other sources of information regarding aboriginal occupation should also be consulted. The definition has been deleted from the rule.

One commenter questioned whether provisions of the Act regarding intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony apply to all aboriginal lands, or just to that portion of an Indian tribe's aboriginal territory that is now in Federal ownership or control. These regulations apply to claims for human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands. One commenter requested reference information for final judgements by the Court of Claims. One commenter stated that the map of aboriginal lands included with the final report of the Indian Claims Commission is out of print, out of date, and difficult to use as neither counties nor detailed geographic indicators are provided. The United States Geological Survey has recently republished the 1978 map. Efforts are underway to update the map to include land claims settled since 1978. One commenter inquired about the status of Indian tribes that have filed a land claim for a particular area, but for which a court judgement or ruling from the court has been made. An Indian tribe's status to make a claim under the Act based upon aboriginal occupation of an area is recognized when a favorable court judgement or ruling has been made. However, this situation will only affect the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal land where no lineal descendants or culturally affiliated Indian tribe has made a claim.

Subsection 10.2 (g) includes definitions of procedures required to carry out these regulations. Two commenters asked for clarification of the difference between the items included on the summary in § 10.2 (e)(1) (renumbered § 10.2 (g)(1)) and the items on the inventory in § 10.2 (e)(2) (renumbered § 10.2 (g)(2)). Summaries are written general descriptions of collections or portions of collections that may contain unassociated funerary objects, sacred objects, and objects of cultural patrimony. Inventories are item-by-item descriptions of human remains and associated funerary objects. The distinction between the documents reflects not only their subject matter, but also their detail (brief overview vs. item-by-item list), and place within the process. Summaries represent an initial exchange of information prior to consultation while inventories are documents completed in consultation with Indian tribe officials and representing a decision by the museum official or Federal agency official about the cultural affiliation of human remains and associated funerary objects.

One commenter recommended including a definition of "repatriation" in the regulations. The rules of statutory construction require interpreting undefined terms according to their common meaning. Repatriation means the return of someone or something to its nation of origin.

One commenter recommended inclusion of a definition for "appropriate care and treatment" of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The appropriateness of particular types of care and treatment will necessarily depend on the nature of the particular human remains, funerary objects, sacred objects, or objects of cultural patrimony under consideration and the concerns of any lineal descendants or affiliated Indian tribes or Native Hawaiian organizations.

Three commenters recommended changes to the definition of intentional excavation in 10.2 (e)(3) (renumbered § 10.2 (g)(3)). One commenter recommended deleting the word "planned" from the definition to embrace all kinds of archeological removal, whether planned or occasioned by an encounter with human remains, funerary objects, sacred objects, or objects of cultural patrimony during construction or land use. One commenter recommended expanding the definition to include intentional excavations on private lands. One commenter recommended replacing the definition with "means intentional removal for the purposes of discovery, study, or removal of such items" from section 3 (c) of the statute. These changes are unnecessary or inappropriate and were not made.

Two commenters recommended changes to the definition of inadvertent discovery in 10.2 (e)(4) (renumbered § 10.2 (g)(4)). One commenter recommended replacing "inadvertent" with "accidental, unintended, unpredictable, or unexpected in spite of all precaution," to avoid any presumption that such discoveries were made without forethought or through negligence. Another commenter recommended expanding the definition to include inadvertent discoveries on private lands. These changes are unnecessary or not appropriate and were not made.

Section 10.3

This section carries out section 3 (c) of the Act regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony that are excavated intentionally from Federal or tribal lands after November 16, 1990. One commenter recommended stating explicitly that the section applies only to Native American human remains and not to non-Native American human remains such as mountain men or early settler burials. The language has not been changed as all provisions of these regulations apply only to Native American human remains, funerary objects, sacred objects or objects of cultural patrimony. One commenter requested reviewing use of the term "intentional excavation" throughout the section to ensure consistency with the statutory language. Section 3 (c) of the Act applies to the "intentional removal from or excavation of Native American [human remains and] cultural items from Federal or tribal lands for the purposes of discovery, study, or removal." This definition includes scientific archeological excavations for independent research, public interpretation, or as part of planned removal of human remains during land-disturbing activities such as construction projects.

One commenter recommended the regulations focus on "more protection of archeological sites ... for research by the scientific community." The Act certainly has as one goal improved protection of *in situ* archeological sites. However, this protection is afforded not simply to allow for more scientific study. Rather, the intent is to preserve and protect Native American graves, allowing for their scientific examination only as necessary and appropriate.

Two commenters requested clarification of the clause "if otherwise required" regarding the necessity for obtaining a permit issued pursuant to the Archeological Resources Protection Act (ARPA) in § 10.3 (b)(1). The clause has been deleted. The Review Committee recommended additional clarification in § 10.3 (b)(1) regarding issuance of ARPA permits on private holdings within the exterior boundaries of Indian reservations and on lands administered for the benefit of Native Hawaiians pursuant to the Hawaiian Homes Commission Act. Language regarding issuance of permits on these lands has been included.

One commenter recommended requiring the consent of culturally affiliated Indian tribes and Native Hawaiian organizations for intentional excavations on both Federal and tribal lands. Another commenter recommended requiring the consent of traditional religious leaders for intentional excavations on both Federal and tribal lands. These changes have not been made. Section 3 (c)(2) of the Act authorizes excavation or removal of human remains, funerary objects, sacred objects, or objects of cultural patrimony only after consultation with or, in the case of tribal lands, consent of the appropriate Indian tribe or Native Hawaiian organization. One commenter recommended that § 10.3 (b)(4) not be "the only requisite for intentional excavation." The requirements of § 10.3 (b)(1) through (4) must all be met before conducting an intentional excavation.

One commenter recommended changing the title of § 10.3 (c) from "Procedures" to "Disturbances during authorized land use." The procedures outlined in this subsection apply to intentional removal or excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal or tribal land and not disturbance during authorized land use, which is dealt with under § 10.4 regarding inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal or tribal lands. One commenter suggested that § 10.3 (c)(1) confuses the issue of who — "any person" or the Federal official — is responsible for complying with the provisions of the regulations regarding intentional excavations, and recommended deleting the section. Two commenters requested clarification of an "activity" as referred to in the first sentence of § 10.3 (c)(1). The subsection has been deleted and subsequent subsections renumbered.

One commenter requested clearly defining "responsible Federal agency." The Federal agency with the responsibility for issuing approvals or permits on actions within their designated Federal lands is the responsible Federal agency under the Act. In situations when two or more Federal agencies share regulatory or management jurisdiction of Federal land, the Federal agency with primary management authority will have control for purposes of carrying out these regulations unless otherwise agreed.

One commenter recommended requiring any person who proposes to undertake an activity on Federal or tribal lands that may result in the intentional excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony to notify all affected parties, including culturally affiliated Indian tribes and Native Hawaiian organizations. The Federal agency official — and not a person proposing to undertake an activity on Federal lands — is responsible for the management of lands under his or her control and is the appropriate person to notify Indian tribes and Native Hawaiian organizations of intentional excavations. The Federal agency official, once notified by a person of such an activity, is required to take reasonable steps to determine whether the planned activity may result in the intentional excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Prior to issuing any approvals or permits, the Federal agency official must notify in writing the Indian tribe or Native Hawaiian organizations that are likely to be affiliated with any excavated items. A person proposing to undertake an activity on tribal lands should contact the appropriate tribal official directly.

One commenter recommended requiring the Federal official identified in the first sentence of § 10.3 (c)(2) (renumbered § 10.3 (c)(1)) to meet the Secretary's standards for persons conducting ethnohistoric research. There currently are no Secretary's standards for ethnohistoric research. Each agency is responsible for ensuring that their employees are qualified to conduct the work required of them. One commenter recommended clarifying the "reasonable steps" required of Federal officials to explicitly include completion of Stage I surveys for of all planned ground-disturbing activities as required under section 106 of the NHPA. The type of steps taken by a Federal agency official are expected of vary from case-to-case and have not been specified in these regulations.

One commenter recommended requiring Federal officials to take reasonable steps regarding planned activities "or Federal actions." The recommended language has not been

added as it might be interpreted to refer to Federal actions on non-Federal lands. Provisions of the Act regarding intentional excavations and inadvertent discoveries apply only to activities occurring on Federal and tribal lands.

One commenter questioned whether the responsible Federal agency official need be notified regarding planned activities for which there is no indication that disturbance of human remains, funerary objects, sacred objects, or objects of cultural patrimony is likely. These regulations do not require notification of the responsible Federal agency official regarding planned activities for which intentional excavation or removal of human remains, funerary objects, sacred objects, or objects of cultural patrimony is not anticipated. Human remains, funerary objects, sacred objects, or objects of cultural patrimony discovered inadvertently during such an activity would require cessation of activity for thirty (30) days while the Federal official consults with affiliated Indian tribes and Native Hawaiian organizations.

One commenter questioned whether the phrase "otherwise required by law" in the second sentence of § 10.3 (c)(2) (renumbered § 10.3 (c)(1)) referred to "approvals or permits" or to "activities." The sentence has been rewritten as "required approvals or permits for activities." One commenter recommended including language requiring Federal agency officials to notify both Indian tribe officials and traditional religious leaders and obtaining that written approval from the traditional leaders prior to issuance of required approvals or permits. The Act requires Federal agency officials to consult with Indian tribes and Native Hawaiian organizations regarding the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands. Consultation with traditional religious leaders is required regarding the identification of cultural items in museum or Federal agency collections. The consent of traditional religious leaders prior to the issuance of approvals or permits is not required by the Act. One commenter recommended inclusion of provisions requiring a minimum of at least ten days advance warning of any proposed meeting in the Federal agency official's notification to culturally affiliated Indian tribes or Native Hawaiian organizations. The recommended requirement could needlessly delay consultation between Federal and tribal officials. Federal officials should include adequate advance notice of upcoming meetings, but the necessary time will vary according to the situation and existing relationship between the Federal agency and the Indian tribes or Native Hawaiian organizations. The text has not been changed.

One commenter questioned the necessity of distinguishing in the third sentence of § 10.3 (c)(2) (renumbered § 10.3 (c)(1)) between culturally affiliated Indian tribes and those Indian tribes that aboriginally occupied an area. The priority order for evaluating claims of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands, provided in Section 3 of Act, includes Indian tribes that are recognized as aboriginally occupying the area in which the objects were identified. The regulatory language ensures that those Indian tribes that aboriginally occupied an area are notified of planned activities that may result in the intentional excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Another commenter recommended including state-recognized intertribal councils in the notification process. Section 12 of the Act makes clear the special relationship between the Federal government and Indian tribes. Federal officials are thus directed to consult directly with Indian tribes. Indian tribes may however, delegate their consultation responsibilities to other organizations, including state inter-tribal councils. One commenter recommended following written notification by telephone contact if there is no response in 15 days. Language to that effect has been inserted as the second to last line of the section. One commenter recommended that, after consultation, Federal officials are required to complete a written plan of action as described in § 10.5 (e) and to execute the actions called for in the plan of action. The recommended text has been inserted as § 10.3 (c)(2) and all subsequent subsections renumbered.

Two commenters objected to § 10.3 (c)(3) on the grounds that by exhorting Federal agencies to coordinate activities required by these regulations with the compliance procedures for section 106 of the NHPA, the regulations give the impression that human remains, funerary objects, sacred objects, or objects of cultural patrimony would be eligible for the National Register of Historic Places. Four other commenters recommended the subsection either be left as is, or edited to require such coordination to ensure consistency between and among Federal agencies. One commenter recommended excluding such "secondary agencies as the State Historic Preservation Officers" from the consultation process. The subsection is intended to remind Federal agencies of similarities between the two consultation processes while providing the necessary latitude for designing effective and situation-specific procedures. The text has not been changed.

Two commenters objected to identification in § 10.3 (c)(4) of the Indian tribe as being responsible for compliance with provisions of the Act regarding intentional excavations on their lands. Section 3 (a)(2)(A) of the Act makes it clear that Indian tribes have preference regarding custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on their tribal lands second only to lineal descendants. The regulatory text is consistent with Federal recognition of an Indian tribe's sovereignty regarding administration of their lands and has not been changed. Another commenter requested clarification of whether the intentional excavation provisions apply to lands exchanged by Indian tribes. In general, the provisions regarding intentional excavations and inadvertent discoveries apply to Federal lands and those lands currently held in trust by the United States for an Indian tribe. Lands outside the exterior boundary of an Indian reservation that are held in trust by the United States for an Indian tribe do not meet the statutory definition of tribal lands. These lands are under Federal control, and the provisions for intentional excavation and inadvertent discovery on Federal lands apply. The provisions of these regulations do not apply to lands owned by an Indian tribe that have not been accepted into trust by the United States. Another commenter requested clarification regarding which Federal agency would have primary responsibility for compliance with the intentional excavation and inadvertent discovery provisions of these regulations for proposed or existing coal mining operations on tribal lands. Any person who proposes to undertake an activity on tribal lands that may result in the intentional excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony must immediately notify in writing the responsible Indian tribe official. The tribal official then decides what, if any, steps to take. One commenter recommended including a deadline for Indian tribe response to notification of an activity planned for tribal lands. A deadline for Indian tribal response regarding proposed intentional excavations on tribal land is not considered appropriate as section 3 (c)(2) of the Act makes it clear that any intentional excavation or removal of human remains, funerary objects, sacred objects, or objects of cultural patrimony on tribal land requires the consent of the appropriate Indian tribe or Native Hawaiian organization. Another commenter recommended clarifying that the Indian tribe should take appropriate steps to make certain that the "treatment and disposition" of human remains, funerary objects, sacred objects, or objects of cultural patrimony be carried out. The recommended language has been included.

Section 10.4

This section carries out section 3 (d) of the Act regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony that are discovered inadvertently on Federal or tribal lands after November 16, 1990. One commenter requested replacement of the word "inadvertent" in the section title with "unintended." Section 3 (d) of the Act addresses the inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony as part of approved work projects as well as other, unintentional discoveries on Federal or tribal lands. The statutory term covers both meanings adequately and has been retained in the title and throughout the text.

One commenter felt the entire section needed to be more specific. One commenter recommended editing the general statement in § 10.4 (a) to state explicitly that the provisions apply only to "Native American" human remains, funerary objects, sacred objects, or objects of cultural patrimony. The definition of human remains, funerary objects, sacred objects, or objects of cultural patrimony in § 10.2 (d) make it clear that these regulations only apply to Native American human remains, funerary objects, sacred objects, or objects of cultural patrimony.

One commenter requested clarification in the regulations regarding treatment of disarticulated and unassociated human remains. Section 10.4 of the Act covers the treatment and disposition of such human remains under "Inadvertent Discoveries."

Two commenters recommended revising the first sentence of § 10.4 (b) to require the person making an inadvertent discovery, and not just anyone that knows of an inadvertent discovery, to notify the responsible Federal official. The phrase has been revised to more closely reflect the statutory language. Another commenter recommended that the notification of the responsible Federal official be immediate, via telephone or fax, to ensure that the activity is ceased as soon as possible. The text has been modified to require immediate telephone notification of the inadvertent discovery with written confirmation following. One commenter recommended inclusion of language in this subsection restating that determination of lineal descent or cultural affiliation usually require physical anthropological study, laboratory analysis, radiocarbon dating, and other study to make a legally defendable statement. The criteria for determining lineal descent and cultural affiliation, which may include these kinds of examinations, are contained in § 10.14, and apply throughout these regulations; they have not been repeated in this section. Another commenter recommended requiring professional investigation sufficient to complete an accurate identification of the nature of the inadvertent discovery prior to notifying the responsible Federal agency official or Indian tribe official to ensure that the procedures are not carried out unnecessarily. The drafters consider requiring the complete professional identification of inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony prior to notification of the responsible Federal or Indian tribe officials inconsistent with the statutory language and the legislative history. One commenter requested clarification of the responsibilities of the person making an inadvertent discovery for notifying other agencies, such as the local police, coroner, and the State Historic Preservation Officer. Requirements for notification of local or state officials vary by jurisdiction and have not been addressed in this rule. Subsection 10.4 (f) of these regulations suggests Federal land managers coordinate their responsibilities under this section with their emergency discovery responsibilities under section 106 of the NHPA which includes notification of the State Historic Preservation Officer. One commenter recommended modifying the text to require Federal agency employees working on tribal lands to immediately notify their supervisor, who in turn will notify the Indian tribe official. Section 3 (d)(1) of the Act requires notification of Indian tribe officials regarding inadvertent discoveries on tribal lands. Federal agency officials conducting activities on tribal lands should ensure that their employees are familiar with the notification procedures of these regulations. One commenter recommended expanding this subsection to include provisions to ensure that a Federal agency documents and acts on reported inadvertent discoveries. Federal agency officials are required to comply with the provisions of these regulations.

One commenter recommended applying the cessation of activity following inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal or tribal lands in § 10.4 (c) only to burials in areas that will not be disturbed and in emergency discovery situations. This suggestion runs counter to the statutory requirements and the regulatory language has not been changed. Two commenters requested clarification of the phrases "in the area of the discovery" and a "reasonable effort" regarding protection of human remains, funerary objects, sacred objects, or objects of cultural patrimony following inadvertent discovery. The terms have not been precisely defined in recognition of the variability of site locations and types. In general, the terms are interpreted in a fashion that adequately protects the human remains, funerary objects, sacred objects, or objects of cultural patrimony from additional damage.

One commenter recommended editing and renumbering § 10.4 (a), (e), and (f) to more accurately reflect the distinctions between procedures on Federal lands and those for tribal lands. The text of § 10.4 (d) has been renumbered § 10.4 (d)(1) and § 10.4 (e) has been renumbered as § 10.4 (d)(2).

Two commenters recommended including additional text in § 10.4 (d)(1) (renumbered section 10.4 (d)(1)(i)) directing Federal agencies to establish a process for certifying the receipt of inadvertent discovery notifications and training personnel responsible for such certifications by a specific date. Certification procedures for the receipt of notifications — such as those resulting from inadvertent discoveries — are already in place with all land management Federal agencies and need only be modified to the specifics of these regulations. One commenter recommended including additional examples of steps to secure and protect inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony — such as fencing, 24–hour surveillance in populated areas — in § 10.4 (d)(2) (renumbered section 10.4 (d)(1)(i)). Specific steps to secure and protect inadvertently discovered human

remains, funerary objects, sacred objects, or objects of cultural patrimony will vary from site-to-site and have not been specified in this rule.

Seven commenters recommended extending the one (1) day deadline for notification of affiliated Indian tribes by Federal agency officials in § 10.4 (d)(3), with suggestions ranging anywhere from three to ten days. The one (1) day deadline was designed to ensure that Federal agency officials and Indian tribe officials maximize the amount of time available for consultation regarding the treatment and disposition of inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony. The Act requires that the thirty (30)-day cessation of the activity begins with the Federal agency official certifying receipt of notification from the inadvertent discoverer of the human remains, funerary objects, sacred objects, or objects of cultural patrimony. As a result, any additional time provided the Federal agency official to contact the appropriate Indian tribe official is time taken away from the consultation process. In recognition of the inherent notification difficulties, the drafters have modified the initial notification requirements to require the person making the inadvertent discovery to provide immediate telephone notification with written confirmation to the Federal official. Certification of the notification by the Federal official and the required notification of the Indian tribe official occurs upon receipt of the written confirmation, thus providing the Federal agency official with some additional time between the telephone call and receipt of the written notice to identify the appropriate Indian tribe officials. The one (1) day notification deadline has been extended to three (3) working days. One commenter requested clarification for the phrase "Indian tribe or tribes known or likely to be affiliated." It should be noted that this initial contact is designed to notify those Indian tribes or Native Hawaiian organizations that are "likely" to be affiliated with the inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony. Federal agencies are encouraged to compile a listing of the appropriate Indian tribes or Native Hawaiian organizations and their officials as soon as possible to facilitate rapid notification when an inadvertent discovery is made. Determination of the specific affiliation of the inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony can be made during the thirty (30) day cessation of activity. Two commenters requested clarification of the phrase "if known" in § 10.4 (d)(3) (renumbered § 10.4 (d)(1)(iii)) regarding the required notification of Indian tribes which aboriginally occupied the area in which human remains, funerary objects, sacred objects, or objects of cultural patrimony have been discovered inadvertently. Information regarding the aboriginal lands of Indian tribes is readily available to Federal agency officials from the results of Indian Land Claims Commission and Court of Claims decisions. "If known" has been deleted.

One commenter recommended suspending the initiation of consultation required in § 10.4 (d)(1) (renumbered § 10.4(d)(1)(ii)) for up to thirty (30) days in cases of illegal excavation or violation of Federal law, specifically in cases where confidential criminal investigation are being conducted. As the likely custodians of illegally excavated human remains, funerary objects, sacred objects, or objects of cultural patrimony pursuant to section 3 of the Act, the appropriate Indian tribe or Native Hawaiian organization should be notified of the inadvertently discovery and consulted as part of any ongoing investigation. The responsibility to pursue ARPA investigations does not devolve from the land manager's law enforcement agency merely because consultation is required under this Act. If an ARPA investigation is under way, the law enforcement agents involved should immediately notify their superiors and other Federal agency officials involved in NAGPRA consultation if any aspect of NAGPRA consultation is likely to interfere with the investigation.

Six commenters recommended changing the length of the required cessation of activities in § 10.4 (e) (renumbered § 10.4 (d)(2)). Four commenters recommended reducing the period — to fifteen (15) days, seven (7) days, or deleted entirely — while two commenters recommended extending the period until the affiliated Indian tribe or Native Hawaiian organization consents to continuation of the project. The thirty (30) day period for cessation of activities in the area of an inadvertent discovery is stipulated in section 5 (d) of the Act and has not been changed. Three commenters requested clarification of the stipulation that activity may resume after thirty (30) days, "if the resumption of the activity is otherwise lawful." The phrase is used to acknowledge that provisions of other statutes, such as section 106 of the NHPA, may also apply to a particular inadvertent discovery and the resumption of activities in the area of the inadvertent discovery must comply with other legal requirements as well as those of these regulations.

Four commenters requested clarification of the procedures following the thirty (30)-day cessation of activity. After consulting with the affiliated Indian tribe or Native Hawaiian organization during the thirty day (30) cessation of activity, the Federal agency official must make a decision regarding the treatment, excavation, and disposition of any inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony. The options may include preservation *in situ* or excavation of the human remains, funerary objects, sacred objects, or objects of cultural patrimony. This decision must be informed by the consultation process, but obviously will take into account other considerations as well. One commenter requested clarification regarding the responsibility for costs incurred during the required work cessation. Responsibility for costs incurred during the required work cessation will depend upon the nature of the contract drawn between the Federal agency and the appropriate contractor. One commenter recommended additional language indicating that resumption of an activity in the area of inadvertent discovery can occur only after the human remains, funerary objects, sacred objects, or objects of cultural patrimony have been removed or treated. Determining the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony discovered inadvertently on Federal and tribe land can only occur after consultation with affiliated Indian tribes and Native Hawaiian organizations. The drafters consider it premature to stipulate the outcomes.

One commenter recommended accompanying the written, binding agreement between the Federal agency and the affiliated Indian tribes or Native Hawaiian organizations in the second sentence of § 10.4 (e) (renumbered 10.4 (d)(2)) by a letter from the appropriate Indian tribe official expressing agreement with a proposed course of action. The nature of agreements between Federal agencies and Indian tribes and Native Hawaiian organizations will depend upon the specific situation and have not been defined precisely in these regulations. Four commenters recommended clarifying the phrase "necessary parties." The phrase has been replaced with "Federal agency and the affiliated Indian tribes or Native Hawaiian

organizations." One commenter inquired whether a memorandum of agreement signed and executed under the NHPA prior to any inadvertent discovery would take priority standing. Such an agreement might apply if the agreement specifies the plan for the removal, treatment, and disposition of the human remains, funerary objects, sacred objects, or objects of cultural patrimony; the agreement is considered binding by both the Federal agency and the affiliated Indian tribes or Native Hawaiian organizations; and, the agreement is consistent with the requirements of the Act and these regulations.

One commenter identified § 10.4 (f) (renumbered section 10.4 (e)) as an "absurd attempt to fob off the Federal agency's responsibilities onto the tribes." Requiring a Federal agency to act as intermediary between the person inadvertently discovering human remains, funerary objects, sacred objects, or objects of cultural patrimony and the Indian tribe on whose land the human remains, funerary objects, sacred objects, or objects of cultural patrimony have been discovered inadvertently is counter to the goal of the statute, as expressed in the legislative history, of facilitating direct dialogue. One commenter recommended inclusion in this subsection of a listing of those actions required of Indian tribe officials under the Act. The subsection has been amended to include the recommended text. One commenter recommended inclusion of a specified deadline for an Indian tribe to respond following notification of the inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The drafters consider it inappropriate to impose a deadline for Indian tribe response following notification. One commenter recommended inclusion of a section regarding the resumption of activity on tribal lands. The recommended section has been included as § 10.4 (e)(2).

One commenter identified § 10.4 (g) (renumbered § 10.4 (f)) as serving only to confuse requirements and procedures stemming from distinct laws with distinct purposes and recommended deleting the subsection. Other commenters identified § 10.4 (g) as being most welcome, but recommended omitting the specific regulatory citations in light of current efforts to amend regulations for the NHPA. The citations have been retained to facilitate cross-referencing. One commenter recommended clarifying the subsection to indicate that the inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony does not necessarily require an agreement under section 106 of the NHPA. Not all human remains, funerary objects, sacred objects, or objects of cultural patrimony are deemed eligible for the National Register of Historic Places and thus do not fall within the purview of the NHPA. Their inadvertent discovery would thus not require such an agreement. Two commenters recommended including specific language to outline the relationship between provisions of the Act and those of ARPA, NHPA, and the American Indian Religious Freedom Act (AIRFA). The details of how Federal agencies coordinate their responsibilities under the various statutes will depend on their procedures and specific situations; the text has not been modified. However, section 110 (a)(2)(E)(iii) of the NHPA requires Federal agencies to provide for the disposition of Native American human remains, funerary objects, sacred objects, and objects of cultural patrimony in a manner consistent with the Act. Further, section 112 (b)(3) and (b)(4) require the Secretary of the Interior to publish guidelines to encourage private owners as well as Federal, state, and tribal governments to protect Native American human remains, funerary objects, sacred objects, and object of cultural patrimony.

One commenter recommended including language at § 10.4 (g) requiring all authorizations to carry out land use activities on Federal lands or tribal lands, including all leases and permits, to include a requirement for the holder of the authorization to notify the appropriate Federal or tribal official immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The language is included in the text.

Section 10.5

This section establishes requirements for consultation as part of the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal lands. One commenter objected to the implication in the first sentence of the section that consultation is necessarily "part of" the intentional excavation or inadvertent discovery process. The Act requires consultation as part of intentional excavation and inadvertent discovery situations. The language has been retained. One commenter recommended replacing the phrase "Federal lands" with "land in the United States, its territories, or possessions." Provisions of section 3 of the Act are clearly limited to Federal and tribal lands. The language has been retained. One commenter recommended that "a minimum set of standards be identified for the scientific study of human remains and associated grave goods." Section 5 (a)(2) of the Act precludes using the Act as an authorization for the initiation of new scientific studies of human remains and associated funerary objects. The recommended language has not been included.

Two commenters recommended revising the first sentence of § 10.5 (a) to coordinate contact with traditional religious leaders through the appropriate Indian tribe. The most appropriate method for contacting traditional religious leaders will vary between Indian tribes. The language has been retained to provide this necessary flexibility. Another commenter recommended clarifying that consultation must be conducted without regard to state boundaries. The widespread relocation of Indian tribes during the eighteenth and nineteenth centuries means that consultation may often require contact with Indian tribes that are no long resident in the area of the intentional excavation or inadvertent discovery. Lineal descendants and affiliated Indian tribes and Native Hawaiian organizations must be contacted and consulted with regardless of where they are living presently.

One commenter recommended inserting "the" before "human remains" in § 10.5 (a)(1) to make it clear that the consulting parties may vary from case-to-case. The text has been changed. One commenter recommended changing the "and" between § 10.5 (a)(1) and (a)(2) to "or." The original text has been retained to emphasize the necessity of consulting with Indian tribes that are or are likely to be culturally affiliated with the human remains, funerary objects, sacred objects, or objects of cultural patrimony as well as the Indian tribe on whose aboriginal lands the human remains, funerary objects, sacred objects, or objects of cultural patrimony have been located or are expected to be found and the Indian tribe or Native Hawaiian organization have a demonstrated cultural relationship with the human remains, funerary objects, sacred objects, or objects of cultural patrimony. One commenter recommended deleting § 10.5 (a)(2) in that it assumes a relationship between prehistoric archeological sites and historic use of an area. Section 3 of the Act makes it clear that Indian tribes on whose aboriginal lands human remains, funerary objects, sacred objects, or objects of cultural

patrimony have been or are likely to be located need not be culturally affiliated with those human remains, funerary objects, sacred objects, or objects of cultural patrimony to be considered their legitimate custodian. One commenter recommended substituting "excavation" for "activity" in § 10.5 (a)(2). The term "activity" in this sentence refers to "an activity on Federal or tribal lands that may result in the excavation of human remains or cultural items" as defined in § 10.3 (c). The text has been modified to incorporate this clarification.

One commenter recommended deleting "likely" cultural affiliation in the first sentence of § 10.5 (b) since the term is not defined in either the Act or these regulations. The term has been deleted. One commenter recommended replacing the term "objects" in the same sentence with "human remains, funerary objects, sacred objects, or objects of cultural patrimony." The term has been replaced. One commenter recommended deleting the phrase "other Indian tribes that may have a relationship..." in the second sentence. The existing phrase is drawn from section 3 (a)(2)(C)(2) of the Act and has been retained. One commenter recommended provisions that require the notice include information regarding the proposed time and place for meetings and the Federal agency's proposed treatment and disposition of the intentionally excavated or inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony. The suggested language has been included in the text. One commenter recommended revising the last sentence of § 10.5 (b) to require traditional religious leaders be consulted and their recommendations followed. The requested revision runs counter to the requirements of the Act and has not been included in the text.

Two commenters requested further clarification of the type of activities that constitute consultation. Additional text has been added throughout § 10.5 to clarify the consultation process.

One commenter recommended inclusion of additional language in § 10.5 (c) requiring Federal agencies to provide in writing information regarding the nature and general location of any inadvertent discovery or proposed activity. The recommended text has been added. One commenter recommended rewriting § 10.5 (c)(2) to indicate that additional documentation will be supplied if it has been used to identify the cultural affiliation of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The proposed language has been included in the text.

One commenter recommended amending § 10.5 (d) to indicate that failure to respond to the Federal agency's request for information could be taken to signify an Indian tribe's voluntary withdrawal from standing under these sections. Indian tribes or Native Hawaiian organizations that have been duly notified of an intentional excavation or inadvertent discovery are not required to respond to the Federal agency's request for information. One commenter recommended including language to insure that information provided to Federal agency officials will, at the request of the Indian tribe or Native Hawaiian organization, be held in confidence. The Act provides no specific exemptions from provisions for the Freedom of Information Act for culturally sensitive information. However, Federal agency officials may, at the request of an Indian tribe or Native Hawaiian organization official, take such steps as are considered necessary pursuant to otherwise applicable law to ensure that information of a particularly sensitive nature is not made available to the general public. One commenter recommended changing "collections" in § 10.5 (d)(3) to "human remains, funerary objects, sacred objects, or objects of cultural patrimony." The recommended change has been made. Two commenters identified § 10.5 (d)(5) as being too broad and unlikely to give useful guidance and recommended deleting the subsection. Although not determinant, information about the kinds of cultural items that the Indian tribe or Native Hawaiian organization considers as funerary objects, sacred objects, or objects of cultural patrimony is important and useful for Federal agency officials to make decisions required of them under these regulations. The subsection has been retained.

One commenter recommended tying the requirements in § 10.5 (e) explicitly to the coordinated preparation of individual environmental and cultural resource management plans for projects, facilities, and land units. Integration of the requirements of these regulations with those of other statutes and policies has been left to the discretion of each affected Federal agency. One commenter considered § 10.5 (e) fine as it stands. One commenter recommended requiring the completion of a written plan of action as a result of consultation. The text has been rewritten to make it clear that completion of a written plan of action, approved and signed by the Federal agency official, is required. One commenter recommended requiring the approval and signature of the written plan of action by the affiliated Indian tribe officials. While the approval and signature of Indian tribe officials and other parties is desirable, the concurrence of these officials to the written plan of action is not required. One commenter recommended the written plan of action include *in situ* preservation to offset what the commenter perceived as a bias toward "excavation, analysis and recordation of imbedded materials," and too narrow a definition of custodial interest in imbedded materials. One commenter requested clarification of the term "treatment" as used in § 10.5 (e)(3) and (e)(7). The term is used throughout these regulations according to its common meaning, that is, a specific manner of dealing with human remains, funerary objects, sacred objects, or objects of cultural patrimony. The specifics of treatment must be considered as part of the consultation process. Two commenters recommended including *in situ* preservation specifically as a treatment option in § 10.5 (e)(3). Preservation of human remains, funerary objects, sacred objects, or objects of cultural patrimony in place should be considered whenever possible. Because case-by-case examples have not been provided, the option has not been added to the regulatory text. Three commenters recommended including language under § 10.5 (e)(4) to indicate that archeological recording must comply with certain standards. Any archeological activity conducted on Federal or tribal lands, including the intentional excavation or removal of human remains, funerary objects, sacred objects, or objects of cultural patrimony, must meet the standards provided by ARPA. One commenter recommended requiring radiocarbon dating as part of the archeological reporting. Determining the necessity of radiocarbon or other types of analysis must be on a case-by-case basis. One commenter recommended deleting § 10.5 (e)(5) since analysis should only be permitted in the rare circumstance where the cultural affiliation of human remains, funerary objects, sacred objects, or objects of cultural patrimony is not clear. The subsection has been retained to ensure that analysis is discussed thoroughly during the consultation process. One commenter recommended specifying the steps to be followed to contact traditional religious leaders should under § 10.5 (e)(6). The Act does not require consultation between Federal agency officials and traditional religious leaders regarding the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Identification of traditional religious leaders and the recommended steps in contacting them is left to the discretion of Indian tribe officials. Three commenters recommended specification of a deadline for completion of the written plan of action. Written plans of action should generally be completed during the thirty (30) day consultation period following an inadvertent discovery or prior to issuance of an ARPA permit for intentional excavations.

Three commenters recommended changing the title of § 10.5 (f) from "Programmatic agreements" to "Comprehensive agreements" to avoid confusion between agreements developed regarding the treatment and disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands and programmatic agreements developed pursuant to provisions of the NHPA. The term "programmatic agreements" has been changed in the title and throughout the subsection to "comprehensive agreements." Two commenters identified such agreements as "an awkward means of accomplishing the intent of the law," and recommended deleting the subsection. Comprehensive agreements are intended to provide Federal agency officials and Indian tribe officials with an efficient means of ensuring intentionally excavated and inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony receive the appropriate treatment and disposition. The subsection has been retained. One commenter objected to the reference to "specific" human remains, funerary objects, sacred objects, or objects of cultural patrimony referenced in the first section of § 10.5 (f) on the grounds that such agreements should define proactively the procedures and criteria for the treatment and disposition of any human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently. The term has been deleted from the text. One commenter recommended that comprehensive agreements address not only Federal agency land management activities, but Federal agency regulatory responsibilities as well. These regulations address Federal agency responsibilities under the Act. While Federal agency responsibilities under other statutory, regulatory, and policy mandates need to be considered in preparation of such documents, the inclusion of such requirements in these rules is not appropriate. One commenter recommended including language requiring the consent of traditional religious leaders to any comprehensive agreements in the text. The Act does not require consultation between Federal agency officials and traditional religious leaders regarding the treatment or disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands. One commenter recommended modifying the last sentence of the subsection to indicate that the "signed" comprehensive agreement should be considered proof of consultation. The text has been edited as recommended.

One commenter recommended requiring Indian tribe officials to consult with and make recommendations following the advice of traditional religious leaders. The Act does not require consultation between Indian tribe officials and traditional religious leaders regarding the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Consultation with traditional religious leaders is left to the discretion of Indian tribe officials.

Section 10.6

This section carries out section 3 (a) of the Act, subject to the limitations in § 10.15, regarding custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands after November 16, 1990. One commentor objected to the terms "legal interest in" and "ownership" as applied to human remains, funerary objects, and objects of cultural patrimony; and recommended replacing the terms with "custodial responsibility." The terms have been changed to "custody" throughout the text. This change, however, is only editorial and does not alter the requirements of the Act. One commenter recommended deleting reference to the limitations in § 10.15 from this section. Limitations on the custodial criteria presented in section 3 (a) of the Act are drawn from section 7 (b), (c), and (e) of the Act. Both § 10.15 and the cross-reference in this section have been retained. One commenter recommended setting limits in this section on just how temporally and culturally far afield claims of custody can be extended reasonably. Applicability of the custody criteria in this section is dependant on the facts of each case and will vary. The type of limits recommended by the commenter are considered inappropriate to such a case-by-case evaluation process. One commenter recommended including language in this section to identify the party responsible for substantiating claims. Lineal descendants or Indian tribes or Native Hawaiian organizations must provide information to substantiate their claims as outlined in § 10.10 (a) and (b).

One commenter recommended concluding the search for the custodian of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands with the first legitimate claimant identified under § 10.6 (a) that declines to make and substantiate a claim. One commenter recommended limiting custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony found on tribal lands to those human remains, funerary objects, sacred objects, or objects of cultural patrimony dating after establishment of the reservation. Two commenters recommended reversing the order of the custody criteria in § 10.6 (a)(2)(i) and (a)(2)(ii) so that culturally affiliated Indian tribes or Native Hawaiian organizations are given preference over tribal land owners. Another commenter recommended giving culturally affiliated Indian tribes preference over tribal land owners in claims for sacred objects or objects of cultural patrimony found on tribal lands. One commenter recommended deleting the custody criteria in § 10.6 (a)(2)(ii) and (a)(2)(iii) and instead have human remains, funerary objects, sacred objects, or objects of cultural patrimony found on Federal lands revert to the United States. One commenter recommended including language under § 10.6 (a)(2)(iii)(A) that would restrict any Indian tribe making a claim based upon its aboriginal occupation of Federal land from any action that would irreparably damage the interests of another Indian tribe who might have a superior claim. The custody criteria in § 10.6 (a) are taken virtually verbatim from section 3 (a) of the Act. All of the above recommendations run counter to those ownership criteria established by the Act and have not been included in the text.

Three commenters requested clarification in § 10.6 (b) of how the custody criteria effect Federal responsibilities under NHPA and ARPA. To the extent that any conflicts among those laws may exist, it is a general rule

of statutory construction that newer and more specific legislation takes precedence over older or more general laws. The custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands is as specified in § 10.6 (a).

One commenter stated that the obvious purpose of § 10.6 (c) is to create disputes between Indian tribes or between Native Hawaiian organizations regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands, and recommended deleting the subsection. One commenter recommended inclusion of language in this subsection indicating that an identified individual, Indian tribe, or Native Hawaiian organization custodian has decision-making authority regarding the treatment and disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands. Individual, Indian tribe, or Native Hawaiian custodians of human remains, funerary objects, sacred objects, or objects of cultural patrimony gain complete decision-making authority regarding the treatment and disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony upon the transfer of those human remains, funerary objects, sacred objects, or objects of cultural patrimony from the Federal agency. One commenter recommended deleting the word "traditional" from the second sentence of § 10.6 (c). Another commenter recommended adding the phrase "of the specific Indian tribe in each instance" at the end of the same sentence for clarification. The recommended language has been added to the text. Two commenters requested clarification of the purpose and nature of the public notices required in the third sentence of § 10.6 (c). Three commenters recommended the publication of notices regarding the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands in the tribal or local newspapers of those Indian tribes that have standing to make a claim under § 10.6 (a), as well as in a newspaper of general circulation in the area in which the human remains, funerary objects, sacred objects, or objects of cultural patrimony were excavated intentionally or discovered inadvertently. Another commenter recommended requiring publication of the notices within seven (7) days of determination of which Indian tribe or Native Hawaiian organization has custodial rights. Another commenter objected to the public notice requirement in that it might offend the sensibilities of those Indian tribes or Native Hawaiian organizations involved. This subsection outlines procedures to ensure due process in the transfer of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands to their proper individual, Indian tribe, or Native Hawaiian organization custodian. Notices need only provide information adequate to allow potentially interested lineal descendants, Indian tribes, or Native Hawaiian organizations to determine their interest in claiming custody under these regulations. The requirements regarding publication of public notices have been rewritten for clarity and include provisions for publication in local and tribal newspapers of general circulation in the areas in which culturally affiliated Indian tribes or Native Hawaiian organizations now reside.

Section 10.7

This section has been reserved for procedures for the disposition of unclaimed human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands or tribal lands after November 16, 1990. One commenter recommended developing this section with input from Indian tribes and Native Hawaiian organizations. Section 3 (b) of the Act requires that regulations regarding the disposition of unclaimed human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribe lands be published by the Secretary in consultation with the Review Committee, and representatives of Indian tribes, Native Hawaiian organizations, museums and the scientific community.

Section 10.8

This section carries out Section 6 of the Act related to conducting summaries of collections in the possession or control of museums that receive Federal funding or Federal agencies which may contain unassociated funerary objects, sacred objects, and objects of cultural patrimony. Four commenters objected to use of the phrase "collections that may include..." in § 10.8 (a) and throughout the section as overstepping the statutory authorization and giving the mistaken impression that these regulations apply to entire collections and not to specific unassociated funerary objects, sacred objects, and objects of cultural patrimony. The statutory language is unclear whether summaries should include only those unassociated funerary objects, sacred objects, or objects of culturally affiliated with a particular Indian tribe or Native Hawaiian organization, or the entire collection which may include these cultural items. The legislative history and statutory language does make it clear that the summary is intended as an initial step in bringing an Indian tribe and Native Hawaiian organization into consultation with a museum or Federal agency. Consultation between a museum or Federal agency and an Indian tribe or Native Hawaiian organization is not required until after completion of the summary. Identification of specific sacred objects or objects of cultural patrimony must be done in consultation with Indian tribe representatives and traditional religious leaders since few, if any, museums or Federal agencies have the necessary personnel to make such identifications. Further, identification of specific unassociated funerary objects, sacred objects, and objects of cultural patrimony would require a museum or Federal agency to complete an item-by-item listing first. The drafters opted for the more general approach to completing summaries of collections that may include unassociated funerary objects, sacred objects, or objects of cultural patrimony rather than the itemized list required for the inventories in hopes of enhancing the dialogue between museums, Federal agencies, Indian tribes, and Native Hawaiian organizations required under the Act. One commenter requested clarification of the deadlines and funding responsibility of this section. Section 10.8 (c) of these regulations clearly states that summaries under this section are to be sent to affiliated or likely affiliated tribes by November 16, 1993. Funding responsibilities lie with the museums and Federal agencies maintaining such collections. Grants to aid museums, Indian tribes, and Native Hawaiian organizations in carrying out the Act are authorized in section 10 of the Act.

Three commenters questioned use of the term "undertakings" in the last sentence of § 10.8 (a). One commenter (67–3) recommended defining the term as used in section 106 of NHPA. Two commenters recommended changing the term to "activities" or "actions" to make it clear that provisions of the Act do not necessarily apply to Federal "undertakings" conducted on private land. The term has been changed to "actions" to clarify that Federal agencies may not be responsible for ensuring that requirements of this section are met for all collections obtained as part of section 106 "undertakings" on non-Federal land.

One commenter recommended including language in § 10.8 (a) to require Federal agencies to consult with non-Federal institutions prior to initiating consultation with Indian tribes or Native Hawaiian organizations that are culturally affiliated with human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal lands but currently in the possession of the non-Federal institution. Another commenter recommended including specific language to stress that non-Federal institutions do not have authorization to unilaterally dispose of human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal lands. Requirements regarding the relationship between Federal agencies and non-Federal institutions are not specified in the Act. ARPA and NHPA assign responsibility for long term care and curation of collections from Federal land and actions to the Federal agency that manages the land or undertakes the action.

One commenter recommended including language in § 10.8 (b) specifying that summaries should include information readily available from museum records as to whether an object is an unassociated funerary object, sacred object, or object of cultural patrimony, as well as an assessment of the general reliability of the records. Information regarding individual unassociated funerary objects, sacred objects, and objects of cultural patrimony is more appropriately shared during the consultation process. The regulatory text has not been changed.

Three commenters recommended including some provision for extension of the November 16, 1993 deadline for completion of the summaries in § 10.8 (c). While provisions for extensions to the November 16, 1995 deadline for completion of inventories of human remains and associated funerary objects are included in section 5 (c) of the Act, no such provisions for extension of the summary deadlines are included in either the statutory language or in the legislative history. Provisions for extensions to the summary deadlines have not been included in these regulations.

Six commenters recommended changes regarding the identification of consulting parties in § 10.8 (d)(1). Two commenters recommended deleting § 10.8 (d)(1)(i) requiring consultation with lineal descendants, since section 7 (a)(3) of the Act only requires consultation with lineal descendants to determine the place and manner of delivery of human remains, funerary objects, sacred objects, or objects of cultural patrimony being repatriated. The subsection requiring consultation with lineal descendants has been deleted. Two commenters recommended that identification of traditional religious leaders in § 10.8 (d)(1)(ii) be made by "members of" Indian tribes and Native Hawaiian organizations to be consistent with the definition of that term. The phrase has been edited to conform with the definition of in § 10.2 (a)(13). One commenter recommended deleting § 10.8 (d)(1)(ii)(A) and (a)(ii)(B) requiring consultation with Indian tribes from whose tribal or aboriginal lands unassociated funerary objects, sacred objects, and objects of cultural patrimony were recovered since section 7 (a)(2) of the Act specifies that only lineal descendants and culturally affiliated Indian tribes and Native Hawaiian organizations have standing to make a claim. Another commenter recommended including language in the rule indicating a presumption that the Indian tribe from whose tribal lands unassociated funerary objects, sacred objects, and objects of cultural patrimony were recovered is the custodian. The requirements in § 10.8 (d)(1)(ii)(A) and (d)(1)(ii)(B) are included to ensure that all Indian tribes and Native Hawaiian organizations that are potentially culturally affiliated with particular unassociated funerary objects, sacred objects, and objects of cultural patrimony are included in the consultation process. Whether an Indian tribe from whose tribal or aboriginal lands a particular unassociated funerary object, sacred object, or objects of cultural patrimony originated is culturally affiliated with that object must be determined on an item-by-item basis. Two commenters recommended deleting the phrase "or likely to be" in § 10.8 (d)(1)(iii). This subsection defines the class of consulting parties from which the culturally affiliated Indian tribe or Native Hawaiian organization will be identified. The phrase is used to indicate that the identification of consulting parties should be inclusive to ensure all Indian tribes and Native Hawaiian organizations that are, or are likely to be culturally affiliated with the unassociated funerary objects, sacred objects, or objects of cultural patrimony are included in the consultation process.

One commenter recommended revising the requirement to initiate consultation no later than the completion of the summary process in § 10.8 (d)(2) to indicate consultation must follow completion of the summary. Another commenter recommended revising the subsection to require the initiation of consultation as early as possible. Another commenter recommended requiring museums and Federal agencies to provide Indian tribes and Native Hawaiian organizations with a "notice of summary" indicating that their collections were under review. The Review Committee recommended revising the subsection to indicate that consultation should result in telephone or face-to-face dialogue. The drafters intend the summary to serve as an initial invitation from the museum or Federal agency to the Indian tribe or Native Hawaiian organization to engage in consultation regarding the identification of unassociated funerary objects, sacred objects, and objects of cultural patrimony in their collection. All museums and Federal agencies are required to complete their summaries by November 16, 1993. Language has been added to the subsection indicating that consultation may be initiated with a letter, but should be followed up by telephone or face-to-face dialogue with the appropriate Indian tribe official.

The Review Committee recommended requiring museums and Federal agencies to provide copies of their summaries to the Departmental Consulting Archeologist in § 10.8 (d)(3). The Departmental Consulting Archeologist provides staff support to the Review Committee, which in turn is required, under section 8 (c)(2) of the Act, to monitor the summary and inventory processes to ensure a fair, objective consideration and assessment of all available relevant information and evidence. The recommended language has been included. One commenter requested clarification regarding the requirement in the second sentence of § 10.8 (d)(3) that museums and Federal agencies, upon request, provide Indian tribes and Native Hawaiian organizations with access to records, catalogues, relevant studies, or other pertinent data. The regulatory language is drawn from section 6 (b)(2) of the Act.

Museums or Federal agencies may not limit Indian tribal access to information needed to determine the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of object covered by the summary. Museums or Federal agencies are under no obligation to pay the travel or other expenses of visiting Indian tribe representatives or traditional religious leaders.

One commenter recommended inclusion of time limits for Indian tribe and Native Hawaiian organization responses to museum and Federal agency requests for information outlined in § 10.8 (d)(4). No time limits for Indian tribe and Native Hawaiian organization response are included in the statutory language or the legislative history and none have been included in this subsection. Indian tribes and Native Hawaiian organizations are under no requirement to respond to museum or Federal agency requests for information. One commenter recommended revising the request for information under § 10.8 (d)(4)(i) to include the name and address of one or more traditional religious leaders. Requirements to request the name and address of traditional religious leaders have already been included under § 10.8 (d)(4)(iii). One commenter objected to the implication in § 10.8 (d)(4)(ii) that, prior to consultation, a museum or Federal agency official could identify a sacred object in their collection to request the name and address of the lineal descendants of its previous custodian. Documentation may be sufficient to indicate that a particular item in a museum of Federal agency's collection might fit the definition of sacred object. The museum or Federal agency should use this information to advance the consultation process by requesting the name and address of any lineal descendants of its previous custodian. One commenter recommended that the requests for information also include a description of the Indian tribe's traditional kinship system under § 10.8 (d)(4)(ii)(A). Information regarding an Indian tribe's traditional kinship system is only necessary when an individual is claiming an unassociated funerary object or sacred object, and is more appropriately requested at that time. One commenter recommended amending § 10.8 (d)(4)(iii) to require consultation and agreement with the recommendations of traditional religious leaders. The recommended requirement is not appropriate since the statutory language does not require Indian tribes or Native Hawaiian organizations to provide information regarding traditional religious leaders. One commenter recommended limiting the request for information to recommendations on how the consultation process should be conducted and that § 10.8 (d)(4)(i), (4)(ii), (4)(iii), and (4)(v) be deleted. The drafters recognize that the identification of lineal descendants, funerary objects, sacred objects, and objects of cultural patrimony may require Indian tribes and Native Hawaiian organizations to divulge sensitive information. Requesting the information at the beginning of consultation, however, may lead to a more open and effective consultation process. Indian tribe officials are under no obligation to respond to these inquires.

One commenter, fearing widespread misapplication of these regulations, recommended requiring museums and Federal agency officials to document certain information and use that information to identify unassociated funerary objects, sacred objects, objects of cultural patrimony, lineal descendants, and culturally affiliated Indian tribes and Native Hawaiian organizations. The recommended text has been included as § 10.8 (a) and the subsequent section renumbered. Submission of this information to the Departmental Consulting Archeologist is not required by these regulations. The Review Committee, pursuant to section 8 (f), may request access to this information.

Two commenters requested clarification for requiring notification prior to repatriation of unassociated funerary objects, sacred objects, and objects of cultural patrimony in § 10.8 (e) (renumbered as § 10.8 (f)). The notification required in section 5 (d) of the Act ensures due process regarding the repatriation of human remains and associated funerary objects. Provisions of this subsection extend the notification procedures to ensure due process in the repatriation of unassociated funerary objects, sacred objects, and objects of cultural patrimony. The Review Committee recommended reducing the specificity of the requirement of an object-by-object listing of unassociated funerary objects, sacred objects, and objects of cultural patrimony to be repatriated. The regulatory text has been revised to require a description of any unassociated funerary objects, sacred objects, and objects of cultural patrimony to be repatriated in sufficient detail so as to allow others to determine if they are interested in the claim. Section 10.8 (e) of these regulations requires that museums and Federal agencies consider the same types of information as are required in § 10.9 (c) in evaluating requests for repatriation. Two commenters recommended including text establishing a deadline for responses to the required notification. A minimum waiting period of thirty (30) days following publication of the notice of intent to repatriate in the **Federal Register** is established in § 10.10 (a)(3). Any claim received by a museum or Federal agency prior to actual repatriation, however, should be given full consideration. One commenter recommended requiring museum officials to consult with the appropriate Federal agency officials prior to issuance of notices by the museum regarding unassociated funerary objects, sacred objects, or objects of cultural patrimony that were excavated intentionally or discovered inadvertently on Federal lands. Notices regarding the repatriation of unassociated funerary objects, sacred objects, or objects of cultural patrimony that were excavated from Federal lands can only be issued by the appropriate Federal agency or by an institution specifically authorized to issue such notices by the appropriate Federal agency. One commenter recommended including language in this subsection informing Indian tribes and Native Hawaiian organizations of their right by law to request access to museum or Federal agency records as they relate to the review of their claim. The recommended language is included in § 10.8 (d)(3). The Review Committee recommended inclusion of text in this subsection to reiterate the requirement in § 10.10 (a)(3) that repatriation not occur until at least thirty (30) days after publication of a notice of intent to repatriate in the **Federal Register**. The proposed language has been included.

Section 10.9

This section presents procedures for carrying out section 5 of the Act related to conducting inventories of human remains and associated funerary objects in the collections of Federal agencies or museums receiving Federal funds. Fifteen commenters recommended changes to the inventory procedures in § 10.9. One commenter requested clarification of the deadlines and funding responsibility of this section. Section 10.9 (f) states that inventories under this section are to be completed not later than November 16, 1995. Funding responsibilities lie with the museums and Federal agencies maintaining such collections. Three commenters requested funding aid to comply with the Act. Although section 10 of the Act authorizes funding in

terms of grants to aid museums, Indian tribes, and Native Hawaiian organizations in carrying out the Act, funds were first appropriated during FY 1994.

One commenter requested clarification regarding the term "geographical affiliation" in the first sentence of § 10.9 (a). The term has been changed to "geographical origin" to reflect usage in section 5 (b)(2) of the Act. Two commenters recommended deleting the term "undertakings" from the last sentence of § 10.9 (a) because of its long history as a legal term of art under section 106 of the NHPA. The term has been changed to "actions" to avoid any confusion.

One commenter recommended inclusion of language in § 10.9 (b) stressing that Federal agency officials are responsible for carrying out consultation regarding human remains and associated funerary objects that were excavated or removed from Federal lands and that are currently in a non-Federal repository. One commenter suggested inclusion of language allowing shared responsibility between a Federal agency and curating institution. Federal agency officials are responsible for carrying out the Act regarding all human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands, regardless of the type of institution that currently is in possession of those human remains, funerary objects, sacred objects, or objects of cultural patrimony. Section 10.9 (a) emphasizes this responsibility of Federal agencies. Two commenters recommended including a stipulation in § 10.9 (b) allowing a museum or Federal agency to declare that, due to unresponsiveness, no further contact with an Indian tribe or Native Hawaiian organization will be pursued. The drafters consider the recommended language counterproductive to achieving the type of effective consultation envisioned by the Act. Museums and Federal agencies are required to complete inventories of human remains and associated funerary objects in their collections by November 16, 1995. If no response is forthcoming after repeated attempts to contact Indian tribe officials by telephone, fax, and mail, the museum or Federal agency official may be required to complete the inventory without consultation to meet the statutory deadline. The drafters suggest museum and Federal agency officials document attempts to contact Indian tribe officials to demonstrate good faith compliance with these regulations and the Act.

One commenter recommended rewriting the requirements regarding consultation with lineal descendants in § 10.9 (b)(1)(i) to coordinate these activities through designated Indian tribe officials. The statute gives lineal descendants priority over culturally affiliated Indian tribes or Native Hawaiian organizations for the repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Establishing a system in which contact with lineal descendants is coordinated through Indian tribes or Native Hawaiian organizations would be detrimental to the rights of lineal descendants, particularly those that are not members of an Indian tribe or Native Hawaiian organization. One commenter recommended amending § 10.9 (b)(1)(i) to make it clear that museum and Federal agency officials must consult with lineal descendants of individuals whose remains and associated funerary objects are, in the opinion of the responsible Federal agency official or museum official, likely to be subject to the inventory provisions of these regulations. The drafters consider the current language to describe adequately the responsibilities of Federal agency officials or museum officials regarding consultation with lineal descendants.

One commenter recommended rewording the first sentence of § 10.9 (b)(1)(ii) to make it clear that consultation must be with Indian tribe officials. This change has been made. Two commenters recommended changing the second part of the sentence to indicate that traditional religious leaders must be recognized by members of the Indian tribe. The text has been changed to conform with the definition of in § 10.2 (a)(13). One commenter recommended inserting the word "the" prior to each usage of "human remains" throughout § 10.9 (b)(1)(ii)(A), (B), and (C) to make it clear that the procedures refer to specific human remains and not human remains in general. The recommended change has been made.

Three commenters recommended restructuring the consultation process in § 10.9 (b)(2) to allow museums and Federal agencies to make a tentative determination of cultural affiliation and then allow comment on the determination by interested groups. Section 5 (b)(1)(A) of the Act requires that inventories be completed in consultation with Indian tribe and Native Hawaiian organization officials and traditional religious leaders. The notification procedures in § 10.9 (e) are designed to ensure that all interested parties have the opportunity to participate in the consultation process. Another commenter recommended requiring consultation at the earliest possible moment in the inventory process. Language reflecting the latter recommendation has been included in the text.

One commenter recommended revising § 10.9 (b)(3)(iv) to state that if any additional documentation was used to identify cultural affiliation, this documentation must be made available on request. Language ensuring Indian tribes and Native Hawaiian organization access to relevant documentation is included in § 10.9 (e).

One commenter recommended deleting the word "reasonably" from § 10.9 (b)(4)(v) on the grounds that it is unreasonable for the United States to request an Indian tribe or Native Hawaiian organization to be reasonable in its beliefs regarding objects used for burial purposes. Reasonableness in this context refers to an accepted legal standard and has been retained in the regulatory text.

One commenter objected to the information requirements in § 10.9 (c) as exceeding requirements of the Act. Another commenter recommended amending the requirements to ensure that completion of the inventory would not be delayed. The information requirements in § 10.9 (c) were drawn from section 5 (a)(2) of the Act. One commenter recommended including text in § 10.9 (c) specifying the types of information that can not be requested. The Act does not identify any types of information that can not be requested. The drafters consider inclusion of such a requirement to be detrimental to the development of productive dialogues between museums, Federal agencies, Indian tribes, and Native Hawaiian organizations. One commenter recommended reorganizing the information requirements for clarity. Sections 10.9 (c)(1) through (c)(8) have been reorganized and renumbered. One commenter recommended changing § 10.9 (c)(7) to require either a description or photographic documentation of the human remains, funerary objects, sacred objects, or objects of cultural patrimony, and not both. The drafters consider description of the human remains, funerary objects, sacred objects, or objects of cultural patrimony to be necessary in all cases, with photographic documentation considered appropriate in some circumstances. The types of information required in § 10.9 (c) have not been changed. The drafters feel that careful, detailed consideration of all human remains and associated funerary objects is critical to carry out the statutory requirements. Basic descriptive

information is necessary to ensure accountability and that the human remains and associated funerary objects conform to the statutory definitions. Detailed information from Federal agency or museum records and other sources are essential in reaching determinations of lineal descent or cultural affiliation as part of the inventory procedures.

One commenter recommended consolidating the two listings described in § 10.9 (d)(1) and (d)(2) into one list. Separation of the two lists reflects the different purposes intended in the § 10.9 (e) inventory process. The listing of culturally affiliated human remains and associated funerary objects is sent directly to Indian tribes and Native Hawaiian organizations, with a copy to the Departmental Consulting Archeologist. The listing of culturally unidentifiable human remains and associated funerary objects is sent only to the Departmental Consulting Archeologist. One commenter objected to use of the term "clearly" regarding the determination of cultural affiliation in § 10.9 (d)(1) as being contrary to Congressional intent and recommended deleting it from the regulatory text. The term was drawn from section 5 (d)(1)(B) of the Act and reflects Congressional intent. Another commenter recommended keeping the list of those human remains and associated funerary objects that are clearly identifiable as to tribal origin separate from those human remains and associated funerary objects are determined by reasonable belief to be cultural affiliated with the same Indian tribe or Native Hawaiian organization. Since both categories of human remains and associated funerary objects are considered to be culturally affiliated with the Indian tribe or Native Hawaiian organization, and are thus available for repatriation by that Indian tribe or Native Hawaiian organization, there is no practical reason to separate the lists.

One commenter recommended clarifying throughout this subsection that museum or Federal agency officials may need to send the same inventory to multiple Indian tribes or Native Hawaiian organizations. The text has been modified to reflect this concern.

Four commenters recommended replacing the word "shall" in the second sentence of § 10.9 (e)(4) with "should." The Secretary has delegated authority to carry out some provisions of the Act to the Departmental Consulting Archeologist. These responsibilities include providing staff support to the Review Committee. The Review Committee is required under section 8 (c)(2) of the Act to monitor the inventory and identification process. Submission of inventories in electronic format is intended to facilitate the monitoring process. However, in recognition that some museums may have difficulty meeting the electronic format requirement, the drafters have changed the word "shall" in the second sentence to "should." One commenter recommended also allowing Federal agencies to use alternative methods for submission of notices to the Departmental Consulting Archeologist. The phrase "and Federal agencies" has been inserted after "museums" in the text. The Review Committee recommended inclusion of language in this subsection requiring museums and Federal agencies to retain possession of culturally unidentifiable human remains pending promulgation of § 10.11 of these regulations. The recommended language has been included.

One commenter recommended requiring listings of culturally unidentifiable human remains described in § 10.9 (e)(6) be sent to all Indian tribes and Native Hawaiian organizations as well as to the Departmental Consulting Archeologist. Section 8 (c)(5) of the Act gives the Review Committee responsibility for recommending specific action for developing a process for disposition of culturally unidentifiable human remains. Section 10.11 of these regulations has been reserved for that purpose. The drafters consider it premature at this time to establish such procedures.

Two commenters requested extending the November 16, 1995 deadline for completion of inventories in § 10.9 (f). The deadline for completion of inventories is specified in section 5 (b)(1)(B) of the Act and would require Congressional action to change. One commenter recommended including language in this subsection to indicate that the requirement to repatriate may be suspended during the preparation of the inventories. The drafters consider such a suspension of the requirement to repatriate counter to statutory language and legislative history. Two commenters recommended including language in this subsection to allow Federal agencies to apply for extensions of time to complete their inventories. Section 5 (c) of the Act specified that any museum which has made a good faith effort but which has been unable to complete an inventory may appeal to the Secretary for an extension of the time requirements. No provisions are provided in the Act for Federal agencies to apply for extension. One commenter recommended including language in this subsection limiting the number and length of extensions granted to a museum to complete its inventories. The Secretary will determine the number and length of extensions on a case-by-case basis. One commenter recommended requiring museums to apply for an extension in the second sentence of § 10.9 (f). While a museum may chose not to apply for an extension, it is likely that failure to do so would be taken into account by the Secretary in determining if the museum had failed to comply with the requirements of the Act. One commenter requested clarification regarding a situation in which a museum fails to complete an inventory of human remains and associated funerary objects from Federal lands. Federal agencies are responsible for completion of summaries and inventories of all human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal lands regardless of the type of institution in which they are currently curated. One commenter recommended incorporation of personnel qualifications in this subsection for individuals involved in the completion of the inventory plan. Museums are expected in make sure that all of their personnel are qualified to undertake the tasks expected of them.

Section 10.10

Thirty-three commenters recommended changes to the section on repatriation. One commenter recommended rewriting § 10.10 (a)(1) and § 10.10 (b)(1) to emphasis that all of the criteria for repatriation must be met. The initial sentence of each section has been rewritten to state "If all the following criteria are met..." In addition, the word "and" has been added at the end of all but the final roman numeralled subsections in these two sections. Another commenter requested clarification of the term "expeditiously" which is used in both sections. The rule of statutory construction generally holds that undefined terms are interpreted in their common meaning.

One commenter recommended inclusion of language in § 10.10 (a)(1)(ii) and (b)(1)(ii) allowing several Indian tribes or Native Hawaiian organizations to make joint claims for human remains, funerary objects, sacred objects, or objects of cultural patrimony. The drafters feel the current language allows for joint claims. Another commenter recommended amending § 10.10 (a)(1)(ii) and § 10.10 (b)(1)(ii) to clarify that the cultural affiliation of human remains, funerary objects, sacred objects, or objects of cultural patrimony can be established independently of the summary and inventory processes by presentation of a preponderance of the evidence by a requesting Indian tribe or Native Hawaiian organization. Additional text has been inserted under § 10.10 (a)(1)(ii)(B) and § 10.10 (b)(1)(ii)(B) to clarify this issue. Another commenter requested inserting the phrase "culturally affiliated" before "Indian tribe" in § 10.10 (a)(1)(iii), The recommended text has been included.

One commenter recommended deleting the phrase "which, if standing alone before the introduction of evidence to the contrary" from § 10.10 (a)(1)(iii). This phrase is taken directly from section 7 (c) of the Act regarding the standard of repatriation for unassociated funerary objects, sacred objects, and objects of cultural patrimony; and has been retained in the regulations.

One commenter recommended rewriting § 10.10 (a)(1)(iv) to make clear that a Federal agency or museum must present evidence to overcome the inference of tribal custody and prove its right of possession to unassociated funerary objects, sacred objects, or objects of cultural patrimony. The existing text is drawn from section 7 (c) of the Act and is interpreted to provide Federal agencies with some discretion as to whether information regarding right of possession must be used to challenge a request for repatriation.

One commenter recommended deleting § 10.10 (a)(1)(v) and § 10.10 (b)(1)(iii), referring to specific repatriation exemptions, to avoid confusion and havoc with Indian tribes. The specific exemptions to repatriation referred to in these subsections come from section 7 (b) and (e) of the Act.

Two commenters recommended changes to § 10.10 (a)(2) regarding right of possession. One commenter requested clarification of how right of possession might be demonstrated for prehistoric human remains, funerary objects, sacred objects, or objects of cultural patrimony. The right of possession basis for retaining cultural items in an existing collection does not apply to human remains or associated funerary objects, only to unassociated funerary objects, sacred objects, and objects of cultural patrimony. A right of possession for prehistoric cultural items fitting these categories might be written authorization from a competent authority to excavate, remove, and curate such items from a particular area or site. Another commenter recommended locating the definition of right of possession would more appropriately with the other definitions in § 10.2. The concept of right of possession has limited applicability in these regulations to unassociated funerary objects, sacred objects, and objects of cultural patrimony. The explanation of right of possession is retained at this place in the regulations because it is only used for this specific aspect of the Act.

Three commenters recommended changes to § 10.10 (a)(3) and § 10.10 (b)(2) regarding notification. Two commenters requested clarification of whether the ninety (90) days during which repatriation must take place begins from the day a request for repatriation is received or from the day the responsible museum of Federal agency official makes a positive determination that the criteria for repatriation apply. The first sentence of this section has been redrafted to clarify that the ninety (90) day period begins with the receipt of a written request for repatriation from a culturally affiliated Indian tribe or Native Hawaiian organization. Another commenter stated that ninety (90) days may not be sufficient to determine to validity of each request. Section 7 of the Act requires that repatriation must be done "expeditiously" and implies in section 7 (b) a ninety (90) day time frame for such actions. Text has been added to provide for a longer period if mutually agreed upon. It is noted that determination of the validity of a claim should not be difficult since this period only applies to requests from Indian tribes and Native Hawaiian organizations that have been determined to be culturally affiliated with specific human remains, funerary objects, sacred objects, or objects of cultural patrimony.

Five commenters recommended changes to § 10.10 (b) regarding the repatriation of human remains and associated funerary objects. One commenter identified the criteria for repatriating human remains and associated funerary objects as being very confusing and recommended rewriting them for comprehension by lay people. One commenter recommended reiterating the applicability of "right of possession" to human remains and associated funerary objects recognized in the last sentence of section 2 (13) of the Act in this section of the regulations. American law generally recognizes that human remains can not be "owned." This interpretation is consistent with the second sentence of section 2 (13) of the Act that specifically refers to unassociated funerary objects, sacred objects, and objects of cultural patrimony, and with section 7 (a)(1) and (a)(2) of the Act in which no right of possession to human remains or associated funerary objects is inferred. One commenter strongly objected to the requirement in § 10.10 (b)(2) that repatriation not occur until at least thirty days after publication of a notice of inventory completion in the **Federal Register**, referring to section 11 (1)(A) of the Act that states that nothing in the Act shall be construed to limit the authority of any museum or Federal agency to return or repatriate. Publication of the notice in the **Federal Register** was recognized in section 5 (d)(3) of the Act as necessary to ensure Constitutional due process requirements. Delaying a repatriation for thirty (30) days following publication of the notice provides any other legitimate claimant with an opportunity to come forward with a claim. This requirement in no way limits any organization's authority to repatriate. Section 11 (2) of the Act states that nothing in the Act shall be construed to delay action on repatriation requests "that are pending on the date of enactment of this Act," and makes it clear that Congress anticipated there might be some subsequent delays of repatriation initiated after November 16, 1990, due to the statutory provisions. One commenter asked whether a second **Federal Register** notice is required to document a claim following publication of a Notice of Inventory Completion. Requests for repatriation made after completion of the inventory and publication of the Notice of Inventory Completion in the **Federal Register** do not require publication of a second notice, unless it is determined as a result of a competing claim or otherwise that a different Indian tribe or Native Hawaiian organization than the one identified in the original notice is the proper recipient. In such instances, a second **Federal Register** notice is required prior to repatriation. In situations where more than one Indian tribe or Native Hawaiian organization was listed in the original notice, the museum or Federal agency official should consult with each of the listed Indian tribes or Native Hawaiian organizations prior to repatriating to any one of them.

Three commenters recommended deleting § 10.10 (c)(1) regarding the exception to the repatriation requirements for studies of human remains, funerary objects, sacred objects, or objects of cultural patrimony of major benefit to the United States. This exemption is drawn from section 7 of the Act. One commenter identified the phrase "commenced prior to receipt of a request" in this subsection as not being included in the statutory language and recommended deleting it. The phrase has been deleted. Six

commenters recommended clarifying the concept of "major benefit" in the exemption for completion of a specific scientific study in § 10.10 (c)(1). Such determinations necessarily will have to be made on a case-by-case basis. One commenter recommended that the deadline after completion of a study by which human remains, funerary objects, sacred objects, or objects of cultural patrimony must be repatriated be left to the discretion of the parties involved. The requirement that human remains, funerary objects, sacred objects, or objects of cultural patrimony be repatriated no later than ninety days (90) after completion of the study is drawn from the statutory language.

One commenter recommended replacing the phrase "proper recipient" in the first sentence of § 10.10 (c)(2) with "most appropriate recipient." The recommended change has been made.

One commenter recommended including language in this subsection requiring museums and Federal agencies to comply with multiple party claims. The language in these regulations does not preclude claims for repatriation made by groups of lineal descendants or groups of Indian tribes or Native Hawaiian organizations. Museum and Federal agency officials are responsible for assessing the merits of each claim received.

One commenter recommended deleting the "takings exemption" in § 10.10 (c)(3) since it requires complex legal analysis that would unduly burden museum and Federal agency officials and is contrary to the provisions of the Act regarding the determination of custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The language in this subsection was drawn from section 2 (13) of the Act. Six commenters requested additional clarification of the subsection. Additional language has been included in the text. One commenter objected to the "globalization" of the constitutional test of a Fifth Amendment taking in this subsection to include human remains and associated funerary objects, stating that such an interpretation is not supported by the statutory language and recommending that the drafters refrain from attempting to redress in regulation what the commenter considers a facially unconstitutional element of the Act. The regulation has not been changed in response to this comment. The Act does not indicate an express intention to effectuate a legislative or regulatory taking. It is possible, though not likely, that human remains may be subject to Fifth Amendment concerns, e.g., where the human remains have been incorporated into another object. The same commenter recommended including text to exempt museums from the threat of civil penalties in situations where the museum invokes its authority to refuse to repatriate human remains and associated funerary objects based on "otherwise applicable property law." A determination that repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony constitutes a taking of property without just compensation within the meaning of the Fifth Amendment of the United States Constitution must be made by a court of competent jurisdiction and can not be "invoked" by a museum or Federal agency. Assessment of civil penalties by the Secretary will necessarily be made on a case-by-case basis and, as such, the recommended exemption is not considered appropriate. However, the drafters consider it unlikely that the Secretary would assess civil penalties while a takings issue is being considered by a court of competent jurisdiction.

One commenter recommended deleting the reference in § 10.10 (c)(4) to other repatriation limitations in § 10.15. Section 10.15 includes limitation and remedies applying to both the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal land or tribal lands and to the repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony in the possession or control of museums or Federal agencies.

Two commenters requested clarification regarding procedures related to the transfer of custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony to lineal descendants or Indian tribes in § 10.10 (d). Museum and Federal agency officials are responsible for making decisions regarding place and manner of repatriation. However, prior to making such decisions, they must first consult with the requesting lineal descendants or culturally affiliated Indian tribes.

One commenter recommended including additional text requiring museum and Federal agency officials to inform recipients of repatriations of any known treatments, such as application of pesticides, preservatives, or other substances, that might represent a potential hazard to the human remains, funerary objects, sacred objects, or objects of cultural patrimony or the persons handling them. The recommended text has been included as § 10.10 (e) and subsequent subsections renumbered.

Two commenters recommended including language in § 10.10 (e) (renumbered as § 10.10 (f)) advising museum and Federal agency officials that, upon the request of Indian tribe officials, they take steps to ensure that information of a particularly sensitive nature is not made available to the general public. The recommended text has been included in the rule. Documentation of some cultural items, particularly sacred objects and objects of cultural patrimony, is expected to require Indian tribe officials and traditional religious leaders to divulge some information considered sensitive to the Indian tribe or Native Hawaiian organization. There is currently no exemption available to protect such sensitive information from disclosure under the Freedom of Information Act. Museum or Federal officials may wish to ensure that sensitive information does not become part of the public record by not writing such information down in the first place.

Two commenters identified "unidentified human remains," referred to in § 10.10 (f) (renumbered as § 10.10 (g)) as a category not supported by the statutory language, and recommended deleting the term. Section 8 (c)(5) of the Act required the Review Committee to compile an inventory and make recommendations regarding specific actions for developing a process for disposition of "culturally unidentifiable human remains." Section 10.10 (g) has been amended to reflect that statutory language.

One commenter requested that § 10.10 reference the requirements of the Migratory Bird Treaty Act, the Bald and Golden Eagle Act, the Endangered Species Act and the Marine Mammal Act. While it is not appropriate to include the requirements of these acts in the regulations, museums, Federal agencies, and Indian tribes should be aware that additional statutes and regulations may affect the transport and possession of repatriated objects, For additional information, contact, the U.S. Fish and Wildlife Service, Division of Law Enforcement, PO Box 3247, Arlington VA 22203–3247.

Section 10.11

This section has been reserved for procedures related to the disposition of culturally unidentifiable human remains in museum or Federal agency collections. One commenter questioned the authority under which the Federal government can determine the final disposition of human remains for which no cultural affiliation can reasonably be established. Another commenter recommended changing the title of this section to read "culturally and geographically unidentifiable" to ensure that a "simple-minded or hostile reading of the rules" would not result in assignment of many human remains to the catch-all category. One commenter requested clarification for procedures concerning "affected remains of . . . biologically extinct peoples". Section 8 (c)(5) and (c)(7) of the Act gives the Review Committee the responsibilities of recommending specific actions for developing a process for disposition of "culturally unidentifiable human remains" and consulting with the Secretary in the development of regulations to carry out the statute. Section 13 of the Act charges the Secretary with promulgating regulations to carry out the statute. One commenter recommended interring all culturally unidentifiable human remains in a tribal or intertribal cemetery. One commenter recommended sending inventories of all culturally unidentifiable human remains to all Indian tribes and Native Hawaiian organizations. One commenter requested that this section be published promptly. Another commenter recommended seeking Indian tribal input in developing this section to ensure that "the dominant society [not dictate] the proposed language to protect their own interests." A draft of this section is being developed currently and will submitted to the Review Committee for discussion and recommendations prior to publication as proposed regulation for public comment in the **Federal Register**.

Section 10.12

This section has been reserved for procedures related to the assessment of civil penalties by the Secretary against any museum that fails to comply with the requirements of the statute. One commenter requested prompt publication of this section. A draft of this section is currently being developed and will submitted to the Review Committee for discussion prior to publication for public comment in the **Federal Register**.

Section 10.13

This section has been reserved for procedures related to the future applicability of the statute. One commenter recommended that the section should include continuing responsibilities for museums and Federal agencies to update summaries and inventories of human remains, funerary objects, sacred objects, or objects of cultural patrimony to reflect new accessions, first time receipt of Federal funds, and the recognition of new Indian tribes and Native Hawaiian organizations. One commenter requested clarification on the subject of future accessions. One commenter stressed that tribal input, comment and recommendations are imperative in formulating this section. A draft of this section is currently being developed and will be submitted to the Review Committee for discussion prior to publication for public comment in the **Federal Register**. One commenter proposed inclusion of a ten year time limit during which Indian tribes must make claims for repatriation. Time limits for claims were discussed by Congress when the bill was being considered but were not included in the Act. Inclusion of such time limits in the regulations would contradict Congressional intent.

Section 10.14

Eighteen commenters recommended changes to the section on lineal descent and cultural affiliation. Two commenters recommended further identification in § 10.14 (a) of the parties responsible for completing the required activities. On Federal lands, Federal agency officials are responsible for determining which modern Indian tribes and Native Hawaiian organizations may have valid claims upon human remains, funerary objects, sacred objects, or objects of cultural patrimony that are excavated intentionally or discovered inadvertently on lands they manage. For existing collections, the museum or Federal agency official is responsible for assembling, describing, evaluating human remains, funerary objects, sacred objects, or objects of cultural patrimony and making determinations regarding their cultural affiliation and disposition. It is the responsibility of lineal descendants, Indian tribes or Native Hawaiian organizations that disagree with determinations of cultural affiliation made by a Federal agency or museum official to develop and present information to challenge that determination.

Another commenter recommended changing all references to Indian tribe in this section to "Indian tribe or tribes" to reflect the fact that Indian tribes may bring joint claims for certain items. The drafters consider the current language to support the possibility of joint claims.

One commenter identified the criteria for determining lineal descendants in § 10.14 (b) as being overly restrictive and recommended broadening them to allow for both individual and Indian tribe and Native Hawaiian organization claims. One commenter requested including a procedure "for independent verification of claimed descent." Criteria for determining lineal descent have been narrowly defined to reflect the priority given these claims under section 3 and section 7 of the Act. One commenter requested that the section include procedures for independent verification of any claims of lineal descent based upon traditional kinship systems. Museum or Federal agency officials are responsible for evaluating claims of lineal descent.

Three commenters identified criteria for determining cultural affiliation under § 10.14 (c)(1), (2) and (3) as placing an undue and unrealistic burden of proof on Indian tribes and Native Hawaiian organizations, and recommended fewer requirements. The three criteria — existence of an identifiable present-day Indian tribe or Native Hawaiian organization, evidence of the existence of an identifiable earlier group, and evidence of a shared group identity that can be reasonably traced between the present-day Indian tribe or Native Hawaiian organization and the earlier group—are the components of the statutory definition of cultural affiliation at section 2 (2) of the Act. They have been retained in the regulations.

Three commenters recommended rewording § 10.14 (c)(2) for clarification. The second sentence of § 10.14 (c)(2) has been rewritten to read: "Evidence to support this requirement may include, but is not necessarily limited to: . . ." One commenter recommended rewording § 10.14 (c)(2)(ii) to emphasize the desirability of demonstrating linkages between claimants and archeological remains. One commenter questioned whether it is possible to make biological distinctions between earlier groups as suggested in § 10.14 (c)(2)(iii). Cultural affiliation between particular human remains, funerary objects, sacred objects, or objects of cultural patrimony and particular Indian tribes and Native Hawaiian organizations must be determined on a case-by-case basis.

One commenter recommended regarding human remains or cultural objects found within the traditional (aboriginal) territory of an Indian tribe as being culturally affiliated with that Indian tribe, regardless of the antiquity of the human remains, funerary objects, sacred objects, or objects of cultural patrimony. The statutory provisions related to intentional excavation and inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal or tribal lands (section 3 of the Act) includes provisions for the disposition of human remains, funerary objects, sacred objects, or objects of

cultural patrimony to the Indian tribe that is recognized as aboriginally occupying the area in which the human remains or objects were recovered, if upon notice, such tribe states a claim for such human remains or items. No such criteria are included in the statutory sections regarding repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony in museum or Federal agency collections.

One commenter recommended inclusion of language from House Report 101–877 (page 5) clarifying that determinations of cultural affiliation should be based on an overall evaluation of the totality of the circumstances and evidence and should not be precluded solely because of some gaps in the record. Language from the House Report has been included as § 10.14 (d), and the subsequent sections relettered.

One commenter noted that the types of evidence listed in § 10.14 (e) were originally derived from section 7 (a)(4) of the Act—which deals exclusively with the determination of cultural affiliation — and recommends that lineal descent should be established through normally accepted methods of evidence. Section 7 (a) of the Act, of which section 7 (a)(4) is a subpart, deals with both determinations of lineal descent and cultural affiliation. It is the opinion of the drafters that each of the types of evidence listed could potentially be used to support a claim of lineal descent and should be available for use by potential claimants.

One commenter objected to oral tradition and folklore being allowed as evidence in § 10.14 (d), particularly for those areas, such as central, southwestern, southern, and coastal Texas, "where the aboriginal inhabitants have no biological descendants." One commenter recommended including a statement that physical anthropological/biological, archeological, and other "hard" scientific evidence will have the greatest bearing in determining the cultural affiliation of prehistoric materials, scaled with weight increasing as distance in time increases. One commenter recommended inclusion of a statement regarding "standards of evidence." The applicability and strength of particular types of evidence must be determined on a case-by-case basis. It would be inappropriate to place stipulations on the applicability of various types of evidence in regulation.

Two commenters recommended changing the last sentence of § 10.14 (e) to require that cultural affiliation be established with scientific certainty to avoid any misuse of the Act. A standard of scientific certainty is not consistent with Congressional intent. The statement of evidence in this subsection is drawn from section 7 (a)(4) of the Act. Two other commenters questioned whether this subsection might give the impression that scientific research is of no value in determining cultural affiliation. Section 7 (a)(4) identifies scientific information related to numerous fields as having relevance to the determination of cultural affiliation. One commenter recommended stipulating that no repatriation will occur until the analysis is completed. Section 5 (a) specifies that the geographic and cultural affiliation of human remains and associated funerary objects be determined "to the extent possible based on information possessed by the museum of Federal agency." No new scientific research is required. Delaying repatriation until new scientific research is completed contradicts the intent of Congress unless that scientific research is considered to be of major benefit to the United States.

Section 10.15

Eleven commenters recommended changes to the section on repatriation limitations and remedies. One commenter stated the section was not consistent with the statute and recommended deleting it in its entirety. Two commenters identified § 10.15 (a)(1) as being unduly harsh to Indian tribes and Native Hawaiian organizations, and recommended deleting it. Section 10.15 (a)(1) ensures that any claim received prior to the disposition or repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony must be considered by the museum or Federal agency. Claims made after disposition or repatriation have occurred are properly the responsibility of the receiving lineal descendant, Indian tribe, or Native Hawaiian organization. The subsection has been retained as it is important for the protection of museums and Federal agencies that comply with the Act and regulations. One commenter recommended adding another subsection under the title "Multiple Claimants" to address such situations. Three commenters recommended specifying that a time period for competing parties to reach agreement on the appropriate disposition or repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony. No time period has been established because it appears to be contrary to Congressional intent. One commenter recommended inclusion of a statement specifying who decides the disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony that cannot be shown to be culturally affiliated to a present-day Indian tribe or Native Hawaiian organization. Section 10.11 of the regulations has been reserved for procedures related to the disposition of culturally unidentifiable human remains.

One commenter recommended completing § 10.15 (b), reserved for "Failure to claim where no repatriation or disposition has occurred," as quickly as possible. Another commenter questioned whether the statutory language supports the inclusion of unclaimed cultural items as well as human remains. Section 3 (b) of the Act addresses the disposition of "unclaimed human remains and objects" and requires the Secretary to publish regulations to carry out their disposition in consultation with the Review Committee, Native American groups, and representatives of museums and the scientific community.

One commenter asked for clarification regarding whether the denial of a request for repatriation implied in § 10.15 (c) would have the effect of stopping the "90-day clock" for expedient repatriation. Museum and Federal agency officials are required to make a decision regarding claims for the disposition or repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony within ninety (90) days of receipt of that claim. Once that decision is made, the museum or Federal agency official has carried out their responsibility. Another commenter recommended that this subsection state specifically that museums and Federal agencies must repatriate within ninety (90)-days of receipt of a written request. Section 10.10 (a)(3) and (b)(2) specify that museums and Federal agencies must repatriate human remains, funerary objects, sacred objects, or objects of cultural patrimony in their collections within ninety (90) days of receipt of a written request for repatriation that satisfies the requirements of § 10.10 (a)(1) and (b)(1), respectively, provided that the repatriation may not occur until at least thirty (30) days after publication of the appropriate notice in the **Federal Register**.

Section 10.16

Two commenters recommended changes to the section on the Review Committee. One commenter recommended deletion of the term "culturally unidentifiable human remains" on the grounds that there is no such category recognized under the Act. Section 8 (b)(5) of the Act requires the Review Committee to compile an inventory of culturally unidentifiable human remains and recommend specific actions for developing a process for disposition of such human remains. Another commenter recommended specifying the criteria to be used by the Review Committee in resolving disputes. One commenter requested clarification as to the "arbitrator" for disputes arising from the Act. The Review Committee has established its own guidelines for facilitating the resolution of disputes that include both procedures and criteria. Copies of these procedures are available from the Department of the Interior through the Departmental Consulting Archeologist, Archeological Assistance Division, National Park Service.

Section 10.17

Three commenters recommended changes to the section on dispute resolution. One commenter recommended strengthening the section to provide a realistic and definitive forum for resolving problems. Another commenter recommended including criteria to be used by the Review Committee in resolving disputes. A third commenter recommended that appropriate time frames should be established for Review Committee comments concerning disputes. The Review Committee has established its own guidelines for facilitating the resolution of disputes that include both procedures and criteria. Copies of these procedures are available from the Department of the Interior through the Departmental Consulting Archeologist, Archeological Assistance Division, National Park Service.

Appendix A

Four commenters recommended changes to the sample summary. Two commenters recommended narrowing the focus of the summary from collections held by a museum which may contain unassociated funerary objects, sacred objects, or objects of cultural patrimony to a summary of those specific objects. This proposed text was not changed for reasons previously presented in the discussion of section 10.8.

One commenter objected to the enumeration of sites and objects in the seventh paragraph of the sample summary as being both impractical and impossible. The enumeration of sites and objects in the sample summary are identified clearly as approximations. Further, provision of this type of information to Indian tribes and Native Hawaiian organizations is consistent with the requirements of section 6 of the Act as clarified in section 10.8 of these regulations.

One commenter objected to the apparently broad access to museum records given Indian tribes in the final paragraph. The sentence in question closely paraphrases section 6 (b)(2) of the Act and has not been changed.

Appendix B

This appendix was reserved for a sample inventory of human remains and associated funerary objects. One commenter stressed the importance of developing this section as quickly as possible. A sample inventory of human remains and associated funerary objects currently has been developed in consultation with the Review Committee and distributed to Indian tribes, Native Hawaiian organizations, museums, and Federal agencies. This reserved appendix has been deleted from the rule.

Appendix C

The notice of inventory completion in this appendix has been updated with a more recent version and retitled as Appendix B.

Appendix D

The Review Committee recommended deleting this section that had been reserved for a sample memorandum of understanding dealing with repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony in Federal collections from the regulations. Guidance regarding such memoranda of understanding will be developed and distributed by the Department of the Interior.

Appendix E

The Review Committee recommended deleting this section that had been reserved for a sample memorandum of understanding dealing with intentional excavation on Federal or tribal lands from the regulations. Guidance regarding such memoranda of understanding will be developed and distributed by the Department of the Interior.

Authorship These proposed regulations were prepared by Dr. Francis P. McManamon (Departmental Consulting Archeologist, National Park Service), Dr. C. Timothy McKeown (NAGPRA Program Leader, National Park Service), and Mr. Lars Hanslin (Senior Attorney, Office of the Solicitor), in consultation with the Native American Graves Protection and Repatriation Review Committee as directed by section 8 (c)(7) of the Act.

Compliance with the Paperwork Reduction Act

The collections of information contained in this rule have been approved by the Office of Management and Budget as required by 44 U.S.C. 3501 *et seq* (OMB control number 1024-0144). Public reporting burden for this collection of information is expected to average 100 hours for the exchange of summary/inventory information between a museum or Federal agency and an Indian tribe or Native Hawaiian organization and six hours per response for the notification to the Secretary, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collected information. Two commenters questioned use of an average amount of time to characterize the expected burden. While the amount of time required to complete the reporting requirements of these regulations will vary between institutions depending on the size and nature of their collections and the comprehensiveness of their documentation, review of summaries, inventories, and notices received by the Departmental Consulting Archeologist confirms the accuracy of the previous estimates. Send comments regarding this burden estimate or any other aspects of this collection of information, including suggestions for reducing the burden, to Information Collection Officer, National Park Service, Box 37127, Washington D.C. 20013 and to the Office of Management and Budget, Paperwork Reduction Project, Washington DC 20503.

Compliance with Other Laws

This rule has been reviewed under Executive Order 12866. The final rule implements provisions of the Native American Graves Protection and Repatriation Act of 1990 and addresses the rights of lineal descendants, Indian tribes, and Native Hawaiian organizations to Native American human remains, funerary objects, sacred objects, and objects of cultural patrimony. The final rule requires that any museum receiving Federal funds prepare summaries and conduct inventories. These requirements are within professionally accepted standards for museum record keeping consistent with the purposes of such institutions or organizations. Grants have been awarded during FY 1994 and FY 1995 to assist museums in these tasks. Federal agencies will incur costs in two ways: (1) Preparing the summaries and conducting the

inventories; and (2) conducting consultation prior to planned excavations and following inadvertent discoveries on Federal or tribal lands. The Congressional Budget Office estimated costs for summary and inventory activities at between $5 and $30 million over a five year period. Many of the actions required of Federal agencies under item (2) are recommended or required by previous legislation—such as the National Historic Preservation Act and the Archaeological Resources Protection Act—and costs for these activities are not expected to increase appreciably, particularly if the Federal agencies are able to coordinate their consultation and review activities as encouraged by these regulations and other guidance documents.

The Department of the Interior certifies that this document does not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

The Department of the Interior has determined that these final regulations meet the applicable standards provided in sections 2(a) and 2(b) of Executive Order 12778.

The Department of the Interior has determined that these final regulations will not have a significant effect on the quality of the human environment under the National Environmental Policy Act (42 U.S.C. 4321–4347). In addition, the Department of the Interior has determined that these final regulations are categorically excluded from the procedural requirements of the National Environmental Policy Act by Departmental regulations in 516 DM 2. As such, neither an Environmental Assessment nor an Environmental Impact statement has been prepared.

List of Subjects in 43 CFR Part 10

Administrative practice and procedure, Graves, Hawaiian Natives, Historic preservation, Indians—Claims, Indians—lands, Museums, Public lands, Reporting and record keeping requirements.

For the reasons set out in the preamble, 43 CFR Subtitle A is amended by adding Part 10 to read as follows:

PART 10—NATIVE AMERICAN GRAVES PROTECTION AND REPATRIATION REGULATIONS

Subpart A—Introduction

Sec.

10.1 Purpose and applicability.
10.2 Definitions
10.3 Intentional archeological excavations.
10.4 Inadvertent discoveries.
10.5 Consultation.
10.6 Custody.
10.7 Disposition of unclaimed human remains, funerary objects, sacred objects, or objects of cultural patrimony. [Reserved]

Subpart C—Human Remains, Funerary Objects, Sacred Objects, or Objects of Cultural Patrimony in Museums and Federal Collections

10.8 Summaries.
10.9 Inventories.
10.10 Repatriation.
10.11 Disposition of culturally unidentifiable human remains. [Reserved]
10.12 Civil penalties. [Reserved]
10.13 Future applicability. [Reserved]

Subpart D—General

10.14 Lineal descent and cultural affiliation.
10.15 Repatriation limitations and remedies.
10.16 Review committee.
10.17 Dispute resolution.

Appendix-A to Part 10—Sample summary.

Appendix-B to Part 10—Sample notice of inventory completion.

Authority: 25 U.S.C. 3001 *et seq.*

Subpart A—Introduction

§ 10.1 Purpose and applicability.

(a) *Purpose.* These regulations carry out provisions of the Native American Graves Protection and Repatriation Act of 1990 (Pub.L. 101–601; 25 U.S.C. 3001–3013;104 Stat. 3048–3058). These regulations develop a systematic process for determining the rights of lineal descendants and Indian tribes and Native Hawaiian organizations to certain Native American human remains, funerary objects, sacred objects, or objects of cultural patrimony with which they are affiliated.

(b) *Applicability.* (1) These regulations pertain to the identification and appropriate disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony that are:

(i) In Federal possession or control; or

(ii) In the possession or control of any institution or State or local government receiving Federal funds; or

(iii) Excavated intentionally or discovered inadvertently on Federal or tribal lands.

(2) These regulations apply to human remains, funerary objects, sacred objects, or objects of cultural patrimony which are indigenous to Alaska, Hawaii, and the continental United States, but not to territories of the United States.

(3) Throughout these regulations are decision points which determine their applicability in particularly circumstances, e.g., a decision as to whether a museum "controls" human remains and cultural objects within the meaning of the regulations, or, a decision as to whether an object is a "human remain," "funerary object," "sacred object," or "object of cultural patrimony" within the meaning of the regulations. Any final determination making the Act or these regulations inapplicable is subject to review pursuant to section 15 of the Act.

§ 10.2 Definitions.

In addition to the term *Act*, which means the Native American Graves Protection and Repatriation Act as described above, definitions used in these regulations are grouped in seven classes: Parties required to comply with these regulations; Parties with standing to make claims under these regulations; Parties responsible for implementing these regulations; Objects covered by these regulations; Cultural affiliation; Types of land covered by these regulations; and Procedures required by these regulations.

(a) *Who must comply with these regulations?* (1) *Federal agency* means any department, agency, or instrumentality of the United States. Such term does not include the Smithsonian Institution as specified in section 2 (4) of the Act.

(2) *Federal agency official* means any individual authorized by delegation of authority within a Federal agency to perform the duties relating to these regulations.

(3) *Museum* means any institution or State or local government agency (including any institution of higher learning) that has possession of, or control over, human remains, funerary objects, sacred objects, or objects of cultural patrimony and receives Federal funds.

(i) The term "*possession*" means having physical custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony with a sufficient legal interest to lawfully treat the objects as part of its collection for purposes of these regulations. Generally, a museum or Federal agency would not be considered to have possession of human remains, funerary objects, sacred objects, or objects of cultural patrimony on loan from another individual, museum, or Federal agency.

(ii) The term "*control*" means having a legal interest in human remains, funerary objects, sacred objects, or objects of cultural patrimony sufficient to lawfully permit the museum or Federal agency to treat the objects as part of its collection for purposes of these regulations whether or not the human remains, funerary objects, sacred objects or objects of cultural patrimony are in the physical custody of the museum or Federal agency. Generally, a museum or Federal agency that has loaned human remains, funerary objects, sacred objects, or objects of cultural patrimony to another individual, museum, or Federal agency is considered to retain control of those human remains, funerary objects, sacred objects, or objects of cultural patrimony for purposes of these regulations.

(iii) The phrase "*receives Federal funds*" means the receipt of funds by a museum after November 16, 1990, from a Federal agency through any grant, loan, contract (other than a procurement contract), or other arrangement by which a Federal agency makes or made available to a museum aid in the form of funds. Federal funds provided for any purpose that are received by a larger entity of which the museum is a part are considered Federal funds for the purposes of these regulations. For example, if a museum is a part of a State or local government or a private university and the State or local government or private university receives Federal funds for any purpose, the museum is considered to receive Federal funds for the purpose of these regulations.

(4) *Museum official* means the individual within a museum designated as being responsible for matters relating to these regulations.

(5) *Person* means an individual, partnership, corporation, trust, institution, association, or any other private entity, or, any official, employee, agent, department, or instrumentality of the United States, or of any Indian tribe or Native Hawaiian organization, or of any State or political subdivision thereof that discovers human remains, funerary objects, sacred objects or objects of cultural patrimony on Federal or tribal lands after November 16, 1990.

(b) *Who has standing to make a claim under these regulations?*

(1) *Lineal descendant* means an individual tracing his or her ancestry directly and without interruption by means of the traditional kinship system of the appropriate Indian tribe or Native Hawaiian organization or by the common law system of descendance to a known Native American individual whose remains, funerary objects, or sacred objects are being claimed under these regulations.

(2) *Indian tribe* means any tribe, band, nation, or other organized Indian group or community of Indians, including any Alaska Native village or corporation as defined in or established by the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians. The Secretary will distribute a list of Indian tribes for the purposes of carrying out this statute through the Departmental Consulting Archeologist.

(3)(i) *Native Hawaiian organization* means any organization that:

(A) Serves and represents the interests of Native Hawaiians;

(B) Has as a primary and stated purpose the provision of services to Native Hawaiians; and

(C) Has expertise in Native Hawaiian affairs.

(ii)The term *Native Hawaiian* means any individual who is a descendant of the aboriginal people who, prior to 1778, occupied and exercised sovereignty in the area that now constitutes the State of Hawaii. Such organizations must include the Office of Hawaiian Affairs and *Hui Mālama I Nā Kūpuna 'O Hawai'i Nei.*

(4) *Indian tribe official* means the principal leader of an Indian tribe or Native Hawaiian organization or the individual officially designated by the governing body of an Indian tribe or Native Hawaiian organization or as otherwise provided by tribal code, policy, or established procedure as responsible for matters relating to these regulations.

(c) *Who is responsible for carrying out these regulations?*

(1) *Secretary* means the Secretary of the Interior.

(2) *Review Committee* means the advisory committee established pursuant to section 8 of the Act.

(3) *Departmental Consulting Archeologist* means the official of the Department of the Interior designated by the Secretary as responsible for the administration of matters relating to these regulations. Communications to the Departmental Consulting Archeologist should be addressed to:

Departmental Consulting Archeologist
National Park Service,
PO Box 37127
Washington, DC 20013–7127.

(d) *What objects are covered by these regulations?* The Act covers four types of Native American objects. The term *Native American* means of, or relating to, a tribe, people, or culture indigenous to the United States, including Alaska and Hawaii:

(1) *Human remains* means the physical remains of a human body of a person of Native American ancestry. The term does not include remains or portions of remains that may reasonably be determined to have been freely given or naturally shed by the individual from whose body they were obtained, such as hair made into ropes or nets. For the purposes of determining cultural affiliation, human remains incorporated into a funerary object, sacred object, or object of cultural patrimony, as defined below, must be considered as part of that item.

(2) *Funerary objects* means items that, as part of the death rite or ceremony of a culture, are reasonably believed to have been placed intentionally at the time of death or later with or near individual human remains. Funerary objects must be identified by a preponderance of the evidence as having been removed from a specific burial site of an individual affiliated with a particular Indian tribe or Native Hawaiian organization or as being related to specific individuals or families or to known human remains. The term *burial site* means any natural or prepared physical location, whether originally below, on, or above the surface of the earth, into which as part of the death rite or ceremony of a culture, individual human remains were deposited, and includes rock cairns or pyres which do not fall within the ordinary definition of grave site. For purposes of completing the summary requirements in § 10.8 and the inventory requirements of § 10.9:

(i) *Associated funerary objects* means those funerary objects for which the human remains with which they were placed intentionally are also in the possession or control of a museum or Federal agency. Associated funerary objects also means those funerary objects that were made exclusively for burial purposes or to contain human remains.

(ii) *Unassociated funerary objects* means those funerary objects for which the human remains with which they were placed intentionally are not in the possession or control of a museum or Federal agency. Objects that were displayed with individual human remains as part of a death rite or ceremony of a culture and subsequently returned or distributed according to traditional custom to living descendants or other individuals are not considered unassociated funerary objects.

(3) *Sacred objects* means items that are specific ceremonial objects needed by traditional Native American religious leaders for the practice of traditional Native American religions by their

present-day adherents. While many items, from ancient pottery sherds to arrowheads, might be imbued with sacredness in the eyes of an individual, these regulations are specifically limited to objects that were devoted to a traditional Native American religious ceremony or ritual and which have religious significance or function in the continued observance or renewal of such ceremony. The term *traditional religious leader* means a person who is recognized by members of an Indian tribe or Native Hawaiian organization as:

(i) Being responsible for performing cultural duties relating to the ceremonial or religious traditions of that Indian tribe or Native Hawaiian organization, or

(ii) Exercising a leadership role in an Indian tribe or Native Hawaiian organization based on the tribe or organization's cultural, ceremonial, or religious practices.

(4) *Objects of cultural patrimony* means items having ongoing historical, traditional, or cultural importance central to the Indian tribe or Native Hawaiian organization itself, rather than property owned by an individual tribal or organization member. These objects are of such central importance that they may not be alienated, appropriated, or conveyed by any individual tribal or organization member. Such objects must have been considered inalienable by the culturally affiliated Indian tribe or Native Hawaiian organization at the time the object was separated from the group. Objects of cultural patrimony include items such as Zuni War Gods, the Confederacy Wampum Belts of the Iroquois, and other objects of similar character and significance to the Indian tribe or Native Hawaiian organization as a whole.

(e) *What is cultural affiliation?* Cultural affiliation means that there is a relationship of shared group identity which can reasonably be traced historically or prehistorically between members of a present-day Indian tribe or Native Hawaiian organization and an identifiable earlier group. Cultural affiliation is established when the preponderance of the evidence — based on geographical, kinship, biological, archeological, linguistic, folklore, oral tradition, historical evidence, or other information or expert opinion — reasonably leads to such a conclusion.

(f) *What types of lands to the excavation and discovery provisions of these regulations apply to?*

(1) *Federal lands* means any land other than tribal lands that are controlled or owned by the United States Government, including lands selected by but not yet conveyed to Alaska Native Corporations and groups organized pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.). United States "control," as used in this definition, refers to those lands not owned by the United States but in which the United States has a legal interest sufficient to permit it to apply these regulations without abrogating the otherwise existing legal rights of a person.

(2) *Tribal lands* means all lands which:

(i) Are within the exterior boundaries of any Indian reservation including, but not limited to, allotments held in trust or subject to a restriction on alienation by the United States; or

(ii) Comprise dependent Indian communities as recognized pursuant to 18 U.S.C. 1151; or

(iii) Are administered for the benefit of Native Hawaiians pursuant to the Hawaiian Homes Commission Act of 1920 and section 4 of the Hawaiian Statehood Admission Act (Pub.L. 86–3; 73 Stat. 6).

(iv) Actions authorized or required under these regulations will not apply to tribal lands to the extent that any action would result in a taking of property without compensation within the meaning of the Fifth Amendment of the United States Constitution.

(g) *What procedures are required by these regulations?*

(1) *Summary* means the written description of collections that may contain unassociated funerary objects, sacred objects, and objects of cultural patrimony required by § 10.8 of these regulations.

(2) *Inventory* means the item-by-item description of human remains and associated funerary objects.

(3) *Intentional excavation* means the planned archeological removal of human remains, funerary objects, sacred objects, or objects of cultural patrimony found under or on the surface of Federal or tribal lands pursuant to section 3 (c) of the Act.

(4) *Inadvertent discovery* means the unanticipated encounter or detection of human remains, funerary objects, sacred objects, or objects of cultural patrimony found under or on the surface of Federal or tribal lands pursuant to section 3 (d) of the Act.

Subpart B—Human Remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal or Tribal Lands

§ 10.3 Intentional archeological excavations.

(a) *General.* This section carries out section 3 (c) of the Act regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony that are excavated intentionally from Federal or tribal lands after November 16, 1990.

(b) *Specific Requirements.* These regulations permit the intentional excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal or tribal lands only if:

(1) The objects are excavated or removed following the requirements of the Archaeological Resources Protection Act (ARPA) (16 U.S.C. 470aa et seq.) and its implementing regulations. Regarding private lands within the exterior boundaries of any Indian reservation, the Bureau of Indian Affairs (BIA) will serve as the issuing agency for any permits required under the Act. For BIA procedures for obtaining such permits, see 25 CFR part 262 or contact the Deputy Commissioner of Indian Affairs, Department of the Interior, Washington, DC 20240. Regarding lands administered for the benefit of Native Hawaiians pursuant to the Hawaiian Homes Commission Act, 1920, and section 4 of Pub. L. 86–3, the Department of Hawaiian Home Lands will serve as the issuing agency for any permits required under the Act, with the Hawaii State Historic Preservation Division of the Department of Land and Natural Resources acting in an advisory capacity for such issuance. Procedures and requirements for issuing permits will be consistent with those required by the ARPA and its implementing regulations;

(2) The objects are excavated after consultation with or, in the case of tribal lands, consent of, the appropriate Indian tribe or Native Hawaiian organization pursuant to § 10.5;

(3) The disposition of the objects is consistent with their custody as described in § 10.6; and

(4) Proof of the consultation or consent is shown to the Federal agency official or other agency official responsible for the issuance of the required permit.

(c) *Procedures.* (1) The Federal agency official must take reasonable steps to determine whether a planned activity may result in the excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony from Federal lands. Prior to issuing any approvals or permits for activities, the Federal agency official must notify in writing the Indian tribes or Native Hawaiian organizations that are likely to be culturally affiliated with any human remains, funerary objects, sacred objects, or objects of cultural patrimony that may be excavated. The Federal agency official must also notify any present-day Indian tribe which aboriginally occupied the area of the planned activity and any other Indian tribes or Native Hawaiian organizations that the Federal agency official reasonably believes are likely to have a cultural relationship to the human remains, funerary objects, sacred objects, or objects of cultural patrimony that are expected to be found. The notice must be in writing and describe the planned activity, its general location, the basis upon which it was determined that human remains, funerary objects, sacred objects, or objects of cultural patrimony may be excavated, and, the basis for determining likely custody pursuant to § 10.6. The notice must also propose a time and place for meetings or consultations to further consider the activity, the Federal agency's proposed treatment of any human remains, funerary objects, sacred objects, or objects of cultural patrimony that may be excavated, and the proposed disposition of any excavated human remains, funerary objects, sacred objects, or objects of cultural patrimony. Written notification should be followed up by telephone contact if there is no response in 15 days. Consultation must be conducted pursuant to § 10.5.

(2) Following consultation, the Federal agency official must complete a written plan of action (described in § 10.5(e)) and execute the actions called for in it.

(3) If the planned activity is also subject to review under section 106 of the National Historic Preservation Act (16 U.S.C. 470 *et seq.*), the Federal agency official should coordinate consultation and any subsequent agreement for compliance conducted under that Act with the requirements of § 10.3 (c)(2) and § 10.5. Compliance with these regulations does not relieve Federal agency officials of requirements to comply with section 106 of the National Historic Preservation Act (16 U.S.C. 470 *et seq.*).

(4) If an Indian tribe or Native Hawaiian organization receives notice of a planned activity or otherwise becomes aware of a planned activity that may result in the excavation of human remains, funerary objects, sacred objects, or objects of cultural patrimony on tribal lands, the Indian tribe or Native Hawaiian organization may take appropriate steps to:

(i) Ensure that the human remains, funerary objects, sacred objects, or objects of cultural patrimony are excavated or removed following § 10.3 (b), and

(ii) make certain that the disposition of any human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently as a result of the planned activity are carried out following § 10.6.

§ 10.4 Inadvertent discoveries.

(a) *General.* This section carries out section 3 (d) of the Act regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony that are discovered inadvertently on Federal or tribal lands after November 16, 1990.

(b) *Discovery.* Any person who knows or has reason to know that he or she has discovered inadvertently human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal or tribal lands after November 16, 1990, must provide immediate telephone notification of the inadvertent discovery, with written confirmation, to the responsible Federal agency official with respect to Federal lands, and, with respect to tribal lands, to the responsible Indian tribe official. The requirements of these regulations regarding inadvertent discoveries apply whether or not an inadvertent discovery is duly reported. If written confirmation is provided by certified mail, the return receipt constitutes evidence of the receipt of the written notification by the Federal agency official or Indian tribe official.

(c) *Ceasing activity.* If the inadvertent discovery occurred in connection with an on-going activity on Federal or tribal lands, the person, in addition to providing the notice described above, must stop the activity in the area of the inadvertent discovery and make a reasonable effort to protect the human remains, funerary objects, sacred objects, or objects of cultural patrimony discovered inadvertently.

(d) *Federal lands.* (1) As soon as possible, but no later than three (3) working days after receipt of the written confirmation of notification with respect to Federal lands described in § 10.4 (b), the responsible Federal agency official must:

(i) Certify receipt of the notification;

(ii) Take immediate steps, if necessary, to further secure and protect inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony, including, as appropriate, stabilization or covering;

(iii) Notify by telephone, with written confirmation, the Indian tribes or Native Hawaiian organizations likely to be culturally affiliated with the inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony, the Indian tribe or Native Hawaiian organization which aboriginally occupied the area, and any other Indian tribe or Native Hawaiian organization that is reasonably known to have a cultural relationship to the human remains, funerary objects, sacred objects, or objects of cultural patrimony. This notification must include pertinent information as to kinds of human remains, funerary objects, sacred objects, or objects of cultural patrimony discovered inadvertently, their condition, and the circumstances of their inadvertent discovery;

(iv) Initiate consultation on the inadvertent discovery pursuant to § 10.5;

(v) If the human remains, funerary objects, sacred objects, or objects of cultural patrimony must be excavated or removed, follow the requirements and procedures in § 10.3 (b) of these regulations; and

(vi) Ensure that disposition of all inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony is carried out following § 10.6.

(2) *Resumption of activity.* The activity that resulted in the inadvertent discovery may resume thirty (30) days after certification by the notified Federal agency of receipt of the written confirmation of notification of inadvertent discovery if the resumption of the activity is otherwise lawful. The activity may also resume, if otherwise lawful, at any time that a written, binding agreement is executed between the Federal agency and the affiliated Indian tribes or Native Hawaiian organizations that adopt a recovery plan for the excavation or removal of the human remains, funerary objects, sacred objects, or objects of cultural patrimony following § 10.3 (b)(1) of these regulations. The disposition of all human remains, funerary objects, sacred objects, or objects of cultural patrimony must be following § 10.6.

(e) *Tribal lands.* (1) As soon as possible, but no later than three (3) working days after receipt of the written confirmation of notification with respect to Tribal lands described in § 10.4 (b), the responsible Indian tribe official may:

(i) Certify receipt of the notification;

(ii) Take immediate steps, if necessary, to further secure and protect inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony, including, as appropriate, stabilization or covering;

(iii) If the human remains, funerary objects, sacred objects, or objects of

cultural patrimony must be excavated or removed, follow the requirements and procedures in § 10.3 (b) of these regulations; and

(iv) Ensure that disposition of all inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony is carried out following § 10.6.

(2) Resumption of Activity. The activity that resulted in the inadvertent discovery may resume if otherwise lawful after thirty (30) days of the certification of the receipt of notification by the Indian tribe or Native Hawaiian organization.

(f) *Federal agency officials.* Federal agency officials should coordinate their responsibilities under this section with their emergency discovery responsibilities under section 106 of the National Historical Preservation Act (16 U.S.C. 470 (f) *et seq.*), 36 CFR 800.11 or section 3 (a) of the Archeological and Historic Preservation Act (16 U.S.C. 469 (a-c)). Compliance with these regulations does not relieve Federal agency officials of the requirement to comply with section 106 of the National Historical Preservation Act (16 U.S.C. 470 (f) *et seq.*), 36 CFR 800.11 or section 3 (a) of the Archeological and Historic Preservation Act (16 U.S.C. 469 (a-c)).

(g) *Notification requirement in authorizations.* All Federal authorizations to carry out land use activities on Federal lands or tribal lands, including all leases and permits, must include a requirement for the holder of the authorization to notify the appropriate Federal or tribal official immediately upon the discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony pursuant to § 10.4 (b) of these regulations.

§ 10.5 Consultation.

Consultation as part of the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal lands must be conducted in accordance with the following requirements.

(a) *Consulting parties.* Federal agency officials must consult with known lineal descendants and Indian tribe officials:

(1) from Indian tribes on whose aboriginal lands the planned activity will occur or where the inadvertent discovery has been made; and

(2) from Indian tribes and Native Hawaiian organizations that are, or are likely to be, culturally affiliated with the human remains, funerary objects, sacred objects, or objects of cultural patrimony; and

(3) from Indian tribes and Native Hawaiian organizations that have a demonstrated cultural relationship with the human remains, funerary objects, sacred objects, or objects of cultural patrimony.

(b) *Initiation of consultation.* (1) Upon receiving notice of, or otherwise becoming aware of, an inadvertent discovery or planned activity that has resulted or may result in the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony on Federal lands, the responsible Federal agency official must, as part of the procedures described in § 10.3 and § 10.4, take appropriate steps to identify the lineal descendant, Indian tribe, or Native Hawaiian organization entitled to custody of the human remains, funerary objects, sacred objects, or objects of cultural patrimony pursuant to § 10.6 and § 10.14. The Federal agency official shall notify in writing:

(i) any known lineal descendants of the individual whose remains, funerary objects, sacred objects, or objects of cultural patrimony have been or are likely to be excavated intentionally or discovered inadvertently; and

(ii) the Indian tribes or Native Hawaiian organizations that are likely to be culturally affiliated with the human remains, funerary objects, sacred objects, or objects of cultural patrimony that have been or are likely to be excavated intentionally or discovered inadvertently; and

(iii) the Indian tribes which aboriginally occupied the area in which the human remains, funerary objects, sacred objects, or objects of cultural patrimony have been or are likely to be excavated intentionally or discovered inadvertently; and

(iv) the Indian tribes or Native Hawaiian organizations that have a demonstrated cultural relationship with the human remains, funerary objects, sacred objects, or objects of cultural patrimony that have been or are likely to be excavated intentionally or discovered inadvertently.

(2) The notice must propose a time and place for meetings or consultation to further consider the intentional excavation or inadvertent discovery, the Federal agency's proposed treatment of the human remains, funerary objects, sacred objects, or objects of cultural patrimony that may be excavated, and the proposed disposition of any intentionally excavated or inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony.

(3) The consultation must seek to identify traditional religious leaders who should also be consulted and seek to identify, where applicable, lineal descendants and Indian tribes or Native Hawaiian organizations affiliated with the human remains, funerary objects, sacred objects, or objects of cultural patrimony.

(c) *Provision of information.* During the consultation process, as appropriate, the Federal agency official must provide the following information in writing to the lineal descendants and the officials of Indian tribes or Native Hawaiian organizations that are or are likely to be affiliated with the human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands:

(1) A list of all lineal descendants and Indian tribes or Native Hawaiian organizations that are being, or have been, consulted regarding the particular human remains, funerary objects, sacred objects, or objects of cultural patrimony;

(2) An indication that additional documentation used to identify affiliation will be supplied upon request.

(d) *Requests for information.* During the consultation process, Federal agency officials must request, as appropriate, the following information from Indian tribes or Native Hawaiian organizations that are, or are likely to be, affiliated pursuant to § 10.6 (a) with intentionally excavated or inadvertently discovered human remains, funerary objects, sacred objects, or objects of cultural patrimony:

(1) Name and address of the Indian tribe official to act as representative in consultations related to particular human remains, funerary objects, sacred objects, or objects of cultural patrimony;

(2) Names and appropriate methods to contact lineal descendants who should be contacted to participate in the consultation process;

(3) Recommendations on how the consultation process should be conducted; and

(4) Kinds of cultural items that the Indian tribe or Native Hawaiian organization considers likely to be unassociated funerary objects, sacred objects, or objects of cultural patrimony.

(e) *Written plan of action.* Following consultation, the Federal agency official must prepare, approve, and sign a written plan of action. A copy of this plan of action must be provided to the lineal descendants, Indian tribes and Native Hawaiian organizations involved. Lineal descendants and Indian tribe official(s) may sign the written plan of action as appropriate. At a minimum, the plan of action must comply with § 10.3 (b)(1) and document the following:

(1) The kinds of objects to be considered as cultural items as defined in § 10.2 (b);

(2) The specific information used to determine custody pursuant to § 10.6;

(3) The planned treatment, care, and handling of human remains, funerary objects, sacred objects, or objects of cultural patrimony recovered;

(4) The planned archeological recording of the human remains, funerary objects, sacred objects, or objects of cultural patrimony recovered;

(5) The kinds of analysis planned for each kind of object;

(6) Any steps to be followed to contact Indian tribe officials at the time of intentional excavation or inadvertent discovery of specific human remains, funerary objects, sacred objects, or objects of cultural patrimony;

(7) The kind of traditional treatment, if any, to be afforded the human remains, funerary objects, sacred objects, or objects of cultural patrimony by members of the Indian tribe or Native Hawaiian organization;

(8) The nature of reports to be prepared; and

(9) The disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony following § 10.6.

(f) *Comprehensive agreements.* Whenever possible, Federal agencies should enter into comprehensive agreements with Indian tribes or Native Hawaiian organizations that are affiliated with specific human remains, funerary objects, sacred objects, or objects of cultural patrimony and have claimed, or are likely to claim, those human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands. These agreements should address all Federal agency land management activities that could result in the intentional excavation or inadvertent discovery of human remains, funerary objects, sacred objects, or objects of cultural patrimony. Consultation should lead to the establishment of a process for effectively carrying out the requirements of these regulations regarding standard consultation procedures, the determination of custody consistent with procedures in this section and § 10.6, and the treatment and disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony. The signed agreements, or the correspondence related to the effort to reach agreements, must constitute proof of consultation as required by these regulations.

(g) *Traditional religious leaders.* The Federal agency official must be cognizant that Indian tribe officials may need to confer with traditional religious leaders prior to making recommendations. Indian tribe officials are under no obligation to reveal the identity of traditional religious leaders.

§ 10.6 Custody.

(a) *Priority of custody.* This section carries out section 3 (a) of the Act, subject to the limitations of § 10.15, regarding the custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal or tribal lands after November 16, 1990. For the purposes of this section, custody means ownership or control of human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently in Federal or tribal lands after November 16, 1990. Custody of these human remains, funerary objects, sacred objects, or objects of cultural patrimony is, with priority given in the order listed:

(1) In the case of human remains and associated funerary objects, in the lineal descendant of the deceased individual as determined pursuant to § 10.14 (b);

(2) In cases where a lineal descendant cannot be ascertained or no claim is made, and with respect to unassociated funerary objects, sacred objects, and objects of cultural patrimony:

(i) In the Indian tribe on whose tribal land the human remains, funerary objects, sacred objects, or objects of cultural patrimony were discovered inadvertently;

(ii) In the Indian tribe or Native Hawaiian organization that has the closest cultural affiliation with the human remains, funerary objects, sacred objects, or objects of cultural patrimony as determined pursuant to § 10.14 (c); or

(iii) In circumstances in which the cultural affiliation of the human remains, funerary objects, sacred objects, or objects of cultural patrimony cannot be ascertained and the objects were discovered inadvertently on Federal land that is recognized by a final judgment of the Indian Claims Commission or the United States Court of Claims as the aboriginal land of an Indian tribe:

(A) In the Indian tribe aboriginally occupying the Federal land on which the human remains, funerary objects, sacred objects, or objects of cultural patrimony were discovered inadvertently, or

(B) If it can be shown by a preponderance of the evidence that a different Indian tribe or Native Hawaiian organization has a stronger cultural relationship with the human remains, funerary objects, sacred objects, or objects of cultural patrimony, in the Indian tribe or Native Hawaiian organization that has the strongest demonstrated relationship with the objects.

(b) Custody of human remains, funerary objects, sacred objects, or objects of cultural patrimony and other provisions of the Act apply to all intentional excavations and inadvertent discoveries made after November 16, 1990, including those made before the effective date of these regulations.

(c) *Final notice, claims and disposition with respect to Federal lands.* Upon determination of the lineal descendant, Indian tribe, or Native Hawaiian organization that under these regulations appears to be entitled to custody of particular human remains, funerary objects, sacred objects, or objects of cultural patrimony excavated intentionally or discovered inadvertently on Federal lands, the responsible Federal agency official must, subject to the notice required herein and the limitations of § 10.15, transfer custody of the objects to the lineal descendant, Indian tribe, or Native Hawaiian organization following appropriate procedures, which must respect traditional customs and practices of the affiliated Indian tribes or Native Hawaiian organizations in each instance. Prior to any such disposition by a Federal agency official, the Federal agency official must publish general notices of the proposed disposition in a newspaper of general circulation in the area in which the human remains, funerary objects, sacred objects, or objects of cultural patrimony were excavated intentionally or discovered inadvertently and, if applicable, in a newspaper of general circulation in the area(s) in which affiliated Indian tribes or Native Hawaiian organizations members now reside. The notice must provide information as to the nature and affiliation of the human remains, funerary objects, sacred objects, or objects of cultural patrimony and solicit further claims to custody. The notice must be published at least two (2) times at least a week apart, and the transfer must not take place until at least thirty (30) days after the publication of the second notice to allow time for any additional claimants to come forward. If additional claimants do come forward and the Federal agency official cannot clearly determine which claimant is entitled to custody, the Federal agency must not transfer custody of the objects until such time as the proper recipient is determined pursuant to these

regulations. The Federal agency official must send a copy of the notice and information on when and in what newspaper(s) the notice was published to the Departmental Consulting Archeologist.

§ 10.7 Disposition of unclaimed human remains, funerary objects, sacred objects, or objects of cultural patrimony. [Reserved]

Subpart C—Human remains, funerary objects, sacred objects, or objects of cultural patrimony in museums and Federal collections

§ 10.8 Summaries.

(a) *General.* This section carries out section 6 of the Act. Under section 6 of the Act, each museum or Federal agency that has possession or control over collections which may contain unassociated funerary objects, sacred objects, or objects of cultural patrimony must complete a summary of these collections based upon available information held by the museum or Federal agency. The purpose of the summary is to provide information about the collections to lineal descendants and culturally affiliated Indian tribes or Native Hawaiian organizations that may wish to request repatriation of such objects. The summary serves in lieu of an object-by-object inventory of these collections, although, if an inventory is available, it may be substituted. Federal agencies are responsible for ensuring that these requirements are met for all collections from their lands or generated by their actions whether the collections are held by the Federal agency or by a non-Federal institution.

(b) *Contents of summaries.* For each collection or portion of a collection, the summary must include: an estimate of the number of objects in the collection or portion of the collection; a description of the kinds of objects included; reference to the means, date(s), and location(s) in which the collection or portion of the collection was acquired, where readily ascertainable; and information relevant to identifying lineal descendants, if available, and cultural affiliation.

(c) *Completion.* Summaries must be completed not later than November 16, 1993.

(d) *Consultation.* (1) Consulting parties. Museum and Federal agency officials must consult with Indian tribe officials and traditional religious leaders:

(A) From whose tribal lands unassociated funerary objects, sacred objects, or objects of cultural patrimony originated;

(B) That are, or are likely to be, culturally affiliated with unassociated funerary objects, sacred objects, or objects of cultural patrimony; and

(C) From whose aboriginal lands unassociated funerary objects, sacred objects, or objects of cultural patrimony originated.

(2) Initiation of consultation. Museum and Federal agency officials must begin summary consultation no later than the completion of the summary process. Consultation may be initiated with a letter, but should be followed up by telephone or face-to-face dialogue with the appropriate Indian tribe official.

(3) Provision of information. During summary consultation, museum and Federal agency officials must provide copies of the summary to lineal descendants, when known, and to officials and traditional religious leaders representing Indian tribes or Native Hawaiian organizations that are, or are likely to be, culturally affiliated with the cultural items. A copy of the summary must also be provided to the Departmental Consulting Archeologist. Upon request by lineal descendants or Indian tribe officials, museum and Federal agency officials must provide lineal descendants, Indian tribe officials and traditional religious leaders with access to records, catalogues, relevant studies, or other pertinent data for the limited purposes of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of objects covered by the summary. Access to this information may be requested at any time and must be provided in a reasonable must be provided access to such materials.

(4) Requests for information. During the summary consultation, museum and Federal agency officials must request, as appropriate, the following information from Indian tribes and Native Hawaiian organizations that are, or are likely to be, culturally affiliated with their collections:

(i) Name and address of the Indian tribe official to act as representative in consultations related to particular objects;

(ii) Recommendations on how the consultation process should be conducted, including:

(A) Names and appropriate methods to contact any lineal descendants, if known, of individuals whose unassociated funerary objects or sacred objects are included in the summary;

(B) Names and appropriate methods to contact any traditional religious leaders that the Indian tribe or Native Hawaiian organization thinks should be consulted regarding the collections; and

(iii) Kinds of cultural items that the Indian tribe or Native Hawaiian organization considers to be sacred objects or objects of cultural patrimony.

(e) Museum and Federal agency officials must document the following information regarding unassociated funerary objects, sacred objects, and objects of cultural patrimony in their collections and must use this documentation in determining the individuals, Indian tribes, and Native Hawaiian organizations with which they are affiliated:

(1) Accession and catalogue entries;

(2) Information related to the acquisition of unassociated funerary object, sacred object, or object of cultural patrimony, including:

(i) the name of the person or organization from whom the object was obtained, if known;

(ii) The date of acquisition,

(iii) The place each object was acquired, i.e., name or number of site, county, state, and Federal agency administrative unit, if applicable; and

(iv) The means of acquisition, i.e., gift, purchase, or excavation;

(3) A description of each unassociated funerary object, sacred object, or object of cultural patrimony, including dimensions, materials, and photographic documentation, if appropriate, and the antiquity of such objects, if known;

(4) A summary of the evidence used to determine the cultural affiliation of the unassociated funerary objects, sacred objects, or objects of cultural patrimony pursuant to § 10.14 of these regulations.

(f) Notification. Repatriation of unassociated funerary objects, sacred objects, or objects of cultural patrimony to lineal descendants, culturally affiliated Indian tribes, or Native Hawaiian organizations as determined pursuant to § 10.10 (a), must not proceed prior to submission of a notice of intent to repatriate to the Departmental Consulting Archeologist, and publication of the notice of intent to repatriate in the **Federal Register**. The notice of intent to repatriate must describe the unassociated funerary objects, sacred objects, or objects of cultural patrimony being claimed in sufficient detail so as to enable other individuals, Indian tribes or Native Hawaiian organizations to determine their interest in the claimed objects. It must include information that identifies each claimed unassociated funerary object, sacred object, or object of cultural patrimony and the circumstances surrounding its acquisition, and describes the objects that are clearly identifiable as to cultural affiliation. It must also describe the objects that are not clearly identifiable as being culturally affiliated with a particular Indian tribe or Native Hawaiian organization, but which, given the totality of circumstances surrounding acquisition of the objects, are likely to be culturally affiliated with a particular Indian tribe or Native Hawaiian organization. The Departmental Consulting Archeologist must publish the notice of intent to repatriate in the **Federal Register**. Repatriation may not occur until at least thirty (30) days after publication of the notice of intent to repatriate in the Federal Register.

§ 10.9 Inventories.

(a) *General.* This section carries out section 5 of the Act. Under section 5 of the Act, each museum or Federal agency that has possession or control over holdings or collections of human remains and associated funerary objects must compile an inventory of such objects, and, to the fullest extent possible based on information possessed by the museum or Federal agency, must identify the geographical and cultural affiliation of each item. The purpose of the inventory is to facilitate repatriation by providing clear descriptions of human remains and associated funerary objects and establishing the cultural affiliation between these objects and present-day Indian tribes and Native Hawaiian organizations. Museums and Federal agencies are encouraged to produce inventories first on those portions of their collections for which information is readily available or about which Indian tribes or Native Hawaiian organizations have expressed special interest. Early focus on these parts of collections will result in determinations that may serve as models for other inventories. Federal agencies must ensure that these requirements are met for all collections from their lands or generated by their actions whether the collections are held by the Federal agency or by a non-Federal institution.

(b) *Consultation*—(1) *Consulting parties.* Museum and Federal agency officials must consult with:

(i) Lineal descendants of individuals whose remains and associated funerary objects are likely to be subject to the inventory provisions of these regulations; and

(ii) Indian tribe officials and traditional religious leaders:

(A) From whose tribal lands the human remains and associated funerary objects originated;

(B) That are, or are likely to be, culturally affiliated with human remains and associated funerary objects; and

(C) From whose aboriginal lands the human remains and associated funerary objects originated.

(2) *Initiation of consultation.* Museum and Federal agency officials must begin inventory consultation as early as possible, no later in the inventory process than the time at which investigation into the cultural affiliation of human remains and associated funerary objects is being conducted. Consultation may be initiated with a letter, but should be followed up by telephone or face-to-face dialogue.

(3) *Provision of information.* During inventory consultation, museums and Federal agency officials must provide the following information in writing to lineal descendants, when known, and to officials and traditional religious leaders representing Indian tribes or Native Hawaiian organizations that are, or are likely to be, culturally affiliated with the human remains and associated funerary objects.

(i) A list of all Indian tribes and Native Hawaiian organizations that are, or have been, consulted regarding the particular human remains and associated funerary objects;

(ii) A general description of the conduct of the inventory;

(iii) The projected time frame for conducting the inventory; and

(iv) An indication that additional documentation used to identify cultural affiliation will be supplied upon request.

(4) *Requests for information.* During the inventory consultation, museum and Federal agency officials must request, as appropriate, the following information from Indian tribes and Native Hawaiian organizations that are, or are likely to be, culturally affiliated with their collections:

(i) Name and address of the Indian tribe official to act as representative in consultations related to particular human remains and associated funerary objects;

(ii) Recommendations on how the consultation process should be conducted, including:

(A) Names and appropriate methods to contact any lineal descendants of individuals whose remains and associated funerary objects are or are likely to be included in the inventory; and

(B) Names and appropriate methods to contact traditional religious leaders who should be consulted regarding the human remains and associated funerary objects.

(iii) Kinds of cultural objects that the Indian tribe or Native Hawaiian organization reasonably believes to have been made exclusively for burial purposes or to contain human remains of their ancestors.

(c) *Required information.* The following documentation must be included, if available, for all inventories completed by museum or Federal agency officials:

(1) Accession and catalogue entries, including the accession/catalogue entries of human remains with which funerary objects were associated;

(2) Information related to the acquisition of each object, including:

(i) the name of the person or organization from whom the object was obtained, if known;

(ii) The date of acquisition,

(iii) The place each object was acquired, i.e., name or number of site, county, state, and Federal agency administrative unit, if applicable; and

(iv) The means of acquisition, i.e., gift, purchase, or excavation;

(3) A description of each set of human remains or associated funerary object, including dimensions, materials, and, if appropriate, photographic documentation, and the antiquity of such human remains or associated funerary objects, if known;

(4) A summary of the evidence, including the results of consultation, used to determine the cultural affiliation of the human remains and associated funerary objects pursuant to § 10.14 of these regulations.

(d) *Documents.* Two separate documents comprise the inventory:

(1) A listing of all human remains and associated funerary objects that are identified as being culturally affiliated with one or more present-day Indian tribes or Native Hawaiian organizations. The list must indicate for each item or set of items whether cultural affiliation is clearly determined or likely based upon the preponderance of the evidence; and

(2) A listing of all culturally unidentifiable human remains and associated funerary objects for which no culturally affiliated present-day Indian tribe or Native Hawaiian organization can be determined.

(e) *Notification.* (1) If the inventory results in the identification or likely identification of the cultural affiliation of any particular human remains or associated funerary objects with one or more Indian tribes or Native Hawaiian organizations, the museum or Federal agency, not later than six (6) months after completion of the inventory, must send such Indian tribes or Native Hawaiian organizations the inventory of culturally affiliated human remains, including all information required

under § 10.9 (c), and a notice of inventory completion that summarizes the results of the inventory.

(2) The notice of inventory completion must summarize the contents of the inventory in sufficient detail so as to enable the recipients to determine their interest in claiming the inventoried items. It must identify each particular set of human remains or each associated funerary object and the circumstances surrounding its acquisition, describe the human remains or associated funerary objects that are clearly identifiable as to cultural affiliation, and describe the human remains and associated funerary objects that are not clearly identifiable as being culturally affiliated with an Indian tribe or Native Hawaiian organization, but which, given the totality of circumstances surrounding acquisition of the human remains or associated objects, are identified as likely to be culturally affiliated with a particular Indian tribe or Native Hawaiian organization.

(3) If the inventory results in a determination that the human remains are of an identifiable individual, the museum or Federal agency official must convey this information to the lineal descendant of the deceased individual, if known, and to the Indian tribe or Native Hawaiian organization of which the deceased individual was culturally affiliated.

(4) The notice of inventory completion and a copy of the inventory must also be sent to the Departmental Consulting Archeologist. These submissions should be sent in both printed hard copy and electronic formats. Information on the proper format for electronic submission and suggested alternatives for museums and Federal agencies unable to meet these requirements are available from the Departmental Consulting Archeologist.

(5) Upon request by an Indian tribe or Native Hawaiian organization that has received or should have received a notice of inventory completion and a copy of the inventory as described above, a museum or Federal agency must supply additional available documentation to supplement the information provided with the notice. For these purposes, the term documentation means a summary of existing museum or Federal agency records including inventories or catalogues, relevant studies, or other pertinent data for the limited purpose of determining the geographical origin, cultural affiliation, and basic facts surrounding the acquisition and accession of human remains and associated funerary objects.

(6) If the museum or Federal agency official determines that the museum or Federal agency has possession of or control over human remains that cannot be identified as affiliated with a particular individual, Indian tribes or Native Hawaiian organizations, the museum or Federal agency must provide the Department Consulting Archeologist notice of this result and a copy of the list of culturally unidentifiable human remains and associated funerary objects. The Departmental Consulting Archeologist must make this information available to members of the Review Committee. Section 10.11 of these regulations will set forth procedures for disposition of culturally unidentifiable human remains of Native American origin. Museums or Federal agencies must retain possession of such human remains pending promulgation of § 10.11 unless legally required to do otherwise, or recommended to do otherwise by the Secretary. Recommendations regarding the disposition of culturally unidentifiable human remains may be requested prior to final promulgation of § 10.11.

(7) The Departmental Consulting Archeologist must publish notices of inventory completion received from museums and Federal agencies in the **Federal Register**.

(f) *Completion.* Inventories must be completed not later than November 16, 1995. Any museum that has made a good faith effort to complete its inventory, but which will be unable to complete the process by this deadline, may request an extension of the time requirements from the Secretary. An indication of good faith efforts must include, but not necessarily be limited to, the initiation of active consultation and documentation regarding the collections and the development of a written plan to carry out the inventory process. Minimum components of an inventory plan are: a definition of the steps required; the position titles of the persons responsible for each step; a schedule for carrying out the plan; and a proposal to obtain the requisite funding.

§ 10.10 Repatriation.

(a) *Unassociated funerary objects, sacred objects, and objects of cultural patrimony*—(1) *Criteria.* Upon the request of a lineal descendant, Indian tribe, or Native Hawaiian organization, a museum or Federal agency must expeditiously repatriate unassociated funerary objects, sacred objects, or objects of cultural patrimony if all the following criteria are met:

(i) The object meets the definitions established in § 10.2 (b) (4), (5) or (6); and

(ii) The cultural affiliation of the object is established:

(A) through the summary, consultation, and notification procedures in § 10.14 of these regulations; or

(B) by presentation of a preponderance of the evidence by a requesting Indian tribe or Native Hawaiian organization pursuant to section 7(c) of the Act; and

(iii) The known lineal descendant or culturally affiliated Indian tribe or Native Hawaiian organization presents evidence which, if standing alone before the introduction of evidence to the contrary, would support a finding that the museum or Federal agency does not have a right of possession to the objects as defined in § 10.10 (a)(2); and

(iv) The agency or museum is unable to present evidence to the contrary proving that it does have a right of possession as defined below; and

(v) None of the specific exceptions listed in § 10.10 (c) apply.

(2) *Right of possession.* For purposes of this section, "right of possession" means possession obtained with the voluntary consent of an individual or group that had authority of alienation. The original acquisition of a Native American unassociated funerary object, sacred object, or object of cultural patrimony from an Indian tribe or Native Hawaiian organization with the voluntary consent of an individual or group with authority to alienate such object is deemed to give right of possession to that object.

(3) *Notification.* Repatriation must take place within ninety (90) days of receipt of a written request for repatriation that satisfies the requirements of § 10.10 (a)(1) from a culturally affiliated Indian tribe or Native Hawaiian organization, provided that the repatriation may not occur until at least thirty (30) days after publication of the notice of intent to repatriate in the **Federal Register** as described in § 10.8.

(b) *Human remains and associated funerary objects*—(1) *Criteria.* Upon the request of a lineal descendant, Indian tribe, or Native Hawaiian organization, a museum and Federal agency must expeditiously repatriate human remains and associated funerary objects if all of the following criteria are met:

(i) The human remains or associated funerary object meets the definitions established in § 10.2 (b)(1) or (b)(3); and

(ii) The affiliation of the deceased individual to known lineal descendant, present day Indian tribe, or Native Hawaiian organization:

(A) has been reasonably traced through the procedures outlined in § 10.9 and § 10.14 of these regulations; or

(B) has been shown by a preponderance of the evidence presented by a requesting Indian tribe or Native Hawaiian organization pursuant to section 7(c) of the Act; and

(iii) None of the specific exceptions listed in § 10.10 (c) apply.

(2) *Notification.* Repatriation must take place within ninety (90) days of receipt of a written request for repatriation that satisfies the requirements of § 10.10 (b)(1) from the culturally affiliated Indian tribe or Native Hawaiian organization, provided that the repatriation may not occur until at least thirty (30) days after publication of the notice of inventory completion in the **Federal Register** as described in § 10.9.

(c) *Exceptions.* These requirements for repatriation do not apply to:

(1) Circumstances where human remains, funerary objects, sacred objects, or objects of cultural patrimony are indispensable to the completion of a specific scientific study, the outcome of which is of major benefit to the United States. Human remains, funerary objects, sacred objects, or objects of cultural patrimony in such circumstances must be returned no later than ninety (90) days after completion of the study; or

(2) Circumstances where there are multiple requests for repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony and the museum or Federal agency, after complying with these regulations, cannot determine by a preponderance of the evidence which requesting party is the most appropriate claimant. In such circumstances, the museum or Federal agency may retain the human remains, funerary objects, sacred objects, or objects of cultural patrimony until such time as the requesting parties mutually agree upon the appropriate recipient or the dispute is otherwise resolved pursuant to these regulations or as ordered by a court of competent jurisdiction; or

(3) Circumstances where a court of competent jurisdiction has determined that the repatriation of the human remains, funerary objects, sacred objects, or objects of cultural patrimony in the possession or control of a museum would result in a taking of property without just compensation within the meaning of the Fifth Amendment of the United States Constitution, in which event the custody of the objects must be as provided under otherwise applicable law. Nothing in these regulations must prevent a museum or Federal agency, where otherwise so authorized, or a lineal descendant, Indian tribe, or Native Hawaiian organization, from expressly relinquishing title to, right of possession of, or control over any human remains, funerary objects, sacred objects, or objects of cultural patrimony.

(4) Circumstances where the repatriation is not consistent with other repatriation limitations identified in § 10.15 of these regulations.

(d) *Place and manner of repatriation.* The repatriation of human remains, funerary objects, sacred objects, or objects of cultural patrimony must be accomplished by the museum or Federal agency in consultation with the requesting lineal descendants, or culturally affiliated Indian tribe or Native Hawaiian organization, as appropriate, to determine the place and manner of the repatriation.

(e) The museum official or Federal agency official must inform the recipients of repatriations of any presently known treatment of the human remains, funerary objects, sacred objects, or objects of cultural patrimony with pesticides, preservatives, or other substances that represent a potential hazard to the objects or to persons handling the objects.

(f) *Record of repatriation.* (1) Museums and Federal agencies must adopt internal procedures adequate to permanently document the content and recipients of all repatriations.

(2) The museum official or Federal agency official, at the request of the Indian tribe official, may take such steps as are considered necessary pursuant to otherwise applicable law, to ensure that information of a particularly sensitive nature is not made available to the general public.

(g) *Culturally unidentifiable human remains.* If the cultural affiliation of human remains cannot be established pursuant to these regulations, the human remains must be considered culturally unidentifiable. Museum and Federal agency officials must report the inventory information regarding such human remains in their holdings to the Departmental Consulting Archeologist who will transmit this information to the Review Committee. The Review Committee is responsible for compiling an inventory of culturally unidentifiable human remains in the possession or control of each museum and Federal agency, and, for recommending to the Secretary specific actions for disposition of such human remains.

§ 10.11 Disposition of culturally unidentifiable human remains. [Reserved]

§ 10.12 Civil penalties. [Reserved]

§ 10.13 Future applicability. [Reserved]

Subpart D—General

§ 10.14 Lineal descent and cultural affiliation.

(a) *General.* This section identifies procedures for determining lineal descent and cultural affiliation between present-day individuals and Indian tribes or Native Hawaiian organizations and human remains, funerary objects, sacred objects, or objects of cultural patrimony in museum or Federal agency collections or excavated intentionally or discovered inadvertently from Federal lands. They may also be used by Indian tribes and Native Hawaiian organizations with respect to tribal lands.

(b) *Criteria for determining lineal descent.* A lineal descendant is an individual tracing his or her ancestry directly and without interruption by means of the traditional kinship system of the appropriate Indian tribe or Native Hawaiian organization or by the common law system of descendence to a known Native American individual whose remains, funerary objects, or sacred objects are being requested under these regulations. This standard requires that the earlier person be identified as an individual whose descendants can be traced.

(c) *Criteria for determining cultural affiliation.* Cultural affiliation means a relationship of shared group identity that may be reasonably traced historically or prehistorically between a present-day Indian tribe or Native Hawaiian organization and an identifiable earlier group. All of the following requirements must be met to determine cultural affiliation between a present-day Indian tribe or Native Hawaiian organization and the human remains, funerary objects, sacred objects, or objects of cultural patrimony of an earlier group:

(1) Existence of an identifiable present-day Indian tribe or Native Hawaiian organization with standing under these regulations and the Act; and

(2) Evidence of the existence of an identifiable earlier group. Support for this requirement may include, but is not necessarily limited to evidence sufficient to:

(i) Establish the identity and cultural characteristics of the earlier group,

(ii) Document distinct patterns of material culture manufacture and distribution methods for the earlier group, or

(iii) Establish the existence of the earlier group as a biologically distinct population; and

(3) Evidence of the existence of a shared group identity that can be reasonably traced between the present-day Indian tribe or Native Hawaiian organization and the earlier group. Evidence to support this requirement must establish that a present-day Indian tribe or Native Hawaiian organization has been identified from prehistoric or historic times to the present as descending from the earlier group.

(d) A finding of cultural affiliation should be based upon an overall evaluation of the totality of the circumstances and evidence pertaining to the connection between the claimant and the material being claimed and should not be precluded solely because of some gaps in the record.

(e) *Evidence.* Evidence of a kin or cultural affiliation between a present-day individual, Indian tribe, or Native Hawaiian organization and human remains, funerary objects, sacred objects, or objects of cultural patrimony must be established by using the following types of evidence: Geographical, kinship, biological, archeological, anthropological, linguistic, folklore, oral tradition, historical, or other relevant information or expert opinion.

(f) *Standard of proof.* Lineal descent of a present-day individual from an earlier individual and cultural affiliation of a present-day Indian tribe or Native Hawaiian organization to human remains, funerary objects, sacred objects, or objects of cultural patrimony must be established by a preponderance of the evidence. Claimants do not have to establish cultural affiliation with scientific certainty.

§ 10.15 Repatriation limitations and remedies.

(a) *Failure to claim prior to repatriation.* (1) Any person who fails to make a timely claim prior to the repatriation or transfer of human remains, funerary objects, sacred objects, or objects of cultural patrimony is deemed to have irrevocably waived any right to claim such items pursuant to these regulations or the Act. For these purposes, a "timely claim" means the filing of a written claim with a responsible museum or Federal agency official prior to the time the particular human remains, funerary objects, sacred objects, or objects of cultural patrimony at issue are duly repatriated or disposed of to a claimant by a museum or Federal agency pursuant to these regulations.

(2) If there is more than one (1) claimant, the human remains, funerary object, sacred object, or objects of cultural patrimony may be held by the responsible museum or Federal agency or person having custody thereof pending resolution of the claim. Any person who has custody of such human remains, funerary objects, sacred objects, or objects of cultural patrimony and does not claim entitlement to them must place the objects in the custody of the responsible museum or Federal agency for retention until the question of custody is resolved.

(b) *Failure to claim where no repatriation or disposition has occurred. [Reserved]*

(c) *Exhaustion of remedies.* No person is considered to have exhausted his or her administrative remedies with respect to the repatriation or disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony subject to subpart B of these regulations, or, with respect to Federal lands, subpart C of these regulations, until such time as the person has filed a written claim for repatriation or disposition of the objects with the responsible museum or Federal agency and the claim has been duly denied following these regulations.

(d) *Savings provisions.* Nothing in these regulations can be construed to:

(1) Limit the authority of any museum or Federal agency to:

(i) Return or repatriate human remains, funerary objects, sacred objects, or objects of cultural patrimony to Indian tribes, Native Hawaiian organizations, or individuals; and

(ii) Enter into any other agreement with the consent of the culturally affiliated Indian tribe or Native Hawaiian organization as to the disposition of, or control over, human remains, funerary objects, sacred objects, or objects of cultural patrimony.

(2) Delay actions on repatriation requests that were pending on November 16, 1990;

(3) Deny or otherwise affect access to court;

(4) Limit any procedural or substantive right which may otherwise be secured to individuals or Indian tribes or Native Hawaiian organizations; or

(5) Limit the application of any State or Federal law pertaining to theft of stolen property.

§ 10.16 Review committee.

(a) *General.* The Review Committee will advise Congress and the Secretary on matters relating to these regulations and the Act, including, but not limited to, monitoring the performance of museums and Federal agencies in carrying out their responsibilities, facilitating and making recommendations on the resolution of disputes as described further in § 10.17, and compiling a record of culturally unidentifiable human remains that are in the possession or control of museums and Federal agencies and recommending actions for their disposition.

(b) *Recommendations.* Any recommendation, finding, report, or other action of the Review Committee is advisory only and not binding on any person. Any records and findings made by the Review Committee may be admissible as evidence in actions brought by persons alleging a violation of the Act.

§ 10.17 Dispute resolution.

(a) *Formal and informal resolutions.* Any person who wishes to contest actions taken by museums, Federal agencies, Indian tribes, or Native Hawaiian organizations with respect to the repatriation and disposition of human remains, funerary objects, sacred objects, or objects of cultural patrimony is encouraged to do so through informal negotiations to achieve a fair resolution of the matter. The Review Committee may aid in this regard as described below. In addition, the United States District Courts have jurisdiction over any action brought that alleges a violation of the Act.

(b) *Review Committee Role.* The Review Committee may facilitate the informal resolution of disputes relating to these regulations among interested parties that are not resolved by good faith negotiations. Review Committee actions may include convening meetings between parties to disputes, making advisory findings as to contested facts, and making recommendations to the disputing parties or to the Secretary as to the proper resolution of disputes consistent with these regulations and the Act.

Appendix A to Part 10—Sample Summary

The following is a generic sample and should be used as a guideline for preparation of summaries tailoring the information to the specific circumstances of each case.

Before November 17, 1993
Chairman or Other Authorized Official
Indian tribe or Native Hawaiian organization
Street
State
Dear Sir/Madame Chair:

I write to inform you of collections held by our museum which may contain unassociated funerary objects, sacred objects, or objects of cultural patrimony that are, or are likely to be, culturally affiliated with your Indian tribe or Native Hawaiian organization. This notification is required by section 6 of the Native American Graves Protection and Repatriation Act.

Our ethnographic collection includes approximately 200 items specifically identified as being manufactured or used by members of your Indian tribe or Native Hawaiian organization. These items represent various categories of material culture, including sea and land hunting, fishing, tools, household equipment, clothing, travel and transportation, personal adornment, smoking, toys, and figurines. The collection includes thirteen objects identified in our records as "medicine bags."

Approximately half of these items were collected by John Doe during his expedition to your reservation in 1903 and accessioned by the museum that same year (see Major Museum Publication, no. 65 (1965).

Another 50 of these items were collected by Jane Roe during her expeditions to your reservation between 1950–1960 and accessioned by the museum in 1970 (see Major Museum: no. 75 (1975). Accession information indicates that several of these items were collected from members of the Able and Baker families.

For the remaining approximately 50 items, which were obtained from various collectors between 1930 and 1980, additional collection information is not readily available.

In addition to the above mentioned items, the museum has approximately 50 ethnographic items obtained from the estate of a private collector and identified as being collected from the "northwest portion of the State."

Our archeological collection includes approximately 1,500 items recovered from ten archeological sites on your reservation and another 5,000 items from fifteen sites within the area recognized by the Indian Claims Commission as being part of your Indian tribe's aboriginal territory.

Please feel free to contact Fred Poe at (012) 345–6789 regarding the identification and potential repatriation of unassociated funerary objects, sacred objects, or objects of cultural patrimony in this collection that are, or are likely to be, culturally affiliated with your Indian tribe or Native Hawaiian organization. You are invited to review our records, catalogues, relevant studies or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these items. We look forward to working together with you.

Sincerely,
Museum Official
Major Museum

Appendix B to Part 10—Sample Notice of Inventory Completion

The following is an example of a Notice of Inventory Completion published in the **Federal Register**.

National Park Service
Notice of Inventory Completion for Native American Human Remains and Associated Funerary Objects from Hancock County, ME, in the Control of the National Park Service.

AGENCY: National Park Service, Interior.

ACTION: Notice.

Notice is hereby given following provisions of the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003(d), of completion of the inventory of human remains and associated funerary objects from a site in Hancock County, ME, that are presently in the control of the National Park Service.

A detailed inventory and assessment of these human remains has been made by National Park Service curatorial staff, contracted specialists in physical anthropology and prehistoric archeology, and representatives of the Penobscot Nation, Aroostook Band of Micmac, Houlton Band of Maliseet, and the Passamaquoddy Nation, identified collectively hereafter as the Wabanaki Tribes of Maine.

The partial remains of at least seven individuals (including five adults, one subadult, and one child) were recovered in 1977 from a single grave at the Fernald Point Site (ME Site 43–24), a prehistoric shell midden on Mount Desert Island, within the boundary of Acadia National Park. A bone harpoon head, a modified beaver tooth, and several animal and fish bone fragments were found associated with the eight individuals. Radiocarbon assays indicate the burial site dates between 1035–1155 AD. The human remains and associated funerary objects have been catalogued as ACAD–5747, 5749, 5750, 5751, 5752, 5783, 5784. The partial remains of an eighth individual (an elderly male) was also recovered in 1977 from a second grave at the Fernald Point Site. No associated funerary objects were recovered with this individual. Radiocarbon assays indicate the second burial site dates between 480–680 AD. The human remains have been catalogued as ACAD–5748. The human remains and associated funerary objects of all nine individuals are currently in the possession of the University of Maine, Orono, ME.

Inventory of the human remains and associated funerary objects and review of the accompanying documentation indicates that no known individuals were identifiable. A representative of the Wabanaki Tribes of Maine has identified the Acadia National Park area as a historic gathering place for his people and stated his belief that there exists a relationship of shared group identity between these individuals and the Wabanaki Tribes of Maine. The Prehistoric Subcommittee of the Maine State Historic Preservation Office's Archaeological Advisory Committee has found it reasonable to trace a shared group identity from the Late Prehistoric Period (1000–1500 AD) inhabitants of Maine as an undivided whole to the four modern Indian tribes known collectively as the Wabanaki Tribes of Maine on the basis of geographic proximity; survivals of stone, ceramic and perishable material culture skills; and probable linguistic continuity across the Late Prehistoric/Contact Period boundary. In a 1979 article, Dr. David Sanger, the archeologist who conducted the 1977 excavations at the Fernald Point Site and uncovered the abovementioned burials, recognizes a relationship between Maine sites dating to the Ceramic Period (2,000 B.P.–1600 A.D.) and present-day Algonkian speakers generally known as Abenakis, including the Micmac, Maliseet, Passamaquoddy, Penboscot, Kennebec, and Pennacook groups.

Based on the above mentioned information, officials of the National Park Service have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity which can be reasonably traced between these human remains and associated funerary objects and the Wabanaki Tribes of Maine.

This notice has been sent to officials of the Wabanaki Tribes of Maine. Representatives of any other Indian tribe which believes itself to be culturally affiliated with these human remains and associated funerary objects should contact Len Bobinchock, Acting Superintendent, Acadia National Park, P.O. Box 177, Bar Harbor, ME 04609, telephone: (207) 288–0374, before August 31, 1994. Repatriation of these human remains and associated funerary objects to the Wabanaki Tribes of Maine may begin after that date if no additional claimants come forward.

Dated: July 21, 1994

Francis P. McManamon,
Departmental Consulting Archeologist, Chief, Archeological Assistance Division.

Part III

Department of Agriculture

Agricultural Marketing Service

7 CFR Part 29, et al.
Removal of U.S. Grade Standards and Other Selected Regulations; Interim Final Rule

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 29, 31, 32, 51, 52, 53, 54, 56, 58, 70, and 160

[Docket Number FV–95–303]

Removal of U.S. Grade Standards and Other Selected Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule will remove most of the voluntary U.S. grade standards and other selected regulations covering a number of agricultural commodities (dairy products, tobacco, wool, mohair, fresh and processed fruits and vegetables, livestock, meats and meat products, eggs, and poultry and rabbit products) from the Code of Federal Regulations (CFR). These are an accumulation of regulations which have been developed for more than 75 years to facilitate the marketing of agricultural commodities by providing a uniform language which may be used to describe the quality of various agricultural commodities as valued in the marketplace. The voluntary standards and all subsequent revisions or new standards will be made available in a separate publication, except for wool and mohair standards. These standards and related regulations will be removed from the CFR and will no longer be available since there is no demand for services pertaining to wool or mohair. This regulatory action is being taken as part of the National Performance Review program to eliminate unnecessary regulations and improve those that remain in force.

In carrying out this responsibility, the Administrator of the Agricultural Marketing Service (AMS), will ensure that proposed, new or revised voluntary standards will appear in the "Notices" section of the **Federal Register** and that the public will have an opportunity to comment. AMS will maintain the existing numbering system in the voluntary standards. The standards for the various commodities will continue to be administered by each commodity division within AMS.

EFFECTIVE DATE: December 4, 1995. Comments must be received by February 2, 1996.

ADDRESSES: Interested persons are invited to submit written comments concerning this interim final rule. Comments must be submitted in duplicate, signed, include the address of the sender, and should bear reference to the date and page number of this issue of the **Federal Register**. Commentors are encouraged to include definitive information which explains and supports the sender's views. Written comments may be mailed to Eric Forman, Deputy Director, Fruit and Vegetable Division, USDA, AMS, Room 2085–S, P.O. Box 96456, Washington, DC 20090–6456.

Comments will be available for public inspection during regular business hours in Room 2085–South Building; 14th Street and Independence Avenue SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Eric Forman (202) 690–0262.

SUPPLEMENTARY INFORMATION: This regulatory action is being taken as part of the National Performance Review program to eliminate unnecessary regulations and improve those that remain in force.

Executive Order 12866

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

Executive Order 12778

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is not intended to have preemptive effect with respect to any State or local laws, regulations, or policies unless they present an irreconcilable conflict with this rule. This rule is not intended to have retroactive effect. There are no administrative procedures which must be exhausted prior to any judicial challenge to this rule or the application of its provisions.

Effect on Small Entities

This action was reviewed under the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*). The Administrator of (AMS) has determined that this action will not have a significant economic impact on a substantial number of small entities. Although this action will remove provisions from the CFR, small entities should see no changes as the standards will be administered under the direction of the Administrator to ensure public input to their formulation and convenient availability to those who want copies of the standards.

Paperwork Reduction Act

In accordance with the provisions of the Paperwork Reduction Act, the information collection requirements contained in the provisions to be amended have been previously approved by the Office of Management and Budget.

Background

The Secretary of Agriculture is authorized under various statutes to provide Federal grading/certification services and to develop and establish efficient marketing methods and practices of agricultural commodities. The ultimate goal being to facilitate the efficient marketing of agricultural commodities and enable consumers to obtain the quality of products they desire at a reasonable cost. For more than 75 years, AMS has facilitated the marketing of agricultural commodities by developing official U.S. grade standards which provide a uniform language that may be used to describe the characteristics of more than 450 commodities as valued by the marketplace. These standards are widely used in private contracts, government procurement, marketing communication and, for some commodities, consumer information.

Although use of most of the U.S. standards is voluntary, they have through the years been promulgated as regulations and codified in the CFR. Rapid changes in consumer preferences, together with associated changes in commodity characteristics, processing technology, and marketing practices have outpaced the revision or issuance of regulations. As a result, industry and the marketplace have been in some instances burdened with outdated trading language. The President's regulatory review initiative has provided the impetus to develop new approaches to meet more effectively the needs of U.S. industry, government agencies, and consumers and still reduce the regulatory burden. To meet this initiative, regulations that are currently in the CFR which could be administered under the authority of AMS are being removed from the CFR. With respect to the official grade standards, this includes all the standards except those which are currently in the rulemaking process, incorporated by reference in marketing orders/agreements appearing at 7 CFR Parts 900 through 999, or those used to implement government price support. Those grade standard regulations will continue to appear in the CFR, although the text will also be available as AMS standards along with all other grade standards, except for wool and mohair standards. These standards and related regulations will be removed from the CFR and will no longer be available since there is no demand for services pertaining to wool or mohair.

This rule eliminates selected regulations which encompass approximately 1,200 pages of the CFR covering: Standards for dairy products; tobacco standards; wool standards; mohair standards; U.S. and consumer standards for fresh fruits, vegetables, nuts and other special products; uniform grade nomenclature; specifications for the classification of damaged or repaired packages of fresh fruits and vegetable; standards for inspection of variables; standards for determination of fill weights; standards for processed fruits and vegetables and related products; livestock, meats, prepared meats and meat products; standards for grades and weight classes for shell eggs; classes, standards and grades for poultry products and rabbit products; and, standards for naval stores.

Separated by Division, the following is an outline of those standards or other regulations being removed from the CFR, those that will remain in the CFR and the reason they are not being removed.

Administered by the Tobacco Division

7 Part 29	Tobacco Inspection
	Standards Being Removed From CFR
CFR Section	**Title**
29.3251–3401	Official Standard Grades for Maryland Broadleaf Tobacco.
29.4251–4391	Official Standard Grades for Pennsylvania Seedleaf Tobacco.
29.4501–4656	Official Standard Grades for Ohio Cigar-Leaf Tobacco.
29.5251–5386	Official Standard Grades for Puerto Rican Cigar-Filler Tobacco.
29.5501–5656	Official Standard Grades for Connecticut Valley Cigar-Binder Tobacco.
29.6001–6161	Official Standard Grades for Wisconsin Cigar-Binder Tobacco.
29.6251–6411	Official Standard Grades for Connecticut Valley Shade-Grown Cigar-Wrapper Tobacco.
29.6501–6661	Official Standard Grades for Georgia and Florida Shade-Grown Cigar-Wrapper Tobacco.
	Standards Being Retained in CFR Because They are Currently Referenced in Government Price Support Programs
29.1001–1225	Official Standard Grades for Flue-Cured Tobacco.
29.2251–2481	Official Standard Grades for Virginia Fire-Cured Tobacco.
29.2501–2696	Official Standard Grades for Kentucky and Tennessee Fire-Cured and Foreign-Grown Fire-Cured Tobacco.
29.3001–3182	Official Standard Grades for Burley Tobacco.
29.3501–3686	Official Standard Grades for Dark Air-Cured Tobacco.
7 CFR 160	Regulations and Standards For Naval Stores.
	Standards Being Removed From CFR
CFR Section	**Title**
160.301–305	Standards
	Appendix A to Part 160—Standard Specifications for Spirits of Turpentine.
	Appendix B to Part 160—Colorimetric Specifications for U.S. Rosin Standards (Master Cubes XA, XB, and XC).

Administered by the Livestock and Seed Division

7 Part 31	Wool Standards.
	Standards Being Removed From the CFR
31.0–16	Official Standards of the United States for grades of wool.
31.100–116	Official Standards of the United States for grades of wool top.
31.200–201	Definitions.
31.202–204	Methods for determining Grade of Wool.
31.300–302	Methods for determining grade of wool top.
31.400–402	Samples representative of official grade standards of the United States for wool and wool top.
7 Part 32	Mohair Standards.
32.1	Official Standards of the United States for grades of grease mohair.
32.100	Official Standards of the United States for grades of mohair top.
32.200–201	Definitions.
32.202–205	Methods for determining grade of grease mohair.
32.300–302	Methods for determining grade of mohair top.
32.400–403	Samples representative of official grade standards of the United States for grease mohair.
7 Part 53	Livestock (Grading, Certification, and Standards).
	Subpart B—Standards.
53.120–124	Vealers and slaughter calves.
53.130–136	Slaughter lambs, yearlings, and sheep.
53.150–159	Swine.
53.208–212	Cattle.
7 Part 54	Meats, Prepared Meats, and Meat Products (Grading, Certification, and Standards).
	Subpart B— Standards.
54.112–117	Veal and calf carcasses.
54.121–127	Lamb, yearling mutton, and mutton carcasses.
54.131–137	Pork carcasses.
	Regulations Being Retained in CFR Because They Provide Operational Regulations.
7 Part 53	Livestock (Grading, Certification, and Standards).
	Subpart A—Regulations.
53.1–53.2	Definitions.
53.3	Administration.
53.4–17	Service.

53.18–19	Charges for Service.
53.20–21	Miscellaneous.
7 Part 54	Meats, Prepared Meats, and Meat Products (Grading, Certification, and Standards).
	Subpart A—Regulations.
54.1–2	Definitions.
54.3	Administration.
54.4–18	Service.
54.19–26	Appeal service.
54.27–28	Charges for service.
54.29–31	Miscellaneous.

Standards Being Temporarily Retained in the CFR Because They Are Currently in Rulemaking

7 Part 53	Livestock (Grading, Certification, and Standards).
	Subpart B—Standards
53.201–206	Cattle
7 Part 54	Meats, Prepared Meats, and Meat Products (Grading, Certification, and Standards).
	Subpart B—Standards.
54.102–107	Carcass beef.

Administered by the Poultry Division

7 Part 56	Grading of Shell Eggs and U.S. Standards, Grades, and Weight Classes for Shell Eggs

Standards Being Removed From CFR

CFR Section	Title
	Subpart B—(Reserved)
56.200–234	Subpart C—United States Standards, Grades, and Weight Classes for Shell Eggs.
	Regulations Being Retained in CFR Because They Provide Operational Regulations, etc.
56.1–177	Subpart A—Grading of Shell Eggs.
7 Part 70	Voluntary Grading of Poultry Products and Rabbit Products and U.S. Classes, Standards, and Grades.

Standards Being Removed From CFR

CFR Section	Title
70.200–271	Subpart B—United States Classes, Standards, and Grades for Poultry.
70.300–332	Subpart C—United States Classes, Standards, and Grades for Rabbits.
	Regulations Being Retained in CFR Because They Provide Operational Regulations.
70.1–110	Subpart A—Grading of Poultry Products and Rabbit Products.

Administered by the Fresh Products Branch, Fruit and Vegetable Division

7 Part 51	Fresh Fruits, Vegetables and Other Products (Inspection, Certification, and Standards)

Standards Being Removed From CFR

51.100–299	Subpart—United States Standards for Grades of Fresh Fruits, Vegetables, Nuts and Other Special Products Uniform Grade Nomenclature.
51.300–339	Subpart—United States Standards for Grades of Apples.
51.340–354	Subpart—United States Standards for Grades of Apples for Processing.
51.355–374	Subpart—United States Standards for Fresh Shelled Lima Beans for Processing.
51.375–399	Subpart—United States Standards for Beets.
51.400–424	Subpart—United States Consumer Standards for Italian Sprouting Broccoli.
51.425–449	Subpart—United States Standards for Broccoli for Processing.
51.450–474	Subpart—United States Standards for Cabbage.
51.495–519	Subpart—United States Consumer Standards for Fresh Carrots.
51.520–539	Subpart—United States Standards for Collard Greens or Broccoli Greens.
51.540–559	Subpart—United States Standards for Cauliflower.
51.810–834	Subpart—United States Consumer Standards for Husked Corn on the Cob.
51.835–859	Subpart—United States Standards for Grades of Sweet Corn.
51.860–879	Subpart—United States Standards for Berries for Processing.
51.925–974	Subpart—United States Standards for Grapefruit (California and Arizona).
51.975–999	Subpart—United States Consumer Standards for Fresh Kale.
51.1030–1054	Subpart—United States Standards for Mustard Greens and Turnip Greens.
51.1055–1084	Subpart—United States Standards for Common Green Onions.
51.1085–1139	Subpart—United States Standards for Oranges (California and Arizona).
51.1345–1374	Subpart—United States Standards for Pears for Canning.
51.1375–1399	Subpart—United States Standards for Fresh Peas.
51.1465–1484	Subpart—United States Standards for Sweet Peppers for Processing.
51.1485–1519	Subpart—United States Standards for Grades of Pineapples.
51.1600–1629	Subpart—United States Standards for Grades of Sweetpotatoes.
51.1630–1659	Subpart—United States Standards for Shallots (Bunched).
51.1660–1684	Subpart—United States Standards for Sweetpotatoes for Canning or Freezing.
51.1685–1709	Subpart—United States Standards for Sweetpotatoes for Dicing or Pulping.
51.1710–1729	Subpart—United States Standards for Raspberries for Processing.
51.1730–1749	Subpart—United States Standards for Spinach Leaves (Fresh).
51.1750–1769	Subpart—United States Consumer Standards for Fresh Spinach Leaves.
51.1770–1809	Subpart—United States Standards for Tangerines.

51.1930–1949	Subpart—United States Standards for Green Tomatoes for Processing.
51.1950–1969	Subpart—United States Standards for Currants for Processing.
51.1970–1994	Subpart—United States Standards for Grades of Watermelons.
51.2025–2049	Subpart—United States Standards for Blueberries for Processing.
51.2050–2074	Subpart—United States Consumer Standards for Brussels Sprouts.
51.2150–2189	Subpart—United States Standards for Grades of Grapes for Processing and Freezing.
51.2190–2219	Subpart—United States Standards for Eggplant.
51.2220–2249	Subpart—United States Standards for Cucumbers.
51.2250–2274	Subpart—United States Standards for Brussels Sprouts.
51.2310–2334	Subpart—United States Consumer Standards for Fresh Parsnips.
51.2360–2394	Subpart—United States Standards for Grades of Topped Carrots.
51.2395–2424	Subpart—United States Standards for Grades of Radishes.
51.2425–2454	Subpart—United States Consumer Standards for Fresh Turnips.
51.2455–2484	Subpart—United States Standards for Bunched Carrots.
51.2485–2509	Subpart—United States Standards for Carrots With Short Trimmed Tops.
51.2510–2539	Subpart—United States Standards for Grades of Lettuce.
51.2585–2609	Subpart—United States Standards for Dandelion Greens.
51.2610–2645	Subpart—United States Standards for Turnips or Rutabagas.
51.2670–2695	Subpart—United States Standards for Southern Peas.
51.2696–2709	Subpart—United States Standards for Spinach for Processing.
51.2775–2794	Subpart—United States Consumer Standards for Fresh Cranberries.
51.2795–2829	Subpart—United States Standards for Grades of Lemons.
51.2860–2879	Subpart—United States Standards for Beet Greens.
51.2880–2890	Subpart—United States Standards for Spinach Plants.
51.2891–2899	Subpart—United States Standards for Grades of Bunched Spinach.
51.2900–2924	Subpart—United States Standards for Grades of Sweet Anise.
51.2976–2999	Subpart—United States Standards for Italian Type Tomatoes for Canning.
51.3000–3029	Subpart—United States Standards for Seed Potatoes.
51.3030–3049	Subpart—United States Standards for Fresh Cranberries for Processing.
51.3085–3114	Subpart—United States Standards for Grades of Christmas Trees.
51.3115–3144	Subpart—United States Standards for Grades of Strawberries.
51.3170–3194	Subpart—United States Consumer Standards for Beet Greens.
51.3220–3239	Subpart—United States Standards for Cauliflower for Processing.
51.3240–3269	Subpart—United States Standards for Snap Beans for Processing.
51.3270–3294	Subpart—United States Standards for Sweet Peppers.
51.3295–3309	Subpart—United States Standards for Grades of Romaine.
51.3310–3344	Subpart—United States Standards for Grade Evaluation of Tomatoes for Processing.
51.3345–3364	Subpart—United States Standards for Grades of Greenhouse Tomatoes.
51.3365–3384	Subpart—United States Standards for Grades of Sweet Corn for Processing.
51.3385–3409	Subpart—United States Standards for Grades of Mushrooms.
51.3435–3454	Subpart—United States Standards for Grades of Mushrooms for Processing.
51.3455–3474	Subpart—United States Standards for Grades of Greenhouse Leaf Lettuce.
51.3475–3499	Subpart—United States Standards for Grades of Blueberries.
51.3500–3519	Subpart—United States Standards for Grades of Brazil Nuts in the Shell.
51.3520–3534	Subpart—United States Standards for Grades of Mixed Nuts in the Shell.
51.3535–3554	Subpart—United States Standards for Grades of Endive, Escarole, or Chicory.
51.3555–3584	Subpart—United States Standards for Grades of Bunched Italian Sprouting Broccoli.
51.3585–3609	Subpart—United States Standards for Grades of Southern Peas for Processing.
51.3610–3634	Subpart—United States Standards for Grades of American (Eastern Type) Bunch Grapes.
51.3635–3664	Subpart—United States Standards for Grades of Okra for Processing.
51.3665–3694	Subpart—United States Standards for Grades of Rhubarb (Field-Grown).
51.3695–3719	Subpart—United States Standards for Grades of Fresh Freestone Peaches for Canning, Freezing, or Pulping.
51.3720–3739	Subpart—United States Standards for Grades of Fresh Asparagus.
51.3785–3804	Subpart—United States Standards for Grades of Globe Artichokes.
51.3805–3828	Subpart—United States Standards for Grades of Lima Beans.
51.3829–3854	Subpart—United States Standards for Grades of Snap Beans.
51.3855–3879	Subpart—United States Standards for Grades of Greenhouse Cucumbers.
51.3880–3899	Subpart—United States Standards for Grades of Garlic.
51.3900–3929	Subpart—United States Standards for Grades of Horseradish Roots.
51.3930–3944	Subpart—United States Standards for Grades of Kale.
51.3945–3954	Subpart—United States Standards for Grades of Okra.
51.3955–3979	Subpart—United States Standards for Grades of Creole Onions.
51.3980–3999	Subpart—United States Standards for Grades of Onion Sets.
51.4000–4009	Subpart—United States Standards for Grades of Parsley.
51.4010–4029	Subpart—United States Standards for Grades of Parsnips.
51.4030–4049	Subpart—United States Standards for Grades of Fall and Winter Type Squash and Pumpkin.
51.4050–4074	Subpart—United States Standards for Grades of Summer Squash.
51.4075–4094	Subpart—United States Standards for Grades of Green Asparagus for Processing.
51.4095–4119	Subpart—United States Standards for Grades of Beets for Processing.
51.4120–4139	Subpart—United States Standards for Grades of Cabbage for Processing.
51.4140–4169	Subpart—United States Standards for Grades of Carrots for Processing.
51.4170–4189	Subpart—United States Standards for Grades of Cucumbers for Pickling.
51.4190–4209	Subpart—United States Standards for Grades of Onions for Processing.
51.4210–4239	Subpart—United States Standards for Grades of Fresh Shelled Peas for Canning or Freezing.
51.4240–4269	Subpart—United States Standards for Grades of Gladiolus Corms (Bulbs).
51.4270–4289	Subpart—United States Standards for Grades of Dewberries and Blackberries.

51.4290–4319	Subpart—United States Standards for Grades of Juice Grapes (European or Vinifera Type).
51.4320–4339	Subpart—United States Standards for Grades of Raspberries.
51.4340–4359	Subpart—United States Standards for Grades of Red Sour Cherries for Manufacture.
51.4360–4379	Subpart—United States Standards for Grades of Sweet Cherries for Canning or Freezing.
51.4380–4399	Subpart—United States Standards for Grades of Sweet Cherries, for Export for Sulphur Brining.
51.4400–4414	Subpart—United States Standards for Grades of American (Eastern Type) Bunch Grapes for Processing and Freezing.
51.4415–4434	Subpart—United States Standards for Grades of Growers' Stock Strawberries for Manufacture.
51.4435–4454	Subpart—United States Standards for Grades of Washed and Sorted Strawberries for Freezing.
51.4455–4474	Subpart—United States Standards for Grades of Asparagus Plumosus.
51.4475–4504	Subpart—United States Standards for Grades of Cut Peonies in the Bud.
51.4505–4574	Subpart—United States Standards for Grades of Tomato Plants.
51.4575–5999	Subpart—United States Standards for Grades of Potatoes for Chipping
	Other Regulations Being Removed.
51.6000–6005	Subpart—United States Specifications for the Classification of Damaged or Repaired Packages of Fresh Fruits and Vegetables.
	Regulations Being Retained in CFR Because They Provide Operational Regulations.
51.1–99	Subpart-Regulations.

Standards Being Retained in CFR Because They are Currently Referenced in Marketing Orders/Agreements

51.475–494	Subpart—United States Standards for Grades of Cantaloups.
51.560–594	Subpart—United States Standards for Celery.
51.595–619	Subpart—United States Consumer Standards for Celery Stalks.
51.620–679	Subpart—United States Standards for Grades of Grapefruit (Texas and States Other Than Florida, California, and Arizona).
51.680–749	Subpart—United States Standards for Grades of Oranges (Texas and States Other Than Florida, California, and Arizona).
51.750–809	Subpart—United States Standards for Grades of Florida Grapefruit.
51.880–924	Subpart—U.S. Standards for Grades of Table Grapes (European or ViniferaType).
51.1000–1029	Subpart—United States Standards for Persian (Tahiti) Limes.
51.1140–1209	Subpart—United States Standards for Grades of Florida Oranges and Tangelos.
51.1210–1234	Subpart—United States Standards for Peaches.
51.1260–1299	Subpart—United States Standards for Summer and Fall Pears.
51.1300–1344	Subpart—United States Standards for Winter Pears.
51.1400–1429	Subpart—United States Standards for Grades of Pecans in the Shell.
51.1430–1464	Subpart—United States Standards for Grades of Shelled Pecans.
51.1520–1539	Subpart—United States Standards for Grades of Fresh Plums and Prunes.
51.1540–1574	Subpart—United States Standards for Grades of Potatoes.
51.1575–1599	Subpart—United States Consumer Standards for Potatoes.
51.1810–1854	Subpart—United States Standards for Grades of Florida Tangerines.
51.1855–1899	Subpart—United States Standards for Fresh Tomatoes.
51.1900–1929	Subpart—United States Consumer Standards for Fresh Tomatoes.
51.1995–2024	Subpart—United States Standards for Grades of Filberts in the Shell.
51.2075–2104	Subpart—United States Standards for Grades of Almonds in the Shell.
51.2105–2149	Subpart—United States Standards for Grades of Shelled Almonds.
51.2275–2309	Subpart—United States Standards for Shelled English Walnuts (Juglans Regia).
51.2335–2359	Subpart—United States Standards for Grades of Kiwifruit.
51.2540–2554	Subpart—United States Standards for Grades of Pistachio Nuts in the Shell.
51.2555–2584	Subpart—United States Standards for Grades of Shelled Pistachio Nuts.
51.2646–2669	Subpart—United States Standards for Grades for Sweet Cherries.
51.2830–2859	Subpart—United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types).
51.2925–2944	Subpart—United States Standards for Apricots.
51.2945–2975	Subpart—United States Standards for Grades of Walnuts in the Shell.
51.3050–3084	Subpart—United States Standards for Florida Avocados.
51.3145–3169	Subpart—United States Standards for Grades of Nectarines.
51.3195–3219	Subpart—United States Standards for Bermuda-Granex-Grano Type Onions.
51.3410–3434	Subpart—United States Standards for Grades of Potatoes for Processing.
51.3740–3784	Subpart—United States Standards for Grades of Honey Dew and Honey Ball Type Melons.

Standards Being Retained in CFR Because They are Currently Referenced in Government Price Support Programs

51.1235–1259	Subpart—United States Standards for Cleaned Virginia Type Peanuts in the Shell.
51.2710–2729	Subpart—United States Standards for Shelled Runner Type Peanuts.
51.2730–2749	Subpart—United States Standards for Grades of Shelled Spanish Type Peanuts.
51.2750–2774	Subpart—United States Standards for Shelled Virginia Type Peanuts.

Administered by the Processed Products Branch, Fruit and Vegetable Division

7 Part 52	Processed Fruits and Vegetables, Processed Products thereof, and Certain Other Processed Food Products.

Standards Being Removed From CFR

CFR Section	Title
52.201–220	Subpart—United States Standards for Inspection by Variables.
52.221–300	Subpart—United States Standards for Determination of Fill Weights (and Attachments).
52.301–330	Subpart—United States Standards for Grades of Canned Apple Juice.
52.331–360	Subpart—United States Standards for Grades of Canned Applesauce.
52.361–380	Subpart—United States Standards for Grades of Frozen Apples.
52.381–410	Subpart—United States Standards for Grades of Frozen Asparagus.
52.411–440	Subpart—United States Standards for Grades of Canned Dried Beans.

52.441–470	Subpart—United States Standards for Grades of Canned Green Beans and Canned Wax Beans.
52.471–500	Subpart—United States Standards for Grades of Canned Lima Beans.
52.501–520	Subpart—United States Standards for Grades of Frozen Lima Beans.
52.521–550	Subpart—United States Standards for Grades of Canned Beets.
52.551–580	Subpart—United States Standards for Grades of Canned Blackberries, and Other Similar Berries such as Boysenberries, Dewberries, and Loganberries.
52.581–610	Subpart—United States Standards for Grades of Canned Blueberries.
52.611–630	Subpart—United States Standards for Grades of Frozen Blueberries.
52.631–650	Subpart—United States Standards for Grades of Frozen Broccoli.
52.651–670	Subpart—United States Standards for Grades of Frozen Brussels Sprouts.
52.671–700	Subpart—United States Standards for Grades of Canned Carrots.
52.701–720	Subpart—United States Standards for Grades of Frozen Carrots.
52.741–770	Subpart—United States Standards for Grades of Sulfured Cherries.
52.821–850	Subpart—United States Standards for Grades of Canned Sweet Cherries.
52.851–880	Subpart—United States Standards for Grades of Canned Cream Style Corn.
52.881–910	Subpart—United States Standards for Grades of Canned Whole Kernel (or Whole Grain) Corn.
52.911–930	Subpart—United States Standards for Grades of Frozen Whole Kernel (or Whole Grain) Corn.
52.931–950	Subpart—United States Standards for Grades of Frozen Corn-on-the-Cob.
52.951–1000	Subpart—United States Standards for Grades of Canned Cranberry Sauce.
52.1021–1050	Subpart—United States Standards for Grades of Dried Figs.
52.1051–1080	Subpart—United States Standards for Grades of Canned Fruit Cocktail.
52.1081–1110	Subpart—United States Standards for Grades of Fruit Jelly.
52.1111–1140	Subpart—United States Standards for Grades of Fruit Preserves (or Jams).
52.1141–1170	Subpart—United States Standards for Grades of Canned Grapefruit.
52.1171–1220	Subpart—United States Standards for Grades of Frozen Grapefruit.
52.1221–1250	Subpart—United States Standards for Grades of Grapefruit Juice.
52.1251–1280	Subpart—United States Standards for Grades of Canned Grapefruit and Orange for Salad.
52.1281–1310	Subpart—United States Standards for Grades of Grapefruit Juice and Orange Juice (or Orange Juice and Grapefruit Juice).
52.1311–1340	Subpart—United States Standards for Grades of Frozen Concentrated Blended Grapefruit Juice and Orange Juice.
52.1341–1370	Subpart—United States Standards for Grades of Canned Grape Juice.
52.1371–1390	Subpart—United States Standards for Grades of Frozen Leafy Greens.
52.1391–1420	Subpart—United States Standards for Grades of Extracted Honey.
52.1421–1450	Subpart—United States Standards for Grades of Frozen Concentrate for Lemonade.
52.1451–1480	Subpart—United States Standards for Grades of Orange Marmalade.
52.1481–1510	Subpart—United States Standards for Grades of Canned Mushrooms.
52.1531–1550	Subpart—United States Standards for Grades of Olive Oil.
52.1551–1610	Subpart—United States Standards for Grades of Orange Juice.
52.1611–1640	Subpart—United States Standards for Grades of Canned Pears.
52.1641–1660	Subpart—United States Standards for Grades of Canned Field Peas and Canned Black-eye Peas.
52.1681–1710	Subpart—United States Standards for Grades of Pickles.
52.1711–1740	Subpart—United States Standards for Grades of Canned Pineapple.
52.1741–1760	Subpart—United States Standards for Grades of Frozen Pineapple.
52.1761–1780	Subpart—United States Standards for Grades of Canned Pineapple Juice.
52.1781–1810	Subpart—United States Standards for Grades of Canned Plums.
52.1811–1840	Subpart—United States Standards for Grades of Canned White Potatoes.
52.1871–1900	Subpart—United States Standards for Grades of Frozen Raspberries.
52.1901–1940	Subpart—United States Standards for Grades of Canned Spinach.
[Reserved]	Subpart—United States Standards for Grades of Frozen Spinach.
52.1941–1960	Subpart—United States Standards for Grades of Frozen Cooked Squash.
52.1961–1980	Subpart—United States Standards for Grades of Frozen Squash (Summer Type).
52.1981–2010	Subpart—United States Standards for Grades of Frozen Strawberries.
52.2011–2040	Subpart—United States Standards for Grades of Frozen Succotash.
52.2041–2070	Subpart—United States Standards for Grades of Canned Sweetpotatoes.
52.2071–2100	Subpart—United States Standards for Grades of Canned Tangerine Juice.
52.2101–2130	Subpart—United States Standards for Grades of Tomato Catsup.
52.2131–2160	Subpart—United States Standards for Grades of Frozen Mixed Vegetables.
52.2161–2190	Subpart—United States Standards for Grades of Canned Apples.
52.2191–2280	Subpart—United States Standards for Grades of Chili Sauce.
52.2281–2320	Subpart—United States Standards for Grades of Canned Peas.
52.2341–2370	Subpart—United States Standards for Grades of Dehydrated (Low Moisture) Apples.
52.2371–2390	Subpart—United States Standards for Grades of Tomato Sauce.
52.2391–2420	Subpart—United States Standards for Grades of Frozen French Fried Potatoes.
52.2421–2450	Subpart—United States Standards for Grades of Peeled Potatoes.
52.2451–2480	Subpart—United States Standards for Grades of Frozen Concentrated Sweetened Grape Juice.
52.2481–2500	Subpart—United States Standards for Grades of Dried Apples.
52.2501–2520	Subpart—United States Standards for Grades of Frozen Peas and Carrots.
52.2521–2540	Subpart—United States Standards for Grades of Frozen Concentrate of Limeade.
52.2541–2560	Subpart—United States Standards for Grades of Canned Asparagus.
52.2561–2600	Subpart—United States Standards for Grades of Canned Clingstone Peaches.
52.2601–2640	Subpart—United States Standards for Grades of Canned Freestone Peaches.
52.2641–2680	Subpart—United States Standards for Grades of Canned and Canned Solid-Pack Apricots.
52.2681–2740	Subpart—United States Standards for Grades of Canned Pimentos.
52.2741–2800	Subpart—United States Standards for Grades of Canned Pumpkin and Canned Squash.
52.2801–2820	Subpart—United States Standards for Grades of Apple Butter.
52.2821–2860	Subpart—United States Standards for Grades of Canned Kadota Figs.
52.2861–2910	Subpart—United States Standards for Grades of Comb Honey.

52.2911–2930	Subpart—United States Standards for Grades of Frozen Plums.
52.2931–2950	Subpart—United States Standards for Grades of Concentrated Tangerine Juice for Manufacturing.
52.2951–3000	Subpart—United States Standards for Grades of Canned Sauerkraut.
52.3001–3040	Subpart—United States Standards for Grades of Frozen Sweet Peppers.
52.3041–3060	Subpart—United States Standards for Grades of Canned Onions.
52.3061–3100	Subpart—United States Standards for Grades of Peanut Butter.
52.3101–3160	Subpart—United States Standards for Grades of Sugarcane Sirup.
52.3161–3180	Subpart—United States Standards for Grades of Frozen Sweet Cherries.
52.3231–3280	Subpart—United States Standards for Grades of Dehydrated Low-Moisture Prunes.
52.3281–3310	Subpart—United States Standards for Grades of Canned Hominy.
52.3311–3330	Subpart—United States Standards for Grades of Canned Raspberries.
52.3331–3420	Subpart—United States Standards for Grades of Canned Okra.
52.3421–3450	Subpart—United States Standards for Grades of Canned Tomatoes and Okra and Canned Okra and Tomatoes.
52.3451–3510	Subpart—United States Standards for Grades of Bulk Sauerkraut.
52.3511–3550	Subpart—United States Standards for Grades of Frozen Peas.
52.3551–3580	Subpart—United States Standards for Grades of Frozen Peaches.
52.3581–3620	Subpart—United States Standards for Grades of Canned Squash (Summer Type).
52.3621–3650	Subpart—United States Standards for Grades of Tomato Juice.
52.3651–3730	Subpart—United States Standards for Grades of Sugarcane Molasses.
52.3731–3750	Subpart—United States Standards for Grades of Frozen Turnip Greens with Turnips.
52.3831–3870	Subpart—United States Standards for Grades of Canned Fruits for Salads.
52.3871–3910	Subpart—United States Standards for Grades of Dehydrated, Low-Moisture Apricots.
52.3911–3950	Subpart—United States Standards for Grades of Dehydrated, Low-Moisture Peaches.
52.3951–4020	Subpart—United States Standards for Grades of Concentrated Lemon Juice for Manufacturing.
52.4021–4060	Subpart—United States Standards for Grades of Canned Grapes.
52.4061–5000	Subpart—United States Standards for Grades of Frozen Breaded Onion Rings.
52.5001–5040	Subpart—United States Standards for Grades of Frozen Sweetpotatoes.
52.5041–5080	Subpart—United States Standards for Grades of Tomato Paste.
52.5081–5160	Subpart—United States Standards for Grades of Canned Tomato Puree (Tomato Pulp).
52.5161–5200	Subpart—United States Standards for Grades of Canned Tomatoes.
52.5201–5240	Subpart—United States Standards for Grades of Concentrated Tomato Juice.
52.5241–5360	Subpart—United States Standards for Grades of Frozen Speckled Butter (Lima) Beans.
52.5361–5440	Subpart—United States Standards for Grades of Frozen Melon Balls.
52.5441–5480	Subpart—United States Standards for Grades of Green Olives.
52.5481–5520	Subpart—United States Standards for Grades of Canned Lemon Juice.
52.5521–5600	Subpart—United States Standards for Grades of Frozen Apricots.
52.5601–5760	Subpart—United States Standards for Grades of Canned Dried Prunes.
52.5761–5800	Subpart—United States Standards for Grades of Dried Apricots.
52.5801–5840	Subpart—United States Standards for Grades of Dried Peaches.
52.5841–5880	Subpart—United States Standards for Grades of Dried Pears.
52.5881–5960	Subpart—United States Standards for Grades of Frozen Berries.
52.5961–6000	Subpart—United States Standards for Grades of Table Maple Sirup.
52.6001–6040	Subpart—United States Standards for Grades of Canned Succotash.
52.6041–6080	Subpart—United States Standards for Grades of Refiner's Sirup.
52.6081–6200	Subpart—United States Standards for Grades of Canned Leafy Greens.
52.6201–6240	Subpart—United States Standards for Grades of Canned Peas and Carrots.
52.6241–6280	Subpart—United States Standards for Grades of Canned Solid-Pack Apricots.
52.6281–6320	Subpart—United States Standards for Grades of Frozen Cranberries.
52.6321–6400	Subpart—United States Standards for Grades of Frozen Concentrated Apple Juice.
52.6401–6440	Subpart—United States Standards for Grades of Frozen Hash Brown Potatoes.
52.6441–6460	Subpart—United States Standards for Grades of Canned Pork and Beans.
52.6461–6570	Subpart—United States Standards for Grades of Canned Baked Beans.
52.6571–6582	Subpart—United States Standards for Grades of Canned Celery.
	Regulations Being Retained in CFR Because They Provide Operational Regulations.
52.1–200	Subpart—Regulations Governing Inspection and Certification.
	Standards Being Temporarily Retained in CFR Because They are Currently in Rulemaking.
52.721–729	Subpart—United States Standards for Grades of Frozen Cauliflower.
52.1511–1520	Subpart—United States Standards for Grades of Frozen Okra.
52.1661–1674	Subpart—United States Standards for Grades of Frozen Field Peas and Frozen Black-eye Peas.
52.2321–2334	Subpart—United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans.
	Standards Being Retained in CFR Because They are Currently Referenced in Marketing Orders/Agreements
52.771–784	Subpart—United States Standards for Grades of Canned Red Tart Pitted Cherries.
52.801–812	Subpart—United States Standards for Grades of Frozen Red Tart Pitted Cherries.
52.1001–1011	Subpart—United States Standards for Grades of Dates.
52.1841–1858	Subpart—United States Standards for Grades of Processed Raisins.
52.3181–3188	Subpart—United States Standards for Grades of Dried Prunes.
52.3751–3830	Subpart—United States Standards for Grades of Canned Ripe Olives.

Administered by the Dairy Division

7 Part 58	Grading and Inspection, General Specifications for Approved Plants and Standards for Grades of Dairy Products.

Standards Being Removed From CFR

CFR Section	Title

58.2425–2454	Subpart G—United States Standards for Grades of Whipped Butter.
58.2455–2464	Subpart H—United States Standards for Grades of Bulk American Cheese.
58.2475–2500	Subpart J—United States Standards for Grades of Colby Cheese.
58.2501–2524	Subpart K—United States Standards for Grades of Cheddar Cheese.
58.2550–2569	Subpart M—United States Standards for Grades of Nonfat Dry Milk (Roller Process).
58.2570–2600	Subpart N—United States Standards for Grades of Swiss Cheese, Emmentaler Cheese.
58.2601–2620	Subpart O—United States Standards for Dry Whey.
58.2621–2650	Subpart P—United States Standards for Grades of Butter.
58.2651–2675	Subpart Q—United States Standards for Grades of Dry Buttermilk and Dry Buttermilk Product.
58.2676–2700	Subpart R—United States Scorched Particle Standards for Dry Milks.
58.2701–2725	Subpart S—United States Standards for Grades of Dry Whole Milk.
58.2726–2749	Subpart T—United States Sediment Standards for Milk and Milk Products.
58.2800–2824	Subpart V—United States Standards for Grades of Edible Dry Casein (Acid).
	Regulations Being Retained in CFR Because They Provide Operational Requirements
58.1–99	Subpart A—Regulations Governing the Inspection and Grading Services of Manufactured or Processed Dairy Products.
58.100–2424	Subpart B—General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service.
	Standards Being Temporarily Retained in CFR Because They are Currently in Rulemaking
58.2465–2474	Subpart I—United States Standards for Grades of Monterey (Monterey Jack) Cheese.
58.2525–2549	Subpart L—United States Standards for Grades of Nonfat Dry Milk (Spray Process).
58.2750–2799	Subpart U—United States Standards for Instant Nonfat Dry Milk.
	Regulations Being Retained in CFR in Accordance With the Agricultural Marketing Act.
58.2825–2827	Subpart W—United States Department of Agriculture Standard for Ice Cream.

To ensure that standards will be developed, issued, and revised in accordance with procedures that continue to ensure a fair and open process, all new and proposed revisions to existing AMS standards will be published in the **Federal Register** as a "Notice" with adequate time for public comment. A final version of the standards will also be published in the **Federal Register** as a notice (in addition to continuing to be made available by AMS).

In developing or revising existing grade standards, the Administrator must first determine that a new or revised standard is needed to facilitate trade in a particular commodity. Second, because use of the standards is voluntary, there must be demonstrated interest and support from the affected industry or other interested parties. And third, the standards must be practical to use.

Initial requests for development or revision of a standard may come from the industry, trade or consumer groups, State departments of agriculture, the U.S. Department of Agriculture, or others. Once a request has been received, AMS will coordinate procedures to gather information needed to move forward with the new or revised standard. After this process is completed, a notice of proposed standards change will be published in the **Federal Register** to solicit comment from any interested parties (normally 30 to 60 days). After evaluating the comments received from interested parties, AMS will determine whether to proceed, develop a new proposal, or terminate the process. The public will be informed through a press release and a notice in the **Federal Register**.

In addition to publication in the **Federal Register**, the AMS commodity program that handles the commodity will distribute copies of each standard on request as a pamphlet or other means under the direction of the Administrator of AMS.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The standards are voluntary; (2) No changes are being made to the standards by this docket; (3) New procedures have been drafted for developing new and revising existing U.S. standards which will provide an improved form of delivery standards for those who use U.S. standards to trade; and (4) This is in-line with the President's regulatory review initiative.

List of Subjects

7 CFR Part 29

Administrative practice and procedure, Advisory committees, Government publications, Imports, Pesticides and pests, Reporting and recordkeeping requirements, Tobacco.

7 CFR Part 31

Wool.

7 CFR Part 32

Mohair.

7 CFR Part 51

Agricultural commodities, Food grades and standards, Fruits, Nuts, Reporting and recordkeeping requirements, Trees, Vegetables.

7 CFR Part 52

Food grades and standards, Food labeling, Frozen foods, Fruit juices, Fruits, Reporting and recordkeeping requirements, Vegetables.

7 CFR Part 53

Cattle, Hogs, Livestock, Sheep.

7 CFR Part 54

Food grades and standards, Food labeling, Meat and meat products.

7 CFR Part 56

Eggs and egg products, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

7 CFR Part 58

Dairy products, Food grades and standards, Food labeling, Reporting and recordkeeping requirements.

7 CFR Part 70

Food grades and standards, Food labeling, Poultry and poultry products, Rabbits and rabbit products, Reporting and recordkeeping requirements.

7 CFR Part 160

Administrative practice and procedure, Advertising, Forests and forest products, Labeling, Packaging and containers, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR chapter I is amended as follows:

PART 29—TOBACCO INSPECTION

1. The authority citation for 7 CFR Part 29 is revised to read as follows:

Authority: 7 U.S.C. 511b, 511r.

§§ 29.3251–29.3401, 29.4251–29.6661 [Removed]

2. In part 29, Subpart C—Standards, §§ 29.3251 through 29.3401 and §§ 29.4251 through 29.6661 and their undesignated centerheadings are removed.

PART 31—WOOL STANDARDS

3. Under the authority of 7 U.S.C. 415c, 1621–1627, Part 31 is removed.

PART 32—MOHAIR STANDARDS

4. Under the authority of 7 U.S.C. 415c, 1621–1627, Part 32 is removed.

PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS [1, 2] (INSPECTION, CERTIFICATION, AND STANDARDS)

5. The authority citation for 7 CFR Part 51 is revised to read as follows:

Authority: 7 U.S.C. 1621–1627.

§§ 51.100–51.464, 51.495–51.556, 51.810–51.869, 51.952–51.986, 51.1030–51.1109, 51.1345–51.1387, 51.1465–51.1510, 51.1600–51.1793, 51.1930–51.1987, 51.2025–51.2062, 51.2150–51.2262, 51.2310–51.2322, 51.2360–51.2534, 51.2585–51.2630, 51.2670–51.2701 51.2775–51.2821, 51.2860–51.2908, 51.2976–51.3037, 51.3085–51.3124, 51.3170–51.3183, 51.3220–51.3398, 51.3435–51.3734, 51.3785–51.6005 [Removed]

6. In part 51, §§ 51.100 through 51.464, §§ 51.495 through 51.556, §§ 51.810 through 51.869, §§ 51.925 through 51.986, §§ 51.1030 through 51.1109, §§ 51.1345 through 51.1387, §§ 51.1465 through 51.1510, §§ 51.1600 through 51.1793, §§ 51.1930 through 51.1987, §§ 51.2025 through 51.2062, §§ 51.2150 through 51.2262, §§ 51.2310 through 51.2322, §§ 51.2360 through 51.2534, §§ 51.2585 through 51.2630, §§ 51.2670 through 51.2701, §§ 51.2775 through 51.2821, §§ 51.2860 through 51.2908, §§ 51.2976 through 51.3037, §§ 51.3085 through 51.3124, §§ 51.3170 through 51.3183, §§ 51.3220 through 51.3398, §§ 51.3435 through 51.3734, and §§ 51.3785 through 51.6005 and all their undesignated centerheadings and the subpart headings are removed.

[1] Among such other products are the following: Raw nuts, Christmas trees and evergreens; flowers and flower bulbs; and onion sets.

[2] None of the requirements in the regulations of this part shall excuse failure to comply with any Federal, State, county, or municipal laws applicable to products covered in the regulations in this part.

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS [3]

7. The authority citation for 7 CFR Part 52 is revised to read as follows:

Authority: 7 U.S.C. 1621–1627.

§§ 52.201–52.711, 52.741–52.755, 52.821–52.963, 52.1021–52.1495, 52.1531–52.1651, 52.1681–52.1821, 52.1871–52.2294, 52.2341–52.3172, 52.3231–52.3743, 52.3831–52.6582 [Removed]

8. In part 52, §§ 52.201 through 52.711, §§ 52.741 through 52.755, §§ 52.821 through 52.963, §§ 52.1021 through 52.1495, §§ 52.1531 through 52.1651, §§ 52.1681 through 52.1821, §§ 52.1871 through 52.2294, §§ 52.2341 through 52.3172, §§ 52.3231 through 52.3743, and §§ 52.3831 through 52.6582 and all their undesignated centerheadings and the subpart headings are removed.

PART 53—LIVESTOCK (GRADING, CERTIFICATION, AND STANDARDS)

9. The authority citation for 7 CFR Part 53 is revised to read as follows:

Authority: 7 U.S.C. 1621–1627.

§§ 53.120–53.159, 53.208–53.212 [Removed]

10. In part 53, Subpart B—Standards, §§ 53.120 through 53.159, and §§ 53.208 through 53.212 and their undesignated centerheadings are removed.

PART 54—MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

11. The authority citation for 7 CFR Part 54 is revised to read as follows:

Authority: 7 U.S.C. 1621–1627.

§§ 54.112–54.137 [Removed]

12. In part 54, Subpart B—Standards, §§ 54.112 through 54.137 and their undesignated centerheadings are removed.

PART 56—GRADING OF SHELL EGGS AND U.S. STANDARDS, GRADES, AND WEIGHT CLASSES FOR SHELL EGGS

13. The authority citation for 7 CFR Part 56 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

[3] Among such other processed food products are the following: Honey; molasses, except for stockfeed; nuts and nut products, except oil; sugar (cane, beet, and maple); sirups (blended), sirups, except from grain; tea; cocoa; coffee; spices; condiments.

§§ 56.200–56.234 [Removed]

14. In part 56, Subpart B—(Reserved) and Subpart C—United States Standards, Grades, and Weight Classes for Shell Eggs, §§ 56.200 through 56.234 and their undesignated centerheadings are removed.

PART 58—GRADING AND INSPECTION, GENERAL SPECIFICATIONS FOR APPROVED PLANTS AND STANDARDS FOR GRADES OF DAIRY PRODUCTS [1]

15. The authority citation for 7 CFR Part 58 is revised to read as follows:

Authority: 7 U.S.C. 1621—1627.

§§ 58.2425–58.2435 [Removed and reserved]

16. In part 58, Subpart G—United States Standards for Grades of Whipped Butter (§§ 58.2425 through 58.2435) is removed and reserved.

§§ 58.2455–58.246 [Removed and reserved]

17. In part 58, Subpart H—United States Standards for Grades of Bulk American Cheese (§§ 58.2455 through 58.2463) is removed and reserved.

§§ 58.2475–58.248 [Removed and reserved]

18. In part 58, Subpart J—United States Standards for Grades of Colby Cheese (§§ 58.2475 through 58.2481) is removed and reserved.

§§ 58.2501–58.250 [Removed and reserved]

19. In part 58, Subpart K—United States Standards for Grades of Cheddar Cheese (§§ 58.2501 through 58.2506) is removed and reserved.

§§ 58.2550–58.2562 [Removed and reserved]

20. In part 58, Subpart M—United States Standards for Grades of Nonfat Dry Milk (Roller Process) (§§ 58.2550 through 58.2562) is removed and reserved.

§§ 58.2570–58.2578 [Removed and reserved]

21. In part 58, Subpart N—United States Standards for Grades of Swiss Cheese, Emmentataler Cheese (§§ 58.2570 through 58.2578) is removed and reserved.

§§ 58.2601–58.2611 [Removed and reserved]

22. In part 58, Subpart O—United States Standards for Dry Whey (§§ 58.2601 through 58.2611) is removed and reserved.

[1] Compliance with these standards does not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act.

§§ 58.2621–58.2635 [Removed and reserved]

23. In part 58, Subpart P—United States Standards for Grades of Butter (§§ 58.2621 through 58.2635) is removed and reserved.

§§ 58.2651–58.2657 [Removed and reserved]

24. In part 58, Subpart Q—United States Standards for Grades of Dry Buttermilk and Dry Buttermilk Product (§§ 58.2651 through 58.2657) is removed and reserved.

§§ 58.2676–58.2678 [Removed and reserved]

25. In part 58, Subpart R—United States Scorched Particle Standards for Dry Milks (§§ 58.2676 through 58.2678) is removed and reserved.

§§ 58.2701–58.2710 [Removed and reserved]

26. In part 58, Subpart S—United States Standards for Grades of Dry Whole Milk (§§ 58.2701 through 58.2710) is removed and reserved.

§§ 58.2726–58.2732 [Removed and reserved]

27. In part 58, Subpart T—United States Sediment Standards for Milk and Milk Products (§§ 58.2726 through 58.2732) is removed and reserved.

§§ 58.2800–58.2808 [Removed and reserved]

28. In part 58, Subpart V—United States Standards for Grades of Edible Dry Casein (Acid) (§§ 58.2800 through 58.2808) is removed and reserved.

PART 70—VOLUNTARY GRADING OF POULTRY PRODUCTS AND RABBIT PRODUCTS AND U.S. CLASSES, STANDARDS, AND GRADES

29. The authority citation for 7 CFR Part 70 continues to read as follows:

Authority: 7 U.S.C. 1621—1627.

§§ 70.200–70.332 [Removed and reserved]

30. In part 70, Subpart B—United States Classes, Standards, and Grades for Poultry and Subpart C—United States Classes, Standards and Grades for Rabbits, §§ 70.200 through 70.332, their undesignated centerheadings and the subpart headings are removed and reserved.

PART 160—REGULATIONS AND STANDARDS FOR NAVAL STORES

31. The authority citation for 7 CFR Part 160 is revised to read as follows:

Authority: 7 U.S.C. 94, 1624.

§§ 160.301–160.305 [Removed]

32. In part 160, §§ 160.301 through 160.305 and their undesignated centerheadings and Appendixes A and B are removed.

Dated: November 27, 1995.

Lon Hatamiya,

Administrator.

Title 3—

The President

Proclamation 6853 of November 30, 1995

National Drunk and Drugged Driving Prevention Month, 1995

By the President of the United States of America

A Proclamation

For many young Americans, learning to drive is a significant step along the road to maturity and independence. There are serious responsibilities that accompany getting a driver's license, and it is essential to teach our youth—and all Americans—the terrible risks of drunk and drugged driving. Males aged 21-34 are among those most likely to drive under the influence of alcohol or drugs, and there is a critical need for additional prevention efforts aimed at this group.

Alcohol use played a role in 16,600 motor vehicle-related fatalities last year—nearly 41 percent of all such deaths. While the number of these tragedies has declined significantly over the past decade, the statistics are still devastating. We must continue our campaign of public education, provide increased law enforcement, and seek tougher laws and penalties for offenders.

Last June, I called on the Congress to make "Zero Tolerance" the law of the land and require States to adopt a Zero Tolerance standard for drivers under the age of 21. I am pleased that this provision was included in the "National Highway System Designation Act of 1995," which I signed this week. It is already against the law for young people to consume alcohol, and Zero Tolerance creates a national standard that will make it effectively illegal for young people who have been drinking to drive an automobile.

Many States have already enacted Zero Tolerance laws. These laws work—alcohol-related crashes involving teenage drivers are down as much as 20 percent in those States. When all States have these laws, hundreds more lives will be saved and thousands of injuries will be prevented. I commend the Congress for heeding my call and making Zero Tolerance the standard nationwide for drivers under the age of 21.

I am also proud that citizens across the Nation are working to spread the word about the dangers of impaired driving. Vital partnerships have formed among Federal, State, and local government agencies, private businesses, and community groups. Last year, on December 15, many Americans observed "Lights on for Life Day" by driving with their headlights illuminated in remembrance of the victims of drunk and drugged driving. I hope that caring citizens will commemorate the same day this month, doing their part to help ensure a safe holiday season.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim December 1995, as National Drunk and Drugged Driving Prevention Month. I urge all Americans to recognize the dangers of impaired driving; to take responsibility for themselves, their guests, and their passengers; to stop anyone under the influence of drugs or alcohol from getting behind the wheel; and to help teach children safe driving behavior.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of November, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

William J. Clinton

Presidential Documents

Proclamation 6854 of November 30, 1995

World AIDS Day, 1995

By the President of the United States of America

A Proclamation

Today the world pauses to remember the millions of men, women, and children who are living with HIV and AIDS and to honor the memory of those who have lost their lives to this insidious disease. We renew our commitment to searching for a cure to AIDS and a vaccine for HIV, rededicate ourselves to reducing the number of people who become infected with the virus, and devote our efforts to protecting the dignity and rights of all those affected by the AIDS epidemic.

The statistics are overwhelming. Around the world, more than 18 million people are believed to be infected with HIV. In America alone, over half a million people have been struck by AIDS, and more than 300,000 have already lost their lives. Nearly 80,000 of our fellow citizens are diagnosed with AIDS and more than 40,000 are dying of the disease each year—some 120 every day. In addition, there are an estimated 40,000 to 60,000 Americans who contract HIV annually. The impact of these numbers goes far beyond the individuals involved—each AIDS death devastates a family, weakens a community, and changes society as a whole. HIV and AIDS present extraordinary challenges to every nation and every person on our planet.

In the past year, there has been some encouraging progress. Researchers from many countries have combined their knowledge and skills to better understand the virus that causes AIDS and its effects on the human body; new AIDS drugs are being developed and approved faster than ever before; we are beginning to find ways to rebuild immune systems destroyed by HIV so that those infected can live longer, healthier lives; and we are aggressively confronting this crisis with prevention programs at the grassroots and national levels.

But there is still much work to do. Half of all new infections occur among people under the age of 25, and one-fourth occur among teenagers. We must protect the next generation by continuing to improve the availability of health care services for those with HIV and AIDS. Since 1990, the Ryan White CARE Act has offered help and hope to hundreds of thousands of people, and we are working with the Congress to extend this vital program for an additional 5 years. However, while the CARE Act is an essential element of the safety net that protects people with HIV and AIDS, it cannot do the job alone. We must also maintain our 30-year commitment to the Medicaid program, which provides services to nearly half of all Americans living with AIDS and more than 90 percent of children with AIDS. Without the protection that Medicaid affords, these individuals and their families would lose all access to health care.

Let us also continue to ensure that our Nation responds aggressively and humanely to the needs of people living with HIV and AIDS. Throughout this epidemic, community organizations have taken the lead in the struggle against the disease and in efforts to provide compassionate care to those in need. Across this country and around the globe, generous people perform miracles every day—holding a hand, cooling a fever, listening, and understanding. Let us further support their efforts to build a better world by

strengthening the partnership between communities and government in the work to stop AIDS.

The theme of this eighth observance of World AIDS Day, "Shared Rights, Shared Responsibilities," is a call to fight against discrimination as strongly as we fight for a cure. When one human being is persecuted because of his or her HIV status, we all suffer. Let us pledge to stand together, united against HIV and AIDS and committed to ending ignorance and prejudice.

NOW, THEREFORE, I, WILLIAM J. CLINTON, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim December 1, 1995, as World AIDS Day. I ask the American people to join me in reaffirming our commitment to combatting HIV and AIDS and in reaching out to all those whose lives have been affected by this disease.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of November, in the year of our Lord nineteen hundred and ninety-five, and of the Independence of the United States of America the two hundred and twentieth.

William J. Clinton

ELECTRONIC BULLETIN BOARD

Free **Electronic Bulletin Board** service for Public Law numbers, Federal Register finding aids, and list of documents on public inspection. 202–275–0920

FAX-ON-DEMAND

You may access our Fax-On-Demand service. You only need a fax machine and there is no charge for the service except for long distance telephone charges the user may incur. The list of documents on public inspection and the daily Federal Register's table of contents are available using this service. The document numbers are 7050-Public Inspection list and 7051-Table of Contents list. The public inspection list will be updated immediately for documents filed on an emergency basis.

NOTE: YOU WILL ONLY GET A LISTING OF DOCUMENTS ON FILE AND NOT THE ACTUAL DOCUMENT. Documents on public inspection may be viewed and copied in our office located at 800 North Capitol Street, N.W., Suite 700. The Fax-On-Demand telephone number is: 301–713–6905

TRANSPORTATION DEPARTMENT

Federal Aviation Administration

Class C airspace; comments due by 12-15-95; published 11-1-95

Class E airspace; comments due by 12-11-95; published 11-1-95

TREASURY DEPARTMENT

Fiscal Service

Financial management services:

Federal process agents of surety companies; comments due by 12-11-95; published 11-9-95

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List November 30, 1995

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $883.00 domestic, $220.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1-189 contains a note only for Parts 1-39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1-39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1-100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1995. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period July 1, 1991 to June 30, 1995. The CFR volume issued July 1, 1991, should be retained.

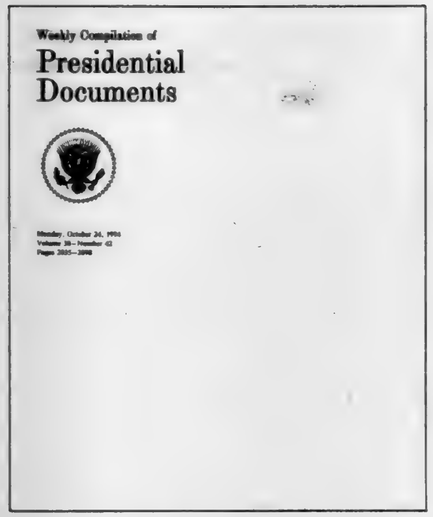
[6] No amendments to this volume were promulgated during the period January 1, 1993 to December 31, 1994. The CFR volume issued January 1, 1993, should be retained.

[7] No amendments to this volume were promulgated during the period October 1, 1993, to September 30, 1994. The CFR volume issued October 1, 1993, should be retained.

[8] No amendments to this volume were promulgated during the period April 1, 1994 to March 31, 1995. The CFR volume issued April 1, 1994, should be retained.

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$26.00 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$24.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example*:

A renewal notice will be sent approximately 90 days before this date.

```
AFR SMITH212J                DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

A renewal notice will be sent approximately 90 days before this date.

```
AFRDO SMITH212J              DEC95 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20747
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9375.

To order a new subscription: Please use the order form provided below.

NEW EDITION

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

Revised January 1, 1994

The GUIDE is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC, Long Beach, CA, and Seattle, WA, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

THE FEDERAL REGISTER

WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Reader Aids
Additional information, including a list of public laws, telephone numbers, and finding aids, appears in the Reader Aids section at the end of this issue.

New Feature in the Reader Aids!
Beginning with the issue of December 4, 1995, a new listing will appear each day in the Reader Aids section of the **Federal Register** called "Reminders". The Reminders will have two sections: "Rules Going Into Effect Today" and "Comments Due Next Week". Rules Going Into Effect Today will remind readers about Rules documents published in the past which go into effect "today". Comments Due Next Week will remind readers about impending closing dates for comments on Proposed Rules documents published in past issues. Only those documents published in the Rules and Proposed Rules sections of the **Federal Register** will be eligible for inclusion in the Reminders.
The Reminders feature is intended as a reader aid only. Neither inclusion nor exclusion in the listing has any legal significance.
The Office of the Federal Register has been compiling data for the Reminders since the issue of November 1, 1995. No documents published prior to November 1, 1995 will be listed in Reminders.

Electronic Bulletin Board
Free **Electronic Bulletin Board** service for Public Law numbers, **Federal Register** finding aids, and a list of documents on public inspection is available on 202–275–1538 or 275–0920.

Rules and Regulations

Federal Register
Vol. 60, No. 233
Tuesday, December 5, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 401

RIN 0563–AB29

General Crop Insurance Regulations; Florida Citrus Endorsement

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation ("FCIC") hereby amends the Florida Citrus Endorsement that supplements the General Crop Insurance Policy. The intended effect of this rule is to require that the insured crop unit suffer at least a fifty percent (50%) average percent of damage before an indemnity would be due for any catastrophic risk protection policy.

EFFECTIVE DATE: December 5, 1995.

FOR FURTHER INFORMATION CONTACT: Diana Moslak, Regulatory and Procedural Development Staff, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone (202) 254–8314.

SUPPLEMENTARY INFORMATION: This action has been reviewed under United States Department of Agriculture ("USDA") procedures established by Executive Order 12866 and Departmental Regulation 1512–1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is May 1, 2000.

This rule has been determined to be "exempt" for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget ("OMB").

The information collection requirements contained in these regulations (7 CFR part 401) were previously approved by OMB pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35) under OMB control numbers 0563–0003, 0563–0014, and 0563–0016. The amendments set forth in this rule do not revise the content or alter the frequency of reporting for any of the forms cleared under the above mentioned dockets. The public reporting burden for the collection of information is estimated to range from 10 to 90 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

It has been determined under section 6(a) of Executive Order 12612, Federalism, that this rule does not have sufficient federalism implication to warrant the preparation of a Federalism Assessment. The policies and procedures contained in this rule will not have a substantial direct effect on states or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government.

This regulation will not have a significant impact on a substantial number of small entities. This action neither increases nor decreases the paperwork burden on the insured and the reinsured company. Therefore, this action is determined to be exempt from the provisions of the Regulatory Flexibility Act (5 U.S.C. 605) and no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which require intergovernmental consultation with state and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115, June 24, 1983.

The Office of the General Counsel has determined that these regulations meet the applicable standards provided in subsections (2)(a) and 2(b)(2) of Executive Order 12778. The provisions of this rule will preempt state and local laws to the extent such state and local laws are inconsistent herewith. The administrative appeal provisions promulgated by the National Appeals Division under Pub. L. No. 103–354 must be exhausted before judicial action may be brought.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Background

On Tuesday, June 6, 1995, FCIC published an interim rule in the **Federal Register** at 60 FR 29749, to amend the Florida Citrus Endorsement by revising the Catastrophic Risk Protection (CAT) loss adjustment provisions contained in section 9 of the endorsement.

Following publication of the interim rule, the public was afforded 60 days to submit written comments, data, and opinions. The comments received and FCIC responses are as follows:

Comment: One comment received from an insurance company maintains that the rule is incomplete because it only addresses the loss adjustment deductible aspect of the program and does not address the dollar amount of insurance.

Response: FCIC revised Section 9 (Claim for Indemnity) because the language did not conform with the requirements of Section 508(b) of the Federal Crop Insurance Reform Act (Act) of 1994 which states that CAT shall offer a producer coverage for a 50 percent loss of yield. Under the Florida Citrus Endorsement, loss payments began once the damage exceeded 10 percent. FCIC added language to bring Section 9 in compliance with the Act. This language only addresses the 50 percent deductible. The dollar amount of insurance for CAT coverage, as determined by FCIC, is stipulated in the actuarial table. Therefore, FCIC has addressed the dollar amount of insurance for CAT coverage and the formula used to determine CAT coverage indemnities will not be changed.

Comment: One comment received from an insurance company stated that the rule was not necessary because the same result could be achieved by multiplying the maximum value FCIC assigns to a given variety of citrus by 50%, then multiplying this product by 60%.

Response: FCIC disagrees with the comment. The determination of an appropriate CAT dollar amount of

insurance is a separate issue from establishing the amount of loss that must be sustained before an indemnity is due.

Comment: One comment received from an insurance company suggested that the Act specifically addresses CAT coverage for production based programs but leaves discretion as to how to apply CAT to dollar amount of insurance crops.

Response: The Act stipulates that CAT coverage shall offer a producer coverage for a 50 percent loss in yield on an individual basis, indemnified at 60 percent of the expected market price, or comparable coverage (as determined by the Corporation). For dollar amount of insurance crops like Florida Citrus, the CAT dollar amount of insurance is stated in the actuarial table. The 50% loss threshold for CAT is not discretionary and applies to dollar amount of insurance crops.

Comment: One comment received from an insurance company suggested that changing the loss calculation for CAT represents a material change in the program and essentially creates a second Florida Citrus program.

Response: Changing the Florida Citrus CAT loss calculation did not create another program. CAT coverage was a new insurance coverage level that was required to be implemented by the Act. The change explains how CAT losses will be calculated.

Comment: One comment received from an insurance company stated their belief that CAT payment values are far short of 60% of the market value called for in the Act. Consequently, loss guidelines which result in a CAT producer being indemnified once they have sustained a loss greater than 10% helped to compensate for the insufficient CAT dollar amount of coverage.

Response: FCIC believes that it would be inappropriate to compensate for a perceived insufficient dollar amount of coverage by manipulating loss calculations, since it would violate crop loss guidelines established in the Act.

Comment: One comment received from an insurance company suggested that the rule change would not reduce paperwork nor simplify the program and could cost more money to administer since agents would have two quoting systems.

Response: FCIC disagrees with this comment. The rule change is not expected to either increase or decrease paperwork. The change does not create two quoting systems, it only informs the CAT policyholder how a claim for indemnity is calculated for this new coverage level.

Comment: One comment received from an insurance company suggested that the rule will spread confusion and bad will among their growers and creates additional work for companies and agents who are already "undercompensated" for CAT.

Response: The Act mandates guidelines for implementing CAT coverage and FCIC does not have the liberty to deviate from the guidelines. Therefore, Florida citrus producers with CAT policies will be treated the same as CAT policyholders of other crops.

Comment: One comment received from an insurance company stated that while they believed the rule change was required to bring the program in compliance with legislation, the change was made well after the April 15, 1995 contract change date, and thus it was inappropriate to implement it for the 1996 crop year.

Response: FCIC's position is that CAT was implemented when the interim rules, Catastrophic Risk Protection Endorsement and Subpart T-Regulations for Implementation, were published in the **Federal Register** on January 6, 1995. The Florida Citrus interim rule was a continuation of implementing CAT. Implementing legislation (the Act) takes precedence over a crop policy's contract change date.

Comment: One comment received from an insurance company stated that the only changes allowable after the April 15, 1995 contract change date would be a liberalization which would benefit the policyholders, as described in section 11 of the General Provisions of the MPCI Policy. Furthermore a 500% increase in the CAT policy deductible does not qualify as a liberalization.

Response: Implementing legislation takes precedence over a crop policy's contract change date. CAT insureds who sustain a complete loss of their Florida citrus can realize 100% of their CAT coverage, while under the previous loss calculation, based on 10% deductible, they would have received only 90% of their CAT coverage.

List of Subjects in 7 CFR Part 401

Crop insurance, Florida citrus.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*) the Federal Crop Insurance Corporation hereby adopts as a final rule, the interim rule as published at 60 FR 29749 on June 6, 1995.

Done in Washington, DC, on November 29, 1995.

Kenneth D. Ackerman,

Manager, Federal Crop Insurance Corporation.

BILLING CODE 3410–FA–P

SMALL BUSINESS ADMINISTRATION

13 CFR Part 140

Debt Collection Through Offset

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: In response to President Clinton's regulatory review directive, the Small Business Administration has completed a page-by-page and line-by-line review of its regulations. As a result, SBA is proposing to clarify and streamline its regulations, revising or eliminating any duplicative, outdated, inconsistent, or confusing provisions. This rule reorganizes all of Part 140 covering agency debt collection, clarifying it and making it easier to use through the use of "plain language." It also amends the Part by removing redundant provisions and applying, where permitted by applicable statute, uniform procedural rights to all debt collection procedures. The name of the regulation has been changed from simply Debt Collection to Debt Collection Through Offset. There are no substantive changes.

EFFECTIVE DATE: This rule is effective January 4, 1996.

FOR FURTHER INFORMATION CONTACT: Cheri Wolff, Chief Counsel for General Litigation, Office of General Counsel, at (202) 205–6643.

SUPPLEMENTARY INFORMATION: 13 CFR Part 140 establishes procedures for the collection of debts owed to SBA. This rule reorganizes the entire Part, clarifying it and making it easier to use. Where permitted by relevant statute, it also amends Part 140 to give all debtors similar procedural rights.

Currently, Part 140 does not give all debtors the same procedural rights. Where a salary deduction or administrative offset procedure is used, debtors have thirty days to present evidence in response to SBA's notice of intent to collect a debt. On the other hand, where the deduction from income tax refund procedure is used, debtors are given sixty days to present evidence in response to SBA's notice. The rule eliminates this distinction and provides all debtors with the same procedural rights. All debtors will be given sixty days to present their relevant evidence.

Section-by-Section Analysis

The authority citations are amended by specifying the statutory authority for each of the three debt collection procedures.

The following is a section by section analysis of each provision of this Rule affected by these changes:

140.1: Revises section 140.1 by inserting clear language as to coverage of the regulation.

140.2: Deletes, in most respects, section 140.2 (the definition section). The definitions of administrative offset and salary offset are now included in proposed section 140.2 ("What is a debt and how can the SBA collect it through offset?"). Several other definitions are retained for clarity, but are defined as the terms appear in the text. Section 140.2 also clarifies the three debt collection procedures.

140.3: Current sections 140.3 ("Information disclosure"), 140.4 ("Salary offset"), 140.5 ("Administrative offset"), and 140.6 ("Income tax refund offset") are deleted and replaced with new Section 140.3 ("What rights do you have when SBA tries to collect a debt from you through offset?"). Section 140.3 specifies, in clear language, debtors' rights. These rights apply to all persons affected by SBA debt collection offset procedures.

Compliance With Executive Orders 12612, 12778, and 12866, the Regulatory Flexibility Act (5 U.S.C. 601, et seq.), and the Paperwork Reduction Act (44 U.S.C. Ch. 35)

SBA certifies that this rule involves internal administrative procedures and would not be considered a significant rule within the meaning of Executive Order 12866 and would not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* It is not likely to have an annual economic effect of $100 million or more, result in a major increase in costs or prices, or have a significant adverse effect on competition or the United States economy.

For purposes of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, SBA certifies that this rule contains no new reporting or recordkeeping requirements.

For purposes of Executive Order 12612, SBA certifies that this rule would not have any federalism implications warranting the preparation of a Federalism Assessment.

For purposes of Executive Order 12778, SBA certifies that this rule is drafted, to the extent practicable, in accordance with the standards set forth in Section 2 of that Order.

List of Subjects in 13 CFR Part 140

Claims; Government employees; Income taxes; Wages.

For the reasons set forth above, SBA revises Part 140 of Title 13 of the Code of Federal Regulations to read as follows:

PART 140—DEBT COLLECTION THROUGH OFFSET

Sec.

§ 140.1 What does this part cover?
§ 140.2 What is a debt and how can the SBA collect it through offset?
§ 140.3 What rights do you have when SBA tries to collect a debt from you through offset?

Authority: 31 U.S.C. 3711, Collection and compromise; 31 U.S.C. 3720A, Reduction of tax refund by amount of debt; 5 U.S.C. 5514, Installment deduction for indebtedness to the United States; 31 U.S.C. 3716, Administrative offset; 15 U.S.C. 634(b)(6), Small Business Act.

§ 140.1 What does this part cover?

This part establishes procedures which SBA may use in the collection, through offset, of past-due debts owed to the Government. SBA's failure to comply with any provision of the regulations in this part is not available to any debtor as a defense against collection of the debt through judicial process.

§ 140.2 What is a debt and how can the SBA collect it through offset?

(a) A debt means an amount owed to the United States from loans made or guaranteed by the United States, and from fees, leases, rents, royalties, services, sales of real or personal property, overpayments, fines, penalties, damages, interest, forfeitures, or any other source. You are a debtor if you owe an amount to the United States from any of these sources.

(b) SBA may collect past-due debts through offset by using any of three procedures: administrative offset, salary offset, or IRS tax refund offset. A past-due debt is one which has been reduced to judgment, has been accelerated, or has been due for at least 90 days.

(1) *Administrative offset.* SBA may withhold money it owes to the debtor in order to satisfy the debt. This procedure is an "administrative offset" and is authorized by 31 U.S.C. 3716.

(2) *Salary offset.* If the debtor is a federal employee (a civilian employee as defined by 5 U.S.C. 2105, an employee of the U.S. Postal Service or Postal Rate Commission, or a member of the Uniformed Services or Reserve of the Uniformed Services), SBA may deduct payments owed to SBA or another federal agency from the debtor's paycheck. This procedure is a "salary offset" and is authorized by 5 U.S.C. 5514.

(i) Any amount deducted from salary in any one pay period will not exceed 15 percent of a debtor's disposable pay, unless the debtor agrees in writing to a greater percentage.

(ii) SBA also may collect against travel advances, training expenses, disallowed payments, retirement benefits, or any other amount due the employee, including lump-sum payments.

(iii) If an employee has terminated employment after salary offset has been initiated, there are no limitations on the amount that can be withheld or offset.

(3) *IRS tax refund offset.* SBA may request that IRS reduce a debtor's tax refund by the amount of the debt, as authorized by 31 U.S.C. 3720A. Where available, administrative and salary offsets must be used before collection is attempted through income tax offset. SBA may refer a debt to the IRS for a tax refund offset and take additional action against the debtor to collect the debt at the same time or in sequence. When SBA makes simultaneous or sequential referrals (within six months of the initial notice), only one review pursuant to the rules in this part and the statutes authorizing them is required.

§ 140.3 What rights do you have when SBA tries to collect a debt from you through offset?

(a) SBA must write to you and tell you that it proposes to collect the debt by reducing your federal paycheck, withholding money the Government owes you, and/or reducing your tax refund.

(b) In its written notice to you, SBA must tell you the nature and amount of the debt; that SBA will begin procedures to collect the debt through reduction of your federal paycheck, administrative offset, or reduction of your tax refund; that you have an opportunity to inspect and copy Government records relating to the debt at your expense; and that, before collection begins, you have an opportunity to agree with SBA on a schedule for repayment of your debt.

(c) SBA also must tell you that unless you respond within 60 days from the date of the notice, it will disclose to consumer reporting agencies (also known as credit bureaus or credit agencies) that you are responsible for the debt and the specific information it intends to disclose in order to establish your identity. The amount, status, history of the debt, and agency program

under which it arose also will be disclosed.

(d) If you respond to SBA within 60 days from the date of the notice, SBA will not disclose the information to consumer reporting agencies until it considers your response and determines that you owe a past-due, legally enforceable debt.

(e) Within 60 days of the notice you may present evidence that all or part of the debt is not past due or not legally enforceable.

(1) Where a salary offset or administrative offset is proposed, you will have the opportunity to present your evidence to SBA's Office of Hearings and Appeals ("OHA"). The rules in part 134 of this title govern the procedural rights to which you are entitled. In order to have a hearing before OHA, you must request a hearing within 15 days of receipt of the written notice described in this section. An OHA judge will issue a decision within 60 days of the date you filed your petition/request for a review or hearing with OHA, unless you were granted additional time within which to file your request for review.

(2) Where an income tax refund offset is proposed, you will have the opportunity to request a review and present your evidence to the appropriate SBA Commercial Loan Servicing Center at the address provided in the notice.

(f) SBA must consider any evidence you present and must first decide that a debt is past due and legally enforceable. A debt is legally enforceable if there is any forum, including a State or Federal Court or administrative agency, in which SBA's claim would not be barred on the date of offset. Non-judgment debts are enforceable for ten years; judgment debts are enforceable beyond ten years. You will be notified of SBA's decision at least 30 days before any offset deduction is made. You also will be notified of the amount, frequency, proposed beginning date, and duration of the deductions, as well as any obligation to pay interest, penalties, and administrative costs.

(g) If there is any substantial change in the status or amount of your debt, SBA will promptly report that change to each consumer reporting agency it originally contacted.

(h) SBA will obtain satisfactory assurances from each consumer reporting agency that the consumer reporting agency has complied with all federal laws relating to provision of consumer credit information.

(i) If your debt is being repaid by reduction of your income tax refund and you make any additional payments to SBA, SBA will notify the IRS of these payments and your new balance within 10 business days of receiving your payment.

(j) When the debt of a federal employee is reduced to court judgment, the employee is not entitled to further review by SBA, but is only entitled to notice of a proposed salary offset resulting from the judgment. The amount deducted may not exceed 15% of disposable pay, except when the deduction of a greater amount is necessary to completely collect the debt within the employee's remaining period of employment.

(k) When another federal agency asks SBA to offset a debt for it, SBA will not initiate the requested offset until it has received from the creditor agency a written certification that the debtor owes a debt, its amount, and that the provisions of all applicable statutes and regulations have been complied with fully.

(l) SBA may make an offset prior to completion of the procedures described in this part, if:

(1) Failure to make an offset would substantially prejudice the government's ability to collect the debt; and

(2) The time before the payment would otherwise be made to you does not reasonably permit the completion of the procedures.

(3) Such prior offset then must be followed by the completion of the procedures described in this part.

(m) Where an IRS tax refund offset is sought, SBA must follow the Department of the Treasury's regulations governing offset of a past-due, legally enforceable debt against tax overpayment.

Dated: November 22, 1995.

Philip Lader,

Administrator.

[FR Doc. 95-29564 Filed 12-4-95; 8:45 am]

BILLING CODE 8025-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 94-NM-247-AD; Amendment 39-9449; AD 95-01-06 R1]

Airworthiness Directives; Boeing Model 737-200 and -300 Series Airplanes Equipped With Cargo Doors Installed in Accordance With Supplemental Type Certificate (STC) SA2969SO

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment revises an existing airworthiness directive (AD), applicable to certain Boeing Model 737-200 and -300 series airplanes, that currently requires inspections to detect cracking in the radii on the support angles on the lower jamb (latch lug fittings) of the main deck cargo door, and replacement of cracked parts. That amendment was prompted by reports of premature fatigue cracking on the support angles on the lower jamb of the main deck cargo door. The actions specified in that AD are intended to prevent in-flight separation of the main deck cargo door from the airplane due to fatigue cracking on the support angles on the lower door jamb. This amendment requires a change in the cognizant aircraft certification office for requesting approvals of alternative methods of compliance with the provisions of this AD.

DATES: Effective December 20, 1995.

The incorporation by reference of certain publications listed in the regulations was approved previously by the Director of the Federal Register as of January 24, 1995 (60 FR 2323, January 9, 1995).

Comments for inclusion in the Rules Docket must be received on or before February 5, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 94-NM-247-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

The service information referenced in this AD may be obtained from Pemco Aeroplex, Inc., P.O. Box 2287, Birmingham, Alabama 35201-2287. This information may be examined at the FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, Suite 2-160, College Park, Georgia; or at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Curtis Jackson, Aerospace Engineer, Airframe Branch, ACE-120A; FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, Suite 2-160, College Park, Georgia 30337-2748; telephone (404) 305-7358; fax (404) 305-7348; or Della Swartz, Aerospace Engineer, Airframe Branch, ANM-120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2785; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION: On December 29, 1994, the FAA issued AD 95-01-06, amendment 39-9117 (60 FR 2323, January 9, 1995), applicable to certain Boeing Model 737-200 and -300 series airplanes, to require repetitive visual inspections to detect cracking in the radii on the support angles on the lower jamb of the main deck cargo door, and replacement of cracked parts with new parts. For those operators requesting approval of alternative methods of compliance (AMOC) with the requirements of that AD, that AD requires that those requests be submitted to the Seattle Aircraft Certification Office (ACO).

That AD was prompted by reports of premature fatigue cracking on the support angles on the lower jamb of the main deck cargo door. The actions required by that AD are intended to prevent in-flight separation of the main deck cargo door from the airplane due to fatigue cracking on the support angles on the lower door jamb.

Since the issuance of that AD, the FAA has reviewed the requirement for operators requesting approval of an AMOC to submit those requests to the Seattle ACO. The FAA considered the physical proximity of the supplemental type certificate (STC) holder, Pemco, which is located in Birmingham, Alabama, to the Atlanta ACO, which is located in College Park, Georgia. The FAA has determined that the Atlanta ACO would be more readily accessible to Pemco than the Seattle ACO, which is located in Renton, Washington. Consequently, the FAA finds that revising this AD to change the cognizant ACO for requesting approval of an AMOC, from the Seattle ACO to the Atlanta ACO, would allow the FAA to be more responsive to the needs of its customers. Therefore, the FAA has determined that it is appropriate to take action to revise paragraph (b) of that AD to change the cognizant ACO from Seattle to Atlanta.

Since unsafe condition has been identified that is likely to exist or develop on other airplanes of this same type design, this AD revises AD 95-01-06 to continue to require repetitive visual inspections to detect cracking in the radii on the support angles on the lower jamb of the main deck cargo door and replacement of cracked parts with new parts. This AD changes the cognizant ACO for requesting approval of an AMOC from the Seattle ACO to the Atlanta ACO.

This AD merely changes, for those operators requesting approval of an AMOC, the cognizant office from the Seattle ACO to the Atlanta ACO. In light of this, the FAA has determined that this AD has no adverse economic impact and imposes no additional burden on any person. Therefore, notice and opportunity for prior public comment hereon are unnecessary, and the amendment may be made effective in less than 30 days after publication in the **Federal Register**.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES.** All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 94-NM-247-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39--AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40101, 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-9117 (60 FR 2323, January 9, 1995), and by adding a new airworthiness directive (AD), amendment 39-9449, to read as follows:

95-01-06 R1 Boeing: Amendment 39-9449. Docket 94-NM-247-AD. Revises AD 95-01-06, Amendment 39-9117.

Applicability: Model 737-200 and -300 series airplanes equipped with main deck cargo doors installed in accordance with supplemental type certificate (STC) SA2969SO, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (b) of this AD to request approval from the FAA. This approval may address either no action, if the current configuration eliminates the unsafe condition; or different actions necessary to address the unsafe condition described in

this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any airplane from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent in-flight separation of the main deck cargo door from the airplane, accomplish the following:

Note 2: This AD references Pemco Alert Service Letter 737–53–0003, Revision 3, dated December 22, 1994, for information concerning inspection and replacement procedures. In addition, this AD specifies replacement requirements different from those included in the service letter. Where there are differences between the AD and the service letter, the AD prevails.

(a) Within 50 flight after January 24, 1995 (the effective date of AD 95–01–06, amendment 39–9117), or within 50 flight cycles after installation of STC SA2969SO, whichever occurs later, perform a visual inspection to detect cracking in the radii on the support angles on the lower jamb of the main deck cargo door, in accordance with Pemco Alert Service Letter 737–53–0003, Revision 3, dated December 22, 1994.

(1) If no cracking is detected, repeat the visual inspection thereafter at intervals not to exceed 450 flight cycles.

(2) If any cracking is detected, prior to further flight, replace the cracked part with a new part in accordance with the service letter. Repeat the visual inspection thereafter at intervals not to exceed 450 flight cycles.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office (ACO). Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta ACO.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection and replacement procedures shall be done in accordance with Pemco Alert Service Letter 737–53–0003, Revision 3, dated December 22, 1994. This incorporation by reference was approved previously by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51 as of January 24, 1995 (60 FR 2323, January 9, 1995). Copies may be obtained from Pemco Aeroplex, Inc., P.O. Box 2287, Birmingham, Alabama 35201–2287. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Small Airplane Directorate, Atlanta Aircraft Certification Office, Campus Building, 1701 Columbia Avenue, Suite 2–160, College Park, Georgia 30337–2748; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on December 20, 1995.

Issued in Renton, Washington, on November 28, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 95–AWP–15]

Establishment of Class E Airspace; Byron, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action establishes a Class E airspace area at Byron, CA. The development of a Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway (RWY) 30 has made this action necessary. The intended effect of this action is to provide adequate controlled airspace for Instrument Flight Rules (IFR) operations at Byron Airport, Byron, CA.

EFFECTIVE DATE: 0901 UTC, February 29, 1996.

FOR FURTHER INFORMATION CONTACT: Scott Speer, Airspace Specialist, System Management Branch, AWP–530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California, 90261, telephone (310) 725–6533.

SUPPLEMENTARY INFORMATION:

History

On October 10, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by establishing a Class E airspace area at Byron, CA (60 FR 52638). The development of a GPS SIAP at Byron Airport has made this action necessary.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments to the proposal were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9C, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. Class E airspace designations listed in this document will be published subsequently in this Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) establishes a Class E airspace area at Byron, CA. The development of a GPS SIAP at Byron Airport has made this action necessary. The intended effect of this action is to provide adequate Class E airspace for aircraft executing the GPS RWY 30 SIAP at Byron Airport, Byron, CA.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 10034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AWP CA E5 Byron, CA [New]

Byron Airport, CA
(Lat. 37°49'40" N, long. 121°37'27" W)

That airspace extending upward from 700 feet above the surface within a 4.9-mile radius of Byron Airport.

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Part 455

Regulatory Flexibility Act and Periodic Review of Used Motor Vehicle Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Commission announces that its review of the Used Car Rule (the "Rule"), which was conducted pursuant to the Regulatory Flexibility Act ("RFA"), and the Commission's review program, has been completed. Having considered all of the issues raised during the comment period, the Commission is now issuing non-substantive amendments to the Rule. The Commission is making several minor grammatical changes to the Spanish language version of the Buyers Guide. Further, the Commission is amending the Rule to permit dealers to post Buyers Guides anywhere on a used vehicle, instead of requiring that they be posted on a side window, provided the Buyers Guide is conspicuously and prominently displayed and both sides can be easily read. Finally, the Commission is amending the Rule to allow dealers the option of obtaining a consumer's signature on the Buyers Guide, if accompanied by a disclosure that the buyer is acknowledging receipt of the Buyers Guide at the close of the sale.

DATES: The effective date of these non-substantive amendments will be January 4, 1996.

ADDRESSES: Requests for copies of the regulations and the notice of final, non-substantive amendments should be sent to Public Reference Branch, Room 130, Federal Trade Commission, 6th and Pennsylvania Ave., NW, Washington D.C. 20580.

FOR FURTHER INFORMATION CONTACT: George Brent Mickum IV, Attorney, Federal Trade Commission, Division of Enforcement, Bureau of Consumer Protection, Washington, D.C. 20580, (202) 326–3132.

SUPPLEMENTARY INFORMATION:

I. Introduction

On May 6, 1994, the Commission, in accordance with the RFA's requirements, and its own program to review all its rules and guidelines periodically, published a Notice in the **Federal Register** soliciting comments on the Rule.[1] The Notice solicited comments about the impact of the Rule generally, and whether it had had a significant economic impact on small entities,[2] and, if so, whether the Rule should be amended to minimize any such impact. The Notice also sought comment on certain proposed changes to the Rule.

The Commission received 26 comments in response to the Notice.[3] These comments came from eight used car dealers;[4] four Attorneys General;[5] four consumer protection groups;[6] three trade associations;[7] one state government;[8] one radio station;[9] one national distributor of Buyers Guides;[10] one CPA firm that represents used car dealers;[11] and one consumer.[12]

II. The Regulation

The Commission promulgated the Used Car Rule under the authority of the Federal Trade Commission Act, 15 U.S.C. 41 *et seq.* ("FTC Act"), and the Magnuson Moss Warranty Act, 15 U.S.C. 2309, on November 19, 1984. 49 FR 45692 (1984). The Rule became effective on May 9, 1985.[13] A violation of the Rule constitutes an unfair or deceptive act or practice under the FTC Act, and one who violates the Rule is subject to civil penalties of up to $10,000 per violation.

The Used Car Rule is primarily intended to prevent and to discourage oral misrepresentations and unfair omissions of material facts by used car dealers concerning warranty coverage. The Rule provides a uniform method for written disclosure of warranty information on a window sticker called the "Buyers Guide." The Rule requires sellers to disclose on the Buyers Guide the basic terms and conditions of any warranty offered in connection with the sale of a used car, including the duration of coverage, the percentage of total repair costs to be paid by the dealer, and the exact systems covered by the warranty.

The Rule also requires certain other disclosures, including: a suggestion that consumers ask the dealer if a pre-purchase inspection is permitted; a warning against reliance on spoken promises that are not confirmed in writing; and a list of fourteen major systems of an automobile and the major problems that may occur in these systems. The Rule also provides that the Buyers Guide disclosures are incorporated by reference into the sales contract and govern in the event of an inconsistency between the Buyers Guides and the sales contract.

The public comments on the questions asked in the Notice and the additional information gathered during the reviews are discussed below.

III. Non-Substantive Amendments to Spanish Language Version of the Buyers Guide

In the Notice, the Commission proposed two non-substantive amendments to the Rule involving the

---

[1] 59 FR 23647 (May 6, 1994) ("the Notice").

[2] For the purpose of the RFA review, a "small entity" is a used motor vehicle dealer with less than $11.5 million in annual sales, as defined by the Small Business Size Standards, 13 CFR 121.601.

[3] The comments were placed on the public record under category 23 (Regulatory Flexibility Act Review Comments) of Public Record Docket No. P944202. References to the comments are made by means of the author and number of the comment and, when appropriate, the page of the comment. Two of the comments were consumer complaints that were inadvertently classified as comments. Although some comments were submitted shortly after the closing date of July 6, 1994, the Commission has included them in its analysis.

[4] Chuck Gould, J.O.A. Motors Ltd., B–03; Anonymous South Carolina dealer, B–04; Karl Kroeger, K&K Auto Sales, Inc., B–05; F. Whalen, B–06; Kenny Loveless, Northside Auto Sales, B–09; Mike Zibura, B–10; Lee S. Maas, Sun-West Audi, B–18; Duane H. Wallace, Town & Country Chevrolet Oldsmobile Inc., B–26.

[5] Alaska Attorney General, Bruce M. Botelho, B–01; Illinois Attorney General, Roland W. Burris, B–08; Iowa Attorney General, William L. Brauch, Assistant Attorney General, B–15; Washington Attorney General, Christine O. Gregoire, B–17.

[11] Hundman & Woodward, Carl Woodward, C.P.A., B–21.

[12] Jay R. Drick, Esq., B–25. As indicated earlier, two of the comments were consumer complaints that were misclassified as comments. Warren and Irma Muncey, B–02; Sam A. Amato, B–22.

[13] Two states, Wisconsin and Maine, subsequently petitioned the Commission and received exemptions pursuant to section 455.6 of the Rule.

Spanish language version of the Buyers Guide, Section 455.5 of the Rule. The Commission received three comments favoring the changes and none in opposition.[14] The Commission has thus determined to adopt the proposed amendments.[15] The first change is grammatical: the "As Is" ("Como Esta-Sin Garantia") section of the Buyers Guide reads "El vendedor no asume ninguna responsabilidad por cualquier *las reparaciones* * * *" (emphasis added). This language is amended to read: "El vendedor no asume ninguna responsabilidad por cualquier reparacion * * *" The second change appears in the "Warranty" ("Garantia") section of the Buyers Guide. The word "vendedo" in the second full sentence is amended to "vendedor." Consequently, the sentence is also amended to read "Pida al *vendedor* una copia del documento * * *."

IV. Responses to the Federal Register Notice

Question One

Is there a continuing need for the Rule?

a. What benefits has the Rule provided to purchasers of the products or services affected by the Rule?

b. Has the Rule imposed costs on purchasers?

i. *Summary of Comments.* The comments from the eight dealers and the CPA firm (its clients are dealers) all favored rescinding the Rule. They stated that the Rule places an enormous burden on small businesses. Generally, these dealer comments [16] and the CPA firm [17] contended that the consumer benefit derived from the Rule was not justified by the cost of displaying the form, and that consumers pay no attention to the Buyers Guide. None of these comments provided any specific information in support of their contentions.

All of the other comments, including those from dealer trade associations, stated that the Rule is beneficial and that there is a continuing need for the Rule. Both NADA and NIADA reported that the Rule has helped avoid confusion regarding warranty coverage, and that the Buyers Guide is beneficial to both customers and dealers. Both NADA and NIADA stated that the costs associated with the Rule seem to be reasonable.[18]

NCCE noted that because young people and consumers with limited resources are the major purchasers of used cars, objective, reliable, point-of-sale information is essential to an effective consumer decision. The comment stated that the FTC Used Car Rule provides information to consumers that assists them in making a wise and well informed decision, stimulates comparison shopping, and stimulates the competitive spirit of our free enterprise system.[19] Michigan's Department of State noted that the longer the Rule is in place, the more the public becomes aware of issues regarding warranty coverage and extended service agreements.[20] NCLC and NACAA noted that the Rule allows consumers an opportunity to see what warranty protection is available and to compare warranty coverage among vehicles and dealers.[21] The Iowa Attorney General noted that because motor vehicle designs are growing increasingly complex and repairs more expensive, warranty coverage is of increasing importance to motor vehicle purchasers.[22] Consequently, the Rule provides the consumer with valuable information.

ii. *Discussion.* In the original rulemaking, the Commission found that "many used car dealers mislead consumers into believing that they have broad post-purchase warranty coverage when in fact consumers receive limited or no warranty protection * * *. In many cases dealers make verbal promises to repair defects after sale that are contradicted by final written contract terms * * *."[23] The Commission concluded that the "practices are pervasive and among the chief sources of complaints received by various consumer protection organizations around the country."[24]

Although the trade associations asserted that some of the aforementioned problems have abated, other comments suggested that some of these problems continue to occur. Used car complaints continue to be among the most frequent type of complaints received by consumer protection groups across the country,[25] and the majority of these organizations suggested amending the Rule in ways they contend would provide even more protection to consumers.

No evidence was adduced during this review that contravenes the Commission's 1984 findings, and no persuasive reasons were advanced in the comments that would suggest that reconsideration is appropriate. The dealer comments favoring repeal of the Rule because it is burdensome are conclusory and contradicted by other comments. For example, Reynolds & Reynolds, a publisher of Buyers Guides, noted that the average cost of a Buyers Guide is 7.6 cents. It also noted that because the compliance costs are so small they are usually absorbed and rarely passed on to the purchaser.[26] Accordingly, because the Rule is achieving its objectives and is cost effective, the Commission is retaining the Rule.

Question Two

What changes, if any, should be made to the Rule to increase the benefits of the Rule to purchasers?

a. How would these changes affect the costs the Rule imposes on firms subject to its requirements?

The comments responding to this question are discussed category-by-category below.

A. Disclosing Defects

i. *Summary of Comments.* Many comments suggested general changes to the Rule to increase its effectiveness for consumers. Six comments recommended that the Rule require dealers to make written disclosure of known defects in all "As-Is" sales.[27] Texas's Consumer Credit Commissioner suggested amending the Rule to inform consumers that "As-Is" does not mean dealers can sell vehicles with material defects.[28]

ii. *Discussion.* In the original rulemaking, after carefully considering the issue, the Commission decided not to require disclosure of known defects because it "concluded that the known defects disclosure requirement will not provide used car buyers with a reliable source of information concerning a car's mechanical condition and that the provision would be exceedingly difficult to enforce."[29] The Commission determined that the warranty and "As-Is" disclosures—along with the warnings about spoken promises and the pre-purchase inspection notice—are effective remedies for the deceptive practices occurring in the used car industry.[30] No new information was provided in this review on whether provisions requiring disclosure of known defects provide substantial information benefits in practice, nor did the Commission staff's independent review of available information contradict this determination.[31] The only pertinent evidence regarding this issue relates to Wisconsin's experience with its statute.

The SBP indicates that during the original rulemaking the Commission examined Wisconsin's experience with its used car rule, which requires dealers to inspect their cars and to disclose the results of the inspection. This examination revealed that 51% of Wisconsin consumers still ultimately experienced repair problems not identified at the time of purchase.[32]

The Commission was aware of this information when it promulgated the Rule. There is no new evidence indicating that reliable information would be disclosed if such a provision were required or that efficient enforcement would be feasible. Based on the foregoing, the Commission has determined that changing its original position on defect disclosures is unnecessary.

B. Requiring Dealers To Keep Copies of the Buyers Guide and Requiring a Signature Line

i. *Summary of Comments.* Both NACAA and the Iowa Attorney General suggested amending the Rule to require dealers to obtain a consumer signature on the Buyers Guide to ensure receipt of the document, and to retain copies of the signed Buyers Guide.[33] Both contended that enforcement of the Rule would be easier because the absence of a signed Buyers Guide in the dealer's records would create the inference that no Buyers Guide was provided. Further, the dealer copy would be evidence of the warranty disclosures that were made. On the other hand, NCLC suggested that some dealers already have consumers sign the back of the Buyers Guide at the close of the deal in an attempt to cover themselves for failing to post Buyers Guides in vehicles earlier as required by the Rule.[34] NCLC stated that such a requirement could undermine the intent of the Rule because signing a piece of paper, perhaps as part of signing a stack of papers at closing, does not prove that the Buyers Guide was posted on the vehicle, that the Buyers Guide was given to the consumer at an appropriate time, or that the buyer was apprised of the warranty terms.

ii. *Discussion.* In initially approving the form of the Buyers Guide, the Commission determined that "a uniform method of disclosure will alleviate confusion and possible deception which might result from inconsistent versions of the Buyers Guide." SBP at 45709. Consequently, the Rule does not allow dealers to modify the format of the Buyers Guide. In response to dealer requests, however, staff has informed dealers, through informal staff opinion letters, that staff was not likely to recommend enforcement actions against a dealer asking for a consumer's signature on the back of the Buyers Guide.

Allowing a signature to be obtained on the back of the Buyers Guide was permitted to assist dealers who wanted protection against consumer claims that they had failed to provide Buyers Guides, as required by law.[35] From the dealers' perspective, one effective way to document that a Buyers Guide was received by a consumer is to obtain the consumer's signature and keep a copy of the signed Buyers Guide in their files. Thus, there is now considerable incentive for dealers to obtain signatures. Requiring a signature to be obtained appears unnecessarily burdensome.

The Commission also notes that the presence or absence of a signature on a Buyers Guide, by itself, does little to ensure that the Buyers Guide will be posted as required by the Rule. There is no benefit unless dealers also are required to keep signed copies, any omissions thereby demonstrating noncompliance. However, the Commission does not believe the benefits of a mandatory signing requirement along with a recordkeeping provision are likely to justify the costs those requirements would impose.[36]

Dealers, however, may want to obtain signatures and maintain copies of the Buyers Guide in their files. The Commission staff's enforcement advice permits this, but such advice is not necessarily widely known. The Commission, therefore, is amending the Rule to allow an optional signature line on the back of the Buyers Guide. To ensure that the customer's signature is not misused, and to put dealers on notice that obtaining a signature does not satisfy all of the Rule's requirements, the optional signature line is permitted only when accompanied by language in immediate proximity to the line stating: "I hereby acknowledge receipt of the Buyers Guide at the closing of this sale."[37]

C. Scope of the Rule

1. Private Sales

NIADA suggested that the FTC require that everyone display a Buyers Guide in any used motor vehicle that is advertised for sale.[38] This issue was thoroughly considered during the original rulemaking. As noted in the SBP, private parties generally do not offer warranties, and therefore, at least as to this issue, it is unlikely that there would be any misunderstandings. Also,

[14] NIADA, B–7 at 1; TADA, B–11 at 3; NACAA, B–24 at 3.

[15] Dealers may use up existing stocks of the current version of the Spanish Buyers Guide.

[16] B–05 at 1; B–06 at 1; B–09 at 1; B–18 at 1; B–26 at 1.

[17] B–21. Henceforward, all references to the dealer comments will include this comment.

[18] See, *e.g.*, NIADA Comment, B–7 at 2.

[19] B–12 at 1. The comment indicates that the Commission's objectives in promulgating the Rule have, in large part, been achieved.

[20] B–14 at 1.

[21] NCLC, B–23 at 1; NACAA, B–24 at 1–2.

[22] B–15 at 2.

[23] SBP, 49 FR 45692, 45702 (Nov. 19, 1984).

[24] *Id.*

[25] For example, NACAA's comment notes that "[a]uto sales consistently rank among the most numerous consumer complaints. In surveys of NACAA members conducted in 1992 and 1993, auto sales were in the top five complaint categories. A report issued by the Council of Better Business Bureaus revealed that in 1993 auto sales problems were the fifth most frequent complaint made to BBBs nationwide. NAAG has also released 1993 statistics which list automobiles (including sales and service) as the third largest category of complaints." B–24 at 1.

[26] B–20 at 1.

[27] Alaska AG, B–01 at 1–2; Illinois AG, B–08 at 1; WBBM Newsradio, B–13 at 1; Michigan Department of State, B–14 at 1; Office of Consumer Credit Commissioner, B–16 at 1; NACAA, B–24 at 2–3.

[28] B–16 at 1.

[29] *Id.* at 45712.

[30] *Id.*

[31] For example, a literature search for economic research on "defects disclosures" turned up two titles, one an FTC working paper, the other a dissertation from a student at the University of Wisconsin. The two studies both use data from the 1970's (pre-Used Car Rule SBP) and neither finds a beneficial effect of the disclosures on the used car market.

[32] During the rulemaking, the Commission considered the results of a study conducted in Wisconsin, involving surveys of both dealers and consumers. See, *e.g.*, SBP at 45712.

[33] B–24 at 3; B–15 at 3–4.

[34] B–23 at 8–9.

[35] Although some dealers only give consumers the Buyers Guide at closing and do not post, Commission investigations reveal that some consumers claim that they were not provided with a copy of the Buyers Guide, when, in fact, they were.

[36] The issue of requiring dealers to maintain copies of the Buyers Guide was considered in the original proceeding. In an effort to minimize the Rule's recordkeeping requirements, the Commission decided not to require dealers to maintain copies. The primary thrust of the Rule was to provide pre-sale information about warranty coverage and to ensure that a copy of the Buyers Guide was given to the purchaser. The Commission concluded the Rule would achieve these results without a recordkeeping requirement. Dealers, of course, are free to maintain whatever records they believe are appropriate, and many in fact do keep copies. Further, recent legislation amending the Paperwork Reduction Act requires agencies to attempt to reduce the paperwork burden associated with their regulations. Adding a recordkeeping requirement would constitute a new paperwork burden.

[37] Dealers are advised that the customer's signature will be viewed merely as an acknowledgement that the customer has received the Buyers Guide, which is only one of a dealer's duties under the Rule. The dealer is still responsible for ensuring that posting occurs when a vehicle is offered for sale. Further, the dealer has the responsibility to ensure that any warranty terms that the dealer and the buyer negotiate are reflected on the Buyers Guide, as required by section 455.3(a) of the Rule. This is a non-substantive amendment that does not require Magnuson-Moss rulemaking procedures, as specified in section 18 of the FTC Act, 15 U.S.C. 57a.

[38] B–7 at 3.

enforcing the Rule in private sales would not be cost effective. NIADA offered no data that would contradict the findings in the SBP. Thus, the Commission has determined that a proceeding to amend the Rule to include private sales under the Rule is unnecessary.

2. Demonstrators

i. *Summary of Comments.* NADA suggested that Buyers Guides not be required on "demonstrator" vehicles, because such vehicles also are required to have a new car Monroney Label that cannot be removed until after the vehicle is sold at retail.[39] The purpose of the Monroney label is to provide consumers with the manufacturers' suggested retail price for the vehicle, and a list of the optional equipment that comes with the vehicle. NADA believes that the Buyers Guide, when combined with the Monroney Label, confuses customers without providing additional useful information. It stated that all demonstrators are covered by factory new vehicle warranties, and manufacturers require dealers to review the warranty coverage of new vehicles with the customer at the time of delivery.[40]

ii. *Discussion.* "Demonstrator" vehicles are considered "used" under the Rule because they have been driven for purposes other than test driving or moving.[41] However, for purposes of the Monroney Act they are "new" because they have not been titled.[42] In promulgating the Used Car Rule, the Commission expressly rejected defining whether a vehicle is new by virtue of titling laws.[43] The Commission determined that the definition of a used vehicle should be consistent with the Commission's decision in *Peacock Buick, Inc.*[44] The *Peacock* order prohibits the defendants from "[r]epresenting * * * that any vehicle is new when it has been used in any manner, other than the limited use necessary in moving or road testing a vehicle prior to delivery of such vehicle to the customer."[45]

Further, the rulemaking record reflected that used cars sold as demonstrators were subject to dealer oral misrepresentations. Thus, there was substantial justification on the record for including demonstrators within the scope of the Rule.[46] Consequently, the Commission defined a "used vehicle" as "any vehicle driven more than the limited use necessary in moving or road testing a new vehicle prior to delivery. * * *"[47] In adopting this definition, the Commission was aware that the term would cover demonstrators, and that the definition was broader than the definition employed in some states, which rely on titling to determine whether a vehicle is used. Because of the Commission's prior consideration of this issue and the fact that the Monroney Label does not serve the purposes the Buyers Guide was designed to address, the Commission has determined that amending the Rule's coverage of demonstrators is unnecessary.

3. Salvage Vehicles

Iowa's Attorney General suggested that the Commission amend the Rule to cover sales of vehicles on salvage or equivalent certificates of title.[48] The Rule excludes from the definition of a "used vehicle" "any vehicle *sold only for scrap or parts (title documents surrendered to the State and a salvage certificate issued).*"[49] Addressing this issue in the SBP, the Commission stated:

> Insofar as a vehicle is sold for its parts and not as an operating vehicle, there appears to be no need to provide consumers with the kind of information customarily used to evaluate an automobile as a means of personal transportation. Accordingly, the definition of "used vehicle" specifically excludes those cars sold only for salvage.[50]

Although the Iowa AG's comment does not discuss the reasons why the Rule should be extended to include salvaged vehicles, the Commission is aware that the sale of salvaged vehicles is viewed as a problem in some parts of the country. This occurs because unscrupulous individuals take advantage of state laws that do not require titling documents to show that a vehicle has been rebuilt from salvaged vehicles. These individuals obtain salvaged vehicles, restore them, and then transport them to a state that does not require the title to show that a vehicle has been salvaged. There, a clean title with no reference to the fact that a vehicle has been salvaged is obtained. The vehicle may then be taken to any state, even a state that requires a salvage disclosure, and be retitled and sold as a used vehicle without disclosing that it was a salvaged vehicle.

The Used Car Rule, however, only addresses warranty coverage, not the source of car parts, which is the underlying issue with vehicles rebuilt from salvaged parts. Even if the Rule were amended to require Buyers Guides for such vehicles, consumers still would not have information about the vehicle's history. Further, because the vehicle could be sold "As-Is" or with a limited warranty of short duration, a Buyers Guide is unlikely to provide the desired protection for individuals purchasing vehicles rebuilt from salvaged parts.

This problem is best addressed by the states or by federal legislation,[51] and not by an amendment to the Rule. To the extent that consumers want or need to know that the vehicle they are purchasing is constructed from a salvaged vehicle or vehicles, the more appropriate and effective remedy would be uniform laws regarding the way salvage vehicles are required to be titled. For these reasons, the Commission has determined that it is unnecessary to amend the Buyers Guide to indicate that a vehicle has been salvaged.

4. Leased Vehicles

NCLC suggested that the Rule be amended to cover leased used vehicles.[52] The comment, however, did not provide information indicating the leasing of used vehicles is particularly pervasive or fraught with the same types of problems the Commission found were associated with the sale of used cars. Other than NCLC's suggestion, there is no evidence on the record to suggest a need for the Commission to initiate a proceeding to amend the Rule. The Consumer Leasing Act, among other things, requires lessors to disclose in writing who is responsible for repairs and maintenance on the vehicle and whether warranties or service contracts are available.[53] Pursuant to that Act, if a warranty is offered the complete terms must be set forth in writing. The Commission's research into the market for used leased vehicles indicates that most used vehicles that are leased come with warranties. Thus, lessors are required to provide the same type of information required by the Used Car Rule (although not via a window sticker format). Accordingly, the Commission has determined that the suggested change is unnecessary.

D. Amend Language That the Buyers Guide Controls in the Event of a Discrepancy

i. *Summary of Comments.* NCLC suggested changing the language in Section 455.3(b) of the Rule, which incorporates the Buyers Guide into the written contract by reference and provides that the Buyers Guide controls in the event of any discrepancy. NCLC stated that the requirement that the Buyers Guide overrides any contrary provisions is too broad and might in some cases have the Buyers Guide override greater protections in the contract.[54] NCLC preferred language saying that if there are contrary provisions in the contract, the provision that offers the greatest warranty protection to the consumer is applicable.[55]

ii. *Discussion.* The purpose of the disclosure in Section 455.3(b) is to provide consumers with protection by allowing information to be considered that might otherwise not be considered under contract law. Specifically,

> By integrating the Buyers Guide within the "four corners" of the used car sales contract, the Commission intends that the Buyers Guide become part of the written agreement between buyer and seller, so that, in the event of disputes between buyers and sellers, the information on the Buyers Guide would fall outside the exclusions of the parol evidence rule of contract law.[56]

The NCLC comment envisions a situation where, for example, a written contract offers a warranty but the Buyers Guide is marked "As-Is" and then incorporated into the contract, negating or overriding the warranty described in the contract. Because the Rule states that the Buyers Guide controls, the consumer could, theoretically, be without recourse. However, the Commission has never encountered this problem, most likely because the Buyers Guide, if conforming to the Rule, should contain any extra protections set forth in the contract. In fact, the Rule places an affirmative duty on dealers to ensure that the Buyers Guide reflects the actual terms negotiated. Section 455.3(b) of the Rule states that the "information on the *final* version of the window form is incorporated into the contract * * *" (emphasis added),[57] and section 455.4 states that "*[A]ny final warranty terms agreed upon * * * must be identified in the sales contract and summarized on the copy of the Buyers Guide given to the buyer.*"[58] Accordingly, there will be no conflict where the dealer complies with the Rule. Where the dealer does not, and the Buyers Guide contains the "As-Is" statement, there usually will be ample evidence that this was not a "final" Buyers Guide reflecting the terms negotiated.[59]

For these reasons, the Commission has determined that action to amend the Rule in this regard is unnecessary.

E. "AS-IS" Version of the Buyers Guide May Be Depriving Consumers of Oral or Implied Warranty Rights Under UCC or State Law

i. *Summary of Comments.* NCLC recommended that the Commission clarify use of the word "warranty," as used on the Buyers Guide. The comment notes that, under the UCC, oral express warranties may be given in an individual transaction, notwithstanding that written warranties are not provided.[60] Consequently, NCLC believed that the term "As-Is No Warranty" on the Buyers Guide is confusing, because, pursuant to the Rule's definition, the term "No Warranty" only means no *written* warranty.[61] Therefore, NCLC contended that the "As-Is No Warranty" notice on the Buyers Guide could conflict with UCC protections and mislead consumers into believing that any express oral warranty is voided when the dealer provides an "As-Is No Warranty" Buyers Guide.[62] Moreover, NCLC contends that a dealer might make oral warranties which are recognized by state law, but later use the "As-Is No Warranty" language on the Buyers Guide as evidence that no oral warranties had been offered.

NACAA similarly stated that:

> In many jurisdictions, oral or written representations (other than [those found on] the "Buyers Guide") are enforceable. To remedy this conflict, the [R]ule should be changed to say that while dealers may not make any statements or take any actions that would be contrary to the disclosures required in §§ 455.2 and 455.3, the "Buyers Guide" may not be used to disclaim any rights that consumers may be able to assert under state or local law* * *.[63]

In addition, NCLC stated that the warranty section of the Buyers Guide should be changed. The comment pointed out that a warranty, as defined in § 455.1(d)(5), is an undertaking in writing to refund, repair, replace, maintain, or take other action with respect to the vehicle.[64] NCLC noted, however, that the form language written on the Guide speaks only in terms of repair. It does not appear to allow any option of refund, replacement, maintenance, or other action. NCLC suggested that the Buyers Guide be changed to reflect that these as well as other remedies are options.[65]

As a corollary to the foregoing discussion, several comments contended that the most frequently used version of the Buyers Guide—having only "AS-IS-NO WARRANTY" and "WARRANTY" designations—encourages dealers to sell cars without warranties. This version of the Buyers Guide provides dealers with two choices, either to give an express written warranty or to sell the car "As-Is" (with no express or implied warranties). An alternate "Implied Warranties Only" Buyers Guide is provided for in § 455.2(b)(ii) for use in those states that prohibit "As-Is" sales.

---

[39] Under the Monroney Act, 15 U.S.C. 1231–33, new vehicles must display a document (called the Monroney Label) that contains the manufacturer's price, all optional equipment on the vehicle, the location of the dealer to whom the vehicle was shipped, and the Vehicle Identification Number of the car.

[40] B–19 at 2.

[50] SBP at 45707.

[51] The Final Report of the Motor Vehicle Title, Registration, and Salvage Advisory Committee, submitted by a Presidential Task Force on February 10, 1994, proposes federalizing the definition of a salvage vehicle to prevent the practice of allowing salvage vehicles to be retitled in states that do not require disclosure on the title certificate that a vehicle is a salvaged vehicle.

[52] B–23 at 3.

[53] 15 U.S.C. 1667 *et seq.*; see also 12 CFR 213.

[54] B–23 at 2.

[55] *Id.*

[56] SBP at 45710.

[57] Section 455.3(a) states that the dealer must provide the buyer with a Buyers Guide containing all of the disclosures required by the Rule, "and reflecting the warranty coverage agreed upon."

[58] SBP at 45711 (emphasis added).

[59] Other documents generated in used car sales transactions also would be pertinent to a decision whether a Buyers Guide reflects the "final version" of the deal negotiated between the buyer and the dealer. For example, the Warranty Disclosure Rule requires that consumers be given written information regarding warranty terms and coverage. It also provides that written warranty terms become "part of the basis of the bargain between the supplier and the buyer . . ." 16 CFR section 701.1(c)(2) Thus, if warranty documents are considered part of the contract, and a Buyers Guide indicates that a vehicle was sold "As-Is," the warranty documents would appear to be evidence that the Buyers Guide did not reflect the final deal, and the language in section 455.3(b) of the Rule would not be controlling.

[60] B–23 at 2.

[61] Under the Rule, "warranty" means "any undertaking in writing, in connection with the sale by a dealer of a used vehicle, to refund, repair, replace, maintain or take other action with respect to such used vehicle and provided at no extra charge beyond the price of the used vehicle." NCLC noted that the definition is very similar to the one that appears in the Magnuson-Moss Warranty Act, 15 U.S.C. 2301(6)(B). See SBP at 45709 ("These subsections define the terms 'warranty,' 'implied warranty,' and 'service contract' in a manner which conforms to the definitions of those terms in the Magnuson-Moss Warranty Act").

[62] According to NCLC, the UCC allows dealers to disclaim implied warranties (i.e., sell a vehicle "As-Is" and still make statements about the car that create oral express warranties). B–23 at 2.

[63] B–24 at 2.

[64] B–23 at 8–9.

[65] *Id.*

To remedy the problem, NCLC suggested that the Buyers Guide be revised to include an "Implied Warranties Only" section on the "As-Is" version of the Buyers Guide.[66] If this revision were adopted, the Buyers Guide would give dealers the option of checking one of three boxes: "As-Is No Warranty," "Implied Warranties Only," and "Warranty." The comments contended that most consumers do not know that implied warranties are available as a form of legal redress.[67] If all versions of the Buyers Guide contained an "Implied Warranties Only" provision, or at least alerted consumers that implied rights exist, consumers would be on notice that they may be forsaking possible legal redress to which they would otherwise be entitled but for the dealer's decision to sell the vehicle "As-Is." Consumers then might attempt to negotiate a better warranty agreement with the dealer than an "As-Is" deal. Also, some dealers might even choose to offer implied warranties rather than use "As-Is" sales if they were given an easy choice and did not have to use a special form or make a substitution on the form. If their only choice is "As-Is" or an express warranty, NCLC contends, dealers nearly always choose to sell vehicles "As-Is."[68]

Washington's Attorney General asserted that the Rule should only allow use of the "Implied Warranties Only" version of the Buyers Guide, because, given the choice to sell with a warranty or "As-Is," dealers opt simply to check off the "As-Is" provision. The Washington State Attorney General stated that the "As-Is" provision may provide an unintended shield for some unscrupulous dealerships that fail to use required procedures for disclaiming implied warranties under Washington contract law. The comment stated that Washington consumers are not generally aware that, under Washington law, their waiver of the implied warranty of merchantability must be knowing and voluntary. Warranty terms or the absence of implied warranties must be the subject of explicit negotiations between the parties (written disclaimers are not enough). The Rule does not disclose preconditions to a valid disclaimer of implied warranties peculiar to Washington State Law.[69]

ii. *Discussion.* The Buyers Guide focuses on written warranties because during the rulemaking the Commission found that oral promises made during used car sales were frequently contradicted by the written documents, and that the parol evidence rule operated to exclude the admissibility of oral promises contradicted by a written contract.[70] In the SBP, the Commission recognized that "As-Is" purchases could operate to exclude other contractual rights. The Commission stated that:

> consumers purchasing "as-is" but relying on contradictory oral promises are stripped of the protection afforded by either express or implied warranties and, at the same time, have no legal recourse against the dealer because prior or contemporaneous oral statements that contradict final written contract terms are generally not legally binding.[71]

To address this problem, the Commission sought to put consumers on notice that they should be wary of oral promises. Immediately under the words "Buyers Guide," on both forms of the Buyers Guide, is the following language: "IMPORTANT: SPOKEN PROMISES ARE DIFFICULT TO ENFORCE. ASK THE DEALER TO PUT ALL PROMISES IN WRITING. KEEP THIS FORM." In addition, the "As-Is" box contains the following statement: "YOU WILL PAY ALL COSTS FOR ANY REPAIRS. The dealer assumes no responsibility for any repairs regardless of any oral statements about the vehicle." The warnings on the Buyers Guide and its admonition to put all promises in writing help consumers by giving them information they can use to ensure they have enforceable rights. Thus, the changes suggested by NCLC (e.g., to revise the "As-Is No Warranty" title to "As-Is No Written Warranty") are not necessary. Such changes could lead to more uncertainty and disputes about warranty coverage. The Commission continues to advise that consumers get any promises in writing, rather than trying to prove later that a dealer orally promised to make repairs.

NCLC also suggested that the Buyers Guide be revised to reflect that options other than repair are available. However, repair is the most common remedy offered by dealers. Dealers, of course, are free to offer other options on the Buyers Guide, if they choose. Further, the Buyers Guide does not take the place of the warranty documents that dealers must provide pursuant to rule 701. The Buyers Guide refers to these documents in the "Warranty" box on the Buyers Guide: "ASK THE DEALER FOR A COPY OF THE WARRANTY DOCUMENT FOR A FULL EXPLANATION OF WARRANTY COVERAGE, EXCLUSIONS, AND THE DEALER'S REPAIR OBLIGATIONS."

NCLC also suggested reformatting the Buyers Guide to include "As-Is," "Implied Warranties Only," and "Warranty" sections on the same Buyers Guide. The purpose would be to increase consumer awareness of implied warranty rights and the likelihood that implied warranty rights could be negotiated. There is no evidence that suggests, however, that including "Implied Warranties Only" as a third option on the Buyers Guide would encourage consumers to negotiate for warranty coverage more than they presently do, as NCLC suggests. Nor is there any evidence that supports the assertion that dealers would choose this option over the "As-Is" option if it were displayed on the Buyers Guide.

Comments such as the Washington Attorney General's indicated a desire to alert consumers that implied warranties exist. Others suggested adding language that categorically states that implied warranties are unavailable in "As-Is" sales.[72] The "Warranty" section of the Buyers Guide contains the following language: "UNDER STATE LAW, 'IMPLIED WARRANTIES' MAY GIVE YOU EVEN MORE RIGHTS." The existing language alerts consumers that the other option to an "As-Is" sale is one with a warranty, and that, along with an express warranty, the buyer may receive even more rights (implied warranties) under state law. Similarly, amending the "As-Is" portion of the Buyers Guide to state that implied warranties are never available in an "As-Is" transaction would likely create confusion in states such as Washington, where implied warranties must be knowingly waived.[73] Further, such language would misstate the law when a service contract is sold with a vehicle.[74]

Although some consumers are not aware that implied warranties are available under state laws, many states permit "As-Is" sales and do not require disclosures or preconditions to such sales. The problem presented by the Washington Attorney General is somewhat unique insofar as it pertains to implied warranties, and might be addressed more effectively under state law. For the foregoing reasons, the Commission has determined to take no action on the suggested change.

F. Private Right of Action

i. *Summary of Comments.* NCLC and Jay Drick suggested that the Commission create a private right of action for violation of the Rule.[75] NCLC noted that currently, a consumer has a cause of action for violations of the Magnuson-Moss Warranty Act, but no equivalent cause of action for violations of the Rule.[76] These comments suggested that the Rule state that a violation of the Rule is a violation of the Magnuson-Moss Act, which affords a private legal remedy in both state and federal courts. NCLC stated that, if necessary, the language of the Magnuson-Moss Warranty Act could be amended to make this clear. According to these comments, a private right of action for violation of the Rule would increase dealers' accountability for violating the Rule.[77]

ii. *Discussion.* The actual value of a private cause of action for buyers against dealers for violating the Used Car Rule is unclear. It would be difficult for consumers to prove and quantify the injury or damages sustained as a consequence of a Rule violation for failing to post a Buyers Guide or for some other violation of the Rule.[78] In enforcing compliance with the Rule, the Commission has relied on injunctions and civil penalties to stop violations and provide deterrence.

Even if a private right of action would be useful, the Commission has no apparent authority to create one. There is no private right of action for violation of any FTC rule promulgated under the Magnuson-Moss Act. In addition, federal courts consistently have held that there is no private remedy under the FTC Act.[79]

For the foregoing reasons, the Commission is taking no action on the recommendation.

Questions Three, Four, Seven, Eight, Nine, and Eleven

Questions 3, 4, 7, 8, and 9 all deal generally with the costs and burdens that may be associated with the Rule. Consequently, they are addressed together to avoid repetition. Question 11 is also included in this section because it deals with the number of small firms that are affected by the Rule.

Question Three

What significant burdens or costs, including costs of compliance, has the Rule imposed on firms subject to its requirements?

a. Has the Rule provided benefits to such firms?

Question Four

What changes, if any, should be made to the Rule to reduce the burdens or costs imposed on firms subject to its requirements?

a. How would these changes affect the benefits provided by the Rule?

Question Seven

What significant burdens or costs, including costs of compliance, has the Rule imposed on small firms subject to its requirements?

a. How do these burdens or costs differ from those imposed on larger firms subject to the Rule's requirements?

Question Eight

To what extent are the burdens or costs that the Rule imposes on small firms similar to those that small firms would incur under standard and prudent business practices?

Question Nine

What changes, if any, should be made to the Rule to reduce the burdens or costs imposed on small firms?

a. How would these changes affect the benefits of the Rule?

b. Would such changes adversely affect the competitive position of larger firms?

Question Eleven

How many used car dealers have under $11.5 million in annual sales?

i. *Summary of Comments.* No comment furnished any information about how many dealers have sales under $11.5 million, which is how a small used motor vehicle dealer is defined by the Small Business Administration. Based on the Commission's experience in conducting inspections and investigations, the Commission believes that the overwhelming majority of independent used car dealers have annual sales under $11.5 million, and thus are small entities for purposes of the RFA analysis. Franchised dealers that sell used cars, in contrast, are likely to have annual sales in excess of $11.5 million, but their sales figures would include new car as well as used car sales.

Only a few comments addressed whether changes to the Rule—short of rescinding the Rule altogether[80]—would reduce the costs imposed on small and large firms. TADA contended that requiring a Spanish Buyers Guide to be posted on every used vehicle in addition to the English Buyers Guide, where sales are conducted in Spanish, is burdensome to dealers, and it therefore recommended that dealers be permitted to provide a Spanish Buyers Guide to the consumer only when the transaction is being consummated.[81] NIADA suggested that the burdens related to compliance are greater for small dealerships because larger dealerships have more personnel to assist in the preparation and processing of paperwork related to car sales.[82]

---

[66] NCLC also suggested amending the "As-Is" box on the Buyers Guide to include language that made clear that an "As-Is" sale precludes implied warranties. B–23 at 5.

[67] An implied warranty of fitness indicates that a car "is reasonably fit for and adapted to the purposes for which it was purchased, i.e., a vehicle that will carry a driver and passenger with reasonable safety, efficiency and comfort." *Berg v. Stromme*, 79 Wn.2d 184, 195, 484 P.2d 380 (1971). The *Berg* court uses the word fitness interchangeably with merchantability.

[68] B–23 at 8.

[69] B–17 at 2.

[70] *See* UCC 2–202.

[71] SBP at 45698 (footnote omitted).

[72] NCLC, B–27 at 5.

[73] See also discussion relating to Part IV, Question 5, infra.

[74] The Buyers Guide states: "IF YOU BUY A SERVICE CONTRACT WITHIN 90 DAYS OF THE TIME OF SALE, STATE LAW 'IMPLIED WARRANTIES' MAY GIVE YOU ADDITIONAL RIGHTS."

[75] B–23 at 1–2, B–25 at 1 (a consumer and attorney).

[76] B–23 at 1.

[77] B–23 at 1–2, B–25 at 1. Mr. Drick contends the rule should allow for enforcement by private attorneys in state courts. B–25 at 1.

[78] Consumers who have disputes with dealers about warranties generally already have recourse to the courts to resolve their disputes, and such disputes normally will involve resolving who should be responsible for making repairs. For example, section 110(d) of the Warranty Act allows consumers to bring suits on their own behalf for a warrantor's failure to honor warranties or service contracts, or to comply with any other obligation under the Act. Under the law, actions generally will be brought in state courts. If a complaint alleges at least $50,000 in damages the action may be filed in federal court.

[79] The Circuit Court for the District of Columbia, in *Holloway v. Bristol-Myers Corp.*, 485 F.2d 986, 988–89 (D.C. Cir. 1973), and other federal courts have held there is no implied private right of action under the FTC's franchise disclosure rules. In *Freedman v. Meldy's Inc.*, 587 F. Supp. 658, 662 (E.D. Pa. 1984)., the court reached its decision despite the FTC's contention that the courts should recognize private rights of action under the Franchise Rule. Citing Justice Rehnquist's opinion in *Cannon v. University of Chicago*, 441 U.S. 677, 718 (1979), the *Freedman* court stated: "Congress may, if it wishes, give effect to the apparent desire of the FTC that private rights of action be afforded litigants under 16 CFR §§ 436.1–438.10. The FTC may express, as it has, its opinion that private rights of action should be provided, but the Commission's opinion cannot supplement or supply the requisite Congressional intent." 587 F. Supp. at 662.

[80] For example, two comments from independent dealers contended that the Rule and the posting requirement place an unnecessary burden on dealers. They stated the Rule creates extra, and unneeded, steps in processing a vehicle sale transaction. No quantification for the assertion was provided, however. B–03 at 1, B–26 at 1. One of the dealers also noted that virtually every car in his area is sold "As-Is" and that most consumers in the area are aware of the practice. Instead of posting Buyers Guides, he suggested posting one large sign on the lot stating: "Unless a specific warranty is provided in writing, all used vehicles for sale at this dealership are sold As-Is; the buyer will pay all costs for any repairs." B–03 at 2.

[81] B–11 at 2. TADA asserted that in cities with large Spanish-speaking populations where dealers conduct a large percentage of sales in Spanish, the Rule requires each vehicle to have two Buyers Guides, one in English and another in Spanish.

[82] B–7 at 2. NIADA noted that filling out the Buyers Guide and attaching it to the car is just another part of the logging-in procedure. With

Continued

NADA stated that the Rule is meeting the objectives of the law and is not a substantial burden on small dealers.[83] Iowa's Attorney General noted that the costs associated with Rule compliance are minimal and are passed on to the consumer.[84] However, Iowa's comment also stated that larger firms are better able to absorb the costs of compliance. Reynolds & Reynolds noted that the costs of compliance include the costs of the form and the time required to fill them out properly. These costs differ from small firms to large firms because a larger firm most likely can take advantage of volume purchases and afford a computer to print out the form, while a smaller dealer would be more likely to purchase Buyers Guides in smaller quantities and fill them out by hand.[85]

The majority of the comments that responded to these questions, however, contended that the burdens or costs associated with compliance are minimal.[86] For example, Reynolds & Reynolds reported that used car dealers can purchase Buyers Guides for an average cost of 7.6 cents.[87] While Reynolds & Reynolds believes the costs are so minimal that they are not passed along to the consumer, NIADA stated that they are.[88]

Two comments from Attorneys General addressed whether the burdens and costs of the Rule would be similar to those incurred under ordinary and prudent business practice. The Iowa Attorney General noted that the Used Car Rule imposes no costs other than those a prudent dealer would incur regardless of the Rule.[89] The Washington Attorney General stated that the burdens or costs should be similar to those that would be incurred by prudent businesses.[90]

In terms of benefits, Iowa's Attorney General noted that the Rule has undoubtedly benefited both the manufacturers and dealers by fostering competition regarding warranty coverage.[91] The comments generally suggested that the Rule also has eliminated many disputes regarding oral representations made by dealers concerning warranty coverage.[92] For example, Reynolds & Reynolds noted that the Rule removes the question as to whether or not a specific vehicle has a warranty.[93] Compliance with the Rule virtually assures that consumers are aware of available warranty coverage, and therefore consumers are significantly protected against dealer misrepresentations.[94]

ii. *Discussion.* Based on the information obtained in response to the Notice, the Commission has concluded that the costs and burdens associated with Rule compliance are not substantial. Although the costs or burdens of complying with the Rule may be marginally greater on smaller dealers that have fewer employees than larger dealerships, the costs associated with compliance are still quite small. The cost for Buyers Guides averages 7.6 cents per form, and other costs associated with the Rule (i.e., filling out the Buyers Guide and posting them), although not quantified, were represented as minimal and reasonable. At the same time, the comments contended that there are benefits from Rule compliance. Accordingly, the Commission has determined that no changes are needed to reduce the costs of the Rule on small businesses.

Further, although compliance with the Rule may be more burdensome and costly to dealers who frequently conduct sales transactions in Spanish, TADA's proposed solution (elimination of the requirement to post Spanish Buyers Guides) contravenes the Commission's rationale for the posting requirement.[95] Providing a Buyers Guide at the time of sale is insufficient to protect against the unfair and deceptive practices the Rule was designed to deter. By requiring posting, the Rule affords buyers an opportunity to comparison shop. Accordingly, the Commission has decided to take no action.

Question Five

Does the Rule overlap or conflict with other federal, state, or local laws or regulations?

i. *Summary of Comments.* In terms of "overlap," NCLC stated: There really is no overlap with state consumer protection laws (unfair and deceptive acts and practices statutes) because not all states' laws cover all violations of the Used Car Rule. The Used Car Rule itself merely effectuates a claim under a deceptive practices act in some states, by declaring certain conduct to be unfair or deceptive, which may then be prohibited by the state law.[96]

NIADA stated, however, that there may be possible overlap with Texas's Deceptive Trade Practices Act.[97] Iowa's Attorney General noted that the Rule overlaps with the Iowa Consumer Fraud Act, Iowa Code 714.16, to the extent that the Consumer Fraud Act requires that sellers of merchandise not fail to disclose material facts with the intent that others rely on the omission.[98] Although the two overlap, Iowa believed it presents no problem to either the Commission or the State of Iowa in the enforcement of the Rule or the Iowa Consumer Fraud Act.[99]

Alaska's Attorney General believed there is a "gap" in the Rule that has been addressed in state court decisions.[100] TADA noted that the Rule's definition of a "used vehicle" and the State of Texas's definition cause problems because the Commission's definition of "used vehicle" is much broader than that of some states, including Texas.[101] According to TADA this causes confusion and misunderstanding as to when a vehicle is required to display a Buyers Guide.[102]

NACAA stated that the Rule conflicts with some state laws by providing that the language in the Buyers Guide overrides contrary provisions in the contract of sale.[103] The Washington State Attorney General's Office also noted that the Commission's "As-Is" version of the Buyers Guide does not accurately reflect Washington contract law on valid disclaimer of implied warranties, thus creating a conflict.[104]

ii. *Discussion.* The comments indicated that to the extent there is any overlap between the Rule and state law, it is generally not a significant problem. The "conflict" noted by the Washington Attorney General has been addressed by the Commission staff in correspondence with the Attorney General. As was explained in the staff's letter, the purpose of the posted Buyers Guide is to show consumers what warranty coverage a dealer is offering. The Rule also requires the dealer to provide the buyer with a copy of the Buyers Guide showing the final warranty coverage agreed to. If, under Washington State law, an "As-Is" sale has not been properly consummated, the final version of the Buyers Guide should note that the car is being sold with implied warranties.[105] Because the Used Car Rule does not conflict with state consumer protection statutes in any significant way, there is no need for Commission action.

Questions Six and Ten

Since the Rule was issued, what effects, if any, have changes in relevant technology or economic conditions had on the Rule?

How many used vehicles (as defined by Section 455.1(d)(2) of the Rule) are sold annually in the United States?

i. *Summary of Comments.* The number of used cars sold annually is much larger now than when the Rule was promulgated.[106] Based on information NADA submitted, franchised dealerships accounted for nearly 10 million used car sales in 1993 (9,836,800) and NIADA reported another 16 million sales were made by independent dealers. NIADA's information indicated that 25.9 million used vehicles were sold by independent and franchised dealers in 1992.[107] Franchised dealers report that the biggest part of both their profit and their volume is coming from their used, not new, vehicle sales. "New car dealers sold more used vehicles than new for the first time in 1989, and since then relative used-car volume has grown steadily."[108]

NIADA noted that economic conditions within the industry have improved, but was unable to quantify whether the changed conditions have had an impact on the Rule. Other comments noted changes in the relevant technology and/or economic conditions that may have affected the Rule. For example, NCLC noted a significant increase in the leasing of new and used cars in support of its recommendation that Buyers Guides be posted on leased vehicles. NCLC also pointed to the proliferation of computers and copying machines within the industry, concluding this should make it easier for dealers to comply with the Rule.[109] Reynolds & Reynolds noted that many computer systems have the ability to print the form for a dealer, thereby reducing time/energy demands upon dealers to fill out the Buyers Guide.[110] Another comment noted that car manufacturers have done a better job of conveying warranty information and covered systems to dealers.[111]

The Iowa Attorney General noted that since vehicles are more complex than ever, repair costs have increased. The Washington Attorney General noted that both the demand for and price of used vehicles have been driven up because new cars are becoming increasingly expensive.[112] Thus, warranty coverage is more important to consumers than ever before, and the need for the Rule is greater than in the past.[113] Similarly, most of the comments said there was a continuing need for the Rule because of the size of the industry.

ii. *Discussion.* The economic changes in the industry—the growth in used car sales, the increased prices of used cars,[114] and the rising cost of repairs—make warranty coverage an important consideration in a sales transaction. The changes addressed in the comments demonstrate that the reasons for promulgating the Rule continue to exist. At the same time, the comments noted that technological changes have made it easier for dealers to comply with the Rule.

Question Twelve

Should the Rule's requirement that the Buyers Guide be posted in a side window of a used vehicle, as set forth in Section 455.2(a)(1) of the Rule, be modified to allow posting in a different location (for example, in the rear window of a pickup truck or other vehicle without side rear windows), as long as the Buyers Guide is conspicuous and both sides may be readily viewed?

i. *Summary of Comments.* The comments generally supported modifying the Rule as suggested. NADA recommended that the Rule afford some flexibility in the placement of the guide, allowing it to be placed elsewhere than in a side window. NCCE suggested that enforcement focus on the availability and accessibility of the information "and not on the trivial aspects of the regulation such as location of the information."[115]

One consumer protection group noted that if there are no side rear windows, the Buyers Guide should be placed in the front window.[116] One Attorney General supported the modification, noting that the Rule should allow for dealers to post the Buyers Guides in the rear windows of pick-up trucks and other vehicles lacking side rear windows to offer the dealers some flexibility.[117] The Michigan Secretary of State supported the amendment permitting the posting of Buyers Guides in other than the side window as long as the guide is prominently displayed and both sides can be readily viewed by a purchaser.[118] Other comments also supported the proposed modification of the Rule.[119]

ii. *Discussion.* The Commission is amending the Rule to delete the side window posting requirement.[120] Dealers instead will be required to post Buyers Guides prominently and in plain sight anywhere on the vehicle as long as both sides are accessible. This amendment affords dealers greater flexibility in posting Buyers Guides on all vehicles, not just pickup trucks or vehicles without side windows. For example,

---

regard to the differing costs between large and small firms, the trade association noted that both size firms need to fill out a certain number of forms for each vehicle they sell. The larger dealers have more employees to do the job.

[83] B–19 at 1.

[84] B–15 at 6.

[85] B–20 at 2.

[86] See, *e.g.*, B–20 at 1.

[87] B–20 at 1. See also NIADA, B–07 at 2. Buyers Guides may be purchased in packets of 250 for $21.00.

[88] *Id.* NIADA also noted that labor costs are associated with compliance, but did not quantify those costs.

[89] B–15 at 6.

[90] B–17 at 4. But stricter compliance with Washington law on the disclaimer of implied warranties could increase the costs of repair or recision to dealers who market unmerchantable vehicles.

[91] B–15 at 4.

[92] See NIADA Comment, B–7 at 4–5.

[93] B–20 at 1.

[94] B–15 at 4.

[95] The Commission originally considered requiring Buyers Guides to be translated into several dozen languages. However, "[t]he evidence in the [rulemaking] record indicates that, besides English, Spanish is the language most frequently used during used car sales transaction." SBP at 45711 (footnote omitted). Thus, the Rule requires the window form and the content disclosures to be, in Spanish, if the sale is conducted in Spanish. Dealers who conduct transactions in both English and Spanish may post both versions of the Buyers Guide.

[96] B–23 at 5.

[97] B–07 at 5.

[98] Warranty coverage on a motor vehicle is considered to be a material fact under Iowa law.

[99] B–15 at 5.

[100] The "gap" relates to the Rule's failure to require dealers to disclose known defects. The AG asserts that the common law of most states requires disclosure. See, *e.g.*, *Patton* v. *McHone*, 822 S.W.2d 608 (Tenn. App. 1991). B–01 at 1.

[101] See also discussion at Part IV, Question 2, B, 2–3, *supra*, regarding the difference between the Rule's definition of a "used vehicle," and the state law definitions.

[102] B–11 at 2.

[103] B–24 at 2, citing section 455.3(b) of the Rule. NACAA also contended that the provision may be used by dealers to disclaim promises of greater warranty protection in oral or written form. This issue was addressed in the discussion at Part IV, Question 2, E, *supra*.

[104] B–17 at 3. See also discussion at Part IV, Question 2, E, *supra*.

[105] See staff Opinion Letter to Robert F. Manifold, Division Chief, October 12, 1989.

[106] In the original rulemaking, the Commission noted that in 1979, "two of every three cars sold in the United States were used. Consumers in that year spent $66.7 billion, including the value of trade-ins in purchasing 18.5 million used cars from all sources." SBP at 45695.

[107] B–7, see attachment to comment entitled "Used Car Sales." Other sources indicate that the dollar amount of used car sales covered by the Rule reached $281.5 billion in 1993 and $289.2 billion in 1994. See Used Gold Reference Guide, Chapter 7, p. 3, CNW Marketing Research, Bandon, Oregon, 1994.

[118] B–14 at 1.

[119] B–17 at 5, B–19 at 2, B–20 at 2.

[120] Because this amendment does not change the substantive rights afforded by the Rule or significantly affect the obligations of dealers, the Commission has concluded that section 18, 15 U.S.C. 57a, rulemaking proceedings are unnecessary to issue this amendment.

dealers could hang Buyers Guides from the rear view mirror or place them under the windshield wipers or hang them from exterior side view mirrors. These options allow consumers to view the Buyers Guide easily. Putting Buyers Guides in glove boxes or on the floor or in the trunk will not satisfy the requirement that the Buyers Guide be in plain sight and conspicuous.

Question Thirteen

What changes to the format of the Buyers Guide should be considered in order to reduce compliance costs or burdens? Would such changes have any detrimental effect on the benefits provided by the Rule? Is there any empirical or other evidence to support opinions that such changes would or would not have a detrimental effect on benefits?

i. *Summary of Comments.* Some comments recommended that the Buyers Guide should be maintained in its present form.[121] Others stated that the format of the Buyers Guide should be changed, but none provided empirical evidence in support of their assertions. For example, Reynolds & Reynolds suggested allowing the Buyers Guide to be merged with other required forms. It stated that the Buyers Guide could be combined with the state lemon laws and refund rights acts forms. The result would be a form with larger dimensions. While the combined form would be higher priced, the overall cost of complying with the multiple laws would be lowered.[122]

Both NADA and NIADA recommended that the Rule allow some flexibility in the format requirements of the Buyers Guide.[123] Specifically, NIADA suggested that reducing the size requirement of the Buyers Guide to 7" x 5" would be useful because it would minimize the window blockage in compact cars and pickup trucks, and thus reduce what it termed a driving safety hazard.[124] NIADA contended that the present Buyers Guide contains much empty space "that could be eliminated without destroying the eye catching qualities it now has."[125] NIADA also suggested putting the dealer's name and address on the front of the Buyers Guide so that the entire form could be easily filled in using an office computer printer. In addition it suggested that the language "RECEIPT OF ORIGINAL COPY ACKNOWLEDGED" and a signature line be placed on the front of the Buyers Guide.

NCLC, along with Iowa Attorney General,[126] opposed changing the format of the Buyers Guide, stating:

> It is important to keep the Buyers Guide at its current size and not to make it smaller. It must be prominent in order to be noticed by consumers so that the buyer can negotiate with the dealer over the terms on the Buyers Guide and know exactly what is provided in terms of warranties. Some of the type on the back of the Buyers Guide, indicating systems to check, is already very small.[127]

ii. *Discussion.* The Commission has decided not to modify the present size or format of the Buyers Guide. The only argument for reducing the size of the Buyers Guide is that the current size of the Buyers Guide may present a safety hazard during test drives. It is difficult to imagine that dealers would forego the option of temporarily removing Guides during test drives, if a true safety hazard existed. However, if such a hazard existed, it seems unlikely that reducing the dimensions of the Buyers Guide to 5" x 7" would significantly lessen the hazard. The Commission's amendment to allow conspicuous posting anywhere in the vehicle is likely to better address this issue than reducing the size of the Buyers Guide.

The Commission requested empirical evidence to support any proposed modifications to the size or format because, during the original rulemaking proceeding, considerable effort was expended to design a form that communicates information effectively to consumers. To evaluate the effectiveness of the Buyers Guide during the rulemaking, a series of copy comprehension tests were conducted. According to the SBP for the Rule, the results of the copy testing were incorporated into the final design of the Buyers Guide that the Commission adopted in May 1981.[128] Although the copy testing was done on prior versions of the Buyers Guide, which differed from the Buyers Guide now in use, those comprehension tests were relevant to the design of the revised format the Commission adopted in 1984. Based on those tests, certain changes to the Buyers Guide were implemented which carried through to the current version.[129]

Further, the size of the Buyers Guide was the subject of comments filed in response to the Commission's July 31, 1984 **Federal Register** Notice soliciting comment on a Baseline Study of the Rule and the Commission's tentative decision to adopt a revised rule. For example, NADA requested that the size of the form be reduced from 12 inches high by 7¼ inches wide to 6 x 8 inches. Following its review, the Commission concluded that the format and type size required by the Rule would easily fit onto a 7¼ x 11 sheet. Therefore, to avoid unnecessary costs, the Commission revised the Rule to require a form no smaller than 11 inches high by 7¼ inches wide. The Commission rejected NADA's proposal to reduce the form to the 6 x 8 size because the type sizes required by the Rule would have to be reduced to fit on the smaller sheet, making the Buyers Guide difficult to read. The final Rule the Commission published required a Buyers Guide no smaller than 11 inches high by 7¼ wide.[130]

Under these circumstances, the Commission has determined not to change the format of the Buyers Guide without copy testing or other reliable information showing that a reduced or revised Buyers Guide would be as easy to read and comprehend as the current Buyers Guide. For example, taking out the white space, as NIADA suggests, could reduce the effectiveness of the Buyers Guides. The empty space on the Buyers Guide was planned to make information stand out and to avoid making the form a jumble of information. For the same reasons, the Commission is also rejecting the suggestion that the format of the Buyers Guide be modified to incorporate other required forms.[131]

[121] Iowa Attorney General, B–15 at 7.

[122] B–20 at 1. Reynolds & Reynolds suggested that additional information could be printed on the form (i.e., standard warranty coverage) in order to save dealers from having to fill out a new form for each vehicle. There is, however, no prohibition against pre-printing information on the Buyers Guide.

[123] The Rule requires that the Buyers Guide conform to the exact wording, type style, type size, and format specified by the Rule. See Section 455.2(a)(2) of the Rule. Among other things, the Rule specifies that the form must be printed on white stock no less than 11 inches high by 7¼ inches wide. NADA stated that while the Buyers Guide does an adequate job of communicating information to consumers, "[t]here needs to be more flexibility regarding the size, typeface, additions, etc. to the form."

[124] B–7 at 3. The Rule provides that Buyers Guides may be removed during test drives. But, some commenters claim that removing Buyers Guides for test drives and re-posting them afterwards is burdensome.

[125] *Id.*

[126] B–15 at 7.

[127] B–23 at 4.

[128] SBP at 45709. The Commission announced the earlier version of the rule in 46 FR 41328 (1981). The 1981 Buyers Guide included information about the condition of major mechanical and safety systems of the car, which the Commission decided to omit in 1984.

[129] For example, based on the testing, the Commission increased the type size of the warning against relying on spoken promises, and prefaced it with the bold-face heading, "Important."

[130] 16 CFR 455.2(a)(2).

[131] Recent Commission research also suggests that the consolidation of labels may result in information overload. *See* Report to Congress by the Federal Trade Commission, Study of a Uniform National Label for Devices that Dispense Fuel to Consumers, pp. 27–30 (Oct. 1993).

Further, the Commission is rejecting the suggestion to modify the Buyers Guide to include dealer information and a signature line on the front of the Buyers Guide. NIADA noted that computer pre-printing of the Buyers Guide requires turning the page over in order to print the information. The actual burden of having to turn over the Buyers Guide to pre-print the information is quite small. Further, dealers may use an ink stamp to put this information on the back side. Both of these methods—ink stamp or turning the Buyers Guide over and pre-printing the information—are inexpensive ways of complying with the Rule.[132]

Question Fourteen

What changes to the format of the Buyers Guide should be considered in order to increase its benefits? What effect would such changes have on the costs or burdens imposed by the Rule? Is there any empirical or other evidence to support opinions that such changes would or would not increase costs or burdens?

i. *Summary of Comments.* One consumer suggested that the information be on one side only, and that a signature line be included so that the customer has a chance to read it and know he is entitled to a copy.[133] This consumer also suggested that the Buyers Guide be modified to have check boxes for the selling dealer to disclose whether or not the dealer has attempted to repair any item on the vehicle in any way, and a section for the dealer to list specifically what components or systems were found by the inspection to be in need of repair and yet were not repaired by the dealer, plus their anticipated costs.[134] NACAA noted that the Buyers Guide should be revamped to provide a checklist of symptoms and causes for auto problems, and state more strongly that consumers should have those items independently checked before committing themselves to a used car purchase.[135] Washington's Attorney General suggested that the Buyers Guide note that the Cooling-Off Rule does not apply to used car sales. Reynolds & Reynolds suggested that a customer signature box be added to the form's back to ensure that the purchaser has received warranty information (or the lack thereof) and has acknowledged it.[136]

ii. *Discussion.* The Commission has concluded that adding additional information to the Buyers Guide, such as a warning that the Cooling-Off Rule does not apply, is unnecessary.[137] The format of the present Buyers Guide achieves the Rule's objectives, and thus, for the reasons previously discussed throughout this notice, the Commission is leaving the format of the Buyers Guide essentially unchanged.[138]

V. Regulatory Flexibility Act Review

Based on its review of the record, the Commission has concluded that the Rule has not had "a significant economic impact on a substantial number of small entities" affected by the Rule.[139] As previously discussed, the comments indicate that the costs associated with Rule compliance are minimal. The record also suggests that these costs generally would be borne by a reasonably prudent business anyway.

VI. Conclusion

The comments and the Commission's experience indicate that the Rule is working and achieving its objectives, while imposing only minimal costs on used car dealers. For the reasons discussed above, however, the Commission is amending the Spanish Buyers Guide and amending the Rule to permit dealers to post Buyers Guides prominently and in plain view in all used vehicles being offered for sale (rather than on a side window). The Commission also is amending the Rule to permit dealers to put a signature line on the back of the Buyers Guide, if accompanied by a specific disclosure.

List of Subjects in 16 CFR Part 455

Motor vehicles, Trade practices.

Authority: The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (1980).

Text of Amendments

For the reasons set forth in this document, pertinent sections of the Used Car Rule, 16 CFR Part 455, are amended as follows:

PART 455—[AMENDED]

The authority citation for part 455 continues to read as follows:

Authority: 88 Stat. 2189, 5 U.S.C. 2309; 38 Stat. 717 as amended; 15 U.S.C. 41 et seq.

2. Section 455.2(a)(1) is revised to read as follows:

§ 455.2 Consumer sales—window form.

(a) * * *

(1) The Buyers Guide shall be displayed prominently and conspicuously in any location on a vehicle and in such a fashion that both sides are readily readable. You may remove the form temporarily from the vehicle during any test drive, but you must return it as soon as the test drive is over.

* * * * *

3. Further, § 455.2 is amended by adding paragraph (f) to read as follows:

§ 455.2 Consumer sales—window form.

* * * * *

(f) Optional Signature Line. In the space provided for the name of the individual to be contacted in the event of complaints after sale, you may include a signature line for a buyer's signature. If you opt to include a signature line, you must include a disclosure in immediate proximity to the signature line stating: "I hereby acknowledge receipt of the Buyers Guide at the closing of this sale." You may pre-print this language on the form if you choose.

* * * * *

4. Further, the first page of the sample Spanish language Buyers Guide ("GUIA DEL COMPRADOR") appearing at the end of section 455.5 is revised to read as follows:

§ 455.5 Spanish language sales.

* * * * *

BILLING CODE 6750–01–P

[132] The issue of obtaining consumer signatures was addressed earlier in this notice. See Part IV, Question 2, B, *supra.*

[133] Jay Drick, B–25 at 1–2.

[134] B–25 at 1.

[135] B–24 at 3.

[136] B–20 at 2.

[137] 16 CFR 429. The Cooling-Off Rule does not apply to the sale of vehicles, nor any other goods and services, offered at a seller's place of business. It also does not apply to sales of vehicles at auctions provided that the seller has a permanent place of business.

[138] See discussion at Part IV, Question 2, B, *supra.*

[139] 5 U.S.C. 603–605. The Commission received no information regarding the number of dealerships with annual sales of $11.5 million or less. But, the Commission's experience is that most independent used car dealers have annual sales less than $11.5 million and therefore are small entities for purposes of the RFA.

BILLING CODE 6750–01–C

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 176

[Docket No. 95F–0016]

Indirect Food Additives: Paper and Paperboard Components

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of silver chloride-coated titanium dioxide as a preservative in polymer latex emulsions used in the coating of food-contact paper and paperboard. This action is in response to a petition filed by Johnson Matthey Chemicals.

DATES: Effective December 5, 1995; written objections and requests for a hearing by January 4, 1996.

ADDRESSES: Submit written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Vir D. Anand, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3081.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of February 13, 1995 (60 FR 8243), FDA announced that a food additive petition (FAP 5B4442) had been filed by Johnson Matthey Chemicals, c/o 1000 Potomac St. NW., Washington, DC 20007. The petition proposed to amend the food additive regulations in § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) to provide for the safe use of silver chloride-coated titanium dioxide as a preservative in polymer latex emulsions used in the coating of food-contact paper and paperboard.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed use of the additive in paper and paperboard products in contact with food is safe and that the regulations in § 176.170 should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before January 4, 1996, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR part 176 continues to read as follows:

Authority: Secs. 201, 402, 406, 409, 721 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 346, 348, 379e).

2. Section 176.170 is amended in the table in paragraph (a)(5) by alphabetically adding a new entry under the headings "List of Substances" and "Limitations" to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

[FR Doc. 95–29476 Filed 12–04–95; 8:45 am]

BILLING CODE 4160–01–F

21 CFR Parts 182 and 186

[Docket No. 80N–0196]

Japan Wax; Affirmation of GRAS Status as an Indirect Human Food Ingredient

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations to affirm Japan wax as generally recognized as safe (GRAS) as an indirect food ingredient for use as a constituent of cotton and cotton fabrics used in dry food packaging. The safety of this indirect food use of Japan wax has been evaluated under the comprehensive safety review conducted by the agency.

DATES: Effective December 5, 1995.

FOR FURTHER INFORMATION CONTACT: Martha D. Peiperl, Center for Food Safety and Applied Nutrition (HFS–217), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3077.

SUPPLEMENTARY INFORMATION:

In the **Federal Register** of June 1, 1995 (60 FR 28555), FDA published a proposal to affirm the GRAS status of the use of Japan wax as an indirect human food ingredient migrating to food from cotton and cotton fabrics used in dry food packaging. The proposal was published in accordance with the announced FDA review of the safety of GRAS and prior-sanctioned food ingredients.

In accordance with § 170.35 (21 CFR 170.35), copies of the scientific literature review and the report of the Select Committee on GRAS Substances (the Select Committee) on Japan wax, as well as documents in the possession of FDA and further evidence of the safety of Japan wax obtained by FDA since publication of the Select Committee's report, have been made available for public review in the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

The proposal gave interested parties an opportunity to submit comments. FDA received no comments on its proposal. The agency is, therefore, adopting the proposal without any changes.

Environmental Impact

The agency has previously considered the environmental effects of this rule as announced in the proposed rule that published in the **Federal Register** of June 1, 1995 (60 FR 28555). No new information or comments have been received that would affect the agency's determination that there is no significant impact on the human environment, and that neither an environmental assessment nor an environmental impact statement is required.

Analysis of Impacts

FDA has examined the impacts of the final rule under Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The Regulatory Flexibility Act requires analyzing options for regulatory relief for small businesses.

The agency finds that this rule is not a significant regulatory action as defined by Executive Order 12866. Furthermore, in accordance with the Regulatory Flexibility Act, the agency previously considered the potential effects that this rule would have on small entities, including small businesses, and determined that this rule will have no significant adverse impact on a substantial number of small businesses. FDA has received no new information or comments that would alter its previous determination.

Effective Date

As this rule recognizes an exemption from the food additive definition in the Federal Food, Drug, and Cosmetic Act, and from the approval requirements applicable to food additives, no delay in effective date is required by the Administrative Procedure Act (5 U.S.C. 553(d)). The rule will therefore be effective December 5, 1995 (5 U.S.C. 553(d)(1)).

List of Subjects

21 CFR Part 182

Food ingredients, Food packaging, Spices and flavorings.

21 CFR Part 186

Food ingredients, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR parts 182 and 186 are amended to read as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

1. The authority citation for 21 CFR part 182 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

§ 182.70 [Amended]

2. Section 182.70 *Substances migrating from cotton and cotton fabrics used in dry food packaging* is amended by removing the entry for "Japan wax."

PART 186—INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. The authority citation for 21 CFR part 186 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

4. New § 186.1555 is added to subpart B to read as follows:

§ 186.1555 Japan wax.

(a) Japan wax (CAS Reg. No. 8001–39–6), also known as Japan tallow or sumac wax, is a pale yellow vegetable tallow, containing glycerides of the C_{19}–C_{23} dibasic acids and a high content of tripalmitin. It is prepared from the mesocarp by hot pressing of immature fruits of the oriental sumac, *Rhus succedanea* (Japan, Taiwan, and Indo-China), *R. vernicifera* (Japan), and *R. trichocarpa* (China, Indo-China, India, and Japan). Japan wax is soluble in hot alcohol, benzene, and naphtha, and insoluble in water and in cold alcohol.

(b) In accordance with paragraph (b)(1) of this section, the ingredient is used as an indirect human food ingredient with no limitation other than current good manufacturing practice. The affirmation of this ingredient as generally recognized as safe (GRAS) as an indirect human food ingredient is based on the following current good manufacturing practice conditions of use:

(1) The ingredient is used as a constituent of cotton and cotton fabrics used for dry food packaging.

(2) The ingredient is used at levels not to exceed current good manufacturing practice.

(c) Prior sanctions for this ingredient different from the uses established in this section do not exist or have been waived.

Dated: November 24, 1995.

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations regarding excise taxes, accelerated tax assessments, and injunctions imposed for certain political expenditures made by organizations that (without regard to any political expenditure) would be described in section 501(c)(3) and exempt from taxation under section 501(a). These regulations reflect changes to the law that were enacted as part of the Revenue Act of 1987.

EFFECTIVE DATE: These regulations are effective December 5, 1995.

FOR FURTHER INFORMATION CONTACT: Cynthia Morton or Paul Accettura, (202) 622–6070 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On December 14, 1994, proposed regulations §§ 53.4955–1, 301.6852–1, and 301.7409–1 under sections 4955, 6852 and 7409 were published in the **Federal Register** (59 FR 64359). In addition, amendments were made to regulations under other sections in order to reflect the effects of sections 4955, 6852, and 7409. Proposed regulation amendments in §§ 1.6091–2, 53.4963–1, 53.6011–1, 53.6071- 1, 53.6091–1, 301.6211–1, 301.6212–1, 301.6213–1, 301.6861–1, 301.6863–1, 301.6863–2, 301.7422–1, and 301.7611–1 were also published in the **Federal Register** (59 FR 64359). No public hearing was requested or held. The IRS received two comments on the proposed regulations, only one of which offered substantive suggestions. The IRS and the Treasury Department have considered the public comments on the proposed regulations, and the regulations are adopted as revised by this Treasury decision.

Explanation of Provisions

The regulations provide guidance with respect to sections 4955, 6852 and 7409. The sanctions in these sections apply to all organizations described in section 501(c)(3). Before sections 4955, 6852 and 7409 were enacted in 1987, revocation of recognition of exemption was the sole sanction available against political intervention by public charities. Section 4955 was modeled on the section 4945 excise tax on political expenditures (taxable expenditures) by private foundations, while sections 6852 and 7409 provide new sanctions against flagrant political expenditures and flagrant political intervention, respectively.

One comment on the proposed regulations requested that the regulations define in additional detail the term *political expenditure* and provide specific examples of activities that constitute intervention or participation in a political campaign for or against a candidate. Section 53.4955–1(c)(1) of the proposed regulations provides that any expenditure that would cause an organization that makes the expenditure to be classified as an action organization in accordance with § 1.501(c)(3)–1(c)(3)(iii) is a political expenditure within the meaning of section 4955(d)(1). By referring to the long standing action organization regulations, § 53.4955–1(c)(1) of the proposed regulations ties the definition of *political expenditure* in section 4955 to existing IRS and judicial interpretations of when an organization participates or intervenes in a political campaign on behalf of or in opposition to any candidate for public office in violation of the requirements of section 501(c)(3). The IRS and the Treasury Department believe this direct connection between section 4955 and section 501(c)(3) correctly implements the intent of Congress as expressed in the statute and the legislative history. To the extent that further guidance is needed on the interpretation of the terms political expenditure under section 4955 and intervening in political campaigns under section 501(c)(3), the IRS and the Treasury Department believe such guidance should be given in connection with the requirements for tax exemption under section 501(c)(3). Therefore, the final regulations have not revised § 53.4955–1(c)(1).

Another comment suggested that the regulations specify whether there were circumstances under which conduct would result in the imposition of a tax under section 4955 but not in revocation of exemption under section 501(c)(3). According to the statutory language and the legislative history of section 4955, the addition of that section to the Internal Revenue Code did not affect the substantive standards for tax exemption under section 501(c)(3). To be exempt from income tax as an organization described in section 501(c)(3), an organization may not intervene in any political campaign on behalf of any candidate for public office. Consistent with this requirement, section 4955 does not permit a de minimis amount of political intervention. Therefore, the final regulations have not been revised. However, there may be individual cases where, based on the facts and circumstances such as the nature of the political intervention and the measures that have been taken by the organization to prevent a recurrence, the IRS may exercise its discretion to impose a tax under section 4955 but not to seek revocation of the organization's tax-exempt status.

One comment raised questions about the interpretation of section 4955(d)(2), which relates to organizations formed primarily to promote the candidacy of a particular individual. The comment requested clarification of the standard for determining whether an organization "is formed primarily for purposes of promoting the candidacy (or prospective candidacy) of an individual for public office" under section 4955(d)(2). The comment also requested clarification of the meaning of the phrase "availed of" in the section 4955(d)(2) reference to organizations availed of primarily to promote an individual's candidacy for public office. The comment further requested examples of expenses which have the primary effect of promoting public recognition or otherwise primarily accruing to the benefit of a candidate or a prospective candidate.

The legislative history of section 4955 provides that the determination of whether an organization's primary purpose is the promotion of the candidacy or prospective candidacy of an individual for public office is based on all relevant facts and circumstances. The proposed regulations follow the legislative history. The IRS and the Treasury Department believe that, if more detailed guidance is necessary, it would be more appropriate to provide it in a form that allows for the consideration of a fuller range of facts and circumstances. Therefore, the final regulations have not been revised.

The comment also asked whether section 4955(d)(2) adds anything to the

range of activities that would already be deemed political expenditures under section 4955(d)(1). The plain language of the statute makes it clear that the expenditures described in section 4955(d)(2) are included within the general category of political expenditures that is described in section 4955(d)(1). Furthermore, the legislative history states that section 4955(d)(2) "enumerates certain expenditures as political expenditures for purposes of the excise tax * * *." The IRS and the Treasury Department believe that organizations described in section 4955(d)(2) are subject to the same restrictions on political expenditures as all other section 501(c)(3) organizations. Therefore, the final regulations have not been revised.

One comment concluded that § 53.4955–1(b) of the proposed regulations, affecting organization managers under section 4955, imposed tax on a larger group of employees and officers than are subject to tax under chapter 42 because the section did not include language contained in § 53.4946–1(f)(1)(ii) and in § 53.4946–1(f)(2). The IRS and the Treasury Department agree that the definition of foundation manager under section 4946(b) should be incorporated into the definition of organization manager when applying section 4955(f)(2). Therefore, we have clarified the final regulations to make them consistent with the interpretation in § 53.4946–1(f)(1)(ii) and in § 53.4946–1(f)(2) by adding a sentence at the end of § 53.4955–1(b)(2)(ii)(B) and at the end of § 53.4955–1(b)(2)(iii).

One comment noted that § 53.4955–1(b)(7) of the proposed regulations provides that, in certain circumstances, if an organization manager relies on a reasoned legal opinion from legal counsel, the act of the organization manager will not be considered knowing or willful and will be considered due to reasonable cause for purposes of section 4955(a)(2). The commentator requested consideration of whether the same reasoned legal opinion would protect the organization from tax under section 4955(a)(1). Section 53.4955–1(b)(7) interprets whether an act is not willful and is due to reasonable cause for purposes of section 4955(a)(2). Unlike section 4955(a)(2), section 4955(a)(1) taxes an organization without regard to whether its act of making a political expenditure was willful or due to reasonable cause. Therefore, the final regulations have not been revised. A reasoned legal opinion from legal counsel received by the organization prior to making a political expenditure may be a factor that the IRS takes into account in determining what action to take in an individual case. Section 53.4955–1 (d) and (e) of the final regulations are also relevant where an organization has corrected a political expenditure that was not willful and flagrant.

One comment requested that the regulations provide more detail on the type of behavior that would be considered flagrant under sections 6852 and 7409. Since a determination of when a specific act or acts by an organization is flagrant depends on the facts and circumstances in individual cases, the IRS and the Treasury Department believe that, to the extent guidance is necessary on this issue, it is better rendered in a form other than through regulations. Therefore, the final regulations do not expand on the definition of flagrant.

One comment suggested that § 301.7409–1 of the proposed regulations should be modified to allow the IRS, where appropriate, to provide an organization with less than the 10 days notice required under the proposed regulations before the Commissioner would recommend that a petition for injunctive relief be filed. In light of the important considerations involved when contemplating an injunction of this sort, the IRS and the Treasury Department believe that an organization should be allowed a reasonable amount of time to respond before the IRS takes action. Therefore, the final regulations retain the 10 day notice period.

Special Analysis

It has been determined that this Treasury Decision is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding these regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information

The principal author of these regulations is Cynthia D. Morton, Office of Associate Chief Counsel (Employee Benefits and Exempt Organizations). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 53

Excise taxes, Foundations, Investments, Lobbying, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR parts 1, 53, and 301 are amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. In § 1.6091–2, paragraph (g) is added to read as follows:

§ 1.6091–2 Place for filing income tax returns.

* * * * *

(g) *Returns of persons subject to a termination assessment.* Notwithstanding paragraph (c) of this section, income tax returns of persons with respect to whom an income tax assessment was made under section 6852(a) with respect to the taxable year must be filed with the district director as provided in paragraphs (a) and (b) of this section.

PART 53—FOUNDATION AND SIMILAR EXCISE TAXES

Par. 3. The authority citation for part 53 continues to read as follows:

Authority: 26 U.S.C. 7805.

Par. 4. Section 53.4955–1 is added to Subpart K to read as follows:

§ 53.4955–1 Tax on political expenditures.

(a) *Relationship between section 4955 excise taxes and substantive standards for exemption under section 501(c)(3).* The excise taxes imposed by section 4955 do not affect the substantive standards for tax exemption under section 501(c)(3), under which an organization is described in section 501(c)(3) only if it does not participate or intervene in any political campaign on behalf of any candidate for public office.

(b) *Imposition of initial taxes on organization managers*—(1) *In general.* The excise tax under section 4955(a)(2) on the agreement of any organization manager to the making of a political expenditure by a section 501(c)(3) organization is imposed only in cases where—

(i) A tax is imposed by section 4955(a)(1);

(ii) The organization manager knows that the expenditure to which the manager agrees is a political expenditure; and

(iii) The agreement is willful and is not due to reasonable cause.

(2) *Type of organization managers covered*—(i) *In general.* The tax under section 4955(a)(2) is imposed only on those organization managers who are authorized to approve, or to exercise discretion in recommending approval of, the making of the expenditure by the organization and on those organization managers who are members of a group (such as the organization's board of directors or trustees) which is so authorized.

(ii) *Officer.* For purposes of section 4955(f)(2)(A), a person is an officer of an organization if—

(A) That person is specifically so designated under the certificate of incorporation, bylaws, or other constitutive documents of the foundation; or

(B) That person regularly exercises general authority to make administrative or policy decisions on behalf of the organization. Independent contractors, acting in a capacity as attorneys, accountants, and investment managers and advisors, are not officers. With respect to any expenditure, any person described in this paragraph (b)(2)(ii)(B) who has authority merely to recommend particular administrative or policy decisions, but not to implement them without approval of a superior, is not an officer.

(iii) *Employee.* For purposes of section 4955(f)(2)(B), an individual rendering services to an organization is an employee of the organization only if that individual is an employee within the meaning of section 3121(d)(2). With respect to any expenditure, an employee (other than an officer, director, or trustee of the organization) is described in section 4955(f)(2)(B) only if he or she has final authority or responsibility (either officially or effectively) with respect to such expenditure.

(3) *Type of agreement required.* An organization manager agrees to the making of a political expenditure if the manager manifests approval of the expenditure which is sufficient to constitute an exercise of the organization manager's authority to approve, or to exercise discretion in recommending approval of, the making of the expenditure by the organization. The manifestation of approval need not be the final or decisive approval on behalf of the organization.

(4) *Knowing*—(i) *General rule.* For purposes of section 4955, an organization manager is considered to have agreed to an expenditure *knowing* that it is a political expenditure only if—

(A) The manager has actual knowledge of sufficient facts so that, based solely upon these facts, the expenditure would be a political expenditure;

(B) The manager is aware that such an expenditure under these circumstances may violate the provisions of federal tax law governing political expenditures; and

(C) The manager negligently fails to make reasonable attempts to ascertain whether the expenditure is a political expenditure, or the manager is aware that it is a political expenditure.

(ii) *Amplification of general rule.* For purposes of section 4955, knowing does not mean having reason to know. However, evidence tending to show that an organization manager has reason to know of a particular fact or particular rule is relevant in determining whether the manager had actual knowledge of the fact or rule. Thus, for example, evidence tending to show that an organization manager has reason to know of sufficient facts so that, based solely upon those facts, an expenditure would be a political expenditure is relevant in determining whether the manager has actual knowledge of the facts.

(5) *Willful.* An organization manager's agreement to a political expenditure is willful if it is voluntary, conscious, and intentional. No motive to avoid the restrictions of the law or the incurrence of any tax is necessary to make an agreement willful. However, an organization manager's agreement to a political expenditure is not willful if the manager does not know that it is a political expenditure.

(6) *Due to reasonable cause.* An organization manager's actions are due to reasonable cause if the manager has exercised his or her responsibility on behalf of the organization with ordinary business care and prudence.

(7) *Advice of counsel.* An organization manager's agreement to an expenditure is ordinarily not considered knowing or willful and is ordinarily considered due to reasonable cause if the manager, after full disclosure of the factual situation to legal counsel (including house counsel), relies on the advice of counsel expressed in a reasoned written legal opinion that an expenditure is not a political expenditure under section 4955 (or that expenditures conforming to certain guidelines are not political expenditures). For this purpose, a written legal opinion is considered reasoned even if it reaches a conclusion which is subsequently determined to be incorrect, so long as the opinion addresses itself to the facts and applicable law. A written legal opinion is not considered reasoned if it does nothing more than recite the facts and express a conclusion. However, the absence of advice of counsel with respect to an expenditure does not, by itself, give rise to any inference that an organization manager agreed to the making of the expenditure knowingly, willfully, or without reasonable cause.

(8) *Cross reference.* For provisions relating to the burden of proof in cases involving the issue of whether an organization manager has knowingly agreed to the making of a political expenditure, see section 7454(b).

(c) *Amplification of political expenditure definition*—(1) *General rule.* Any expenditure that would cause an organization that makes the expenditure to be classified as an action organization by reason of § 1.501(c)(3)–1(c)(3)(iii) of this chapter is a political expenditure within the meaning of section 4955(d)(1).

(2) *Other political expenditures*—(i) For purposes of section 4955(d)(2), an organization is effectively controlled by a candidate or prospective candidate only if the individual has a continuing, substantial involvement in the day-to-day operations or management of the organization. An organization is not effectively controlled by a candidate or a prospective candidate merely because it is affiliated with the candidate, or merely because the candidate knows the directors, officers, or employees of the organization. The effectively controlled test is not met merely because the organization carries on its research, study, or other educational activities with respect to subject matter or issues in which the individual is interested or with which the individual is associated.

(ii) For purposes of section 4955(d)(2), a determination of whether the primary purpose of an organization is promoting the candidacy or prospective candidacy of an individual for public office is made on the basis of all the facts and circumstances. The factors to be considered include whether the surveys, studies, materials, etc. prepared by the organization are made available only to the candidate or are made available to the general public; and whether the organization pays for speeches and travel expenses for only one individual, or for speeches or travel expenses of

several persons. The fact that a candidate or prospective candidate utilizes studies, papers, materials, etc., prepared by the organization (such as in a speech by the candidate) is not to be considered as a factor indicating that the organization has a purpose of promoting the candidacy or prospective candidacy of that individual where such studies, papers, materials, etc. are not made available only to that individual.

(iii) Expenditures for voter registration, voter turnout, or voter education constitute other expenses, treated as political expenditures by reason of section 4955(d)(2)(E), only if the expenditures violate the prohibition on political activity provided in section 501(c)(3).

(d) *Abatement, refund, or no assessment of initial tax.* No initial (first-tier) tax will be imposed under section 4955(a), or the initial tax will be abated or refunded, if the organization or an organization manager establishes to the satisfaction of the IRS that—

(1) The political expenditure was not willful and flagrant; and

(2) The political expenditure was corrected.

(e) *Correction*—(1) *Recovery of Expenditure.* For purposes of section 4955(f)(3) and this section, correction of a political expenditure is accomplished by recovering part or all of the expenditure to the extent recovery is possible, and, where full recovery cannot be accomplished, by any additional corrective action which the Commissioner may prescribe. The organization making the political expenditure is not under any obligation to attempt to recover the expenditure by legal action if the action would in all probability not result in the satisfaction of execution on a judgment.

(2) *Establishing safeguards.* Correction of a political expenditure must also involve the establishment of sufficient safeguards to prevent future political expenditures by the organization. The determination of whether safeguards are sufficient to prevent future political expenditures by the organization is made by the District Director.

(f) *Effective date.* This section is effective December 5, 1995.

§ 53.4963–1 [Amended]

Par. 5. In § 53.4963–1, paragraphs (a), (b), and (c) are amended by adding the reference "4955," immediately after the reference "4952," in each place it appears.

§ 53.6011–1 [Amended]

Par. 6. In § 53.6011–1, paragraph (b) is amended as follows:

1. In the first sentence, the language "or 4945(a)," is removed and ", 4945(a) or 4955(a)," is added in its place.

2. In the last sentence, the language "or 4955(a)" is added immediately following the language "section 4945(a)".

Par. 7. In § 53.6071–1, paragraph (e) is added to read as follows:

§ 53.6071–1 Time for filing returns.

* * * * *

(e) *Taxes related to political expenditures of organizations described in section 501(c)(3) of the Internal Revenue Code.* A Form 4720 required to be filed by § 53.6011–1(b) for an organization liable for tax imposed by section 4955(a) must be filed by the unextended due date for filing its annual information return under section 6033 or, if the organization is exempt from filing, the date the organization would be required to file an annual information return if it was not exempt from filing. The Form 4720 of a person whose taxable year ends on a date other than that on which the taxable year of the organization described in section 501(c)(3) ends must be filed on or before the 15th day of the fifth month following the close of the person's taxable year.

Par. 8. In § 53.6091–1, the section heading is revised and paragraph (d) is added to read as follows:

§ 53.6091–1 Place for filing chapter 42 tax returns.

* * * * *

(d) *Returns of persons subject to a termination assessment.*

Notwithstanding paragraph (c) of this section, income tax returns of persons with respect to whom a chapter 42 tax assessment was made under section 6852(a) with respect to the taxable year must be filed with the district director as provided in paragraphs (a) and (b) of this section.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 9. The authority citation for part 301 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

§ 301.6211–1 [Amended]

Par. 10. In § 301.6211–1, the last sentence of paragraph (b) is amended by adding "or 6852" immediately after "section 6851".

§ 301.6212–1 [Amended]

Par. 11. In § 301.6212–1, the second sentence of paragraph (c) is amended by adding "termination assessments in section 6851 or 6852," immediately after "section 6213(b)(1),".

§ 301.6213–1 [Amended]

Par. 12. Section 301.6213–1 is amended as follows:

1. Paragraph (a)(2), first sentence, is amended by adding ", 6852," immediately after "section 6851".

2. Paragraph (e), first sentence, is amended by adding "4955," immediately after "4952,".

Par. 13. Section 301.6852–1 is added to read as follows:

§ 301.6852–1 Termination assessments of tax in the case of flagrant political expenditures of section 501(c)(3) organizations.

(a) *Authority for making.* Any assessment under section 6852 as a result of a flagrant violation by a section 501(c)(3) organization of the prohibition against making political expenditures must be authorized by the District Director.

(b) *Determination of income tax.* An organization shall be subject to an assessment of income tax under section 6852 only if the flagrant violation of the prohibition against making political expenditures results in revocation of the organization's tax exemption under section 501(a) because it is not described in section 501(c)(3). An organization subject to such an assessment is not liable for income taxes for any period prior to the effective date of the revocation of the organization's tax exemption.

(c) *Payment.* Where a District Director has made a determination of income tax under paragraph (b) of this section or of section 4955 excise tax, notwithstanding any other provision of law, any tax will become immediately due and payable. The taxpayer is required to pay the amount of the assessment within 10 days after the District Director sends the notice and demand for immediate payment regardless of the filing of an administrative appeal or of a court petition. Regardless of filing an administrative appeal or of petitioning a court, enforced collection action may proceed after the 10-day payment period unless the taxpayer posts the bond described in section 6863. For purposes of collection procedures such as section 6331 (regarding levy), assessments under the authority of paragraph (a) of this section do not constitute situations in which the collection of such tax is in jeopardy and, therefore, do not suspend normal collection procedures.

(d) *Effective date.* This section is effective December 5, 1995.

§ 301.6861–1 [Amended]

Par. 14. In § 301.6861–1, paragraph (g) is amended by:

1. Adding the language "4955(a)," immediately after "4952(a),".

2. Adding the language "4955(b)," immediately after "4952(b),".

§ 301.6863–1 [Amended]

Par. 15. Section 301.6863–1 is amended as follows:

1. Paragraph (a)(1) is amended by adding the language ", or under section 6852 (referred to as a political assessment for purposes of this section)" immediately after "for purposes of this section)".

2. Paragraphs (a)(3) first sentence, (a)(4) last sentence, and (b) first sentence are amended by adding the language "or political assessment" immediately after "jeopardy assessment" in each place it appears.

3. Paragraph (b) is amended by adding the language "(or political assessment)" immediately after "jeopardy" in the last sentence.

§ 301.6863–2 [Amended]

Par. 16. In § 301.6863–2, paragraph (a) introductory text, the first sentence is amended by adding the language "6852," immediately after "section 6851,".

Par. 17. Section 301.7409–1 is added under the undesignated centerheading "Civil Actions by the United States" to read as follows:

§ 301.7409–1 Action to enjoin flagrant political expenditures of section 501(c)(3) organizations.

(a) *Letter to organization.* When the Assistant Commissioner (Employee Plans and Exempt Organizations) concludes that a section 501(c)(3) organization has engaged in flagrant political intervention and is likely to continue to engage in political intervention that involves political expenditures, the Assistant Commissioner (Employee Plans and Exempt Organizations) shall send a letter to the organization providing it with the facts based on which the Service believes that the organization has been engaging in flagrant political intervention and is likely to continue to engage in political intervention that involves political expenditures. The organization will have 10 calendar days after the letter is sent to respond by establishing that it will immediately cease engaging in political intervention, or by providing the Service with sufficient information to refute the Service's evidence that it has been engaged in flagrant political intervention. The Internal Revenue Service will not proceed to seek an injunction under section 7409 until after the close of this 10-day response period.

(b) *Determination by Commissioner.* If the organization does not respond within 10 calendar days to the letter under paragraph (a) of this section in a manner sufficient to dissuade the Assistant Commissioner (Employee Plans and Exempt Organizations) of the need for an injunction, the file will be forwarded to the Commissioner of Internal Revenue. The Commissioner of Internal Revenue will personally determine whether to forward to the Department of Justice a recommendation that it immediately bring an action to enjoin the organization from making further political expenditures. The Commissioner may also recommend that the court action include any other action that is appropriate in ensuring that the assets of the section 501(c)(3) organization are preserved for section 501(c)(3) purposes. The authority of the Commissioner to make the determinations described in this paragraph may not be delegated to any other persons.

(c) *Flagrant political intervention.* For purposes of this section, *flagrant political intervention* is defined as participation in, or intervention in (including the publication and distribution of statements), any political campaign by a section 501(c)(3) organization on behalf of (or in opposition to) any candidate for public office in violation of the prohibition on such participation or intervention in section 501(c)(3) and the regulations thereunder if the participation or intervention is flagrant.

(d) *Effective date.* This section is effective December 5, 1995.

§ 301.7422–1 [Amended]

Par. 18. In § 301.7422–1, paragraphs (a) introductory text, (c) introductory text and (d) are amended by adding the language "4955," immediately after "4952,".

§ 301.7611–1 [Amended]

Par. 19. In § 301.7611–1, A–6, the first sentence is amended by adding the language "or 6852," immediately after "section 6851".

Margaret Milner Richardson,

Commissioner of Internal Revenue.

Approved: October 26, 1995.

Leslie Samuels,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

RIN 3067–AC38

Review of Determinations for Required Purchase of Flood Insurance

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Final rule.

SUMMARY: This final rule establishes the procedures for FEMA's review of determinations whether a building or manufactured home is located in an identified Special Flood Hazard Area. The determination review process will provide an opportunity for borrowers and lenders of loans secured by improved real estate to resolve disputes regarding contested determinations.

EFFECTIVE DATE: January 2, 1996.

FOR FURTHER INFORMATION CONTACT: Michael K. Buckley, P.E., Chief, Hazard Identification Branch, Mitigation Directorate, 500 C Street SW., Washington, DC 20472, (202) 646–2756, or by facsimile (202) 646–4596 (not toll-free calls).

SUPPLEMENTARY INFORMATION: As part of its implementation of the National Flood Insurance Reform Act of 1994 (NFIRA), FEMA published a proposed rule (60 FR 31442, June 15, 1995) to establish the procedures for its review of determinations whether a building or mobile home is located in an identified Special Flood Hazard Area. The comment period ended on August 14, 1995. The proposed rule used the term "mobile home" for consistency with the statute. However, the term "manufactured home" is preferred in the industry, and is specifically defined in both the National Flood Insurance Program (NFIP) regulations at 44 CFR part 59, and in the standard flood insurance policy. Therefore, the term "manufactured home" will be used in this final rule.

This final rule addresses FEMA's requirement under 42 U.S.C. 4012a(e)(3) to review a determination whether a building or manufactured home is located in an identified Special Flood Hazard Area (SFHA) if jointly requested by the borrower and lender for a loan secured by improved real estate or a manufactured home. FEMA will begin accepting requests for determination reviews under this regulation on January 2, 1996. Requests should be mailed to the following locations:

For Minnesota and locations east of the Mississippi River: Determination Review Coordinator, c/o Dewberry &

Davis, P.O. Box 2020, Merrifield VA 22116–2020.

For Louisiana and locations west of the Mississippi River: Determination Review Coordinator, c/o Michael Baker Jr., Inc., 3601 Eisenhower Avenue, Alexandria VA 22304–6439.

We received comments from 25 organizations and individuals, as follows: 12 lenders, 9 associations, 3 third party determinators, and 1 consultant. The greatest number of comments related to who pays the requested fee (12 comments). Others commented on whether FEMA will accept individual requests (9 comments), whether and when borrowers are required to purchase flood insurance (6 comments). We also received 6 comments stating that FEMA should not require copies of NFIP maps to be submitted because it should already have them on file. Summarized below are the comments we received and our responses to them.

Fees

The $60.00 fee for FEMA's review of determinations, contained in the proposed rule, has been increased to $80.00, based on FEMA's anticipated costs to process reviews of determinations. The $80.00 fee does not completely cover FEMA's costs, and contains some subsidy to the requestor. The costs for this service will be monitored and revised at the beginning of FY 1997, if necessary.

Determination of fee. Two responders asked how the fee was determined.

Response. The amount of time required to handle, record, document, and respond to these requests was estimated based on our experience with high volumes of similar types of requests. Using current $40 per hour fee rates for the existing Letter of Map Revision (LOMR) review process, we estimated the $80 fee based on the anticipated steps and time required to review a determination and process the request.

Fee is excessive. Five responders felt that the fee is excessive and more than commercial third party determinators charge for the same service.

Response. The vast majority of flood determinations made by third party determinators are for structures well away from the SFHA. These determinations can be done very quickly using automated processes at very low cost. For example, a third party determinator may determine that the only area of a community having SFHAs has a specific zip code. Any time that a third party determinator gets a request for a determination in that community it first checks the zip code. If it is any zip code other than the one having SFHAs, a determination of "Not in SFHA" can be made quickly. This determination takes only minutes and costs are minimal. Only when a request for a determination is for a property with the zip code containing SFHAs is more effort required. Most of these determinations are for structures well away from the boundary of the SFHA and are clearly shown in or out of the SFHA.

Determinations where a structure is located near the edge of a mapped SFHA are the most complex because additional review is often required to locate the structure accurately on the NFIP map. While these latter determinations cost the determinator more, the inexpensive determinations comprise the vast majority of determinations made. We expect that FEMA's determination reviews will cost more because we anticipate receiving primarily requests for structures near the boundary of mapped flood hazards, where a review of the technical data used in making the determination and comparing it to the printed map will be required in order to issue a response.

Multiple structures. One commenter asked how the fee would apply to multiple structures.

Response. One fee will apply to each Standard Flood Hazard Determination Form (SFHDF) submitted. Generally, an SFHDF is prepared for a single structure used as loan collateral. If a request for a determination review includes multiple buildings, the fee will be based on the number of SFHDFs included in the request.

Authority. Two responders requested that FEMA cite the specific authority for imposing a fee.

Response. The authority for FEMA to charge a fee is at 31 U.S.C. 9701, which allows Federal agencies to recover costs associated with providing something of value to a customer.

Responsibility and Disclosure. Almost half of the responders asked who would pay the fee. Two responders asked how the fee for a determination review related to the Real Estate Settlement Procedures Act, if this fee was considered a finance charge, and if the fee needed to be disclosed.

Response. These issues were sent to the Federal Financial Institutions Examination Council for the Council's review and advice. We understand that they will be considered by the Council during the comment period (October 18–December 18, 1995) following the publication of the proposed rule for loans in areas having special flood hazards (60 FR 53962, October 18, 1995).

Notification. One commenter indicated that FEMA should not rely on the **Federal Register** for notification of the initial fee or subsequent increases or decreases in the amount, and suggested that all interested parties be notified directly regarding fee changes.

Response. Publication in the **Federal Register** is a legally acceptable method to notify the public of rule changes. Notifying individual parties is not FEMA's role, and cannot be provided within the constraints of FEMA's budget and staff. We expect that organizations and trade associations that serve the banking industry will provide such notification to their constituents.

Payment Method. The proposed rule included an option of payment by credit card. On further investigation this option will not be available because of the expense that would be incurred by FEMA to process credit card payments. Payment for requests for review must be made by check or by money order, in U.S. funds, payable to the National Flood Insurance Program.

Insurance Purchase Requirements

Forced placement. Five responders questioned how the request for review of lender determinations impacts the 45-day clock for forced placement of flood insurance. One responder asked whether a lender could force place insurance during the 90-day window (45 days to submit, 45 days to review) without liability or penalty, and whether new extensions of credit should be postponed pending FEMA's Response.

Response. Section 524 of the NFIRA states that if the request is made in connection with the origination of a loan and if FEMA fails to respond before the later of the expiration of the 45-day period after receiving the request or closing of the loan, then flood insurance is not required until such a letter is provided. Thus, section 524 only temporarily delays the flood insurance purchase requirement. If the closing of the loan occurs *prior to* 45 days after FEMA receives a request, then the flood insurance purchase requirement is not waived under section 524 because FEMA has not failed to respond within the 45-day period. If loan closing occurs *after* FEMA's 45-day response period, then the mandatory flood insurance purchase requirement is waived only if FEMA's response is not issued by loan closing. We plan to respond to requests within 45 days.

However, if we do not respond within 45 days and the mandatory purchase requirement is delayed until we do respond, it is nevertheless a prudent business practice to require the purchase of flood insurance to protect the collateral. The lender always retains the prerogative to require flood insurance even when its purchase is not Federally mandated. Flood insurance premiums can be refunded if it is determined by FEMA that the structure is not located in the SFHA and the lender waives the flood insurance purchase requirement.

Mandatory purchase. We received comments noting that the proposed rule did not address when borrowers are or are not required to purchase flood insurance. Another commenter asked whether the lender could waive the flood insurance purchase requirement while the determination is under review. Others noted that FEMA's review of lender determinations should not delay flood insurance purchase requirements.

Response. As stated above, section 524 temporarily delays the flood insurance purchase requirement only when FEMA fails to respond within its allotted 45-day period. At all other times, the mandatory purchase of flood insurance for structures located in SFHAs remains in effect.

Requirement for Joint Request

Individual requests. Seven responders indicated that individual requests for determination reviews should be accepted, and that joint requests would be too time consuming.
